COMMUNICATED.

Editor of The Record.

DEAR SIR:—We, who are against government, are satisfied with the progress being made. Many men of learning and presumed intellect, unaided by their numbers, are power and place, are making our fight for us. They remind us of the falling steamship along the coast. They look powerful and dignified, but when they see the little fellows taking fish, they steam in and cast their great nets to gobble up what the little fellows have discovered. So with these big fellows, they want the meat of the thing; they want the office, they want the power; they want the fishes, and they steam in and give dignity and breadth to our movements.

We started, in a small way, with small resources; but have spread over the earth, like the new colonies, the new colonies, the new colonies originating in the criminal instincts of Britton's penal colonies. Our work was successful, the suckers bit, and now the great publications rush in to net them as suckers, and the big fellows rush in to net them as suckers, and so the rivalry for our fish by the big fellows has begun.

We know that it is a pretty nice side of civilization where seventy-five per cent. of the people are on a plane, at all times, of order and beauty and light and love, who are willing to uphold the orderly processes of the administration of justice; and we know that the other twenty-five per cent. are the scum of the earth, who are willing to uphold the orderly processes of the administration of justice; and we know that the other twenty-five per cent. are the scum of the earth, who are willing to uphold the orderly processes of the administration of justice.

Deafness Cannot be Cured

A deaf application, as they cannot reach the

treated portion of the ear. There is only one

way to cure deafness, and that is by constitu-

tional remedies. Deafness is caused by an in-

Asthma - Catarrh Cured

Expert Medical Scientists Announce
Startling Results Obtained
by Senpine

in the name of the generous offer made by The West
 Coast Company, Dept. 0, 101 Broadway, New
 York City, requesting an experiment pack-
 age of Sempine, the great discovery for Asthma,
 Hay Fever, Rheumatism, and Catarrh, which
 nullified five of those to whom we write for it.
 I have been using it for several weeks in all
 cases. It makes no difference how long you
 have been suffering or how severe the climatic
 conditions are where you live, Sempine will
 cure you.

If you have experimented with other treat-
 ments and have failed to find a cure do not
 be discouraged but send for a trial of this won-
 derful truly meritorious remedy which is a solvent
 compound discovered by a Professor of Yale
 University, and is being recommended

Notice of Fire Alarms.

The fire whistle is to be blown for fire alarms only. The alarm signals are as follows:

- 1 short blast, North of Fire Station;
- 2 short blasts, East of Fire Station;
- 3 short blasts, South of Fire Station;
- 4 short blasts, West of Fire Station.

All blasts are to be preceded with one blast as an alarm of fire. In blowing an alarm the first blast must be made carefully in order to prevent damage to the whistle.
