RECORD FOR FARM PRODUCE

Immense Quantities of Perishable Freight Shipped From South Jersey During July—3,900 Carloads From Six Counties.

More perishable freight was shipped by farmers of Southern New Jersey during the month of July than in any previous month in the history of that section. In July, 1907, the value of produce shipped by farmers of the six lower counties of New Jersey was \$748,800. In 1908 the estimated value of the shipments was \$1,178,000, while July of this year shows an increase over 1908 of \$885,800. The total number of cars used to transport this freight was 3,900, over 37 miles of cars if placed end to end.

Two thousand three hundred and twenty-two cars of potatoes were shipped from Southern New Jersey in July, while it required 1,047 cars to haul the tomatoes offered for transportation. The other 540 carloads were loaded as follows: Apples 5, berries 148, claims and crates 165, fish 148, peppers 19, poultry 46, mixed carloads 9.

The ballots which are to be voted at the election are huge sheets of paper with half a dozen spaces for or against the amendments to be checked off separately by the voter. They are being shipped to the municipal and township election officers by County Clerk Kirby.

The amendments, it is stated, give absolute no advantage in any way to any member of the bar, but they mean a very considerable improvement in the Constitution of our State.

Million Dollar Pier.

Hundreds of music lovers crowd the big auditorium to the variety concert given after noon and evening to hear the Philadelphia Orchestra. Managers of the big amusement houses all over the country are unusual in their efforts and inducements to secure the orchestra for an indefinite time. The Queen of Resorts has been considered and favored above all others. Cap. John L. Young has provided the resort with one of the best Hippodromes in the country—equal to any, but second to none. The bill features O'Brien troupe of acrobats, including Naomi, shot from a cannon; Annie and her lions (one of the only two acts of its kind in America); Steve Mico, the imitator clown; Winston's seals, the greatest troupe of performers with the most remarkable demonstration of animal intelligence ever displayed; Rex Circus, presenting performing cats, dogs and monkeys, introducing Hoo-Haw Band, the original bucking and kicking mule; Mlle. Martina, aerialist, etc.

Thieves Hard Up For Clothes.

One of the meanest of petty robberies that has occurred here in a long while took place recently when the clothes line of Mrs. Ida Laderitz was stripped of family wearing apparel. Special Election Not Legal Holiday.

Thursday, September 14, which has been designated for the constitutional amendment election, will not be a legal holiday according to an opinion Attorney General Wilson has just furnished to Governor Ford. The Attorney General bases his opinion upon a decision rendered some years ago by the late Samuel H. Grey who was Attorney General when John W. Griggs was Governor in 1897 when a similar election was held. What effect the opinion will have upon the opening or closing of schools on September 14, has not yet been determined. FOUR PERSONS INJURED WHEN AUTO OVERTURNS

DR. DARNELL AND PARTY MET WITH ACCIDENT.

Were Rounding Sharp Curve at Gravelly Run and Driver lost Control—Machine a Wreck—Victims taken to Atlantic City.

Rounding a sharp curve at Gravelly Run Thursday evening in his Buick automobile at a high rate of speed, Dr. William E. Darnell, of 1794 Pacific avenue, Atlantic City, with his wife and two friends, were hurled into the embankment of the Gravelly Run Mill pond by the overturning of the machine and seriously injured.

Passing automobiles came to the rescue of the occupants of the car, taking them in their machine, rushed them to Atlantic City, where their injuries were dressed. The force of their fall tore off clothing and jewelry, inflicting painful contusions, lacerating their faces and causing it is thought internal injuries.

Mrs. Darnell was reported in a serious condition yesterday, partly from nervous shock and her actual injuries, severe in nature. The nature of Dr. Darnell's guests were not made public, but both were badly injured. That the occupants of the wrecked machine escaped death was almost miraculous, as it is said to have been travelling at a rate of forty miles an hour when the accident occurred. The women were picked up unconscious.

Dr. Darnell stated that his steering gear failed to work and the machine dived off the road before he could get it under control. It was nearly dark and he was not familiar with Gravelly Run Creek just beyond the bridge over the river.

The machine, almost a complete wreck, had not been removed yesterday. It was viewed by many curious persons who had learned of the accident.

"In all of the County districts were found a very fair method of assessment. In all but two of those districts we approved their books and in those districts the errors were technical and not error in assessment. Every district in the whole county showed a decided increase in valuation."

MAY'S LANDING, N. J., SATURDAY, AUGUST 21, 1909.

Atlantic City won a great victory when the resort secured the next National Convention of the Grand Army of the Republic. The city to be congratulated, and the State at large should assist in every possible way to make the visit of the veterans a pleasant one. The victory of Atlantic City, glorious in itself, is even more pleasing in view of the fact that it was contested by several of the foremost cities in the land, pointing to the inevitable conclusion that the resort is destined to become the most important National gathering place in the United States for all sorts of conventions.

Atlantic City is indeed highly favored by its system of fine hotels, amusements and natural attractions for a National convention centre. No matter how attractive Detroit, Salt Lake City and other inland municipalities may be from a standpoint of civic beauty and improvement they cannot compare with the Queen Resort, when it comes to entertaining a host of people of widely diversified tastes. The old veterans, instead of wandering about city streets and public places, will next season have an opportunity to enjoy a stroll on the beach, a plunge in the Atlantic Ocean, or many pleasant hours on the boardwalk with its thousands of varied attractions. No city in the country can offer to conventions such magnificent attractions and conveniences and when the projected Convention Hall is completed the resort will be fully prepared for the largest kind of a national gathering. No city in the world can excel Atlantic City in the magnificence of its hotels. These are the admiration of visitors from far and near, from Paris, London and other cities in foreign lands. The Marlborough-Blenheim, the Chalfonte, the Traymore and others are not only beautiful in their architecture and modern in their design but can entertain in the most thorough manner hundreds of thousands of guests. The long boardwalk, the broad strand, the mammoth piers extending thousands of feet into the ocean, combine to make Atlantic City, beyond the possibility of a doubt, the Queen Resort not only of the United States but of the world.

The new law compelling Boards of Education to employ physicians to examine children is one well calculated to promote general healthful conditions. Says the statute:

"The medical inspector shall examine every pupil to learn whether any physical defect exists, and keep a record from year to year of the growth and development of such pupil, which record shall be the property of the board of education, and shall be delivered by said medical inspector to his successor in office. Said inspector shall lecture before the teachers at such times as may be designated by the board of education, instructing them concerning the methods employed to detect the first signs of communicable disease and the recognized measures for the promotion of health and the prevention of disease. The board of education may appoint more than one medical inspector. A board of education may exclude from school any child whose presence in the school-room shall be certified by the medical inspector as detrimental to the health or cleanliness of the pupils in the school, and shall notify the parent, guardian or other person having control of such child of the reason therefor. If the cause for exclusion is such that it can be remedied, and the parent, guardian or other person having control of the child excluded as aforesaid shall fail or neglect within a reasonable time to have the cause for such exclusion removed, such parent, guardian or other person shall be proceeded against and, upon conviction, be punishable as a disorderly person."

Provision for the comfort of female employees of industrial establishments is made by a new State law, as follows:

"Every individual, firm, or corporation or the managing agent of such individual, firm or corporation, having in his or their employ one or more females engaged in the services and operations incident to any commercial employment, shall provide and maintain seats of a suitable kind, conveniently situated at or near the counter, work-bench, or other places where her or their work is ordinarily performed, for the use of such females, who shall be allowed free access to such seats at all times except when engaged in the discharge of duties that cannot properly be performed in a sitting position."

That such a law is wise and beneficent cannot be gainsaid. Now it is up to the inspectors to see that it is enforced.

The ice famine this season brought to public attention the real utility of the artificial ice process. Ice machines can be installed and operated by private individuals or corporations, thus removing the public from the tyranny of the ice trust. Had there been no means of relieving the famine by artificial products this summer, ice would no doubt have been sold at ruinous prices by the Knickerbocker Ice Company, who control the greatest part of ice-harvesting in America and would have been able to set their own price on what is, to the average house-keeper, rather a necessity than a luxury. So let us thank the inventive genius that has rescued us from the selfish clutches of the ice trust.

The orderliness of the hundreds of thousands of persons in the boardwalk throngs of Atlantic City excites the wonder and comment of visitors to the resort, not without cause. Here, where people from all parts of the country gather, rich and poor and of high and low estate, some disorder might reasonably be expected; but such is the excellence of the police and detective service that little rowdiness or fractures of the peace are known, and women and children may enjoy a stroll on the walk at any hour without fear of insult or molestation. For this satisfactory condition, conducing greatly to the success and popularity of the resort, the Police Department, under the direction of Chief Malcolm Woodruff, deserves high praise and commendation.

Congressman John J. Gardner, the Grand Old Man of the Atlantic, has risen higher in the estimation of the people of this district, if that is possible, by his independent attitude during the recent session of Congress, when he refused to accept the dictation of Speaker Joseph Cannon and voted as he thought his constituents would have him do and as his conscience, his unerring monitor, prompted. Those who, during the heat of the political campaign last Fall, accused the Congressman of intimacy with Cannon cannot but find this a complete refutation of the charge and should forever remain silent on the subject. Uncle John, as he is familiarly called by his associates, can always be depended upon to do the right thing at the right time in the right way.

A severe rain storm Monday caused inconvenience to hundreds of thousands of resort visitors along the seashore, but brought happiness to untold numbers of farmers. The parched soil needed just such a downpour and crops have been greatly benefited.

Maybe you believe the new residents' hunting license law is not what you want, but if you wish to hunt, 'twill be best to secure a permit and avoid a heavy fine. The game wardens have instructions to enforce the law to the letter.

Industries running overtime throughout the country and lack of sufficient workmen denotes a substantial improvement in business conditions, and emphasizes the return of prosperity.

Atlantic City complains of improvements being made during the summer season. May's Landing would be fortunate to have a similar cause of complaint.

'Tis said the railroad contemplates the installation of safety devices at the dangerous grade crossings of the municipality. Speed the day!

STATE PRESS COMMENT.

"President Taft is proving himself an earnest advocate of good roads. He follows up a recent declaration bearing upon the subject in a general way with a letter warmly commending a movement for a road that shall lead directly from the national capital to Richmond."

"He gives utterance to the opinion that there is no more effective means of alleviating the difficulties and burdens of the farmers than by the construction of good, modern highways, connecting not only the centres of population, but traversing the rural districts where the facilities for communication by means of the railroads are not so abundant as in the cities."

"The president wisely adds that because the suggestion for the proposed Washington-Richmond road has been stimulated by those using automobiles, it should not be frowned upon by persons lacking that equipment of locomotion, for, he says, while those owners of the modern motor car are by no means the most important of the community, the fact that their interest in the matter has focused popular attention upon the subject gives them a measure of credit that should not be grudged."

"This seems like a common-sense view of a cause, the importance of which appeals to all classes, and to none more than the farmer."

"Some good may come out of the proposed conference of mayors of the cities of New Jersey to agree upon modifications of the excise law. No one knows better than these municipal executives how difficult it is to enforce the State excise laws. If they could have a more liberal excuse for their official burdens would be measurably lightened. They would welcome such legislation, no doubt."

"Now why wouldn't it be well for the mayors to get together and formulate the kind of excise legislation that will give the most satisfaction to the cities, present it to the Legislature with their endorsement and put it up to that body to decide whether the law shall be changed."

"Each city has its peculiar municipal problem to solve and if it is manifest that a hard and fast anti-selling Sunday law cannot be enforced in the large cities and seaside resorts why shouldn't there be an honest movement, headed by the municipal executives, to induce the Legislature to so modify that law that the scandal of open defiance of law shall be removed?"—Camden Post-Telegram.

"Secretary Wilson, of the Agricultural Department, recently made a surprising statement with reference to farms and farming. He said: 'While the population of the United States has been steadily increasing through the usual additions at home and from immigration, the cultivated area of the country is decreasing. Thousands of acres formerly raising products that made the food of the country have gone back to pasture. The farmers simply cannot get the men to raise the crops.'"

"This is in entire accord with what Secretary Dye has said in his latest annual report of the State Board of Agriculture. He notes the increase in the value of New Jersey farms and a marked increase in the total value of the crops produced, but he says that the latter is due, not to any increase in the acreage of land devoted to crops, but to better farming. There are few new farms. The total has remained at about \$5,000 for many years, though in the same period New Jersey's population has very materially increased along with its manufacturing industries and commerce."—Newark Evening News.

"South Jersey farmers and market gardeners have been specially favored this season. While their brethren in other sections have been suffering from the drought, and have seen their crops ruined, the six lower counties of the State have had frequent showers, and as a result have been able during the month of July to ship produce worth a million and a half dollars. This is more than double the value of the shipments made during the same month in 1907, and 40 per cent. greater than in 1908. With proper soil and climatic conditions, the interest taken by the State in educating the farmers and fruit growers by means of short courses in agriculture and a summer school; the railroads co-operating by running special instruction trains during the winter and early spring; adjacency to the great markets, and splendid facilities for shipping, South Jersey must become more and more the garden for the supply of the main crops of the East."—Trenton Evening Times.

"The State Board of Health, at its session in Trenton, adopted a resolution condemning the use of the drinking cup or glass on railroad trains, and recommending the officers of the railroad to install, free of expense to passengers, germ proof drinking cups made of antiseptic paper, which can be thrown away after use, or to put in the cars penny in the slot machines carrying the germ proof cups. Daily observation of the use of the water when in the cars will show that very few passengers use the train cups, but are provided with their own cups or glasses. Of course there are a few who do use the train cups, but in most cases they are raised by the thirsty before being used. Nevertheless, in accordance with the rules promulgated by medical authorities, to remove as far as possible everything that might contribute to the spread of tuberculosis and other infectious diseases, the action of the State Board of Health is commendable."—Camden Courier.

"The Democratic party over the country at large is in a hopelessly demoralized condition. Even its most loyal newspapers are admitting that as a result of the recent tariff legislation the party has 'ceased to exist,' so far as the tariff is concerned. But for that matter there is no other form of national legislation as reflected by its representatives at Washington that entitles the party to further existence. As the Brooklyn Eagle says, 'The minority at Washington is not only a joke, but a poor joke at that.'"—West Jersey Press.
