The Kansas City widow who was engaged to Governor W. J. Bailey, of Kansas, for two years without any one knowing it, and while he was receiving thousands of letters of proposal following the publication of stories bly ho until Governor Bailey's election last year. She has two sons, the elder being 11 years old.

COST OF LIVING MUCH HIGHER HERE THAN IT IS IN EUROPEAN COUNTRIES

ROM many persons the complain is heard that the cost of living in to live on the plainest fare, says the World.

As for the important items of fuel, coal and wood were never before so hard to get. Clothing, too, has gone up; at least, tallor-made clothes of the same quality cost more than in 1900 and 1901. In general, it may be said that the things that go to make life enjoyable are much higher than they were a few years ago.

Europeans whe come to America find it more difficult to get along here with the same degree of comfort as they could in the old world, and, on the other hand, Americans who go abroad find many items much less costly than here. Those emigrating from southern Europe, Spain, Italy, Greèce, etc., to Mexico or South America note great differences in values. They cannot make ends meet without working harder and figuring closer than they did In the old country. For instance, Spanlards are astonished at the dearness of everything in Mexico. A house renting for \$100 a month in Madrid costs \$400) a month in Mexico City, and a fint renting from \$18 to \$25 a month in Madrid is held at \$125 or more in Mexico City. So says the Mexican Herald.

According to the British Consul in Buenos Ayres, the cost of living la considerable in that city, and he is of the opinion that in the other towns of Argentina I ving is no cheaper. The farm laborer has a hard struggle to get along The monthly expenses of the workingman of Buenos Ayres amount to \$132.20, or 151, tabout \$25 in our money), of which rent is the largest item, nearly one-third, and meat one-seventh, while fire, light, and clothes cost but little in the warm climate. As wages are small, he concludes that "unless the wife is also a wage-earner, there is a small margin between earnings and spendings. The ordinary workman has to live poorly and sparingly." The highest rates of wages are paid to harvest hands in the province of Buenos Ayres, who receive from 10 to 121/2 shillings a day, while carpenters receive from 4 to 5 shillings a day and blacksmiths the same. The wages of other artisans are as low in some instances as 2 shillings (50 cents in United States currency). Probably the laborers and artisans of other Spanish-American countries are not much better off than those in Argentina .-- Chicago Tribune.
