# Partnership

The making of even the most ordinary telephone call involves a partnership of at least three persons.

The effectiveness of the service depends on the degree of team-play existing between these three partners-the person calling, who co-operates by consulting the directory and calling by number always; the operator, by making the connection quickly, courteously and with the maximum degree of human accuracy; and the person called, by answering promptly.

Greatest satisfaction of service is attained, when the second partner, the operator, is accorded the same consideration and courtesy which she is always anxious to show the other two members of the partnership.
