IS MAY'S LANDING TO LOSE GREATEST OPPORTUNITY IN HER HISTORY THROUGH UNREASONABLE PRICES DEMANDED FOR PROPERTY?

SITUATION IS BRAYE AND CALLS FOR CO-OPERATION OF CITIZENS

PAYROLL OF TEN THOUSAND WEEKLY WOULD MAKE THIS TOWN BIG MANUFACTURING CENTRE-CON-SIDER THE WELFARE OF YOUR NEIGHBORS!

Unreasonable prices demanded by certain land owners in the vicinity of May's Landing maye seriously endangered, the weeks and seems to be somewhat later in bloom ing then similar plants started two or three weeks and Seed lawn now will produce the weeks and Seed lawn now will produce the Oreat Egg Harbor River, establishing its headquarters at open ground after danger of frost sower. A this place and according to latest advices Tuckahoe is now in suo line for the project, which when fully under way will have a Account sthe young seedlings in the house payroll of \$10,000 a week.

for the last two weeks and there has been great activity at our by setting the trays or pots in a sheltered, Tuckahoe, whose people are leaving no stone unturned to have sunny spot for a few hours on warm days. the big industry located there. In addition to the efforts of the residents of Tuckahoe, the Reading Railroad is exerting all its constant tendency for these solis to become too influence to have the mammoth plants established there. All said for the successful growth of some of the standard form const. the land necessary has been secured in the vicinity of Tuckahoe.

Unless prompt steps are taken by the people O or may's Landing to co-operate with the agents for the big industry and secure the tracts of COTTON MILL EMPLOYEES land near here that are required, this municipality stands to loss the greatest opportunity in its history. From statements made by agents for the big purchase of land, May's Landing is preferred by the purchasers | headquarters for the project because of better railroad service. The extertionate prices saked by a few owners for land here, however, combined with attractive inducements offered by the railroad interests at Tuckahoe, will be sufficient to cause the industry to be established at

eral payroll of the industry in a little more Not only the people of May's Landing will be losers, but a great many land owners in this vicinity who have given options for prices greatly in excess of the real value of their land, as many of these options will not be exemised if the plant goes to Tuckshoe. The prices by the agents to owners who are refusing to rell are many times the norma vorth of the land and hopes of getting a higher figure are useless.

the County Capital are deeply concerned, as well they may be, and are hoping that the few owners who have so far held off will for the good of their neighbors as well as themselves, dispose of their land at the attractive priors already offered and insure the location of the giant industry at this place. The serionsness of the situation cannot be too deeply impli upon everyone concerned, for the location of the industry here means plenty of work, new residents, more business for every store and a big increase in real exists values—it means in short, a new May's Landing, a centre of one of et induktrial establishments in the

It is inconceivable that anyone will hold up this wonderful opportunity for May's Landing. an opportunity that means reuniting families whose hreadwippers now have to go elsewhere to seek employment, whose sons must now leave home to carn a living. If anyone had prophesied a year ago that such prices would e paid for land along the river, that such an opportunity would come to the people of May's Landing and be beld up by a few owners fo such reasons as this has been, they would have on derided unmercifully. Yet all this has chance of losing the greatest opportunity we have ever known because of the hureasonable and selfish demands of land owners whom numbers can be counted on the fingers of one hand. It is almost incredible, but it is true, and unless these certain few allow them solves to be enided by the wishes and the welfare of the people of May's Landing, at the same time accepting prices for their land far in advance of normal values, the big enter prise that means so much to us will be lost.

In an editorial Thursday last the Atlantic

City Beview had this to say of the project: May's Landing is seriously concerned ove every promise of transforming the County Seat into a busy hive of industry. The sister is advanced that land owners are bolding out for exorbitant prices on a huge tract require by unknown purchasers for establishing an industry, the nature of which is enshroud a clock of sedrecy. This is a matter that does not concern May's Landing alone. The entire ment of the County Reat, for the establishmen of a great industry there could not fail to be o material benefit to practically all the com-

'An industry along the lines indicated in the somewhat vague reports sent out from May's Landing would mark a new era in the development of this section of South Jersey. Once it was established it would serve, as he been the almost invariable experience of other communities, to attract additional enterprise Aside from the immediate benefits that would accrue to their own community, it would ap pear at this distance that May's Landing property holders who are blocking off the pro ed industry are standing in the light of the entire county. A little application of the rule investors behind the proposed industry would not be amiss at this particular time."

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work.
