Thousands of home vegetable gardens in New Jersey are producing abundantly, yet the prices of vegetables are very high. The mercial growers planted more extensively this year than ever before and it has been a good growing season until the recent very dry weather. Just why prices should remain high when there is such a heavy production is not easily explained. One theory is that the thousands of home vegetable gardens started this Spring have popularized the use of vegetables. A few short rows of beans, beets, carrots and sweet oorn give the family a taste of these regetables in their most palatable condition and a demand for them is thereby created. The home vegetable garden therefore has inpresent the demand for commercial vegetables. The ultimate result will be that a greater pro portion of the grain, meat and staple products grown in this country will be spared for exportation in this time of international need.

Description:

German people. It is no business of ours how that great people came under its control or submitted with temporary zest to the domination of its purpose; but it is our business to see to it that the history of the rest of the world is no longer left to its handling.

Declining to treat with the Imperial German Government, the President points the way to the German people for an honorable and lasting peace when he says:

"The American people have suffered intolerable wrongs at the hands of the Imperial German Government, but they desire no reprisal upon the German people, who have themselves suffered all things in this war, which they did not choose. They believe the property of NEW JERSEY.

COME TO MAY'S LANDING!

May's Landing possesses greater p ities than any other municipality in South Jersey. It is the terminal of five of the most important boulevards in Atlantic County, connecting with Atlantic City, Philadelphia, Cape May, Ocean City and North Jersey by direct routes. The Great Egg Harbor River was once the centre of shipping in South Jersey and with a comparatively small expenditure for dredging can again be made a fine commercial highway. Our possibilities can be summed up as three-fold-for industrial development for Summer homes and for a place of permanent residence. If you are looking for a practical site for an industry, come to May's Landing! It you seek an lideal Summer residence, with boating, bathing fishing and kindred pleasures, come to May's Landing! If you desire a permanent home, healthful, with pleasing environments and good connection with Philadelphia or Atlantic City, come to May's Landing! For this is indeed "The Town of Natural Opportunities" in all that the words rightly imply.
