A Library of Universal Information.
THE NEW
AMERICAN CYCLOPÆDIA:
A Popular Dictionary of General Knowledge.
EDITED BY
GEORGE RIPLEY AND CHARLES A. DANA,
Aided by a corps of contributors, including in all departments of Science, Art, and Literature.
In 16 large volumes, 8vo.
750 double-column pages in each volume.
The leading claims to public consideration which the "New American Cyclopædia" possesses may be thus briefly stated:
1. It surpasses all other works in the fulness and ability of its articles relating to the United States.
2. No other work contains so many reliable biographies of the leading men of this and other nations. It therefore is the best repository even of the more bulky Encyclopædia Britannica.
3. The best minds in this country have been employed in enriching its pages with the latest data, and its most recent discoveries in every branch of manufactures, mechanics, and general science.
4. It is a library in itself where every topic is treated, and where information can be gleaned which will enable a student to go to the original, to consult other authorities, thus affording an invaluable key to knowledge.
5. It is uniformly printed, with readable type, on good paper, and contains a most copious index.
6. In the only work, which, since it gives the leading approaching correct descriptions of cities and towns of America, re-embraces reliable statistics showing the wonderful growth of all sections."
Every one that reads, even the most simple in society, is constantly meeting with allusions to subjects on which he produces a misconception or falsification. In conversation in trade, in professional life, in the forum, in the family, practical questions are continually arising, which no man, well informed, can always satisfactorily answer. If facilities for reference are at hand, they are consulted, and not only is curiosity gratified, and the stock of knowledge increased, but perhaps information is gained and ideas are suggested that will directly contribute to the business success of the party concerned.
A Cyclopædia is preeminently the work for our country and generation. This is the age of steam. No one has time to grope among a hundred different works for every little fact or reference, when a gazetteer of a foreign state, or a Dictionary of Biography, or a Dictionary of Arts, or a Dictionary of Science, or a Dictionary of Literature, or a Dictionary of Language, or a Dictionary of Law, or a Dictionary of Medicine, or a Dictionary of Theology, or a Dictionary of Ancient Mythology, or a Dictionary of Modern Biography, or a Dictionary of Ancient Geography, or a Dictionary of Modern Geography, or a Dictionary of Commerce, or a Dictionary of Agriculture, or a Dictionary of Mechanics, or a Dictionary of Military Tactics, or a Dictionary of Naval Tactics, or a Dictionary of Ancient History, or a Dictionary of Modern History, or a Dictionary of Chronology, or a Dictionary of Ancient Literature, or a Dictionary of Modern Literature, or a Dictionary of Ancient Philosophy, or a Dictionary of Modern Philosophy, or a Dictionary of Ancient Art, or a Dictionary of Modern Art, or a Dictionary of Ancient Science, or a Dictionary of Modern Science, or a Dictionary of Ancient Religion, or a Dictionary of Modern Religion, or a Dictionary of Ancient Biography

THE DEMOCRAT.

EGG HARBOR CITY, JANUARY 4, 1858.

FOR PRESIDENT:

JOEL PARKER,

OF NEW JERSEY,

Subject to the Decision of the Democratic National Convention.

GERRYMANDERING.

We observe that application will be made to the coming legislature to set off the township of Egg Harbor, in Burlington county, and attach it to this county. There is also a movement to throw Landis township, including Vineland, in Cumberland county, into this county. The first proposition will add about 300 to the Republican majority, and the latter about 800. The object alluded to, is to make two democratic counties, and leave Atlantic county to battle against fearful odds.

We are opposed to this system of gerrymandering to accomplish political results. Sooner or later it will recoil upon the party that effects it. Burlington county elected her Senator last fall, and can take care of herself. Cumberland, as the law improves, will be safe for the democracy and this county has comparatively an easy task before her to achieving a victory at the coming election. If we could gain over 400 votes last fall, we can surely gain 50 next—all that is required to elect a Senator.—What is the use, then, of jeopardizing a Senator in this county.

Aside from this, the proposed alterations would give a most ungainly shape to our county and bring to us the most unhealthy portion of Burlington county—a mere wilderness, without sufficient property upon which to derive the necessary taxes to support the schools and roads of our township.

We say, give Atlantic a chance to throw off the shackles of radicalism. If we fail next fall, then it will be time enough to acknowledge the Democracy of this county with a calamity they do not deserve at the hands of its friends.

We wish to remind the Democratic members that the people made the radicals suffer sorrow last fall as the reward of their gerrymandering in several instances. Can we hope, therefore, to escape the penalty for a similar political act? These outrages are too often inflicted upon the people without consulting popular sentiment; and we ask it is right—is it just—to summarily transfer whole communities from one jurisdiction to another, as if the citizens were subjects or slaves, to suit the caprice of political leaders?

We hope the democracy will be careful to shun the shoals upon which the radical ship was stranded. It was their unreasonable extremes—their reckless disregard of the will of the people—their assumption of powers never delegated, which brought them to grief. Do not forget that retribution has followed them, and it will follow us for similar offences. We earnestly urge upon the Democracy moderation and circumspection, as the only means of meeting the expectations of the great conservative element which rallied to our support last fall. Of course, we are expected to regard with all the odious measures fastened upon the people by the radical party; but avoid all questionable experiments, and attempt nothing upon which there has not been a clear expression of public sentiment.

A DONATION IN THE RIGHT DIRECTION.—The young men of English's Creek and vicinity, got up quite a surprise for Mr. Widow Campbell, in the shape of a donation visit. It will be remembered that Mr. Campbell lost his life some thirteen month since on Great Egg Harbor bar, while returning home, after having piloted a vessel over it. All this time, the widow has nobly struggled to support her family. The young folks, on Saturday evening, the first just given its decision sustaining that of the court below.

☞ On Christmas Eve there was an occurrence near Ellicott's Mills, in Maryland which might have been serious in its consequences. It appears that two gentlemen, who had been amusing themselves on the railroad track, about five hundred yards this side of the mills, one of them making a wager that the train would not come on the track while the other was shooting, the other, that it did not pass over the track on which he stood he would stop it. It was a bet that brought into the cars some three dozen men, some of gentlemen and others, suddenly snatched up by the cow catcher, and carried in this perilous position into Baltimore city. Several persons along the line of the road were witnesses of the occurrence, and resolved that the man would soon be a mangled corpse. Hurrying to the Depot they found him, to their great surprise, uncrushed, and as cool as if nothing had happened.

THE PRESIDENCY.—The Democratic press throughout Pennsylvania favor the nomination of Governor Parker, of this State. In the west a similar sentiment prevails.—The Crafsville, Ohio, Democrat, endorses Gov. Parker in the following emphatic language:

"He is a staunch, consistent Democrat, and has never been an office seeker. In 1852 he was chosen President of the Senate of Ohio, by a majority of two hundred and his administration was a model of statesmanship and executive ability. He is true at the core—a man of his word, with an unsullied character, incorruptible integrity, commanding talents, and possessing the elements of popularity in an eminent degree. Great as President is our desire to see Lancaster in the Presidency, and if the candidate is taken from the East, there is no man whose nomination would give such universal satisfaction as Hon. Joel Parker, of New Jersey.

☞ The Mount Holly Mirror says that the poultry exhibition recently held there was well attended by those interested in poultry raising. The number of birds on exhibition was 124, comprising turkeys, geese, ducks, a large variety of chickens, some very large wild hawks, trapped and deposited by Edmund Darnell, who had captured six of the rogues within a few days. The object of the exhibition being the encouragement of a lively business was done in that direction, and was an entire success—some two-thirds of that exhibition changing hands, and the next day many a bewildered chanticleer hailed the rising morn amid new-made companions and strange companions.

☞ The Directors of the Camden and Burlington County Railroad Company have declared a scrip dividend of twenty-five per cent. on the stock of the old Burlington County Railroad, as it stood on the books of the Company, October 31, 1857, payable in cash at a future day. This, six per cent. interest free of tax. The interest on the registered bonds of the old Burlington County Railroad, due Jan. 1, 1858, are being paid by the Treasurer, at Mount Holly.

NEWFIELD, GLOUCESTER COUNTY.—This place situated on the Millville and Glassboro Railroad, four miles north of Vineland is gaining in population and business. Two years ago there were but three buildings in sight from the Station, and but one of those in a state of completion. Now there are twenty-five good sized neatly finished dwellings, stores and workshops, besides a handsome school house surmounted by a steeple and bell.

Catawba Avenue, running from the station towards Downtown, at that time all woods and brush, with but one or two houses in its entire length, has now some ten or twelve neat and substantial dwellings with grounds cleared and set in front yards and vines, clearly indicating the energy, industry and good taste of thesettlers. The same agreeable change is to be seen in other directions, and the school house which was finished a year ago, and considered of unapproachable capacity for the educational, devotional and social wants of the place, is already too small for any important gathering.

The various denominations are about equally rep ented, none of them being of sufficient strength to undertake the building of a house of worship at present. The congregationalists have formed a church, and will doubtless make an early move in that direction. There is an Agricultural Society and a Lyceum, both interesting and well sustained institutions. At present the subject of Hop Culture is attracting much consideration on the part of the farmers.—The climate and soil of New Jersey have made it will be well adapted to this kind of crop and settlers from the old Hop growing regions of Western New York are engaging in it with confidence of a richer return for their labor and capital. The subject of Cranberry culture is also receiving the attention it merits—hundreds, and even hundreds of acres of land hitherto entirely useless and unproductive, are being reclaimed for the benefit of man.

STATE TEACHERS' ASSOCIATION.—The fifth annual session of the New Jersey State Association of Teachers was held at Plainfield, on Thursday and Friday of last week. There will be a large number of teachers and Commissioners from all portions of the State. Prof. Hart, of the State Normal School, read an able paper; by Mr. Apgar, State Superintendent of Schools, on the principal workings of the school law, and addresses were delivered by Rev. Mr. Travis, of Sussex, Wm. M. Barringer, of Newark, and Rev. Dr. Armstrong, President, Mr. DeHart, County Superintendent of Schools.

The new school law was earnestly discussed. The question of electing County Superintendents was discussed, and there was a decided sentiment in favor of a repeal of the 31st section, prohibiting corporal punishment.

Joseph E. Hayues, of Essex, was re-elected President for the ensuing year Henry N. Waters, of Bergen, 1st Vice President; O. N. Putnam, of Union, Secretary; Wm. N. Barringer, of Essex, Treasurer.

The Convention next year will probably be held in Gloucestown, Camden county.

LIABILITIES OF OWNERS.—An important decision regarding the liability of Express Companies for the value of goods committed to their care, has been given by the Supreme Court of Massachusetts. In January, 1856, Edward H. Buckland & Co., of Springfield, delivered to the Adams Express Company a case of pistols, valued at $242, to be transported to Vicksburg. The goods were lost by the blowing up of a steamer on the Mississippi, and claim was made against the Express Company for their value, which was resisted on the ground that the receipt given for the goods expressly exempted the company from liabilities for losses from dangers river navigation or steam. The case was first tried in the Superior Court, which held that the Express Company were common carriers, and could not absolve themselves from any liabilities incurred as such. Appeal was taken to the Supreme Court, which has just given its decision sustaining that of the court below.

☞ On Christmas Eve there was an occurrence near Ellicott's Mills, in Maryland which might have been serious in its consequences. It appears that two gentlemen, who had been amusing themselves on the railroad track, about five hundred yards this side of the mills, one of them making a wager that the train would not come on the track while the other was shooting, the other, that it did not pass over the track on which he stood he would stop it. It was a bet that brought into the cars some three dozen men, some of gentlemen and others, suddenly snatched up by the cow catcher, and carried in this perilous position into Baltimore city. Several persons along the line of the road were witnesses of the occurrence, and resolved that the man would soon be a mangled corpse. Hurrying to the Depot they found him, to their great surprise, uncrushed, and as cool as if nothing had happened.

THE PRESIDENCY.—The Democratic press throughout Pennsylvania favor the nomination of Governor Parker, of this State. In the west a similar sentiment prevails.—The Crafsville, Ohio, Democrat, endorses Gov. Parker in the following emphatic language:

"He is a staunch, consistent Democrat, and has never been an office seeker. In 1852 he was chosen President of the Senate of Ohio, by a majority of two hundred and his administration was a model of statesmanship and executive ability. He is true at the core—a man of his word, with an unsullied character, incorruptible integrity, commanding talents, and possessing the elements of popularity in an eminent degree. Great as President is our desire to see Lancaster in the Presidency, and if the candidate is taken from the East, there is no man whose nomination would give such universal satisfaction as Hon. Joel Parker, of New Jersey.

☞ The Mount Holly Mirror says that the poultry exhibition recently held there was well attended by those interested in poultry raising. The number of birds on exhibition was 124, comprising turkeys, geese, ducks, a large variety of chickens, some very large wild hawks, trapped and deposited by Edmund Darnell, who had captured six of the rogues within a few days. The object of the exhibition being the encouragement of a lively business was done in that direction, and was an entire success—some two-thirds of that exhibition changing hands, and the next day many a bewildered chanticleer hailed the rising morn amid new-made companions and strange companions.

From the Toms River Courier.

A Shore Railroad!

TUCKERTON IN EARNEST!

At a meeting of the citizens of Tuckerton, held on the 14th ult., a plan to raise means to construct a Railroad from Egg Harbor City on the Camden and Atlantic R. R. to Tuckerton and its harbor, was laid before the people and after being ably debated was unanimously adopted. Dr. Thomas Page was elected chairman, and J. H. Vining, Secretary.

A meeting to consider the subject of a Railroad from Egg Harbor City to Tuckerton had been previously held at Egg Harbor City, which appointed a committee to take the necessary measures to procure a charter from the next Legislature, to build said Railroad, with power to extend the same to Toms River. That committee have already taken the necessary steps. The plan to raise means, which was adopted by the meeting in Tuckerton is a novel one, and if adopted and acted on as heartily in other places, as it has been in that village, will at once insure the accomplishment of the Road from Egg Harbor City to Toms River.

The plan it will be seen, contemplates the building of the Road by that class of property, which is to be benefitted by the Road, viz: Real Estate. It is as follows:

1st. The owners of unimproved Real Estate lying within 6 miles of the Road, to convey to the Railroad Company, one fourth of said wild land, without wood or timber, on the consideration that 3-4 of said lands will be of more value with a Railroad, than the whole now is without one. The owners to designate and set off the same from any parts of their lands, they please, by making quality equal the value of 1-4 of the whole stripped of wood and timber.—The right of way 100 feet wide through unimproved lands to be made and secured to the Railroad Company, by owners and to be deducted from the 1-4 given.

Those who give the Railroad Company one-half of their unimproved lands, to be assessed from subscribing to the amount of stock of said road, on the amount of 25 per cent of the valuation of their improved Real Estate as herein after provided. All lands, or a portion of lands, including salt meadows, to be regarded as unimproved land except 20 acres of wood land to each land holder, which with all other Real Estate it is to be regarded as improved.

2nd. A new valuation of all improved Real Estate to be made by the Township Committee of those Townships, through which the Road passes respectively, at its present market value.

The owner of improved Real Estate lying within one mile of other Depot, to subscribe 50 per cent. on said valuation to the amount of stock of said Road. That lying over one mile and not over two miles, 15 per cent. and over two miles and not over five, 12-1-2 per cent; over five miles 10 per cent.

Capital invested in oyster of fishing business, including Bay Boats, to subscribe 10 per cent.

The right of way through improved lands to be turned in at present value, and paid for in stock of said road.

Three Commissioners to settle all land damages, and report to the Railroad Company, to be appointed by the Board of Freeholders in the counties, through which the Road passes: their decision to be final and binding.

This scheme has the approval and hearty support of all large land owners of Tuckerton, and under it, 3,500 of unimproved land was pledged on the spot, at the meeting. Messrs. Pharon, Page, and others, and so much 20,000 subscriptions, to the stock was pledged by owners of improved lands. The plan is endorsed by every man of any public spirit who has heard it.

It is believed that if the Road is built it will place a Railroad from Egg Harbor City, and thence to Barnegat Inlet and Hook, making a railway communication from N. w York, along the shore villages of the coast to Philadelphia.

The Road will be a cheap construction, a Railroad from Egg Harbor City to May's Landing, and a contemplated one from May's Landing to Vineland and thence to Bridgeton, will be completed at the same time from New York, via: of the shore to Vineland, and thence via. Cape Island Railroad to Cape May, or from Vineland on to Bridgeton, connecting with the ferries, (as at Camden) and connecting with the Annamessic ferry to Norfolk, or with the Delaware Railroad to Washington, and the South, a view of the magnitude of the road and a knowledge of the undeveloped resources of the country through which it passes, will satisfy the public of its great destiny" decrees the Road. And also that the part of New Jersey which has heretofore been—the last, is in the future to be the first.

This is a belt of land from 6 to 10 miles in width, along this route from Toms River to Egg Harbor City, bounded by the Beautiful Bays on one side, and the Pine plains on the other, which is mostly unimproved, capable of the very highest state of improvement. It will not suffer in a comparison with the East land in New Jersey. Then the fact that the entire shore route is a watering place, having all the benefits of sea air, sea bathing, sailing, gunning, and clams and fish, which abound in all the Bays, the Bay manures for fertilizing the farm, and the facilities of the sail to all kinds of farming, especially trucking and growing small fruits. The great cities of New York and Philadelphia within reach of the Route lays, and that from the centre of the Route, say Barnegat, it will be but 2-1-2 hours by cars to either city, thus opening up the entire route to residences for business men in either place, and all to all, the demand of the large interests of navigation located at the numerous village all along the line, and the need of rapid communication with New York and Philadelphia which the frequent wrecks on the coast require: Will not all these facts warrant the belief that this Route will become one of the most valuable Railroads in the state, and at the same time reconstruct the unreconstructed part of the best State for residences in the Union.

☞ Two young ladies, Maggie and Nettie French, of Plainfield, were married to merchant tailors on Tuesday, the former to Mr. Rev H. V. Sheppard of the New York East Conference, and Professor in the Baker University, Kansas; and the latter to the Rev. G. H. Hickman, of the New York Conference, and pastor of the M. E. Church at Plainfield.

☞ A lady in Weymouth, Mass., went into a pigpen to feed the animals, and left her infant child, which persisted in crying all day. At night, when the mother unlaced the child, found that it was born dead, turned back and turned completely black.

Special Notices.

SWORN TESTIMONY.

THE FOLLOWING STATEMENTS ARE VERIFIED BY OATH:

In December last we were taken with a distressing Cough, accompanied with severe and frequent bleeding at the lungs; supposed to be the Consumption.

DANIEL T. BOON, Jr., Sandy Hill.

No. 229 Broadway.

Last winter I was there to die; my physicians with an agreement advised of the lungs, and was regarded by all who knew me as past recovery. My friends expected to see me carried home to my native place, and there to die. I commenced Dr. Wistar's Balsam of Wild Cherry. I have used two bottles and am now in the enjoyment of health. Coughs, Colds or sore Throat—for many years, and I am

TO ALL TILLERS OF THE SOIL! DAVID MCNISH. PERCIVAL NICHOLS.

MOORE'S LASTING OSTREUM FERTILIZER!
J. K. MOORE,
Sole Manufacturer and Proprietor,
MILLVILLE, N. J.
FOR GRASS, CLOVER, WHEAT, RYE, CORN, OATS, POTATOES, AND CROPS OF EVERY KIND!
IT IS ALSO JUST THE THING FOR
Strawberries, Raspberries, Blackberries, and Fruit of all Description.
The Proprietor having increased facilities for manufacturing his LASTING FERTILIZER, now offers it for sale to all Farmers and Truckers, and to all who desire large returns from their Farms and Gardens. It has only to be tried to be appreciated, and that it not only produces its action, but *lasts*, as its name indicates. One great recommendation for the

VALUABLE FERTILIZER,
is the increasing demand for it at Vineland, where they are extensively engaged in raising Strawberries, Raspberries and various other Fruits.
One important item connected with this Fertilizer, and, which should not be overlooked, is the cost of it. While Guano is selling from $55 to $60, and the various other Fertilizers from $35 to $50 per ton, this can be had for the astonishingly low price of

$25 PER TON!
And we think there cannot be produced any Fertilizer or Phosphate more lasting or beneficial to the soil. It is now being used by our best Farmers and Truckers in and around Millville, on our *sandy soil*, with the most flattering results.
Farmers, Consult Your Interest!!
By Buying this most Excellent and Cheap
FERTILIZER!
SEND FOR A SAMPLE!
We would respectfully refer you to the following named gentlemen, who are or have been extensively engaged in Farming and Trucking, who are well known in this section, and who are acquainted with the properties of the Fertilizer:
William Campbell, John Coombs, Robert Bradford, James Newell, Richard Hann, Dr. Wm. H. Newell, Thomas Ferguson, John McNeal, Arthur Leger, Nathaniel Sinnickson, Asbury Chester.
All orders or inquiries concerning the Fertilizer, addressed to J. K. MOORE, Millville, N. J., will receive prompt attention. aug. 15-67-6m

MILLVILLE MUTUAL FIRE INSURANCE COMPANY,
MILLVILLE, N. J.,
INCORPORATED 1859.

Will the purpose of insuring Dwelling Houses, Stores and other Buildings, Household Furniture, Merchandise and other property, against loss or damage by fire, on the Mutual Principle, on the plan and principle as the "Cumberland Mutual," which has proved the most economical Company in existence for the insured.
The Company also effect MARINE INSURANCE, which risks are independent of Fire Insurance, and the losses in no way affect those who have other property insured. We would call the attention of owners of vessels to this fact, as they can realize the advantage.

BOOTH & GARRETT, of Philadelphia, Chemists of high standing, in their report of the analysis, say to us:
"The combination of the above indicates a decided advance in the composition of a Fertilizer by the introduction of a considerable per centage of Potash, and consequences the claim involved in the name 'Complete Manure.'"
WILLIAMS & MOSS, of Philadelphia, Chemists of large experience in the analysis of Fertilizers, say:
"We find from an analysis your 'Complete Manure,' that the same you have given us, is certainly warranted by its Chemical composition; in addition to its acceptably retaining your Fertilizer from a Chemical stand point, we should state that its mechanical condition is most excellent, being such as to admit of its use in the drill without further preparation."
The "Complete Manure" has been used largely on various crops, and the testimony that farmers have proven it to be the best Fertilizer yet introduced.
