## I do not like to Hear Him Pray

I do not like to hear him pray  
Who loans for twenty-five per cent;  
For then I think the borrower may  
Be pressed for food and rent.

I do not like to hear him pray  
On bended knees about an hour,  
For grace to spend aright the day,  
Who knows his neighbor has no flour.

I'd rather see him go to mill  
And buy the luckless brother bread,  
And see his children eat their fill  
And laugh beneath their humble shed.

I do not like to hear him pray  
"Let blessings on the widow be!"  
Who never seeks her home to say:  
"If want o'ertake you come to me."

I hate that prayer, so loud and long,  
That's offered for the orphan's weal  
By him who sees him crushed by wrong  
And only with his lips doth feel.

I do not like to hear her pray,  
With jeweled ear and silken dress,  
Whose feathered wings tell all day  
And then is asked to work for less.

Such pious shavers I depise;  
With folded hands and face deaure,  
They lift to heaven their "angel eyes,"  
And steal the earnings of the poor.

I do not like such soulless prayers--  
If wrong I hope to be forgiven,  
No angel wings their upward bear,  
They're lost a million miles from heaven.

I do not like long prayers to hear  
And stand from the lips depart,  
Our Father leads a really war;  
Let words be few--He hears the heart.

## Our Washington Letter.

WASHINGTON, D. C., Jan 14, 1878.

The Women's Suffrage Convention held here on the 8th and 9th inst. be recorded as a success, whether measured by the morale of the delegates present from almost every State, the royal hospitality with which they were entertained, the comparative number and character of attendants upon the sessions of the convention, or from the respectful attention accorded by Congress. The faint resolutions introduced in their respective chambers Senator Sargent and Judge Kelly, granting them the right to be heard of Congress was defeated in the Senate by a vote of 31 to 13--all Republicans--and is still pending in the House; but a hearing was given them by the Senate Committee on Privileges and Elections, Friday and Saturday, and the subject of their request will be considered by it in a few days. A resolution was adopted by the Committee to the effect that the arguments of the lady advocates had been characterized by eminent fairness, dignity and marked ability; and no one who has watched the tendency of this agitation during the past decade, in and out of Congress, can be blind to the fact that it has made steady progress towards certain consummation. The opposition has been gradually forced from the arguments formerly most effective, to that of expediency which is about the only one now urged with any spirit.

Montgomery Blair finds his party disposed to shrink from any responsibility for the handling he introduced to the notice of the Maryland Legislature recently crying and clamoring for the undoing of "the great fraud" perpetrated by the Electoral Commission. Blair promptly disavowed any sympathy for the movement, and the effort made to identify Senator Conkling with it has proved a miserable failure, and it Blair has any reputation left save perhaps of being damaged by any wicked revolutionary project at he seems so capable of organizing, this, his latest *pan de azucar*, is thought likely to give it the finishing stroke.

The reconvening of Congress attracted but little attention, though it has had an enlivening and animating effect upon all classes. Wood succeeded in forcing through his drag-net investigation resolution, and we may expect all necessary legislation to be "drapped" as it was two years ago, in the chamber's maw. But for some Republican official who can be made to appear as officially remiss is some way that may be made to contribute to the enlargement of the bull-dozing Tammany thieving Democracy. The assurance and brazen effrontery animating the leading spirits of that notorious coalition could not be better shown than by thrusting Fernando Wood to the front in the character of a "Reformer."

Senator Conkling has formally notified Rankin and Draper that the validity of the Presidential and Departmental action had, restoring them to the positions in the Army and Navy from which they were dismissed or were permitted, as a great favor, to resign, will be located in the Senate, for the double purpose probably of barring the way of scores now waiting to take advantage of the precedent established in the cases of those named, to secure their restoration to positions forfeited by their own misconduct, and to protect the Treasury from any claim for back pay for which not one hour's service has ever been rendered.

The Mexican lobby has rattled out like a pack of cards under the testimony of Dicks, Shafter and Bullis; and the heads of the Indian Bureau employees are continually falling in the market in consequence of the revelations of the committee appointed to investigate that model concern.

The work of the Hayden surveys are making us familiar with heretofore unknown to glens, rich in minerals and of great agricultural and grazing capacity. It extends from Arizona to Montana, embracing the Territories of Utah, Colorado, Wyoming, Idaho and Dakota. The expedition when in the field is composed of 40 persons, including geologists, packers, cooks and laborers; and it is generally divided into several parties, each fully equipped and prepared to examine a specific area of country, usually about 10,000 square miles, more or less, depending upon the character of country to be examined. The field season usually lasts about 4 months, when the laborers are discharged at the starting point, the scientists return here for office duty.

This Survey has issued a series of annual reports, presenting the results in a popular form for general distribution. A series of quarto volumes are also issued, embracing purely scientific matters, for distribution to colleges, libraries and scientific specialists. A series of Bulletins are also issued in which requiring special and immediate attention may be found.

There are also the miscellaneous publications, such as meteorology, distances and altitudes catalogues, etc.

As an illustration of the esteem and appreciation in which the work accomplished is held abroad, I quote Genl. Richard Strachey of the Royal Engineers of England to a gentleman of high scientific attainments in this country: "It is an understanding in all respects most honorable to your Government and to the men of science who have been their agents in carrying it out. In truth it is, I believe, the only real scientific survey of a great country ever entered upon."

MAXWELL.

The Philadelphia North American of Tuesday has an article on South Jersey and its enterprises, which, though apparently written without actual knowledge of some things, nevertheless is important. It says:--

The vicinity of the great markets of New York and Philadelphia has tempted farmers in these new colonies largely into the truck business and fruit culture, in both of which large profits have been realized. But the city markets are now so overloaded with southern fruit and vegetables, and with apples from New England and New York, that latterly the business has been unprofitable, except in the culture of grapes. It is rather singular that no portion of the immense wastes in South Jersey has thus far been devoted to live stock, though it must be obvious that it offers a means of earning money handsomely. It ought to become an extensive dairy farming region for the production of butter and cheese for export. Canning factories, for the canning of fruits and vegetables for the general markets, increase in numbers steadily. But butter and cheese factories as yet have no existence, and yet the market for those products is an immense and valuable one. It would perhaps, have been better for South Jersey if general attention had been first given to agriculture as a permanent basis before planting manufactures. But the influence of Philadelphia and New York has given precedence to manufactures, which, therefore, have made a progress quite out of proportion to the agricultural basis.

In Delaware and eastern Maryland the policy has been reversed, and the consequences are seen in the great produce business transacted on the Philadelphia, Wilmington and Baltimore Railroad and its peninsular branches. The excursion business between Philadelphia and the seaside has drawn attention away from the more important traffic to be derived from the development of the whole of that region by a thirty agricultural population such as we see in the vicinity of the Delaware river and bay. Recent large purchases of land for the purpose of sugar beet culture look like a movement in the right direction; but live stock, dairy farming and butter and cheese factories seem to us the true line of investment. At the present time the produce brought to Philadelphia by the railroads in South Jersey is but a poor return on the capital invested in the roads. Enterprise has gone largely into the building of seaside resorts, where in midsummer the population is so large that the provisions have to be obtained from Philadelphia and New York, the agriculture of the intermediate country having been so much neglected as to be unable to afford the requisite supplies.

Abandoned His Principles.

As President, Mr. Hayes has abandoned the principles he represented as a candidate, and by the acknowledgment of every Democratic leader and every Democratic body, has adopted a policy which Mr. Tilden was pledged to enforce, and enforced it a great deal more successfully and satisfactorily than Mr. Tilden could have done or would have dared to do.

—Boston Traveller.

Chandler's Letter.

Curtis thinks that Chandler's letter is "a damaging blow to the Republican party." We think not. If the President or his friends made the farious allusion to the Republican party is not mixed up in them, but repudiates the whole business. If he did not, the sooner that fact is made apparent the better.

—Pittsburg Commercial Gazette.

A report of the wide-spread alarm in England occasioned by the threatened legislation in regard to silver, has stopped the funding of the United States six per cent. bonds, and seriously affecting our securities abroad, leads the *Evening Express*, of Philadelphia to say:--

"As we predicted, the effect of the base and dishonest policy of the silver-repudiationists, and their proposed depreciated 'silver-bills' are beginning to be seen in the loss of confidence of us, our promises and our bonds. Those who confidently placed their trust in our securities and our honor are doubtful, depressed and distrustful now. The funding of our bonds in the four per cent. is stopped, and our national credit is as far below par as our depreciated silver-dollars.

If the Silver Bill, in all its bald dishonesty and glaring falsehood, should pass, the nation's great lie will make her the mock of the world. The holders of our bonds will demand their payment at the earliest opportunity; business and commercial confidence will be destroyed, and a money-panic worse than any that has preceded it will assuredly visit us, with all its miserable train of prostrated industries; stagnant commerce; closed warehouses; failures, suspensions, panic and ruin. "The way of the transgressor is hard;" whether that evil-doer be an individual or a nation, the same principles of honesty, truth and justice are the safeguards of both alike, and the punishment is equally certain if they be ignored or violated. Honor, respect, esteem, prosperity and success attend their observance. Degradation, contempt, disaster and distress wait ever on those who depart from their guidance; and the world waits now to see whether the United States of America shall hold those glorious tenets of honor and honesty which our fathers taught, or shall prove false to their pledges, become a dishonored nationality, and debate alike their coinage and themselves.

If this loss of confidence in our bonds and distrust of our honor are already felt, even before the fatal step is taken, what may we expect when the remediless plunge is made into the dark gulf of national dishonor. If these be the things "in the green leaf what shall be done in the dry?" Would to heaven that our leaders be wise in time!

The World pays a high compliment to Pres. Hayes. It says: "Had Mr. Tilden been inaugurated as President, he could not possibly have made a more thorough piece of work than Mr. Hayes has made of the pacification of the South." The President has accomplished what no President has ever been able to accomplish before. He has won over to his side the men who were most unrelenting in defiance and belittling him, and has lost nearly all the friends who made him President.—*Comm. Ad.*

Pullman cars are now running through Philadelphia, from Boston to Savannah, Georgia, without alighting and with the same conductor, the whole distance of 1131 miles, passing through eleven States and the District of Columbia, over the lines of fourteen corporations. There is a stop in Washington sufficiently long to allow those who wish to see much of our National Capital.

## Sheriff's Sale.

By virtue of a writ of fieri facias, to me directed, issued out of the Court of Chancery of New Jersey, will be sold at public vendue, on

Tuesday, January 20th, 1878,

at 2 o'clock in the afternoon of said day, at the hotel of Louis Kuehler, Egg Harbor City, New Jersey. All the two tracts of land situate in the township of Hammonton, county of Atlantic and State of New Jersey, bounded as follows:--

No. 1. Begins at a pine knot in the middle of the road leading from Buena Vista to the residence of Rebecca Panooset, five chains and eighty-seven links easterly from the road leading from Buena Vista to Buena Vista; thence north twenty-one degrees and twenty minutes, west one chain and ninety-three links to a stone and pine knot; thence north twenty-six degrees and twenty minutes, east twenty-two chains and eighty-two links to a pine knot; thence north sixty-one degrees and thirty minutes, east seventeen chains and sixty links to a pine knot, marked for a corner; thence north fifteen degrees and ten minutes, east one chain and eighty links to a line run out by the town of Joseph Cooper; thence by said line about north sixty degrees east fourteen chains and sixty-seven links to a corner of Wesley Vanaman; thence bounding Queen's south five degrees west twenty-two chains and thirty-seven links to a pine knot; and thence leading to the residence of Rebecca Panooset; thence along the line of said road north eighty-three degrees and thirty minutes, west forty-seven chains and forty links to the place of beginning, containing sixty-four and

seventy-eight hundredths acres of land more or less.

No. 2. Begins at a corner in the road leading from the residence of Rebecca Panooset to the saw-mill on Deep Run, corner of Rebecca Panooset's farm; thence, north five degrees, east sixty-six chains and twenty-one links, crossing Five-mile branch to a corner; thence, north eighty-eight degrees and twenty minutes, east thirty-nine chains and sixty-two links to a corner; thence, south twenty-three degrees, west seventy-five chains and forty-eight links to a corner in said road; thence along the road north seventy-two degrees and twenty minutes, west ninety-four links to a pine stump; thence still along the said road north eighty-three degrees and thirty-five minutes, west fifteen chains and twenty links to the beginning; containing one hundred and eighty-nine and sixty hundredths acres, more or less.

Sold as the property of Ambrose Panooset and wife, James Whiteall, et al. defendants, taken in execution at the suit of Lewis Mulford, and Firman L. Mulford, complainants, and to be sold by

S. V. ADAMS, Sheriff.

Dated Nov. 28, 1877. Pres. fee, \$3.10

## COMMISSIONER'S SALE.

Atlantic Circuit Court.—In the matter of division of lands on the application of Charles P. Abbott, In Partition.

By virtue of an order made by Alfred Reed, Esq., Judge of the Circuit Court in and for the County of Atlantic, on Tuesday, the eleventh day of September, last, as of the Term of September, we, the subscribers, commissioners appointed in the above named cause will expose and sell at public vendue, on

Saturday, Feb. 9, 1878.

at two o'clock in the afternoon of said day, at Louis Kuebler's hotel, Egg Harbor City, N. J., all the following described tracts of land and premises, situate as hereinafter described, being the lands and premises of which John Abbott died, viz:--

No. 1.—Being a tract of land and premises called and known as the "Homestead," situate in the township of Mullica, county of Atlantic, and adjoining lands of Ephraim Tomlinson, Augustus Voss and others, being a part of the premises conveyed to said John Abbott, deceased, by Jesse Richards, by deed dated May 25, 1849, and recorded in the Atlantic county clerk's office in book F of deeds, page 618, containing ninety-three acres and twenty-five hundredths, more or less.

No. 2.—Being a tract of land and premises situate in Mullica township, county aforesaid, near the settlement or glass factory known as New Columbia, and containing ten acres, and is the same premises conveyed to John Abbott, deceased, by Jesse Richards, by deed dated December 14, 1853, and recorded in the Atlantic county clerk's office in book H of deeds, page 85.

No. 3.—Being a tract of land and premises situate in Mullica township, county aforesaid, and containing twenty-three acres, seven hundredths, being a part of the same premises conveyed to said John Abbott, deceased, by Joseph S. Joyce and wife and Amos J. Marple and wife, by deed dated April 24, 1860, and recorded in the Atlantic county clerk's office in book P of deeds, page 231.

No. 4.—Being a tract of cranberry land and premises situate in the township of Mullica, county of Atlantic, containing sixteen acres, more or less, being the same premises conveyed to John Abbott, deceased, by Lloyd W. Bickley, by deed dated June 12, 1875, and recorded in the Atlantic county clerk's office in book No. 52 of deeds, page 101.

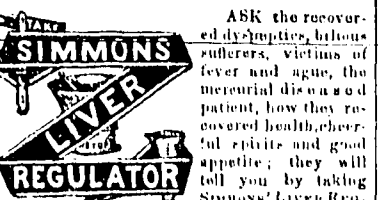

No. 5.—Being a tract of land and premises situate in the township of Mullica, county of Atlantic, containing five acres, more or less, and is a part of the same premises conveyed to said John Abbott, deceased, by John A. Brown and wife, by deed dated September 1, 1876, and recorded in the Atlantic county clerk's office in book No. 31 of deeds, page 231.

Persons wishing to purchase and desiring a view of the premises will call upon Jesse R. Abbott or Charles P. Abbott.

Conditions made known at sale.

DAVID S. BLACKMAN,  
RICHARD J. BYRNES,  
DANIEL E. ISZARD,  
Commissioners.

HARRY L. SLAKE, Attorney.  
Dated October 3, 1877. Pres. fee, \$10.50

ASK the recovered sufferers, victims of fever and ague, the mercurial disease and patient, how they recovered health, cheerful spirits and good appetite; they will tell you by taking SIMMONS' LIVER REGULATOR.

The Cheapest, Finest and Best Family Medicine in the World.

For DYSPEPSIA, CONSTIPATION, Jaundice, Bilious attacks, SICK HEADACHE, Colic, Depression of Spirits, SORE THROAT, Heartburn, &c., &c.

This universal Southern Remedy is warranted not to contain a single particle of Mercury, or any injurious mineral substance, but is

## PURELY VEGETABLE.

Containing those Southern Roots and Herbs, which an all-wise Providence has placed in countries where Liver Diseases most prevail. It will cure all diseases caused by Derangement of the Liver and Bowels.

The SYMPTOMS of Liver Complaint are a bitter or bad taste in the mouth; pain in the Back, Sides or Joints, often mistaken for Rheumatism; Sour Stomach; Loss of Appetite; Humors alternately constipated and lax; Headache; Loss of memory, with a painful sensation of having failed to do something which ought to have been done; Debility; Low Spirits; thick yellow appearance of the skin and eyes; a dry Cough often mistaken for consumption.

Sometimes many of these symptoms attend the disease, at others very few; but the Liver, the largest organ in the body, is generally the seat of the disease, and if not regulated in time great suffering, wretchedness and DEATH will ensue.

I can recommend as an efficacious remedy for disease of the Liver, Heartburn and Dyspepsia Simmons' Liver Regulator.

LEWIS G. WUNDER,  
1025 Master St.,  
PHILADELPHIA.

ASSISTANT POST MASTER, PHILADELPHIA.

"We have tested its virtues personally, and know that for Dyspepsia, Biliousness and Throbbing Headache, it is the best medicine the world ever saw. We have tried forty other remedies before Simmons' Liver Regulator, but none of them gave us more than temporary relief; but the Regulator not only relieved but cured us."—Editor Telegraph and Messenger, Mason, Ga.

MANUFACTURED ONLY BY  
J. H. ZEILIN & CO.  
PHILADELPHIA.

Price \$1.00. Sold by H. D. SMITH, Druggist,  
Hammonton, N. J.

## EATON GOLD and SILVER

## REDUCTION COMPANY

Office--No. 20 Church St., N. Y.

GEN'L JOHN C. FREMONT, President.

PROF. A. K. EATON, Vice-President.

W. W. HANLY, Secretary.

This Company is founded upon discoveries, inventions and improvements in the reduction and treatment of Gold and Silver and other ores, which have recently been perfected. It is intended that its business shall be conducted by works of large capacity, which, for governmental reasons, will be near the city of New York, as well as by branch works in the mining districts, and by sale of its patent rights to other reduction works in this and foreign countries. The discoveries and improvements upon which the Company is based, have been made by Prof. A. K. Eaton, one of the ablest chemists and metallurgists of the present day. They have been reached during a practical and personal experience in mining and smelting occupations extending over a period of more than thirty years.

Twenty-six years ago Mr. Eaton invented and patented the Amalgamating Plates, which have ever since been in use at all the Gold and Silver Mills throughout the mining region. If the use of these plates were discontinued today, the yield of gold would probably be diminished one-half. In the same way his later discoveries are valuable and effective, and are marked by the same certainty and simplicity. The ores of nearly all the gold and silver mines are rendered more or less difficult by the presence, in combination, of zinc, sulphur, and other elements which gives them a refractory character, and which involves great expense and time in working, and great loss of gold and silver.

It is not too much to say that the great mountain region West of the Mississippi and Missouri rivers is occupied and populated only on account of its mines of gold and silver, and other metals. Over this whole country many of these refractory ores are left unworked and many hundred thousand tons of ore trampled because their working would be too difficult and expensive under present modes of treatment. To all these ores Mr. Eaton's processes directly apply. They render their working comparatively easy and inexpensive, and give immediate value to this idle property, and employment to many thousands of unemployed men. These processes increase the yield as at present had, by from ten to forty per cent. The reports of the Consolidated Virginia and California mines, for the year ending December 31, 1876, show that only 752 per cent of the gold and silver contained in the ore is obtained by their present working and the combined yield of those two mines for the year was \$30,062,782.00--thirty millions, sixty two thousand, seven hundred and eighty-two dollars. By the Eaton processes, this yield could have been increased by six or seven millions of dollars. The gold mines of Senator Jones, in the San Joaquin Valley, gave him only 60 per cent, of what the ore contains. These mines are quoted because they are well known, and because every application that money and art could devise, under the ablest management, has been used to increase their production. Under Mr. Eaton's processes, it is claimed that out of most ores 97 per cent.—practically all—of the gold and silver can be obtained at much less cost of time and money than is at present required; that Base Bullion can be treated and refined at one-third the cost, and can fourth the time at present used. In reference to this latter process, Prof. Torrey, U. S. Mint, New York, says: "I believe it to be an entirely new and very useful process. Theoretically, the mechanical and chemical principles on which it is based are correct."

Large amounts of gold and silver ore are brought to this city for treatment and for shipment abroad, as also are large quantities of Base Bullion. The process of reduction is greatly facilitated by working together ore of a different character, and the Base Bullion now sent abroad can be refined for treatment at the works in New York, under the improved process. For the purpose of a general demonstration of these processes, the Company has granted a limited right to a party in New York who is erecting works capable of treating twenty-five tons of ore and twenty-five tons of Base Bullion daily, and the buildings and machinery for this purpose are in greater part ready.

They now desire to provide for the immediate erection of the larger works by sale of a limited portion of their capital stock, and it is in order to procure the required means without unnecessary sacrifice, that their enterprise is in this way laid before the public. For this purpose a sufficient amount of stock will be sold at one dollar per share, being 70 per cent. of its par value; and it is requested that persons who may wish to purchase, will apply personally, or by letter, to the Secretary of the Company, P. O. box 874, to whom all remittances for shares should be made, and from whom the Prospectus and other and more full information can be obtained.

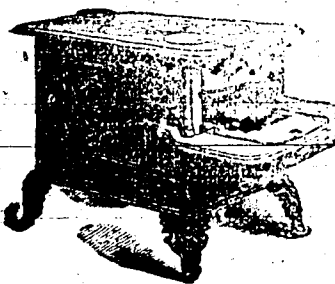

This image shows a vertical strip of a document page. On the left side, there is a dark, textured binding edge. The right side shows a white page with horizontal ruling lines. Faint, illegible text is visible on the page, but it is too blurry to read. The overall appearance is that of a scanned document edge.

WANAMAKER & BROWN respectfully  
announces that their Autumn and Winter  
Fashions in Clothing for Men and Boys  
are ready. The great buildings at Sixth  
and Market are crowded from top to  
bottom with such Clothing as merits the  
confidence of the people.

WANAMAKER & BROWN'S Cloths and  
Cassimeres are, in many instances, made  
expressly for them. No house in the trade  
confines itself so exclusively to the first-  
class manufacturers. Indeed, a long and  
mature experience is necessary to know  
just what goods to select and make up.

WANAMAKER & BROWN'S Order De-  
partment will be found full of fabrics  
of every good kind, either Novel and  
Fashionable styles or the plainer and  
more useful things. Talented cutters, who  
have been successful for years in our  
service, are in waiting to make garments  
according to the ideas of the people who  
are to wear the goods. Good hands are  
employed to make up, and only good  
trimmings used.

WANAMAKER & BROWN'S Ready-  
Made Department offers every accommo-  
dation to those who do not care to go  
through the process of measurement. The  
stock in all Departments for Men and Boys  
is immense and complete, and does not  
lack in style, workmanship or finish,  
while the prices can be proven to be  
lower, if not quite, 25 cents on the dollar  
than the market.

WANAMAKER & BROWN'S Little Boys'  
and Youths' Clothing has always been a  
well cared for and prominent feature of  
the business. All ages can be fitted, and  
the styles are not surpassed—the "fit"  
have always been the subject of admiration.

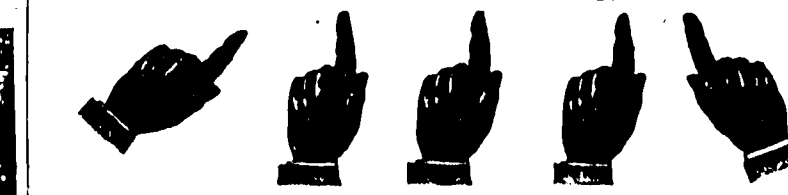

WANAMAKER & BROWN'S Shirt, Neck-  
tie, and Hosiery counters enable their  
customers to get complete outfits at more  
advantageous rates than they expect.
