DR. JOHN BULL'S Smith's Tonic Syrup FOR THE CURE OF FEVER and AGUE Or CHILLS and FEVER, AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain to cure, if its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VEGETABLE FAMILY PILLS will be sufficient.

BULL'S SARSAPARILLA is the old and reliable remedy for impurities of the blood and scrofulous affections—the King of Blood Purifiers.

DR. JOHN BULL'S VEGETABLE WORM DESTROYER is prepared in the form of candy drops, attractive to the sight and pleasant to the taste.

THE OLD ELM TREE.

As I sat
beneath
an old elm
tree, the wind
wont whistling by.
It beat its toughs
and softly breathed the
following with a sigh: "I
have lived here for many a year
and seen the summer come and
go. The springtime with its flowers
and rain, the autumn with its fruit
and grain, the winter with its chilling
blast, when with snow and ice the sky
is overcast. In summer-time beneath my
shade have children often played, and oh
how oft beneath my boughs have lovers
renewed their plighted vows, and many a time the
old and feeble have sought my shade to shake
their pipes or play the needle; and thus I
been with smiles and tears I have watched
them come and go for three-score years,
and many a tale I could tell of
what in that time befell. But age
is creeping o'er my head
and I fear my roots
are getting
dead
and
soon
I'll w-
ither
and
decay
like
the
who sought
my shade each day.

MR. EDITOR.—Why is it that we can hardly pick up a paper that has not something to say about the wonderful red sunsets? Some advance one theory and some another, to account for the phenomenon, but all alike seem to be in the dark. Now I would suggest that when the coming wisecrack does discover the cause, he goes a little further and explains the red sunsets. For several mornings, during the past few weeks, the view has exceeded in grandeur, any, or all the sunsets I have yet witnessed. Possibly I may be almost the only one who has seen the morning display, but if so, it must be because I am emphatically, an

A friend of our, by choice an Episcopalian, hands us the following, requesting its publication:

The spiritual condition of the Church of England was considered in an address to his diocesan convention on the 6th inst. by Dr. Ryle, the Bishop of Liverpool. He is reported as having used this alarming and very remarkable language:

"It is my firm conviction that we are in danger, and that unless a God of mercy interposes in some marvellous way our dear old church cannot live much longer, and must go to pieces and perish. I do not see the slightest likelihood of either of the two great parties or schools of thought in our communions—who are divided about Ritualism—giving way or tolerating one another. Now, mind, I am not saying now which is right and which is wrong. The one party seems determined to go back behind the Reformation and reintroduce things which our reformers rejected; the other party is equally determined to stand fast and have no change. There can only be one end to this state of things. If God does not help us, the church must die. I have no doubt we deserve no better when I think of our past unfaithfulness and our many sins of omission. But I cannot see the apparently approaching death of such a grand church as the Reformed Church of England, with such vast fields of usefulness open to her, without deep sorrow; and so I say to all, Pray, pray, pray for the Church of England."—New York Observer.

From the Capital.

WASHINGTON, D. C., Jan. 19, 1884. The Mexican treaty, which the Senate failed by one vote to ratify last week, came up again to day for action, but will probably not be ratified. It is popularly known as "the Grant treaty," because the general was the most conspicuous of the United States Commissioners who negotiated it. Some votes were thrown against it because Senators thought it designed chiefly to aid the American speculators who are operating in Mexico. The two Roadmaster Virginia Senators, who would have given the treaty the necessary two thirds, voted against it because Mexican tobacco was put on the free list.

By the way, there is a movement here for a revival of the "reciprocity treaty" with the Canadian Provinces, but this, too, meets with no great favor in Congress or with the administration. There seems to be a greater willingness on the part of the Dominion Government than there is on the part of this Government to reciprocate; and the American ex-

porters who go to Ottawa asking favors are not likely to get much consolation; so long as the treaty-making power on this side of the line maintains an attitude on the subject so suggestive of indifference or indecision.

It is expected there will be a warm contest when Chairman Cobb's bill to forfeit public lands granted to railroads, comes up for discussion. I don't mean that "the lobby" will control any Congressmen, but that a decided difference of opinion exists as to the powers of Congress in the premises, many able members holding that in most of the cases, forfeiture, to be effectual, must be through judicial proceedings. Mr. Cobb and most of his committee hold to the contrary opinion.

The Garfield Memorial Church was dedicated last Sunday. The President and many other distinguished gentlemen were present. According to the excellent custom of the people of the denomination, the church was free from debt before the dedicatory services were performed.

Both those friendly to and those opposed to the bill for the relief of Gen. Fitz John Porter, say, that the bill will pass at this session. The vote in the House on Friday, on a motion to take the bill up out of its order, was looked upon as a test vote, and was 158 for, to 78 against. But the discussion will be a long one. It is the same bill that passed the Senate during the last Congress.

The emphatic vote by which \$1,000,000 was appropriated for Mississippi river improvements last week seems to gratify everybody. The money was needed for immediate use, and, very properly, discussion as to the methods of improvement were deferred till the much larger appropriation for the full year shall come before Congress.

There is a large majority in both Houses favorable to liberal action, but a disposition also to do all that can be done by legislation to force a judicious use of the survey.

HOWARD

Gov. Abbott and his fellow-Democrats this week appointed Morris Hamilton, of Camden, State Librarian, in place of Capt. McFarland, a one-legged soldier, who has been an efficient Librarian since 1873. On this, the first opportunity a Democratic worker has been rewarded, as the Governor promised soon after his nomination.

Ayer's Pills cure constipation, improve the appetite, promote digestion, restore healthy action, and regulate every function. They are pleasant to take, gentle in their operation, yet thorough, searching, and powerful in subduing disease.

There was a young fellow named Ned
Who slid down hill on a sled,
Till the sled struck some gravel,
Oh, my! how he stood on his head!

"Don't talk to me about beginning at the bottom of the ladder!" observed a "crushed" actress to a friend: "I began there ten years ago, and I'm there still. If it was to do over again, I'd begin at the top. It's much easier to fall down than to climb up."

Said a boy to a larger one eating an apple:

"Will ye gimme a bite?"
'Naw,' discouragingly.
'Will ye gimme the core?'
'There ain't goin' to be no core,' annihilatingly.

A little ice on a pavement caused more injury to General Grant than all the bullets that whistled around him during four years of the greatest war the world has ever seen.

The Japanese Premier, Prince Kung, addressed General Grant when he was in Japan in English, so called. Endeavoring to compliment him by assuring him that he was born to command, he said: "Sire, brave generale, you vas made to order."

Ayer's Sarsaparilla, being highly concentrated, requires a smaller dose, and is more effective, dose for dose, than any other blood medicine. It is the cheapest, because the best. Quality and not quantity should be considered.

Several hundred colored people have abandoned their homes in the upper and middle counties of South Carolina in the past two or three months, and have left for Arkansas and Texas. One hundred colored laborers have gone to the turpentine farms in Georgia in the last few weeks.

The Secret

of the universal success of Brown's Iron Bitters is simply this: It is the best Iron preparation ever made; is compounded on thoroughly scientific, chemical and medicinal principles, and does just what is claimed for it—no more and no less.

By thorough and rapid assimilation with the blood, it reaches every part of the system, healing, purifying and strengthening. Commencing at the foundation it builds up and restores lost health—in no other way can lasting benefit be obtained.

29 Dearborn Ave., Chicago, Nov. 7.
I have been a great sufferer from a very weak stomach, heartburn, and dyspepsia in its worst form. Nearly everything I ate gave me distress, and I could eat but little. I have tried everything recommended, have taken the prescriptions of a dozen physicians, but got no relief until I took Brown's Iron Bitters. I feel none of the old troubles, and am a new man. I am getting much stronger, and feel first-rate. I am a railroad engineer, and now make my trips regularly. I can not say too much in praise of your wonderful medicine. D. C. MACK.

BROWN'S IRON BITTERS does not contain whiskey or alcohol, and will not blacken the teeth, or cause headache and constipation. It will cure dyspepsia, indigestion, heartburn, sleeplessness, dizziness, nervous debility, weakness, &c.

Use only Brown's Iron Bitters made by Brown Chemical Co., Baltimore, Crossed red lines and trade-mark on wrapper.

TUTT'S PILLS

**TORPID BOWELS,
DISORDERED LIVER,
and MALARIA.**

From these sources arise three-fourths of the diseases of the human race. These symptoms indicate their existence: Loss of Appetite, Bowels constive, Sick Headache, Fullness after eating, aversion to exertion of body or mind, Erection of food, Irritability of temper, Low spirits, A feeling of having neglected some duty, Dizziness, Fluttering at the Heart, Dots before the eyes, highly colored Urine, CONSTIPATION, and demand the use of a remedy that acts directly on the Liver. As a Liver medicine TUTT'S PILLS have no equal. Their action on the Kidneys and Skin is also prompt; removing all impurities through these three "scourers of the system," producing appetite, sound digestion, regular stools, a clear skin and a vigorous body. TUTT'S PILLS cause no nausea or griping nor interfere with daily work and are a perfect

ANTIDOTE TO MALARIA.

HE FEELS LIKE A NEW MAN.
"I have had Dyspepsia, with Constipation, two years, and have tried ten different kinds of pills, and TUTT'S are the first that have done me any good. They have cleaned me out nicely. My appetite is splendid, food digests readily, and I now have natural passages. I feel like a new man." W. D. EDWARDS, Palmyra, O. Sold everywhere, 25c. Office, 41 Murray St., N.Y.

TUTT'S HAIR DYE.

GRAY HAIR ON WHISKERS changed instantly to a GLOSSY BLACK by single application of this DYE. Sold by Druggists, or sent by express on receipt of \$1. Office, 41 Murray Street, New York. TUTT'S MANUAL OF USEFUL RECEIPTS FREE.

GRATITUDE.

For every day when I am able to see you, I am grateful. For every day when I am able to hear you, I am grateful. For every day when I am able to feel you, I am grateful. For every day when I am able to think of you, I am grateful. For every day when I am able to love you, I am grateful.

fact made even the commonplace remarks of John Reading seem almost brilliant. Marian in a moment of triumph, could not but admit her mother's cleverness. "Mamma does not think of the man's ideas as she does a scoundrel old silk dress and makes them nearly as brilliant." "When, after a most wearisome evening for one, at least, of the quartet, that looked so cozy as they sat around the fire, John Reading had gone to his club and the two girls to their rooms, Mrs. Lang sat thinking till the embers faded to a sullen glow; her reflections were far from agreeable.

"If I have overrated my influence with Marian," she thought, "if she should refuse John—what certainly had a defiant air to-night—what will become of us? The neighbors say he is a hard man; but that may be from jealousy of his attention to me. I have striven all these years to give the girls a chance to make a good marriage; and now, when the hope seems near fulfillment, it will be child to dare to defeat my plans! Oh, it is too harassing! I will ever a poor mother so wretched as I?!"

She wrote a tear-blistered letter to her mother, telling her how she had found notes of John Reading's by mistake as she was searching for a letter for Marian. "Mamma must know she had not meant to be dishonored; how she was wretched in her present life, with its shame and attempts to keep up a ladylike appearance before the world of people richer than themselves; now she could not marry John Reading if he asked her, as she knew was expected of him; so she would go away to a school friend on whose help she could rely, and try to get some employment. She would save every farthing she earned, and send to John Reading to pay the disinterested debt."

"And please, dear mamma," was the beseeching end of this midnight epistle. "do not, by the love you bear for your children—which I know has urged you to this false step—please do not borrow any more money! I am very sorry for some hard thoughts I have had of you, and already regret the unkind things I said of you in my anger; and have left Rita all the things of mine of which she can possibly make use—I know she has always admired my sea-blue jacket. When you read this, I shall be in my room, and I shall be very glad to see you. Do not write to me to change my mind, for I am fully determined on my present course."

"For shame," Rita cried Marian indignantly. "How dare we pay it, I should like to know?" "You do know, my dear Marian; but don't be so sensitive—last night, almost violent. That last more unkindly stamp of the foot quite suggested an earthquake."

"Oh, if there could only be an earthquake that would swallow us all up together!" "Now you are childish, Marian. An earthquake? No, I thank you; leave me out of it, please—I have not yet worn my new plush costume. Any way postpone it till after the next vacation concert."

"If the costume were mine, I would send it with my compliments to cousin John, as you call him, although I could never make out why, his money, of course, paid for it."

"Give back my brown plush costume! Marian, you are certainly insane. There is the tea bell. Let us go down, my much troubled elder sister; and try to smile upon your future for his generosity."

Marian moved away, followed leisurely by Rita; and in the pleasantly lighted parlor a daintily spread little tea table was awaiting them. Mrs. Lang was already at its head, and "cousin John," laying down the evening paper, looked up approvingly at Marian's flushed cheeks as she entered.

"Mademoiselle, you are brilliant to-night!" he said, with rather an awkward attempt at a courtly bow. Marian could not force a polite smile, but grimly took her seat; and her thoughts were none too amiable.

"John Reading has an air of proprietorship," she thought. "However, he is not quite master of the situation yet. Mamma's sale is by no means effectual. What a red face he has! And such teeth! He probably chomped tobacco before he was rich enough to buy such good cigars, as well as a wife. Oh, how hard I feel toward everybody!"

Cousin John ate his muffins and admired Marian; Rita discoursed placidly about various topics of the day. Mrs. Lang, with an occasional anxious glance at her elder daughter, endeavored to make herself agreeable to her guest. Her fattery was most delicate and subtle, and her watchful

traveler and warmly welcomed. "But I must tell you how I am. I have run away from mamma and John Reading."

"John Reading," cried Mr. Hartley, "the scamp who is a notorious land shark, and trying this very minute to cheat me out of the very prettiest girl property in the world! What claim can he have upon my Marian?"

"We owe him little," said Marian, with downcast eyes. "Very well," said Mr. Hartley, "I will simply pay him, and be married with clear conscience as soon as the law allows."

The recreant knight having at last discovered, Mrs. Lauriston on coming to take the tired guests to bed, found her resting happily against Mr. Hartley's shoulder.

Hon. Alex. Deimer, speaking to a reporter of his journey to Spain, where he went to inspect some ancient gold mines, said: "The gold mines in Leon and Galicia. The principal one—that of Las Medulas—is in the province of Leon, in a fork formed by the rivers Sil and Cabrera. The route from London is by Paris, Bordeaux, Biarritz, Irun, Vitoria, Pampelona, Palencia, Leon, Astorga, Ponferrada and Domingo Fuentetaja. The general altitude of the country near the gold mines is about half a mile above the level of the sea."

"Will you describe the mines?" "The mines of Las Medulas consisted originally of about 600 acres of unworked gravel, lying between the Cabrera and the Sil. In some places this bed of gravel was 700 feet in depth. From this it shelled down gradually to a level with the soil. The Romans washed about 450 acres of the deposit and left about 150 acres, which still stand. The gravel contains about 25 cents in gold to the cubic yard, and with plenty of water and a good 'dum' or place of deposit for the debris, this would be very rich for hydraulic mining. But the gravel banks are so high—700 feet above the level of the sea—that the adjacent stream can furnish a head of water to wash it. The Romans brought their water from the Cabrera, a stream that rises in the Penedillo mountains, thirty miles distant. They cut ditches in the solid rock, carried water down the valley of the Cabrera in wooden flumes, and thus they brought it to Las Medulas. They cut seven different lines of ditches above the other. These are plainly discernible to-day, although they are too much ruined by the elements to be traced again. The only way to bring a head of water to these mines is to follow closely in the footsteps of the Romans. Their ditches are as perfect as any that can be constructed to-day. They are about three feet wide at the bottom and five feet at the top. They have a grade of pitch of about one foot to the mile, so that all the grade the Romans lost from the Cabrera to Las Medulas scarcely exceeds thirty feet. In many places they tunneled a water-way through the gravel, and in one instance through the solid rock."

"How were Roman mines worked?" "After bringing the water to the top of the gravel bank they bored a line of holes parallel with the face of the latter and let them fill with water. The result of this was that in a short time the face of the bank gave way, and an immense amount of gravel was precipitated below. The water continuing to descend, the gravel disintegrated and began to flow or slip downward towards the 'dum.' On its way down it was washed by slaves and captives of war; some times in wooden bowls, at others in trenches cut in the bed-rock, or formed of timber. The gold being thus separated from the gravel, the latter was allowed to be carried by the water down the dump until it fell into the river Sil, whose annual floods carried it into the Minho, and thence into the ocean."

"Was there no accumulation of debris?" "Immense. The floods of the Sil only carried off the silt and fine sand. The coarse sand and stones remained behind."

"But the photograph of the lady in your trunk? Surely she is your wife?" "She was a dearly loved sister who died a year ago and left her delicate little son to my sole care. I have brought him with me here for change of air and scene."

Marian's face had during this explanation grown terribly red, which she would have given words to prevent; and when Mr. Hartley looked at her with meaning she could scarcely understand, she turned suddenly pale, and would have fallen but that he held out his arm to support her.

"The poor darling is over tired," cried Mrs. Lauriston, sympathetically. "I will call Charles to help her up to her room, and she shall be made to go to bed at once."

But before Charles could be found, Mr. Hartley had kissed Marian, and begged that she would not send him away because he had loved her so short time. Lauriston had gone on a few days' visit to her relatives. So, when

from the first," she said, simply. "But I must tell you how I am. I have run away from mamma and John Reading."

"John Reading," cried Mr. Hartley, "the scamp who is a notorious land shark, and trying this very minute to cheat me out of the very prettiest girl property in the world! What claim can he have upon my Marian?"

"We owe him little," said Marian, with downcast eyes. "Very well," said Mr. Hartley, "I will simply pay him, and be married with clear conscience as soon as the law allows."

The recreant knight having at last discovered, Mrs. Lauriston on coming to take the tired guests to bed, found her resting happily against Mr. Hartley's shoulder.

Hon. Alex. Deimer, speaking to a reporter of his journey to Spain, where he went to inspect some ancient gold mines, said: "The gold mines in Leon and Galicia. The principal one—that of Las Medulas—is in the province of Leon, in a fork formed by the rivers Sil and Cabrera. The route from London is by Paris, Bordeaux, Biarritz, Irun, Vitoria, Pampelona, Palencia, Leon, Astorga, Ponferrada and Domingo Fuentetaja. The general altitude of the country near the gold mines is about half a mile above the level of the sea."

"Will you describe the mines?" "The mines of Las Medulas consisted originally of about 600 acres of unworked gravel, lying between the Cabrera and the Sil. In some places this bed of gravel was 700 feet in depth. From this it shelled down gradually to a level with the soil. The Romans washed about 450 acres of the deposit and left about 150 acres, which still stand. The gravel contains about 25 cents in gold to the cubic yard, and with plenty of water and a good 'dum' or place of deposit for the debris, this would be very rich for hydraulic mining. But the gravel banks are so high—700 feet above the level of the sea—that the adjacent stream can furnish a head of water to wash it. The Romans brought their water from the Cabrera, a stream that rises in the Penedillo mountains, thirty miles distant. They cut ditches in the solid rock, carried water down the valley of the Cabrera in wooden flumes, and thus they brought it to Las Medulas. They cut seven different lines of ditches above the other. These are plainly discernible to-day, although they are too much ruined by the elements to be traced again. The only way to bring a head of water to these mines is to follow closely in the footsteps of the Romans. Their ditches are as perfect as any that can be constructed to-day. They are about three feet wide at the bottom and five feet at the top. They have a grade of pitch of about one foot to the mile, so that all the grade the Romans lost from the Cabrera to Las Medulas scarcely exceeds thirty feet. In many places they tunneled a water-way through the gravel, and in one instance through the solid rock."

"How were Roman mines worked?" "After bringing the water to the top of the gravel bank they bored a line of holes parallel with the face of the latter and let them fill with water. The result of this was that in a short time the face of the bank gave way, and an immense amount of gravel was precipitated below. The water continuing to descend, the gravel disintegrated and began to flow or slip downward towards the 'dum.' On its way down it was washed by slaves and captives of war; some times in wooden bowls, at others in trenches cut in the bed-rock, or formed of timber. The gold being thus separated from the gravel, the latter was allowed to be carried by the water down the dump until it fell into the river Sil, whose annual floods carried it into the Minho, and thence into the ocean."

"Was there no accumulation of debris?" "Immense. The floods of the Sil only carried off the silt and fine sand. The coarse sand and stones remained behind."

"But the photograph of the lady in your trunk? Surely she is your wife?" "She was a dearly loved sister who died a year ago and left her delicate little son to my sole care. I have brought him with me here for change of air and scene."

Marian's face had during this explanation grown terribly red, which she would have given words to prevent; and when Mr. Hartley looked at her with meaning she could scarcely understand, she turned suddenly pale, and would have fallen but that he held out his arm to support her.

"The poor darling is over tired," cried Mrs. Lauriston, sympathetically. "I will call Charles to help her up to her room, and she shall be made to go to bed at once."

But before Charles could be found, Mr. Hartley had kissed Marian, and begged that she would not send him away because he had loved her so short time. Lauriston had gone on a few days' visit to her relatives. So, when

from the first," she said, simply. "But I must tell you how I am. I have run away from mamma and John Reading."

"John Reading," cried Mr. Hartley, "the scamp who is a notorious land shark, and trying this very minute to cheat me out of the very prettiest girl property in the world! What claim can he have upon my Marian?"

"We owe him little," said Marian, with downcast eyes. "Very well," said Mr. Hartley, "I will simply pay him, and be married with clear conscience as soon as the law allows."

The recreant knight having at last discovered, Mrs. Lauriston on coming to take the tired guests to bed, found her resting happily against Mr. Hartley's shoulder.

Has Just Gotten Fairly Under Way.

JOHN WANAMAKER.

Very marked reductions have been made in the ten thousand and one every day and useful articles in Housekeeping and Housefurnishing Departments. Striking reductions in Fine Furniture, Bedsteads, Bureaus, Washstands, and Dressing Cases. Fancy Goods, Mirrors, and Bronzes, etc., are much lower. Excursion parties from the country can club together and have a very pleasant and profitable day.

Upholstery, Piano and Table Covers share the same fate. Satchels, and Trunks have had something like a general reduction. All packages amounting to \$10.00 will be delivered, freight paid, within a radius of 200 miles, during the continuance of this sale. Their packages delivered in one bundle. It seems quite certain that no such opportunity as this will be offered soon again.

Chestnut, Thirteenth, and Market Streets
and City Hall Square.

footsteps homeward. -- Verily, it

of clear grit, for a man who is unaccustomed to such severe manual labor, to the killing of a human being was justified. It was in this case.

Station New York City.

[illegible][illegible]

Woman as a Worker.

"Upon my word," said a young lady in the position of receiving clerk in the main office of the Western Union telegraph office, New York, "it doesn't seem to me that men who do business have the brains enough to keep them out of the vices, or, if they had to work for other people. You have no idea how difficult it is to strike just the right sort of balance between the pleasure and the duty. I often tell us that we must be strong and manageable and never cut or saucy. That's the way very, but we find that it won't do to obey those orders too fully. It doesn't take more than half a smile, more than a word to excite insulting familiarity in a good many customers. I've mad enough twenty times a day to strike my fist right through that wicked notion of their silliness, aggravating, mawkish and unbecoming."

Notwithstanding the sentimental disabilities which masculine idiosyncrasy imposes on woman, they are getting under first-rate in New York in making their way into good employment. A letter, from that city says: Ten years ago the needle and sewing machine provided the only work for them above menial positions. Clerkships in stores were opened more and more to them. At present they outnumber men in the position of cashiers, retail and counter clerks. It remains for the type-writer, its introduction generally into mercantile and professional offices to provide wages for women of education and naturally bright intellects. The difference makes of these machines are clicking by the thousand in this city. The operators commonly attain a speed of 100 words an hour, which is about as fast as the merchant, the lawyer or the journalist cares to dictate letters, documents and reports. The demand for the typewriter on Wall street is without a female officinose. There is, a reason, aside from the fact that these women are glad to work for less pay than men of equal attainment would accept, for preferring to be private secretaries. The person in such a position necessarily gets at the secrets of his employer. It is not notorious, for instance, that men acting in this capacity for Jay Gould have enriched themselves by making use of the secrets obtained in the course of their duty.

Now, it may be that women are worse than men at keeping secrets, but it is also true that they are not so ready to use them for mercenary purposes. In the copying of legal papers and other manuscripts, these nimble-fingered maids find an extensive industry; and the requirements are of a lower order than for writing for dictation. The other necessities of decent living, the necessity of being contented with a plain life, the business consists largely of turning reports to subscribers, made up of quotations from the recorded ratings, is saw over 200 girls at work in a single room. It may be a long time before woman will be permitted to vote or will have any desire to do so, but the means of independent and pleasant livelihood are rapidly opening to her in various sections. The hardest part of the business is the statistical and the commercial world affords. Too many men have yet to learn to treat her respectfully in business life.

For Seals of Commerce.

The scene is the Prybylov Islands, two small specks of land situated on the coast of the Bering Sea. In 1867, in 1867 by Russia, along with the United States Government. The islands, but a few square miles in extent, were sold to the United States in 1867 was but 500,000 and yet the annual revenue they yield to the American exchequer is over \$300,000, to whom sum falls to be added the revenue estimated on rolls of statistical seals of commerce. The seals of the commercial world affords. The islands are the home during six months of the year of multitudes of the fur seals of commerce. The number has been estimated on rolls of statistical grounds at 4,700,000. This number is protected practically constant by the effective protection of the animals. Only one seal is allowed to be killed each year, and from among the victims are strictly prohibited the breeding males, who are over five years of age and whose pelts contain the oil for making gunpowder. The females young and old, and the four or five years are allowed to be taken and they are captured on certain days of the year, the 1st of July, and the 1st of August.

Professor Kellogg, of the Michigan Agricultural College, is making experiments in a close room are not by any means so human life. He says that the notion that it is unhealthy to sleep in a room containing plants is nonsense. He says that the notion that the human body is made of trichine just as it is by the American hog.

A vertical, high-contrast, black and white image showing a textured surface, possibly a book cover or a piece of paper, with a dark, irregular shape on the left side. The image is oriented vertically and appears to be a scan of a physical object.

T. Hartshorn,
Painter and Paper Hanger,
Hammononton, N. J.
Orders left in P. O. Box 24 will receive prompt attention.

Dr. GEORGE R. SHIDLE,
DENTIST,
HAMMONTON, N. J.
Office Days, — Wednesday Thursday,
Friday, and Saturday of each week.

For Sale.
I have a very fine FARM, with outer
buildings in complete shape, for sale, or
will exchange for Hammononton property.
The place is near Bass River.

I have the SCOTT PLACE, one of
the most beautiful in Hammononton, for
sale; or will rent it for a year, or the
season.

I have a few village homes and farms
placed in my hands for sale, on the
most reasonable terms.

MANHOOD
HOW LOST. NOW RESTORED
Just published, a new edition of Dr.
CALVERWELL'S "GOLDEN KEY" on the
subject of the "Lost Manhood."
Spectacular and Sensational, Mental and
Physical Incapacity, Impediments to Marriage,
etc., Consumption, Epilepsy and Fits, induced by self-
indulgence or sexual extravagance, etc.
The celebrated author, in this admirable Essay,
clearly demonstrates, from a thirty years' successful
practice, that the alarming consequences of self-abuse
may be radically cured; pointing out a mode of cure
at once simple, certain, and effectual, by means of
which every sufferer, no matter what his condition
may be, may cure himself cheaply, privately, and
effectually.
This Lecture should be in the hands of every
youth and every man in the land.
Sent under seal, in a plain envelope, to any address,
post paid on receipt of six cents, or two postage stamps.
Address
The Calverwell Medical Co.
41 Ann Street, New York; Post Office Box 450
251-7.

Pure Indian Tea.
VIEWLAND, N. J., 30th June 1883.
We, the undersigned inhabitants of Viewland
testify that we have used during the past year
the **Indian Tea**, introduced into this town
by V. M. Hollinsworth, and certified by him to
have been grown, and manufactured in, and
imported direct from the plantations by him-
self.
We have found it equal in every way to the
statements contained in his personal guaran-
tee which is placed over his initials upon every
packet sold, and we can personally recommend
it as a pure, unadulterated black tea of a high
class which meets all that has been claimed for
it by its introducer, Mr. Hollinsworth, now of
this place.

SIGNED:
Jos. Mason, ex-Mayor, T. W. Braidwood,
Asaheel Gage, Rev. Jas. Walden,
B. J. Ladd, W. Herbert Crozier,
Henry T. Craven, Alexander Smith,
H. C. Beckwith, U. S. N. J. H. Cunningham,
Oliver D. Graves, W. G. Worden, (Jas.
and many others.)
This tea is sold at a fixed price, the qual-
ity never varies, and its strength is more
than double that of other teas. Procure
it in packets from the following Agents ONLY
Viewland, T. B. Ross, Post Office.
" I. G. Newton, Auction Rooms.
South Viewland, William Russell.
Bridgeton, C. Corey, Confectionery, Com-
merce Street.
Millville, J. W. Newlin.
Newfield, Post Office.
Winslow, W. Rutherford.

A Few Facts Concerning the 4 C's, or
BRENTON Business College.
It has the most practical and complete course
of study. It omits nothing necessary to a
thorough business education, yet can be accom-
plished in a remarkably short space of time.
It has novel and original methods of teach-
ing, which are attended by astonishing results.
The student is interested from the start, and
never fails to make satisfactory progress.
It has the largest and best appointed rooms,
the most expensive and perfect appliances.
It employs the best teachers, and pays the
most liberal salaries. In fact, it is the liveliest,
most thorough and complete institution in the
country.
It has been established 18 years, and sent
out thousands of young men and women whose
success attests its efficiency.
It is a member of the Bryant & Stratton
Chain of Colleges, or I. B. O. A., with their
proven system of scholarships, etc., all the advan-
tages of intercommunication so indispensable to a
course of modern business training.
No person contemplating a course at a Busi-
ness College, or desiring a practical education,
can afford to decide upon a school without in-
vestigating the claims of this.
Special accommodations for ladies.
Fall Session begins September 24.

Attorney - at - Law,
Master in Chancery, Notary Public,
Commissioner of Deeds, Supreme
Court Commissioner.
City Hall, Atlantic City, N. J.

SCROFULA
and all scrofulous diseases, Sores, Krys-
pelas, Eczema, Blisters, Ringworm, Tu-
mors, Carbuncles, Boils, and Eruptions
of the Skin, are the direct result of an
impure state of the blood.
To cure these diseases the blood must be
purified, and restored to a healthy and nat-
ural condition. AYER'S SASSAPARILLA has
for over forty years been recognized by emi-
nent medical authorities as the most pow-
erful blood purifier in existence. It frees
the system from all foul humors, enriches
and strengthens the blood, removes all traces
of mercurial treatment, and proves itself a
complete master of all scrofulous diseases.
A Recent Cure of Scrofulous Sores.
"Some months ago I was troubled with
scrofulous sores (ulcers) on my legs. The
limbs were badly swollen and inflamed, and
the sores discharged large quantities of
offensive matter. Every remedy I tried
failed until I used AYER'S SASSAPARILLA,
of which I have now taken three bottles,
with the result that the sores are healed,
and my general health greatly improved.
I feel very grateful for the good your
medicine has done me."
Yours respectfully, Mrs. ANN O'BRIAN,
148 Sullivan St., New York, June 24, 1882.

All persons interested are invited
to call on Mrs. O'Brian; also upon the
Rev. Z. F. Wilds of 78 East 54th Street,
New York City, who will take pleasure in
testifying to the wonderful efficacy of
Ayer's Sarsaparilla, not only in the cure
of this lady, but in his own case and
many others within his knowledge.

The well-known writer on the Boston Herald,
B. W. BALL, of Rochester, N. H., writes, June
7, 1882:
"Having suffered severely for some years
with Eczema, and having failed to find relief
from other remedies, I have made use, during
the past three months, of AYER'S SASSAPARILLA,
which has effected a complete cure. I
consider it a magnificent remedy for all
blood diseases."

Ayer's Sarsaparilla
stimulates and regulates the action of the
digestive and assimilative organs, renews
and strengthens the vital forces, and speedily
cures Rheumatism, Neuralgia, Rheuma-
tic Gout, Catarrh, General Debility, and
all diseases arising from an impoverished or
corrupted condition of the blood, and a weak-
ened vitality.
It is incomparably the cheapest blood medi-
cine, on account of its concentrated strength,
and great power over disease.
PREPARED BY
Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists; price \$1, six bottles
for \$5.

Robert Foreman, a "down East"
who had a desire to see the country,
started out two years ago from his home
in Maine, on a donkey, to satisfy his
desire. Since that time he has traveled
on donkey-back from Maine to the Pa-
cific coast, and recently stopped at
Cleveland, O., on his way back to his
home.

Lucius H. Murch, of Belfast, Me.,
passes as the most patient man next to
Job. Three times a day for twenty-five
years has Mr. Murch recanted in his
diaries the state of the weather.

It is now being found out that the
terrible volcanic eruptions which took
place recently in Java were not an un-
mixed evil, as the enormous masses of
ashes hurled out of the craters are ex-
cellent fertilizers, which, with proper
treatment, may make Java bloom again.

Dickens' "Old Curiosity Shop," in
Portsmouth street, Lincoln's-inn-fields,
London, is to be demolished.

A magazine writer asks: "How shall
we utilize the Indians?" This is a diffi-
cult question to answer, but perhaps the
best plan would be to petrify them, and
use them for cigar-store signs.

Two gigantic eagles, which, for the
last four years, have made themselves
exceedingly disliked by carrying off
lambs and poultry from Vermont farms,
were recently captured in a steel trap
at Standgate. The male bird, which
died in the trap, measured seven feet
and seven inches between the tips of his
wings and weighed twenty-five pounds.
His mate, whose wings spread six feet,
was taken alive.

GOLD
Great chance to make money. Those
who always take advantage of the
good chances for making money
that are offered, generally become
wealthy, while those who do not
improve such chances remain in
poverty. We want many men,
young, boys and girls to work for us right in their
own localities. An one can do the work properly
from the first start. The business will pay more than
ten times ordinary wages. Expensive outfit furnished
free. No one who engages fails to make money—no
one who engages fails to make money—no
one who engages fails to make money. Full information and all
that is needed sent free. Address Tars & Co., Port-
land, Maine.

ESTABLISHED
HOWARD A. SNOW,
Washington, D. C.
SOLICITOR OF
AMERICAN AND FOREIGN
PATENTS,
Successor to GILMORE, SMITH &
CO., and CHIPMAN, HOSMER & CO.

Patents procured upon the same plan which
was originated and successfully practiced by the above-
named firm. Pamphlet of sixty pages sent upon re-
ceipt of stamp.

MILLVILLE
MUTUAL
Marine & Fire Ins. Co.
This Company have disposed entirely of all
its STOCK PLAN BUSINESS, and having
been RE-ORGANIZED, has decided to
in the future do a
Strictly Mutual Home Business.
Having succeeded in paying ALL ITS LI-
ABILITIES, and securing an
Actual Net Available Surplus
of Over \$30,000,
the Directors feel that they can offer to all who
desire insurance not only at LOW RATES and
UNQUESTIONABLE SECURITY, but much
greater probability of immunity from assess-
ment for years to come, than other Companies,
since this surplus is large enough to pay all
probable losses on the policies now in force,
until their expiration, without any dependence
on receipts from new business—a condition of
things that can be shown by but very few com-
panies in the State. The present Director
pledge to the Policy Holder an
ECONOMICAL MANAGEMENT
and a
Careful Supervision of the business
and will continue in the future, as in the
past, to act on the principle of
PROMPT PAYMENT
OF
HONEST LOSSES
without seeking to EVADE them on technical
rounds.
Hereafter, no notes will be subject to assess-
ment, until they are a year old.
We would call especial attention to our
Marine Department,
our LOW RATES and FAVORABLE FORM
OF POLICIES.
Any information cheerfully given by the
Officers of the Company or its Agents,
F. L. MULFORD, Pres.
R. J. HOWELL, Sec'y.

The Express leaves foot of Walnut St.,
Philadelphia, at 4:00 P. M., reaches Hammon-
ton at 5:00, Pleasantville at 5:47, Atlantic City
at 6:30. Going up, leaves Atlantic at 7:50 A. M.,
Pleasantville at 7:44, Elwood 8:13, Hammon-
ton 8:23, reaches Philadelphia at 9:30.

HELP
Yourself by making money when
golden chance is offered, thereby
always keeping poverty from your
door. Those who always take ad-
vantage of the good chances for
making money that are offered, gen-
erally become wealthy, while those
who do not improve such chances remain in poverty.
We want many men, women, boys and girls to work
for us right in their own localities. The business will
pay more than ten times ordinary wages. We furnish
an expensive outfit and all that you need, free. No
one who engages fails to make money very rapidly.
You can devote your whole time to the work, or only
your spare moments. Full information and all that
is needed sent free. Address Tars & Co., Port-
land, Maine.

We don't claim to work
cheaper than anybody else,—
we can't afford it. We ask "A
fair day's pay for a fair day's
work."

AYER'S
Cherry Pectoral.
No other complaints are so insidious in their
attack as those affecting the throat and lungs:
croup, the ordinary cough or cold, resulting
perhaps from a trifling or unconscious ex-
posure, is often but the beginning of a fatal
sickness. AYER'S CHERRY PECTORAL has
well proven its efficacy in a forty years' fight
with throat and lung diseases, and should be
taken in all cases without delay.
A Terrible Cough Cured.
"In 1857 I took a severe cold, which affected
my lungs. I had a terrible cough, and passed
night after night without sleep. The doctors
gave me up. I tried AYER'S CHERRY PECTORAL,
which relieved my lungs, induced
sleep, and afforded me the rest necessary
for the recovery of my strength. By the
continued use of the PECTORAL a perma-
nent cure was effected. I am now 42 years
old, hale and hearty, and am enabled to
enjoy my PECTORAL saved me."
ROCKFORD, Vt., July 15, 1882.

Croup.—A Mother's Tribute.
"While in the country last winter my little
boy, three years old, was taken ill with croup;
it seemed as if he would die from strangu-
lation. One of the family suggested the use
of AYER'S CHERRY PECTORAL, a bottle of
which was always kept in the house. This
was tried in small and frequent doses, and
to our delight in less than half an hour the
little patient was breathing easily. The doc-
tor said that the CHERRY PECTORAL had
saved my darling's life. Can you wonder at
our gratitude? Sincerely yours,
MRS. EMMA GEDNEY."
150 West 126th St., New York, May 16, 1882.

"I have used AYER'S CHERRY PECTORAL
in my family for several years, and do not
hesitate to pronounce it the most effective
remedy for coughs and colds we have ever
tried."
Lake Crystal, Minn., March 13, 1882.

"I suffered for eight years from Bronchitis,
and after trying many remedies with no suc-
cess, I was cured by the use of AYER'S CHERRY
PECTORAL. JOSEPH WALDEN."
Byhalia, Miss., April 5, 1882.

"I cannot say enough in praise of AYER'S
CHERRY PECTORAL, believing as I do that
but for its use I should long since have died
from lung troubles."
Palestine, Texas, April 22, 1882.

No case of an affection of the throat or
lungs exists which cannot be greatly relieved
by the use of AYER'S CHERRY PECTORAL,
and it will always cure when the disease is
not already beyond the control of medicine.
