specially of overwork on the part of the pupils, has received considerable attention, of late. To the useful discussion of this subject Dr. G. Woodruff oheston makes a valuable contribuion in the North American Beview. He deals with the object of school life and present methods of study on the health of the pupils, and while the American data on the subject are few and superficial, as far as they go they support conclusions reached in Europe by sys ematic inquirers. Whenever and wherever such an investigation has been attempted, a surprising amount of ill health among school children has been reported. Moreover, "though varying in degree, from slight functional disturbances to actual illness, the same morbid conditions were found" in every place and every time. There are many "school diseases," the most typi cal of them, perhaps, being headache. This disease may be due to anaemia, eye strain, bad ventilation, nerve exhaustion, fatigue and other causes. From 40 to 50 per cent of all school children suffer from it, and it is habitual, girls, however, being affected more than boys. Th number of scholars suffering from habitual headache increases step by step and grade by grade with advancement through school, and significantly enough, the headaches grow more frequent and severe as the term progresses, disappear in the holidays and reappear with the next term, Among other school diseases are sleep essness, palpitation, irritability, mental weariness, twitching and instability in posture and balance. The diseases affecting the nervous system, according to Dr. Johnston, are of greatest interest to Americans, for "we know

The question of school higher and

#### THE HILLS OF GOD.

- we journey through the lowland shadows, Through the dull, dull mist and the rain : Oh, chilling the fogs of the marshes And the winds from the lonely plain! And our hearts grow sick with longing For the beautiful paths untrod. For we know that away above us Stretch the glad green Hills of God. Our feet are chained to the valley, We plow and we sow and reap; There are strifes and tolls for the noonday, And a grave where at night we sleep. But a something speaks within us: "Look away from the spade and the clod, O soul, look up for thy birthright, And away to the Hills of God!
- "In the winds that sweep their summits Is healing for all thy ills; Up, up! till thou feel the current! There is help, there is help in the hills, Let darkness and sore disaster But sunder thee from the sod, And know thou shalt thrive in the sunlight That crowneth the Hills of God." -Boston Transcript.

TOTICE TO G

#### MOTHER LOVE

MI might build a palace fair With every joy of soul and sense, And set my heart as sentry there To guard your happy innocence; If I might plant a hedge too strong For creeping sorrows to writhe through And find my whole life not too long To give, to make your hedge for you.

If I could teach the laden air. To bear no sounds that were not sweet Could teach the earth that only fair, Untrodden flowers deserve your feet, Would I not tear the secret scroll Where all your griefs lie closely curled, And give your little hand control Of all the joys of all the world.

But ah, I have no skill to raise The palace, teach the hedge to grow ; The common airs blow through your days, By common paths your dear feet go; And you must twine, of common flowers, The wreath that happy women wear, And bear, in desolate darkened hours, The common griefs that all men bears

The pinions of my love I fold, N. Your little shoulders close about ! Ah! could my love keep out the cold, Or shut the creeping sorrows out! Rough paths will tire your darling feet, Gray skles will weep your tears above. While round your life, in torment beat, The impotent wings of mother love\* -Pall: Mall Gazette.

ADAM AND EVE. 

Don't blame girls for falling in love, because they've nothing else to do; but I can't see why fellows want get engaged to a dozen fellows if she to. They've cricket and footer and all wanted to."

sorts of things, without making asses of themselves. Ted Johnson is an awful swell

cricket, and he plays footer for the ing for taste." county, so he hadn't any excuse for hair." bothering about girls; but he went and got engaged to Violet all the same: She's my sister, and four years older row."

than I am. (I'm fifteen and in the lower fifth.) He and VI had just "fallen in love,"

as they call it, when I came home for to the sign post."

I turned round and walked of on way, and she turned round and walked off the other; but somehow we met round the corner. I was going by without taking any notice of her, but she laughed over her shoulder, "I know a boy wuo likes red hair," she said.

"She's a beast," she tipeated direct

"He's a beast," I told her. "Yes," ahe said; "he is! But if took me out he'd take me home." "Come along then," I said. too hennry So we made it up again. The day after we went to Delsham. sum I had a catapult. We were trying if

they would break greenhouse glass; when who should come along the road but Violet! She was reading a crumpled old letter, and she put it in her muff when she saw us. I knew shê wouldn't tell, so I didn't care. She gave me some chocolate drops,

and offered some to Minnie; but the little beggar put her hands behind her. "No, thank you, she said.

"It's about her brother," I explained. knew she must feel pretty bad about It to refuse chocolates. (They were big

"Yes," Violet said, and gave a sort of sigh. "You are quite right to take your brother's part, dear; but-well. I'm glad you and Jack are friends, anyhow.

said, "I won't speak to you; and I mean

I wasn't going to. Jack, that was one of Ted's letters and she'd been crying." "Rot!" I said. (She had, though!) "Vi wouldn't cry about him. She could

"She doesn't want to. She wants Ted. That's just it." "Well," I said, "there's no account-

"No; I know a boy who likes-red

"Then he can take you out to-mor-

She laughed. "All right." you've taken me out to-day. So you may as well be agreeable. I'll race you bate

So we raced. Then we had another practice with the catapult. I hit a can that a milkman was carrying and she hit the man. So we had to race again. You should have seen the chap jump! Mother and father-were out when I

WASHINGTON TRADITIONS. tion !

Preserved in Part of Virginia Where He Was Born.

What-----It is a quiet life that the people of Westmoreland County, in the northern neck of Virginia, lead, says E. N. Vallandigham in the Magazine of History. On a lonely plantation in this county. within sight of the Potomac, George Washington was born, and in spite of the rolling years, of the Civil War and

of the emancipation, the northern neck of Virginia was in many respects much what it was when George Washington and "Light Horse" Harry Lee were born a month apart in the year 1732 It's-"

Even to this day sailing craft slowly worm their way into the deep, navigable inlets of the region ' and carry to do with oysters? What are you freight to Baitimore and Washington Each plantation has its own wharf, at uss us the thay shut the prizzen dore and each planter keeps a lookout for you suppose I am going to do with the coming schooner, just as his ances- them?" broke in Pa, shoutfully. Valuable Blenheim Spaniel. All of Tot's anxious Philadelphia friends will be rejoiced to learn that

chances for recovery are good, says the New York Herald. It should be stated, perhaps, that Tot s a thoroughbred Blenheim spaniel, and moves in the very best circles of Philadelphia's bow wow four hundred. She is the leader of her set, the pos-

sessor of several blue ribbons and a ceneral favorite. But Tot has been a great sufferer and her case is likely to become a celebrated one in canine surgery. It is now nearly a year ago that she began to complain. At first she was treated for ndigestion by several of Philadelphia's best physicians. Brisk walks and plenty of exercise were prescribed, but that

treatment did her little good. Then she was taken to Hot Springs Ark., and received a regular course of sulphur water baths; with a special attendant to administer massage. She grew steadily worse and at last developed convulsions. These attacks would last from one to three minutes and came at frequent intervals. Two nurses were with her constantly, and when her condition became more alarming it was

decided to take her to a New York speelalist. She arrived here three weeks ago and was hurrledly taken to the office of Dr. D. S. Johnson and a consultation was held. With the greatest care her case was studied for three weeks and finally the X-ray was applied. No doubt it was the searching eye
