(Successor to Alex. Aitken)

Excellent accommodations for transient  
guests. Is located close to Railroad  
Stations. Good stables.

Our military orders had a grand  
united installation of officers on Wednes-  
day evening, in Jackson's Hall. The  
weather was unfavorable, and many  
were prevented from attending; but,  
this being the first meeting of the kind,  
its novelty drew all who could get there,  
and the ceremonies were impressive.  
Past Post Commander Aitken installed  
the officers of Post and Camp, and Past  
Post Commander Osgood performed the  
like service for the Relief Corps. We  
give below a list of the officers:

G. A. R. POST.

Commander, Chas. E. Roberts.

Br. V. C., Edw. R. Sprout.

Jr. V. C., W. H. H. Bradbury.

Quarter-Master, H. F. Edsall.

Q. M. Sergt., L. Beverage.

Adjutant, Orville E. Hoyt.

Chaplain, Edwin Adams.

Surgeon, Dr. H. E. Bowles.

O. of D., H. J. Monfort.

O. of G., George Bernshouse.

SONS OF VETERANS.

Captain, Frank S. Drake.

First Lieut., (Vacant).

Second Lieut., A. V. W. Setley.

Camp Council, Wm. Cunningham.

Harry N. Davison.

Chaplain, Rev. R. H. Woodward.

First Sergt., Harry D. Rutherford.

Q. M. Sergt., Harry C. Leonard.

Color Sergt., Robert Miller.

Sergt. of Guard, Wm. Cunningham.

Corp. of Guard, Geo. O. Draz.

Camp Guard, A. J. Whittier.

Picket Guard, Edw. G. Bernshouse.

RELIEF CORPS.

President, Margaret B. Sutton.

Sr. V. P., Emma J. Rutherford.

Jr. V. P., Ella Twomey.

Treasurer, Nora B. Monfort.

Chaplain, May Oakleigh.

Secretary, Lizzie S. Bernshouse.

Conductor, Nellie Monfort.

Asst. Cond., Nellie DePuy.

Guard, Georgeanna Hawitt.

Asst. Guard, Mary Saxton.

The rule of growth is that a child  
should increase two pounds in weight  
for every inch in height between three  
feet and four feet, and two and a half  
pounds for every inch between four and  
five. Any child more than seven lbs.  
below the weight given should be ex-  
amined medically. A remarkable fact  
comes out from the tables is that boys  
at the public schools and young men at  
the universities and entering the public  
service average about three inches taller  
and from six to twenty pounds heavier  
than boys in the boarding schools and  
young apprentices and workmen. Two  
causes may be assigned for this,-- first,  
heredity, the one springing from taller  
parents; secondly, favorable surround-  
ings. Delicent and improper food, town  
air, laborious work at an early age, all  
stunt the growth. Over three inches  
have been thus produced in four months  
where all means in town had failed. A  
good rule for predicting future height is  
that if five feet is passed between eleven  
and twelve years of age the child will  
be tall; if between thirteen and four-  
teen, of medium stature; if not till 15,  
he will be short.

For the benefit of those who desire  
to attend the ceremonies incident to the  
inauguration of President elect McKinley,  
the Pennsylvania Railroad Company will  
sell excursion tickets to Washington,  
March 1, 2, 3, and 4, valid to return from  
March 4 to 9, at the following rates:  
From New York, \$8.00; Philadelphia,  
\$5.40; Baltimore, \$1.00; Hurlingham,  
\$5.00; Williamsport, \$8.70; Buffalo,  
\$11.20; Rochester, \$10.48; Altoona and  
Pittsburg, \$10.00; and from all other  
stations on the Pennsylvania system at  
reduced rates. This inauguration will  
be a most interesting event, and will un-  
doubtedly attract a large number of  
people from every section of the country.  
The magnificent facilities of the Pennsylv-  
ania Railroad make this the favorite  
route to the national capital at all times,  
and its enormous equipment and splendid  
terminal advantages at Washington make  
it especially popular on such occasions.

Estimates given for  
All Kinds of Tin Work,  
Galvanized Iron Work,  
Copper and Zinc Work,  
Stoves Repaired,  
Also Gasoline Stoves.  
Better satisfaction is given if Gasoline  
Stoves are brought to the shop.

**William Baker,**

26 North Third Street, Hammonton

If your eye is on the eternal, your  
intellect will grow and your opin-  
ions and actions will have a beauty  
which no learning or combined advan-  
tages of other men can rival.

A man may know that he is without  
God if he is without prayer. Prayer is  
the simple expression of the desire for  
God. It is by prayer we invite God to  
come in to occupy his throne, and when  
he is in, prayer is inevitable.

If we look down then our shoulders  
stoop. If our thoughts look down, our  
character bends. It is only when we  
hold our head up that the body becomes  
erect. It is only when our thoughts go  
up that our life becomes erect.

The leisure hour is the most perilous  
of hours. But this peril any youth can  
avoid if he is only sensible enough to  
provide himself with some pursuit that  
will develop his tastes and enlarge his  
intellectual horizon; and who of us  
cannot do that.

**Bucklin's Arnica Salve**

The best salve in the world for cuts,  
bruises, sores, ulcers, salt rheum, fever,  
sores, tetter, chapped hands, chilblains,  
corns, and all skin eruptions, and pos-  
sibly cures piles, or no pay required.  
It is guaranteed to give perfect satisfac-  
tion or money refunded. Price, 25 cents  
per box. For sale at Croft's.

California has been most fittingly  
termed the "Italy of America." All the  
delicious balm, the cloudless sky, and the  
rich verdure of the great European pen-  
insula are duplicated in this sunny land  
of the Pacific. Here nature basks in the  
sunshine of her own beauty; and here  
she has established her own sanitarium,  
where eternal spring inspires everlasting  
youth. With the snow-capped peaks of  
the Sierras upon the one hand, the calm  
Pacific with its soft breezes upon the  
other, and a veritable paradise of flowers,  
fruits, and plants between, man can find  
and needs no lovelier land. To visit such  
a country is a privilege, a blessing. The  
Pennsylvania Railroad Company, recog-  
nizing the need of a more comfortable  
and pleasant way of crossing the contin-  
ent, inaugurated a series of annual tours  
to California, running a through train of  
Pullman palace cars from New York to  
the Pacific Coast, and stopping at the  
principal points of interest enroute. The  
great popularity of these tours demon-  
strates the wisdom of the movement.  
For the season of 1897, three tours have  
been arranged to leave New York, Phil-  
adelphia, and Pittsburgh, January 27,  
February 24, and March 27.

The first tour will run direct to San  
Diego via St. Louis and the Santa Fe  
Route, and return from San Francisco  
via Salt Lake City, Denver, and Chicago,  
allowing five weeks in California.  
The second tour will run via the Mam-  
moth Cave and New Orleans to San  
Diego, stopping at the "Crescent City"  
during the Mardi Gras Carnival. This  
tour will return via Salt Lake City, Den-  
ver, Omaha, and Chicago, allowing four  
weeks in California.

The third tour will run via Chicago,  
Denver, and Salt Lake City, allowing  
passengers to return by regular trains  
via different routes within nine months.  
All of these tours, either going or  
returning, will pass through the famous  
Colorado region, Glenwood Springs,  
Leadville, and the Garden of the Gods.  
Rates from all points on the Pennsylvania  
Railroad system east of Pittsburgh: First  
tour, \$310; second tour, \$350; third  
tour, \$210 round trip, and \$150 one way.  
For detailed itineraries and other infor-  
mation, apply at ticket agencies, special  
booking offices, or address Geo. W. Boyd,  
Asst. Gen. Passenger Agt., Broad St.  
Station, Philadelphia.

**Condensed Testimony.**

Charles B. Hood, broker and manu-  
facturer's agent, Columbus, Ohio, certifies  
that Dr. King's New Discovery has no  
equal as a cough remedy. J. D. Brown,  
proprietor St. James Hotel, Ft. Wayne,  
Ind., testifies that he was cured of a  
cough of two years' standing, caused by  
a gripple, by Dr. King's New Discovery.  
B. F. Merrill, Baldwinville, Mass., says  
that he has used and recommended it,  
and never knew it to fail, would rather  
have it than any doctor because it always  
cures. Mrs. Henning, 223 E. 25th St.,  
Chicago, always keeps it at hand and has  
no fear of gripple because it instantly re-  
lieves. Free trial bottles at Croft's.

**IN CHANCERY OF NEW JERSEY.**

To William Bryan:  
By virtue of an order of the Court of Chan-  
cery of New Jersey, made on the day of the  
date hereof, in cause wherein Anna O.  
Bryan is Complainant, and you are Defendant,  
you are required to appear and plead demur-  
or answer to the complainant's bill on or  
before the thirtieth day of March next, or the  
said bill will be taken as confessed against  
you. The said bill is as follows: To secure a divorce  
from the bonds of matrimony.  
Dated January 12th, 1897.

**ALLAN B. ENDICOTT,**

Solicitor of Complainant.  
P. O. address, Atlantic City.

**Tours to Florida.**

No district in America presents, dur-  
ing the Winter season, so many varied  
attractions as the State of Florida. Be-  
sides its delightful climate, which to one  
escaping from the cold and unhealthy  
changes of the North seems almost eth-  
ereal, it is pre-eminently a land of sport  
and pleasure. Along its eleven hundred  
miles of salt water coast and in its twelve  
hundred fresh water lakes are fish of  
almost every conceivable variety, from  
the migratory tribes common to North-  
ern water to the tarpon, pompano, and  
others of a more tropical character. No-  
where in all our broad land can the angler  
find a greater variety of game or better  
sport. Here also the most enthusiastic  
hunter finds satiety. Deer, turkeys,  
bears, panthers, and wild cats roam at  
large through the more sparsely settled  
regions, while birds of all kinds may be  
found in abundance throughout the  
State. The more novel sport of alligator  
and manatee hunting may also be in-  
dulged in by the more adventurous.

With its matchless climate, its orange  
groves, its rivers and lakes, its boating  
and bathing, its fishing and hunting, and  
its extensive forests, Florida presents  
unrivalled attractions for the valetudin-  
arian, the lover of nature, the sportsman,  
and the explorer.

To this attractive state the Pennsylv-  
ania Railroad Company has arranged  
four personally conducted tours during  
the season of 1897, leaving by special  
train Jan. 28, Feb. 9 and 23, and March  
9. The first three tours will admit of  
a sojourn of two weeks in this delightful  
land; tickets for the fourth tour will be  
valid to return until May 31, by regular  
trains. Rates for the round trip, \$50  
from New York, \$48 from Philadelphia,  
and proportionate rates from other points.  
For tickets, itineraries, and other infor-  
mation, apply to ticket agents, special  
booking offices, or address Geo. W. Boyd,  
Assistant Gen. Passenger Agent, Broad  
St. Station, Philadelphia.

**NOTICE.** My wife, Julia Traven,  
having left my bed and board  
without just cause or provocation, I  
hereby warn all persons not to trust her  
on my account, as I will pay no bills of  
her contracting. JAMES TRAVEN.  
Elwood, N. J., Dec. 21, 1896.

**J. B. Small,**

give your eyes a thorough examination  
to correct all cases of defective vision by  
the latest approved scientific methods.

**Monday, Jan. 18.**

No charge for examination. Only reason-  
able charge for glasses, if required.  
Persons unable to call, by sending me  
word, will be treated at their residence.

Every alternate Monday.

Office hours, 10 a. m. to 12 m. and  
from 1 to 4 p. m.

Philadelphia address, 341 N. 7th St.

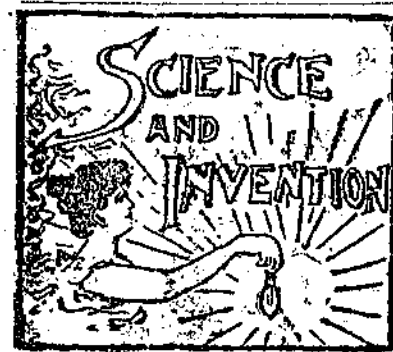

# SCIENCE AND INVENTION

**Prælia Plurima.**  
Southey's "Prælia Plurima" is a book of broad and generally plain to which the name of "prælia plurima" has been given. This curious title comes from the circular sound, arranged in zones and along intersecting lines, with which large areas of the plains are covered. For these zones, which average fifty feet in diameter and attain occasionally a height of ten feet, were supposed to have been made by ants, which were nests they abound. But recently Professor Cledenius, of the Louisiana State University, has found reason for thinking that the mounds were formed through the blowing up of sand by gas escaping from vents in the ground. The arrangement of the mounds in zones and lines is accounted for by supposing that the gas-vents existed along the fractures radiating from an earthquake center.

Recent discoveries in the coal mines of Central France have furnished by the greatest advance that has ever been made in our knowledge of the insects which inhabited the world millions of years, as geologists believe, before the time when man made his appearance upon the earth. In that wonderful age when the carboniferous plants, whose remains constitute the coal beds of today, were alive and flourishing, the air and the soil were animated by the presence of flies, gnats, beetles, cockroaches, dragon-flies, spiders, locusts and scores of other species which exist but slightly changed at the present day. But the insects of those remote times attained a gigantic size, some of the dragon-flies measuring more than two feet from tip to tip of their expanded wings! The remains of these insects have been marvelously preserved in the strata of coal and rock.

**A Kite a Mile High.**  
Since an account was given in this column of the high kite-flying experiments at the Blue Hill Observatory, near Boston, all previous records have been eclipsed there. In 1897 the greatest elevation reached by a kite was 2,500 feet above sea-level, or 1,000 feet above the summit of the hill. During the past summer half a dozen times a kite was sent up more than a mile above sea-level, and on one occasion the height attained was 2,722 feet above the sea, being 1,600 feet more than a mile above the hilltop. The experiments are made with the so-called "tailless" or Eddy kite, and the "tailless" or Eddy kite. The lightest flight was made by an Eddy kite. The purpose is scientific, as the kites carry self-recording instruments by means of which the temperature and humidity of the air at great elevations can be measured. The kites are sent up from a launch, the thickness of which is revealed by the record of the instruments.

**The Wonderful Phagocytes.**  
When a drop of human blood is placed between two plates of glass and examined with a microscope it is seen to contain, beside the minute disks which give it its red color, little white corpuscles called "phagocytes." If the glass is warmed to a temperature equal to that of the human body these corpuscles, or phagocytes, as they are otherwise called, will be seen to put out and retract minute processes, which, as if eating the part of the surface of the glass. The Russian naturalist, Metchnikoff, has discovered that the phagocytes in his blood feed upon the microbes of infectious diseases, when such microbes are introduced into the system. Sir Joseph Lister, president of the British Association for the Advancement of Science, believes that this action of the phagocytes, which is scientifically named "phagocytosis," is the main defensive means possessed by the living body against its microscopic foes. Whenever a wound is made any part of the body the phagocytes, like well-trained soldiers, rush to the breach and make war upon the putrefactive micro-organisms endeavoring to enter the system.

**One Way to Break Glass.**  
It is scarcely credible, but it is a fact, that a glass can be broken by the voice. If you strike a thin wine glass while you hold it by the stem it will emit a certain note in most cases a pretty deep one. In approaching the limit of rapidity to your mouth, and shouting into it the same note as loudly as possible, the vibrations of the glass being thereby extended, it will be shattered into fragments. This used to be a favorite experiment of Lalande, the French singer, who would thus break, one after the other, as many glasses as were handed to him.

Live hot one day at a time if you wish to keep young.

# AN OCEAN AMBULANCE TO FIGHT DEATH

**Shot Fired Fifteen Miles.**  
From twelve to thirteen miles is the computed range of the most powerful guns now made, but the longest distance that a shot has been fired is a few yards over fifteen miles, which was the range of Krupp's 130-ton steel gun, firing a shot weighing 2,600 pounds. The 111-ton Armstrong gun, firing a shot weighing 1,800 pounds and requiring 900 pounds of powder, but quick-firing guns are more depended upon at the present day than guns with such extreme length of range. Of quick-firing guns the most wonderful is, perhaps, the Maxim, which can fire as many as 600 shots a minute, and yet is so light that a soldier can carry it strapped on his back. Krupp's 130-ton gun and Armstrong's 111-ton proved the expense, being unable to stand firing 100 times, and their manufacture has practically been abandoned. The gun most favored, perhaps, is the twenty-two-ton Armstrong, which hurls a solid shot for a distance of twelve miles—London News.

# THE OCEAN AMBULANCE IN ACTION

A great number of men are blown into the water, and many injured men fall from the rigging into the ocean. It is a curious fact that three-fifths of the sailors in the different navies cannot swim, and therefore in many instances to drop from the rigging or to be accidentally forced overboard during a battle is sometimes as sure death as to stop a bullet. The men on board the ambulance ship will be looking for just such accidents all the time, and boats crews will be dispatched if such aid is needed. During the last naval battle between the Austrian and Italian fleets 80 years ago, more than 400 men were drowned who could have easily been saved had an ambulance ship been in attendance.

It is proposed that the new ambulance ships should be fitted up like naval hospitals. The ships will be controlled by "naval ambulance associations," for the treatment of sick and wounded at sea, and while the government would exercise a parental guardianship, the ambulance ship would really be a ship of mercy. The ambulance ship would be the greatest amount of air, will be devoted to the most serious cases, and additional wards will be located in the remaining decks of the vessel, with artificial ventilation will be produced by means of a steam spray, extracting apparatus, as well as a steam fan blast that will pump in an adequate supply of fresh air.

The prevention of recovery of injured men on board an ambulance ship properly equipped would be fully half greater than at present. In a non-of-war the deck was always loaded to the bow, although the naval authorities have pretended against it for years, for owing to the law which states that a ship of war is not to be flooded in case of heavy weather. It is the "sea-sick" quarters of the ship also. Of course, it would be absolutely impossible for an ambulance ship to care for all the wounded during an engagement unless that engagement were simply between two vessels. The truth of this statement is shown by the fact that the ordinary battle ship, whose complement is 500 men, will have, within a few minutes of the time action begins, fifty men killed and 120 wounded.

Milwaukee has just adopted the Dorrillon system of measuring criminals.

# VISIT THE CAPITOL

**Always on Hand.**  
Washington correspondence.  
The Capitol is a place of interest to all who visit it, and it is a place where one can find out a great deal about the government and the people who run it. It is a place where one can see the great hall of the Senate, the great hall of the House of Representatives, and the great hall of the Supreme Court. It is a place where one can see the great hall of the Library of Congress, the great hall of the National Academy of Sciences, and the great hall of the National Academy of Arts.

By the cut of their jib, as the sailors say, the persons themselves may change, but the types they represent do not. Death and the millions of time or circumstances may shift the actors themselves, but their parts are always represented, and the play is constantly on the boards.

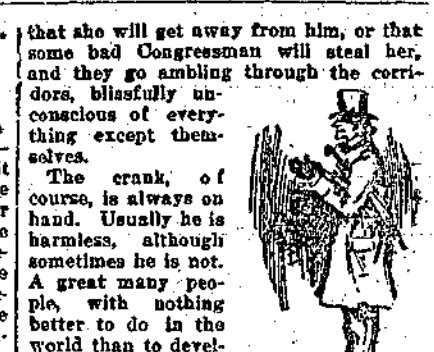

All day long they surge through the Capitol on the stream of humanity that sweeps along the corridors, or remain stationary in niches and nooks, like drift-wood caught in a strong shoreward eddy. Here you will see some of them standing for hours, watching and waiting for the Congressmen whom they will not see if the Congressmen see them first. There are others who do not have the corridors with wistful face and waiting eyes, but who are looking for a glimpse of a familiar face, and are greeted cheerfully, joyously and with enthusiasm by the Congressmen, as if they were old friends.

A daily visitor at the Capitol is the ward politician who runs down to Washington for a day or two to see his Congressman and report upon the condition of the district. The politician who runs down to Washington for a day or two to see his Congressman and report upon the condition of the district. The politician who runs down to Washington for a day or two to see his Congressman and report upon the condition of the district.

**WARD POLITICIAN.**  
Out in Statuary Hall, in a corner filled with chairs and sofas, sits a man of some characteristic type. This is the ward politician, the man who runs down to Washington for a day or two to see his Congressman and report upon the condition of the district. The politician who runs down to Washington for a day or two to see his Congressman and report upon the condition of the district.

**THE FARMER.**  
As though anticipating a hearty welcome and glad to see the Congressman, the farmer sits in the corner of the Statuary Hall, looking at the Congressman with a look of interest and admiration. The farmer who runs down to Washington for a day or two to see his Congressman and report upon the condition of the district.

**OFFICE-SEEKER.**  
The office-seeker is a man who runs down to Washington for a day or two to see his Congressman and report upon the condition of the district. The office-seeker who runs down to Washington for a day or two to see his Congressman and report upon the condition of the district.

that she will get away from him, or that some bad Congressman will steal her, and they go ambling through the corridors, blissfully unconscious of everything except their own selves.

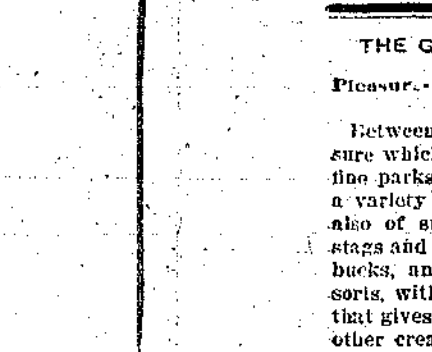

He has not been the same person all the time, but he has been the same kind of a person. He is tall and thin, with a long black mustache and a black tie. He is a man of some characteristic type. This is the ward politician, the man who runs down to Washington for a day or two to see his Congressman and report upon the condition of the district.

**THE FARMER.**  
As though anticipating a hearty welcome and glad to see the Congressman, the farmer sits in the corner of the Statuary Hall, looking at the Congressman with a look of interest and admiration. The farmer who runs down to Washington for a day or two to see his Congressman and report upon the condition of the district.

THE GREAT KHAN'S PARKS.  
Pleasant Grounds of the Famous Emperor of Tartary.  
Between the two walls of the enclosure which I have described, there are a variety of beautiful trees bearing a variety of fruits. There are also a number of small ponds, and a number of small bridges. The parks are covered with abundant grass, and the roads through them being all paved and raised two cubits above the surface, they never become muddy, nor does the rain lodge on them, but flows off into the meadows, quickening the soil and producing that abundance of herbage.

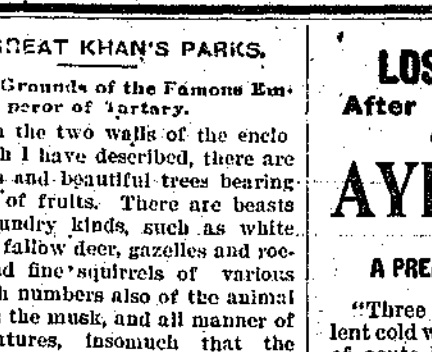

From that corner of the enclosure which is towards the northwest, there extends a fine lake containing a number of different kinds, which the Emperor had caused to be put in there, so that whenever he desired any fish he could have them at his pleasure. A river enters this lake and issues from it, but there is a grating of iron or brass put up so that the fish cannot escape in that way.

Moreover, on the north side of the palace, about a bowshot off, there is a hill which has been made by art from the earth dug out of the lake. It is a good hundred paces in height and a mile in compass. This hill is entirely covered with trees that never lose their leaves, but remain ever green. And I assure you that whenever a beautiful scene is to be seen, the Emperor goes there to see it, and he is always accompanied by a number of his favorites.

**His Good Luck.**  
The chief difference between a so-called lucky and an unlucky person seems to be, as a general thing, that one is quick to take advantage of circumstances and the other is not. In a volume entitled "Savanna River Tales," by Sherwood Bonner, a certain Frenchman tells the story of his "luck."

In the year 1839 I was a latter, but the large concerns absorbed all the custom, and I was on the brink of ruin. For many months the sole display in my show window had been a huge white fish, but with little result. What it pleased me to call a frank of genius, but which no one had noticed except to laugh at.

One day my apprentice came running in with the things that I had been waiting for. The fish was coming. I had a dangerous thing, considering his corpulence. I rushed forward and lifted him to the sidewalk without injury. His fat, however, was pitched into the gutter.

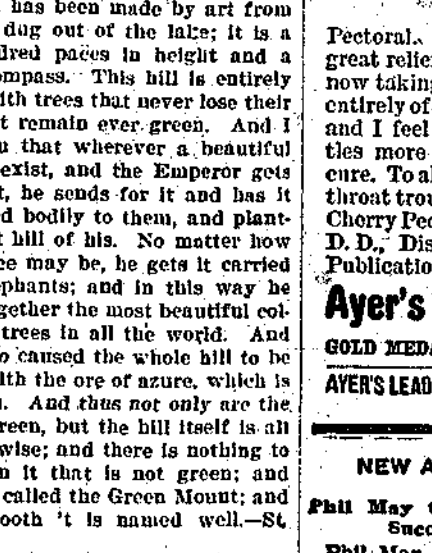

# LOSS OF VOICE

## After Acute Bronchitis

### CURED BY USING

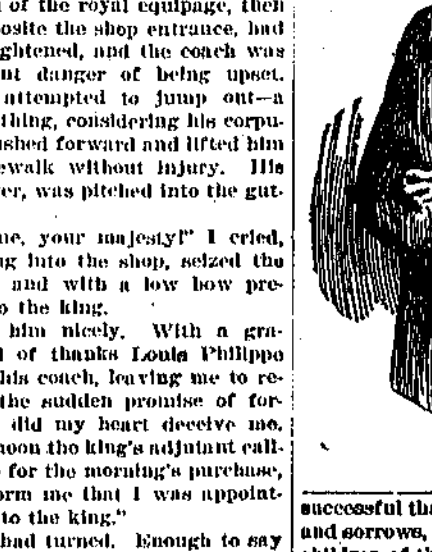

# AYER'S Cherry Pectoral

**A PREACHER'S EXPERIENCE.**  
"Three months ago, I took a violent cold which resulted in an attack of acute bronchitis. I put myself under medical treatment, and at the end of two months was no better. I found it very difficult to preach, and concluded to try Ayer's Cherry Pectoral."

# Ayer's Cherry Pectoral

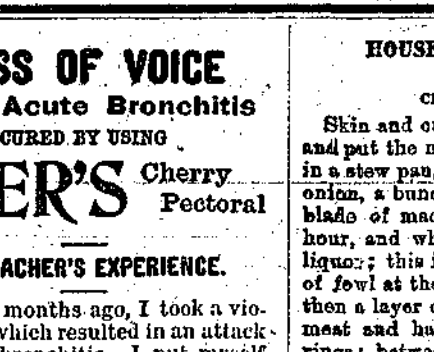

**GOLD MEDAL AT THE WORLD'S FAIR.**  
AYER'S LEADS ALL OTHER SARGAPARILLAS.

# NEW ARTIST ON PUNCH.

**Phil May** the English caricaturist, succeeds Du Maurier.  
Phil May, the famous English caricaturist, is the successor of Du Maurier as the leading artist on London Punch. Mr. May is the finest black and white artist in all England. While he will not be able to take Du Maurier's place precisely, he will be the most admirable substitute that can be had. May chose a field of exploit for himself from that of his distinguished predecessor, Du Maurier drew Mayfield and Belgravia. May caught the slums and Whitechapel. He has never been more successful than when depicting the joys and sorrows, pleasures and pains of the children of the streets and byways. In his pictures there is not a single line without meaning, not a line that is not necessary. He comes from the class that has driven to describe the human condition in the most perfect manner as an artist. He went to London and there picked up some training in his profession. He went to Australia, and by his efforts raised the Sydney Bulletin from an obscure paper to the foremost sheet in the world. Then he returned to London with a reputation and joined the staff of Punch. From that time on his life was a pronounced success. Mr. May's style is strong and vigorous, and is not encumbered with needless detail.

It is not often that a man will want to do a thing, and if he does it will require more than the average comfort-able quarters if his habits are not good.

# HOUSEHOLD MATTERS.

## CHICKEN FORTIF.

Stir and cut up the fowls into joints and put the neck, legs and back bones in a stew pan, with a little water, an onion, a bunch of savory herbs and a blade of mace; let these stew for an hour, and when done strain off the liquor; this is for gravy. Put a layer of fowl at the bottom of a pie dish, then a layer of ham, then one of forcemeat, and so on, until you have used all the fowl. Bake for about an hour and a half, and when done pour in at the top the gravy made from the bones.

# QUAKER OMELET.

When eggs are taken in preparing this is a handsome and sure dish. Three eggs, half a cupful of milk, one and a half tablespoonfuls of corn starch, one teaspoonful of salt, one tablespoonful of butter. Put the omelet pan on a fire and pour in the milk and eggs, and a cover that will fit closely on to heat. Beat well together the yolks of the eggs, the corn starch and the salt; beat the whites to a stiff froth, add to the well beaten yolks and corn starch. Stir all together thoroughly and add the milk. Put the butter in the hot pan; when melted pour in the mixture, cover and place on the stove where it will brown but not burn. Cook about seven minutes, lift, turn on a hot dish and serve with cream sauce poured around it. If the yolks and corn starch are thoroughly beaten, and if, when the stiff whites are added, they are well mixed, and the cover and pan are very hot, the cover can hardly be failure.—New York Ledger.

# ROCKING MEAT.

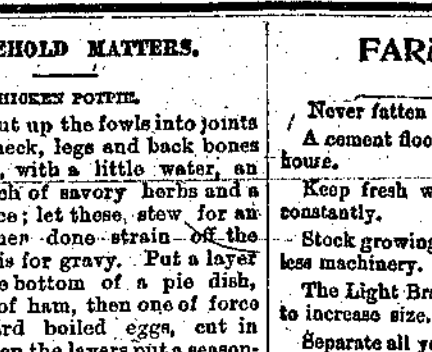

So many housekeepers, both young and old, are in doubt as to the right time to cook vegetables and meats that the following table is given with the hope that it may prove of value to some one.

**Roasting Meat.**  
Roast Sirloin Steak—Eighty minutes for each pound.  
Roast Sirloin, Well Done—Ten to fifteen minutes for each pound.  
Roast Rib or Rump—Ten to fifteen minutes for each pound.  
Roast Fillet—Twenty to twenty-five minutes.  
Lamb, Well Done—Fifteen minutes for each pound.  
Mutton, Rare—Ten to twelve minutes for each pound.  
Mutton, Well Done—Fifteen to twenty minutes for each pound.  
Pork, Well Done—Twenty-five to thirty minutes for each pound.  
Veal, Well Done—Eighteen to twenty minutes for each pound.  
Braised Meat—Three and one-half to four hours.  
Chicken—Weighing from three to five pounds, one to one and one-half hours.  
Turkey—Weighing from nine to twelve pounds, three to three and one-half hours.  
Fish—Of average thickness, weighing from six to eight pounds, one hour.  
CARE AND TENDRY.

**Sponge Cake.**—Forty-five to fifty-five minutes.  
**Plain Cake.**—Twenty to forty-five minutes.  
**Cookies.**—Ten to twelve minutes.  
**Gingerbread.**—Twenty to thirty minutes.  
**Plum Pudding.**—Two and one-quarter to three hours.  
**Trappist or Rice Pudding.**—One hour.  
**Bread Pudding.**—Thirty-five minutes.  
**Pies with two crusts.**—Thirty to forty minutes.  
**Graham Rolls.**—Half an hour.  
**Wheat Rolls.**—Ten to fifteen minutes.  
**Bread.**—Forty to sixty minutes.  
**Ricotti.**—Ten to fifteen minutes.

# Science and Invention.

A machine that splits a hair lengthwise into thirty-seven strips has been invented.  
A new razor-strop rolls up on a spring drum when not in use, and can be secured to the other side of a shelf or stand out of the way.  
The latest attachment for opera and theatre glasses consists of an eye-shield similar to that in a telescope, to steady the glasses and shade the eyes.  
The first attempt at an estimate of bacteria in butter was made in Munich in 1901. It was found that there are about 2,000,000 in a grain.  
A Southman has a patent on a bicycle which is so constructed as to be placed the wheels on a centrally mounted hub so as to give the wheel a rocking motion similar to horseback riding.  
A recently patented device for inspecting the bottoms of electric fans in heavy metal tubes, the lower end of which is closed with plate glass, an auxiliary tube contains a lamp and reflector and means for supplying oil to the flame of the lamp.  
If a woman doesn't "like a man's looks," she thinks it is excusable for her to pay twice as much for an article somewhere else.

# FARM NOTES.

Never fatten breeding fowls.  
A comest food is good for the poultry house.  
Keep fresh water before your fowl constantly.  
Stock growing involves less labor and less machinery.  
The Light Brahmas make a good cross to increase size.  
Separate all your breeders, and sell all the surplus stock.  
For eggs alone, Leghorns are best with Hamburgs second.  
By working hot water in the soil it will dry out and work fine.  
Keeping the droppings cleaned up will prevent scaly legs in fowls.  
It is nearly always best to feed whole grain to the poultry at night.  
It is well known that the feeding value of any variety of good feed, the cabbage plants will grow more starchy if the seed are sown thin.  
Root or celeriac over the tomato root will drive out insect parasites.  
Properly managed, the winter season is most profitable for poultry raising.  
No stock on the farm will more generously repay good care than the fowls.  
Pens may be planted as soon as the ground is open enough to receive the seed.  
The Bush Lima bean has stood the test of several seasons in many different localities.  
When a very early crop of potatoes is desired about the potatoes used for seed should be planted.  
Conover's Colossal, a leading sprang, has been a rival in earliness in the west of Idaho.  
Farmers who put largely in grass upon which good stock is kept are constantly growing richer.  
For growing tomatoes under glass the temperature should not be less than sixty degrees at night.  
Sold the drinking vessels not less than four times a year, and you will find its preventive of poultry disease.  
Plant more nut trees. The black walnut pays well for the space it occupies in valuable lumber, as well as in its nuts.  
If you have a disagreeable cock bird, which is fond of fighting and quarreling than breeding, remove him once; a rooster is better than his company.

# Rotary Blotter.

Rotary blotter has a wheel, on which the blotting paper is wound, and a handle to operate it.  
A dust excluder for vehicle hubs consists of a cap secured to the outer end of the hub, being easily removable.  
A combination chain's carriage and sleigh has a pair of runners which can be thrown into position below the wheels by a lever.  
A new patent consists of a sublimed lead, oil in excess of that necessary to form a mixture of proper consistency and a quantity of water.  
Match pouches to fasten to two buttons on the inside of the coat lapel, and having a rough surface for igniting the matches, have just come into use.  
A h n l package carrier for bicycles consists of a plate fastened to the handlebars by straps and having snap hooks to secure the cord or string on a package.

# Items of Interest.

Each salmon produces about twenty million eggs.  
Napoleon III. wrote a life of Caesar that ran very high.  
Nicholas, who was a king in all but name, took to playing.  
The total cultivated area in the United Kingdom is nearly 50,000,000 acres.  
The public debt of France is the largest in the world and amounts to about \$8,000,000,000.  
Ships built of steel are said to be able to carry 20 per cent more freight than those of iron.  
The present season's crop of cotton in Egypt promises to surpass all previous years in quality.  
Microscopists say that the strongest microscopes do not, probably, reveal the lowest stage of animal life.  
Central Park, in New York city, is two and a half miles long and three-quarters of a mile wide; it covers 862 acres.  
In most parts of Syria, Palestine and Arabia fig trees and date palms are counted, and a tax is levied on each tree.  
About six hundred thousand trees are annually planted by Scotch school children under the guidance of their teachers.  
Arizona has the greatest daily change of temperature on the earth's surface. There is frequently a change of 80 degrees in the twelve hours.  
The oldest university in the world is at Athens, meaning "the school situated at Athens." It is the greatest Mohammedan school, and has clear records dating 976.  
Hercules the fish with even the most needs breath, because the nerves are so thickly matted together under the skin that not even the finest point can be introduced without wounding one or more.

# Housewives Helps.

The best way to wash bed blankets is not to wring them after the last run, but to hang them on the line and let them drip dry. The nap is then not matted down and the blanket retains its beauty and new appearance.  
Frequently putting metallic or other articles on or in the piping, such things frequently cause unpleasant vibrations and sometimes injure the instrument. The more equal the temperature of the room, the better the piano will stay in tune.  
When cayenne pepper is not mixed with the thickening for soup, grind it down with the back of a spoon and stir a little liquid to it before it is thrown into the pot, so it is apt to repel in lumps, and may cause irritation of the throat when swallowed.  
The liver of the calf is better than any other, not even excepting goose liver. Lamb's liver is also better. However, milder, and less dry than those of sheep. These livers which present dark streaks and muddy spots are unwholesome and unfit to be eaten.  
Turn a delicate omelet take one egg, beat it well, add three or four drops of milk. Add three or four drops of milk. Add three or four drops of milk. Add three or four drops of milk.  
Sugar is an ancient luxury. The Chinese have been eating it for at least three thousand years.

# News of New Things.

## NOTICE TO ABSENT DEFENDANTS.

In Chancery of New Jersey.  
Between  
Camille Aichel, Complainant,  
and  
Rosa Tradelius, Emil Tradelius, and  
The Fruit Growers' Union and  
Co-operative Society, Limited, Defs.  
On Bill to Foreclose.  
To Rosa Tradelius and Emil Tradelius, de-  
fendants in the above stated cause:  
By virtue of an order of the Court of  
Chancery of New Jersey, made on the day  
of the date hereof, in a cause wherein Camille  
Aichel is complainant and you and others  
are defendants, you are required to appear,  
plead answer or demur to the bill of said  
complainant, on or before the twenty eighth  
day of January next, or the said bill will be  
taken as confessed against you.  
The said bill is filed to foreclose a mortgage  
given by Rosa Tradelius to Complainant,  
dated the twenty-ninth day of September,  
eighteen hundred and ninety, on lands in  
Town of Hammonton, County of Atlantic, in  
this State. And you, Rosa Tradelius, are  
made a defendant because you own the said  
land. And you, Emil Tradelius, are made a  
defendant because you are the husband of  
said Rosa, and have an equitable right of  
tenancy by courtesy on said land.  
Dated November 27th, 1895
