#### HISTORY OF THE ANCHOR.

Various Improvements That Have  
Been Made in Its Design.  
The anchor is a device used up  
to the beginning of the last century  
consisted of a long, round iron shank,  
having two comparatively short,  
straight arms or flukes, inclined to the  
shank at an angle of about 45 degrees  
and meeting it in a somewhat sharp  
point at the crown. In large anchors  
the bulky wooden stock was built up  
of several pieces, hooped together, the  
whole tapering outward to the ends,  
especially on the aft or cable side.  
About the beginning of the last cen-  
tury a change in the Plymouth naval  
yard, during by name, suggested cer-  
tain improvements, the most important  
of which was making the arms curved  
instead of straight. At first sight this  
simple change may seem of little value,  
but consideration will show that this is  
not the case. The holding power of an  
anchor depends on two principal con-  
ditions—namely, the extent of useful  
surface and the amount of vertical  
penetration. The latter qual-  
ity is necessary on account of the na-  
ture of ordinary soils, which are generally less  
face layers and resisting than is the  
ground a short distance below.  
In the year 1831 chain cables began  
to supersede the wooden ones with

#### NOW SLEEP MAY BE WOODED

Movements of the Feet Will Quiet  
The Nervous Brain.  
Most of the mental devices for woo-  
ing sleep have failed because they have  
nearly always tried to resort to "local  
treatment." In other words, they have  
made a homeopathic attempt to stop  
thinking by thinking about something  
else, a process which might also be  
called "elimination by substitution." But  
all thinking, spontaneous or forced,  
draws more or less blood to the  
brain, prevents deep inhalations and  
bars the gate to the kingdom of dreams.  
Any device, on the other hand, which  
will make one take deep, long breaths  
spontaneously, the inevitable foreman-  
ner of sleep, may be counted upon as a  
genuine remedy for insomnia. Even  
deep breathing which he forced is bet-  
ter than any purely mental attempt to  
win sleep, but if the deep breathing can  
be produced involuntarily one is  
sure of a passport to Nodland.  
After several nights of experiment  
to this device and the writer decided  
to apply the principle adopted by the  
musicians. "Who begins, dear manipu-  
lators, at the point farthest from the  
seat of difficulty," which in the case  
of insomnia would be the feet. Lying  
on the right side, with the knees to-  
gether and considerably flexed, the  
feet of insomnia should begin to

#### THE CODE IN ANCIENT TIMES

Famous Duel in the Days of Good  
Queen Anne.  
In the reign of good Queen Anne  
duels were no less frequent than in  
the rowdy, riotous days of Charles II.  
Lord Mohun, a dissolute, remorseless  
nobleman, was the terror of honest  
London citizens at this time, and  
many were the infamous escapades in  
which he played chief character. He  
was guilty of one act which bears no  
other name than that of murder—the  
killing of poor Mountford, the actor  
in cold blood because he endeavored  
to protect the honor of Mrs. Bracegirdle,  
the famous and beautiful actress. It  
was Lord Mohun who fought and kill-  
ed the Duke of Hamilton, an affair  
which all will remember who have  
read Thackeray's great novel, "Es-  
mond."  
The duel was fought with swords in  
Hyde park, the challenge having been  
sent by Mohun to the duke, who had,  
with perfect accuracy, stated that one  
of Mohun's creatures "had neither  
truth nor justice in him." The Duke  
of Hamilton received a wound in the  
right side of the leg about seven inches  
long, another in the right arm, a third  
in the upper part of the breast, run-  
ning downward toward the body; a  
fourth on the outside of the left leg.

**A Doubting Father.**  
Mr. George Marville Fenn was in  
the Reform club one afternoon, says a  
London Journal, when he noticed that  
an old gentleman, a friend of his, was  
looking rather perturbed, so he in-  
quired if there was anything the mat-  
ter. "Well," said the old gentleman,  
"the fact is my son has got a play  
running out tonight, and I fear it will  
be a ghastly failure. He can write  
pretty little plays when he likes, but  
this one he has written is a non-sensical  
sort of a thing, and I'm sure it won't  
do at all. However, I suppose I must  
go and see it." The son's name was  
William A. Gilbert, and the play was  
called "Iolanthe."

**Valuable Insects.**  
Perhaps there are few substances  
contributed by animals to the material  
medicines of greater value or more ex-  
tensively beneficial than certain species  
of insects. Of these there are none  
more highly esteemed for medical pur-  
poses than those beautiful, shining,  
green colored insects known as blis-  
tering beetles, or cantharides. Their cor-  
rosive action is so great that they fre-  
quently inflame and excoriate the  
hands of those who collect them, and  
on this property their chief medicinal  
virtue depends. They are generally  
used in the form of plasters or oint-  
ment, and in cases of violent visceral  
inflammation their external use can  
scarcely be supplied by any other medi-  
cine.

**Indigestion Causes Catarrh of the Stomach.**  
For many years Dr. J. C. H. has been  
studying the cause of indigestion and  
catarrh of the stomach, and has discovered  
the cause and the cure. He has prepared  
a medicine which will cure indigestion  
and catarrh of the stomach in all cases.  
This is now the only medicine of the  
kind in the world. It is sold by all  
druggists and by the author, Dr. J. C. H.,  
1707 Atlantic Avenue, Atlantic City, N. J.
