At present there are only about 600,000 Protestants in France. That religion, the majority, however, has nearly altogether died out may be inferred from the fact that fewer than five Ministers in the present Cabinet belong to the Reformed faith.

The temperance men of Evansville, Ind., compelled the enforcement of the Sunday law against the liquor sellers.

A bridegroom, residing at Cairo, Ill., had a very eventful honeymoon. He quarrelled with and thrashed his wife the second hour after marriage.

There has been some standing done recently in Ottawa, Iowa, and the Ontario has this to say on the subject: "There is a class of creatures, bees and bees, things that are neither men or women, hyenas in human form, and they gorge themselves to the full on the foul and feild falsehoods that continually ooze from the slimy sewers of each other's mouths."

"Carmen," by Prosper Merimee, of the French Academy. The original work, from which the opera of "Carmen," now the great sensation in Europe, and in this country, was dramatized; the audacious, beautiful and bewitching "Carmen" being presented here by Miss Minnie Hank and Miss Kellogg, with unerring truth, and with the gestures and movements natural to the demure, mirthful girl, conscious of her beauty, and therefore insolent and presumptuous.

His book is pure and elevated in its style and ideas, and furnishes a practical solution of many of the most perplexing questions of life. It should be read by the young and old, by the married and single, and especially by those contemplating marriage.

The leading paper in Potter's American Monthly for January is furnished by that excellent writer, Professor Fred. Mon. Colby, and is entitled "Famous Highway of the World." The theme is a very instructive one, and is admirably and entertainingly treated by the writer.

The National Publishing Company, of Philadelphia, has just issued a very interesting and valuable work, by Prof. O. S. Fowler, on Manhood, Womanhood, and their Mutual Interrelations; Love, its Laws, Powers, etc. It is a masterly exposition of the laws which control the relations of the sexes, and their duties towards each other.

It is for the purpose of diffusing this knowledge that Professor Fowler has given to the world this work on "Sexual Science," which is simply an explanation of the laws which govern the sexes in their relations to each other.
