A certain old man suffered much from absent-mindedness, and was frequently compelled to seek the assist ance of his servant.

If our anspicions were correct, the hound would be sure to find the wolf's track. Once found, there would be little danger of losing it. Joe's favorite weapon was a long, old-fashioned musket. When this was brought out the villagers knew the hunter was bent on bringing home big game, He charged the musket with a hand-

A stone wall, with a ditch parallel to it, stretched away from one end of the sheep pasture. As we reached this wall the hound sniffed about, whimpering excitedly." Joe walked along the ditch, and

stooping, pointed out to me what looked like a large dog track imprinted in the soft earth. It was nearly the size of a panther's track. But when I suggested that it might be one of a panther would kill one sheep and drag it off. Only a wolf was capable of destroying an entire flock for the sake of drinking their blood. They Hid Their Reys. Among the engaging ways of the eternal feminine is the propensity to lock things up and hide the keys. And now it does exasperate their husbands. Take the case of an amiable young woman who carefully fastened her beterhalf's evening clothes in his suit case, but the key to this in the bureau. locked the drawer and promptly lost its key. This was annoying, to be sure. especially as the man in question had but half an hour to dress and get to the house of the friend who had invited him to a very smart dinner party. There is only one valid reason for being late at a dinner-if a member of one's family falls dead he is excused; otherwise not. Imagine the feelings of this martyp then, who had to break open the suft case, and even then arrived at his host's house after the soup had beer taken off.

Another wife's favorite hiding place for the key of the silver chest was in the pocket of her husband's seldon. used hunting clothes. He did go off or a hunting expedition to North Carolina last winter, however, carrying the key with him, unwittingly, of course, and the way that the family had to borrow forks and spoons when company ar rived unexpected at the house is still told around that neighborhood.

The fact is the average woman has no use for a key. She would rather hide things than lock them up. She has no chain to carry her keys on, and the key basket has gone out of fashion

In the midst of a crowd of about forty people composed of members, clerks, messenger boys and visitors, were two ragged urchins fighting for all they were worth.

The larger of the two was about 13 years old and about 4 feet 4 inches tall, while the other, though probably as old, was considerably smaller.

GETTING RICH QUICKLY.

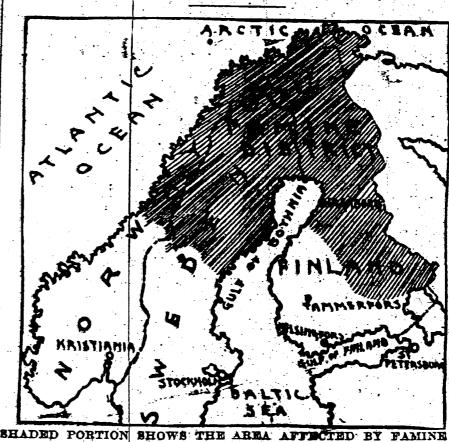

Probably the most startling feature of the revelations regarding the "getrich-quick" concerns is the showing made as to the number and character of the victims. Those who "invested" in such concerns were confined to no particular class. Men and women, city residents and country people, smallsalaried clerks and fairly well established business men, doctors, lawyers and even bank officers seem to have found the prospect of immediate enrichment too alluring to be resisted. Caution, good judgment, intelligent understanding of the possibilities of gain in legitimate enterprises are qualities which no doubt many of the investors possess in the ordinary transactions of life, but they did not suffice to protect the victims against temptation. The extent to which the turi con-

cerns carried on their operations among persons already possessing moderate means and at least average intelligence is suggestive of the growth of the mania for rapid wealth-

getting. It would seem that many Americans have become se profoundly impressed with the possibility of making fortunes in a hurry that they are bound to be discontented with all ordinary profits. The oft-repeated stories of the Carnegies, Hockefellers, Schwabs and Morgans are full of insinuating suggestion as to the ease with which vast sums may be acquired. The man who may be earning an income of from \$1,000 to \$1,200 a year has been forced to recognize the fact that men who are "on the inside" in financial enterprises make many times that sum in a week, a day, an hour, even. He learns how by a turn of the hand, an instant's decision in action, a hasty word with a stock broker, a considerable fortune may be secured. The other side of the story, the losses of the foolish speculator, the fleecing of the lamb, he rarely hears about. Persons with a graving for immediate wealth should rid themselves once

for all of the idea that extravagant profits on investments are any more possible for the small speculator than they ever were. Occasionally an enterprise is inaugurated which may win big returns in a legitimate way, but in the majority of such cases the promoters do not let strangers in "on the ground floor," The small investor would do well to keep it in mind that where an extravagant profit is promised him the venture into which he is asked to put his money is probably either a very risky and illegitimate gamble or else a plain swindle.—Chicago News.

UNCLE SAM GOVERNS HIS CLOCKS BY OBSERVING ONE OF THE FIXED STARS.

HE United States government does not make use of the sun in reckoning time, but instead one of the 'fixed stars' as they are called. Every clear night an astronomer with a blg telescope looks at certain of these stars and makes his calculations, from which he can tell just when the sun would cross the 75th meridian. One of the great clocks in the observatory is called the transmitter, because it transmits or sends out the signal that keeps standard time. This clock is set and regulated by the star-time and then every day at 8 minutes and 15 seconds before 12 a switch is turned on and the beats of the pendulum of this clock are sent by electricity over the wires to the telegraph offices in Washington and New York. When the telegraph through its official journal, urges divioperators hear this sound on their instruments they know that the noon signal is about to be sent out and they at

once begin to connect the telegraph wires with other towns and cities until president, W. D. Mahon, mays that are in a minute or two the "tick, tick" of the clock at Washington is heard in eight-hour day is impracticable for hundreds of telegraph prices. Clubbing the rifle, I gave him a hard blow across the head, but his skull possible for one to have wandered fore I could recover from the momentum of the blow I had struck, the wolf threw himself against my chest.

My foot slipped and I went over backward. The rifle was dashed from my grasp, but as we fell I got a firm grip with

both hands in the long hair at the creature's throat. The wolf stood over me. I was wondering how much longer I would be able to keep him at arm's length. His struggles and plunges were fast exhausting me, when something white flashed across the road, striking the

wolf with such force as to knock him from my grasp. Staggering to my feet, I saw the wolf and old Tige grappling with each other

in deadly combat. As they rolled about in the road neither animal seemed to be gaining any advantage over his opponent, yet the wolf was so much the more agile that I feared he would tire out the dog and escape.

Catching up my rifle from the ground, I was about to interfere, when a voice cried: "Wait a minute; let 'em fight it out?" Joe scrambled through the bushes

and stood at my side. "They said he did it, so it's fair Tige had the first chance at him that did the killing. Tige's most interested and I next. I'll see he don't get away." But there was no need of using the musket. While Joe was speaking the dog had managed to selze his antagonist by the throat, and in a moment. or two the struggle was ended. Joe called off the dog, and carefully

examined the dead wolf. Besides the marks of Tige's teeth there were wounds which Joe said must have been made the night before by the squire's We slung the wolf across a pole and carried him from the awamp. A group

A United States senator is a very great man, and he knows it, and the senate, as a whole, is intensely conscious and proud of the might, majesty and dominion which it wields. To make a comparison, it matters very little what an individual member of the British house of commons thinks and means to do, still_less what an individual British peer thinks and means to do on any given subject,

The senate can veto every appointment made by the president, whether the man nominated for office be a judge of the supreme court or an ambassador or merely a collector of customs. Again the senate can, by refusing to pass it, veto any bill sent up from the lower house, no matter whether the bill is concerned with the raising or spending of money or with the students at that celebrated place alterations in the law. BETTER THAN PILLS.

The Gymnasium Has Cured Many Case of Dyspepsia. William H. Evarts used to boast that he had never even looked into a gym-

nasium, which was his way of saying that in his opinion gymnastics were all nonsense. "People say to me, Mr. Evarts, you're hale and hearty when you ought to be thinking of your grave,' and they wonder how I do it." Of course the secret of the haleness

and the heartiness was temperancemoderation, says the New York News. No man who goes to bed on a supper of mince pie and Welsh rabbit and wakes up for a breakfast of sausage and buckwheat cakes and then spends most of the day twisting from one side of a desk to the other can long avoid the prescription of hot water thrice a day before meals. "Temperance" is one of the words that are ridiculed until they impress themselves upon giddy humanity with the effect of a branding

Some happy mortals like Mr. Evarts have no use for a gymnasium, for they find gymnastic apparatus everywhere. The street is their half mile track; the two flights of steps-or maybe ten flights-are the lung developers; the free and vigorous swing of the arms and the throwing out of the chest are as good as parallel bars.

There are men somewhat intemperate in their temperance, displaying too much of the good thing. They crack vour knuckles when they take you by the hand; they pound you on the back. as if a fishbone were stuck in your throat, and say, "Brace up, old man; you'll be round shouldered if you don't take care."

But there is his to be said in favor of the gymnasium-it has cured many a case of dyspepsia and to that extent has made the world sweeter.

DOING A GREAT DEED.

How Phillips Brooks Sobered Down a Too Aspiring Youth.

When Boston's great preacher, Phillips Brooks, was a student at college, he decided to enter the ministry. His instructors advised him against this step because of an impediment in speech. "The professors had all the argument on their side," said the famous clergyman years after when by patient effort he had gained control of his voice, "but naturally I could not

protest, for words failed me." To this preacher's study there came one day a youth, physically perfect, ambitious for honor and looking for a short cut up the road to success. He intimated that he wished to do some great thing better than it could be done by any one else.

It was a strained and unnatural position for a young girl to find herself in. duty could hold her to the bargain another day. It was not home on the bleak Oklahoma plain. The very quarter section on which they lived was in dispute. The shack which they had built for temporary quarters might not be their own. Across the "dead line" there was another shack—a second blot on the landscape. To one or the other the quarter section belonged, but to which none could say. striving?" Dorothy brushed back a rebellious ear and turned away from the front of the shack. She had never given expression to such parental rebellion before, and she half shuddered at it. By way of apology, she added in an undertone: "Poor father! He suffers, too, He has been disappointed and it is

Jared Wellington was a long time in bed and the fever wasted him to a skeleton. Nature had robbed him of the power and strength to protect his shack from the approach of the enemy. But before his complete recovery the 'dead line" had been obliterated. Then one day Henry Egerton walked to the old shack with lines drawn tighter around his mouth, and with eyes hardened to bear a new burden. The decision of the courts in their respective claims had been handed down. The ownership of the valuable quarter section was decided forever.
