Hoyt & Sons, Publishers.

Terms--\$1.25 Per Year.

VOL. 33.

HAMMONTON, N. J., JANUARY 26, 1895.

NO. 4

TO ALL OUR PATRONS GREETING!

We hope the year 1895 will be the most prosperous of any they have yet seen:

And we shall endeavor to do our part to make it so.

In these days of sensational advertisements, we believe square dealing to be better than unfulfilled promises; and as most people buy their goods from dealers who give them the best value for the least money, we propose to continue our efforts in that direction.

To Cash Customers

we are making liberal concessions.

THE FALLING LEAVES.

I stood in the window; I saw the leaves fall
From the trees that were low, from the trees
that were tall:

They fell one by one, like great flakes of

snow,—

The Creator of all things has ordered it so.

A few months ago they were a beautiful green,

And now many beautiful colors are seen,

Resembling the tints of the summer rain-

bow,—

The Creator of all things has ordered it so.

Now the branches look barren and bare,—

Scarcely a green leaf to be seen anywhere.

The sap has descended to the roots down-

below,—

The Creator of all things has ordered it so.

I thought, a lesson for me, a lesson for all:

There is Spring, and Summer, then comes the

Fall,

Then wintry old age,—to the ground we must

go,—

The Creator of all things has ordered it so.

Our friends all around us, they drop one by

one,—

A father, a mother, a daughter, a son;

Like leaves from the trees, to the ground all

must go,—

The Creator of all things has ordered it so.

May we be prepared when the Saviour shall

call;

The atonement he made is offered to all.

If faithful to him, he with us will go

Thro' the dark valley,—God has ordered it so.

Oh, blessed thought! we shall arise,

And meet our dear friends in our home in

the skies.

May we live the life of the righteous while we

sojourn here below,

Then our end will be peaceful,—God has

promised us so. D.V.R.

Main Road, Hammonton.

Know little is a great critic.

A written contract does not forget.

The straight course has fewest rocks.

In treaties with China, the United

States is called "Mei kwo," the beau-

tiful country.

Walk boldly and wisely in the light

thou hast; there is a hand above thee

will help thee on.

The best way to discipline one's heart

against scandal is to believe all stories

to be false which ought not to be true.

Labor is the inevitable lot of the ma-

ajority, and the best education is that

which will make their labor the most

productive.

To be well educated, a man must be

doubly learned; first by learning, and

second by learning to use what he has

already learned.

Only those whose souls have felt this

one idolatry, can tell how precious is

the slightest thing affection gives and

hallows.

It generally takes four eyes to see

that there are two sides to a question.

A Dakota court is struggling with a

prisoner named Szeyz. We don't

know what he is charged with, but

from his name we suspect that it is

soda-water.

Prudence and industry are the best

sate-guards against bad luck.

Carlton Cornwell, foreman of the Ga-

zette, Middletown, N. J., believes that

Chamberlain's Cough Remedy should be

in every home. He used it for a cold,

and it effected a speedy cure. He says

"It is indeed a grand remedy. I can re-

commend it to all. I have also seen it

used for whooping cough, with the best

results." 25 and 50 cent bottles for sale

by druggists.

CAN I OBTAIN A PATENT? For a prompt answer and an honest opinion, write to MUNN & CO., who have had nearly fifty years' experience in the patent business. Communications strictly confidential. A Handbook of information concerning Patents and how to obtain them sent free. Also a catalogue of mechanical and scientific books sent free. Patents taken through Munn & Co. receive special notice in the Scientific American, and thus are brought widely before the public without cost to the inventor. This splendid paper, issued weekly, elegantly illustrated, has by far the largest circulation of any scientific work in the world. \$3 a year. Sample copies sent free. Building Edition, monthly, \$1.50 a year. Single copies, 50 cents. Every number contains beautiful plates, in colors, and photographs of new inventions, with plans, enabling builders to show the latest designs and secure contracts. Address MUNN & CO., New York, 361 Broadway.

The Weather:

Special Forecast for New Jersey.

Lower temperature, heavy frosts, and high thin winds, are predicted for South Jersey, especially in the vicinity of Hammonton. Vessel owners, landlords, farmers, business and professional people would do well to make immediate provision for cold wave, purchasing stoves, ranges, and heaters from S. E. Brown & Co., whose goods

are known to be the best of their class. All stations in territory described will continue to display cold wave signal till further orders.

By order

The Republican.

(Entered as second class matter.)
SATURDAY, JAN. 26, 1895.

A bill has been introduced in our State Legislature, to do away with the "three days of grace" given on all bank notes, etc. Business men hope the bill will pass, for "grace days" are only a nuisance, a remnant of ancient customs, to give the debtor a little time to provide for his payments after they become due. To-day, if you borrow money from any bank, the cashier reckons interest on the additional three days, and you really borrow for thirty-three days when you desired but thirty. It complicates the rate of interest, and helps no one.

Another bill introduced makes it unlawful for contractors or others to employ men who are not naturalized citizens of the United States. The sentiment which prompted this bill is good; but it is impracticable, and will probably be defeated. It would make it difficult for a man to make estimates on the cost of contemplated work; it would enable laborers to enforce their demand for increased pay whenever unwise leaders suggested the move, by refusing to work when the job is partially completed. Then, what shall immigrants do for a living while awaiting their day of naturalization? If it seems wise to keep out all foreign labor, begin right, and prohibit immigration.

Another bill proposes to change the County boards of freeholders. By this, Atlantic County would have but three members in the Board, elected by the County at large; and each would receive a salary of five hundred dollars a year. The scheme might work well, and might not—it would be an experiment. It seems to us that a representative from each township (as at present) is more likely to know the needs of his section than any one of those representatives at large.

President Cleveland is evidently getting discouraged with his Democratic Congress, in view of its utter incapacity to deal successfully with the public business that presses upon it. He says "I do not want to call an extra session, but reluctant as I am to be forced to call on the Republicans to deal with a question which the Democrats should dispose of with credit to themselves, I can see no other way out." And there is no other way.

Some of the Democratic newspapers are advising their readers not to get discouraged and jump out of their party frying-pan into the McKinley fire. But the people never suffered from the McKinley fire. It warmed them as they sat by it; it glowed brightly and shone on peace and plenty. They were prosperous then, and many of them now have neither a fire nor anything to put into a frying pan.

A New York City merchant who sustains close personal relations with the President, and who has just returned from Washington, is quoted as saying that Mr. Cleveland declared he will issue five hundred million dollars of five per cent bonds, if necessary, to maintain the Treasury on a gold basis.

The 500,000 Democrats who voted with the Republicans last Fall are not being shown at present any good reason why they should go back to their old and mismanaged party.

The eight New Jersey Congressmen held a conference at Trenton the other night, and did not forget to unanimously endorse "Tom" Reed for Speaker.

Two charges are now preferred against Democracy in Congress—one that it does not know its own mind, and the other that it hasn't any mind.

Has it ever occurred to you that next year this universal Yankee nation is going to elect President Cleveland's successor?

In their race for the leather medal John G. Carlisle and Walter Q. Gresham are now neck and neck.

As a mark of respect to the country, Congress should adjourn.

"I know an old soldier who had chronic diarrhoea of long standing to have been permanently cured by taking Chamberlain's Colic, Cholera, and Diarrhoea Remedy," says Edward Shampik, a prominent druggist of Minneapolis, Minn. "I have sold the remedy in this city for over seven years, and consider it superior to any other medicine now on the market for bowel complaints." 25 and 50 cent bottles of this remedy are for sale by druggists.

A. H. Simons has sold his news paper business to John W. Roller, and purchased Treat's goods and business. We wish him success all the time.

Courtship, the photographer, is like all the rest. Hog's taste of Hammonton was about to leave, but has concluded to remain. We are glad of it.

FOR SALE OR RENT. The 10 acre farm opposite the Middle Road School House. For terms, apply on the premises to Mrs. D. G. JACOBS.

All the beach front owners above Delaware Avenue, Atlantic City, have arranged to build a jetty near the iron pier, in order to protect their property, which is being cut away by the sea.

Because of the illness of Pastor Bundall, Mr. A. H. VanDoren occupied the Presbyterian pulpit on Sunday morning, and the house was closed in the evening. We are glad to say he is recovered.

Insure with A. H. Phillips & Co., 1728 Atlantic Ave., Atlantic City.

Mr. M. D. DeFuy, who has been selling for 1000 periods, played his many hands, on Thursday, by appearing on our business street, and making a few calls, on Thursday.

Annual Meeting of the Fruit Growers' Union and Co-Operative Society, limited, at 9 o'clock this afternoon, in Union Hall, for the election of officers and the transaction of other business.

Messrs. W. L. Clark, W. B. Tilton, E. E. L. Tice, A. K. Bernhouse, Wilbert Beveridge, L. B. Joslyn, A. J. Smith, and Will O. Hoyt, constitute a "double quartette" for mutual benefit.

A slight change in train time on the Camden and Atlantic Railroad took effect on the 14th instant. It did not affect Hammonton. We did not receive the figures in time to change this week.

Christian Endeavor Day was observed at the Baptist Church, Sunday evening, with a choice programme of music and readings intended to give out a clearer idea of the aims and work of the Society.

Rev. J. Judson Pierson, well known in Hammonton, for two years State President of the Christian Endeavor Society, died at his home, in Bridgeton, of diabetes, aged 42 years. Delegates from many societies attended the funeral, on Tuesday.

Mrs. Annie B. Fife died on Wednesday morning, at the residence of her sister, Mrs. Wm. Sturtevant, aged 75 years. She had been confined to her bed for more than a year, from the effects of a fall, but was tenderly cared for by her relatives.

There will be a meeting of the County Board of Examiners of Atlantic County, for the examination of candidates for teachers' certificates, at the Pleasantville schoolhouse, on 1st and 2nd of February, beginning at eight o'clock, a. m. Third Grade on the 1st, and Second Grade on the 2nd.

A party of his young friends called at Robt. H. Goff's residence on Monday evening. Of course Rob. was surprised, but they reminded him that his birthday anniversary had just passed, and he forgave their plotting. The usual—and some unusual—games, with refreshments and music, made the time pass pleasantly.

The Baptist Sunday School elected officers for the year, last Sunday: Superintendent, Edw. E. L. Tice; Asst. Supt., L. A. Hoyt; Secretary, David Davies, Jr.; Treasurer, Miss Bertha Miller.

Organist, Mrs. Frank Ramsey. Librarian, Robt. H. Goff. Ushers, John E. Hoyt, Elwood Jones.

The Red Men had a fine time on Tuesday evening. It was a district meeting. Eleven braves received the Past Sachem Degree, which was conferred by Great Sachem Charles Brown, of Paulaboro, and Great Senape D. B. Paterson, of Camden. The attendance was large; there was much good talk, and a supper served in the lower room.

A careful survey of our town school expenditures to Jan. 14th indicates that the total for the year, including cost of books and supplies, will not be greater than that of last year. Our new Board is exercising unusual caution, knowing that "dollars are dollars."

A careful survey of our town school expenditures to Jan. 14th indicates that the total for the year, including cost of books and supplies, will not be greater than that of last year. Our new Board is exercising unusual caution, knowing that "dollars are dollars."

It was a district meeting. Eleven braves received the Past Sachem Degree, which was conferred by Great Sachem Charles Brown, of Paulaboro, and Great Senape D. B. Paterson, of Camden. The attendance was large; there was much good talk, and a supper served in the lower room.

The Fire Company met on Monday evening, with the President, J. M. Austin, in the chair. The following were called and the following responded: Sam'l Anderson, Jr., Wm. C. Andrews, J. M. Austin, W. H. Bernhouse, A. E. Brown, John Baskely, Wesley DeFuy, John Driggs, John French, Jr., S. R. Holland, J. W. Logan, John McCrea, J. H. Marshall, James Richards, E. W. Strickland, Robt. Thomas, E. J. Trafford, B. Warlickson.

Minutes of last meeting read and approved.

Trustee E. W. Strickland stated that he had ordered a half dozen bells for the company, but had not yet received them.

Bill of E. W. Strickland of \$5.35, for merchandise and labor on engine ordered paid.

N. B. Hinchman was excused for non-attendance, out of town. John W. Roller was excused on account of sickness.

The question of purchasing a lot on Bellevue Avenue then came up, and after some discussion it was moved and seconded that the company purchase Dr. Cook's lot, provided that it could be bought for seven hundred dollars. The motion was lost.

On motion a committee of three was appointed to investigate the cost of equipments for the company, such as shirts and belts, to report at next meeting. Committee, W. H. Burgess, L. W. Purdy, and John McCrea.

Receipts, \$3.50. Adjourned.

The Epworth League installed ceremonies, last Sunday evening, were very interesting. We were especially pleased with the singing of the Junior League, some forty little folks, well trained—their childish voices ringing out sweet and clear. The choir, too, sang well, and the large audience joined in right heartily. The installation ceremonies and reception of new members were impressive, and the new President's inaugural contained many excellent points.

The Baptist Sunday School elected officers for the year, last Sunday: Superintendent, Edw. E. L. Tice; Asst. Supt., L. A. Hoyt; Secretary, David Davies, Jr.; Treasurer, Miss Bertha Miller.

Organist, Mrs. Frank Ramsey. Librarian, Robt. H. Goff. Ushers, John E. Hoyt, Elwood Jones.

The Red Men had a fine time on Tuesday evening. It was a district meeting. Eleven braves received the Past Sachem Degree, which was conferred by Great Sachem Charles Brown, of Paulaboro, and Great Senape D. B. Paterson, of Camden. The attendance was large; there was much good talk, and a supper served in the lower room.

A careful survey of our town school expenditures to

To-day, when the sun was lighting my house
 on the place-lad hill,
 The breast of a bird was ruffled as it perched
 on my window sill,
 And a leaf was shaken from the kitten on the
 breeze-swept garden walk,
 And the dainty head
 Of a dahlia red
 Was stirred on its slender stalk.
 Oh, happy the bird at the rose tree, unbo-
 led,
 And happy the blithe leaf-chatter, rejoicing
 in sunshine warm!
 They take no thought for the morrow—they
 know no cares to-day;
 They know the thousand things
 That the future brings
 Are a blank to such as they.
 But I, by the household eagle, can interpret
 the looming clouds,
 For the win! "too-bless" through the key-
 hole I see a shadow the house can
 shrout is,
 And I know I must quit my mountain, and
 go down to the vale below,
 For my house is call
 On the windy hill,
 When the autumn tempests blow,
 My mind is forever drawing an instructive
 parallel
 'Twixt temporal things that pass and eter-
 nal things that dwell—
 When I look up and find around me, and
 waters my soul o'er-
 I descend in hope
 From the mountain top
 To the sheltering vale below.
 I go down to the Valley of Silence, where
 the winds are sweet;
 I know there is "balm and healing" there
 for eyes that with tears are wet;
 And I find, in its sweet seclusion, good
 solace for all my care,
 And I find that restful sleep,
 With its shelter sure,
 Is the beautiful Vale of Prayer.

HUNKLEY'S OBJECTIONS

BY EMMA A. OPTER.

"WOULDN'T there nothing to do with Andrew Wilkerson," said Mr. Hinkley, "but that the old rascal would with a six-foot rattler!"

He was washing his hands at the sink. Jean Carson, his niece, was wringing clothes out of the hot water.

"What is it now?" she asked, looking straight at him, with a keen twinkle in her big, brown, heavy-fringed eyes. Her cheeks were as pink as a rose.

"I'm his nephew," said Jean, "and a machine, ain't it? Wal, I have heard 't was a regular dairy!"

Jean disapproved of slang, but a Kansas ranch is a favorable place for the cultivation of it.

"I don't know nothing about his thrashing machine. What I know is, I know Andrew Wilkerson, when I was livin' in the south part o' Indiana, twenty years ago, and I ain't going to have nothing at all to do with a machine that was celebrated all over the country for being a cheating, lying, on principle, no-account scallawag!"

"Well," said Jean, squeezing out a tablecloth, "you've been saying that for nothing at all, and the more I hear, and I ain't been even disgusted by you."

He was all the "pappy" she had ever known.

"I won't neighbor with 'em!"

"Wal, you ain't. But, guess to me you have these spells of wearing you won't have nothing to do with him just when he's got something new, or he's elected town trustee, or raised an extra big crop of something. I bet I've riled you more than once, but I'm along so good," a mischievous dimple developing itself at the corner of her ripe mouth. "I really believe, pappy."

Mr. Hinkley rattled the wash-basin.

He could never scold Jean, however gross her gay impertinence. But he spoke with sternness.

"I don't want nothing to do with 'em," he repeated. "After I don't want you to do with 'em. You're the only family I've seen him owe no trick with. I wouldn't have you have no twice with him, nor know him, nor son of I got in the world—not the son of a pappy!"

"I tell you, pappy," Jean told him. "If you ever see him, or any of the corn-bushings or merry-makings, you give him the solid-goby. Now, I mean it!"

"You're 'ven saying that for thirteen months, too, pappy," said Jean, laughing.

But her laugh was odd. She faced, her uncle bravely, but her cheeks had lost their pinkness suddenly, and her breath came for a moment in little gasps.

Mr. Hinkley wore spectacles, and was not particularly observant, anyhow.

When Jean carried a basketful of clothes out to the tin, he gazed after her, proudly and securely.

"The smartest gal in the country, and the handsomest!" he reflected, with commendable moderation. "It's got to be a fine feller that gets her away, I guess."

Mr. Hinkley had to drive to the village that afternoon, to try and secure up a decent hired man from Mr. Adams, whose laziness appeared to be the cause of the trouble.

As he was thinking absorbedly of many

himself as he drove along—Andrew Wilkerson's heinous fallings being for the moment wholly forgotten.

"Turn out, there!" a teamster shouted.

"Turn out yourself, Both Simpson," said Mr. Hinkley.

They were old friends, and they grumbled at each other.

But Mr. Hinkley's three-year-old "colt" had no liking for the great seat which Simpson sat. She reared quickly and violently.

"Get out of my horse!" said her rider good-humoredly. "Keep in the road."

He jerked her back, but she jumped again.

Mr. Hinkley was bending forward, with a strong grip upon the lines, and one of the protruding poles of the rack struck him forcibly on the forehead. The lines fell from his hands, and he started back in a daze of pain and alarm, and fell forward just as Seth Simpson reached and caught him.

A volunuous voice was sounding in his confused ears when his senses returned to him.

"Get out of my horse, Doctor Collins," it said, decisively. "He's the only feller around here that knows the difference between a toothache and a case of cholery morbus."

"Get out of my horse, quit your joking!" a woman's pleasant voice beseeched. "Tain't no time for jokes. But you had better get Doctor Collins, Mr. Simpson. Andrew, here, put another pillow under his head. He's hurt."

Mr. Hinkley felt the breeze produced by a palm-leaf fan; he smelled arnica and camphor and ammonia.

He was on a lounge, with his collar open, and his face and hands wet. A big heavy bearded man stood over him—Andrew Wilkerson.

"Wal, you're a master-hand, Gary!" he ejaculated—"bringing him round like that. I don't believe 'we'll need no more of this kind of a cure. I guess it's just a big bump that he'll get over without—"

"Andrews," said his wife, "if you can't talk any lower, you'll have to go out in the kitchen and wash."

"Get out of my horse anybody that's sick," Mr. Hinkley, "he said to the sufferer, "but he means well."

Then upon Andrew came a loud laugh.

Mr. Hinkley raised himself and leaned on his elbow. He felt ill at ease, disturbed, half angry.

"Andrew sent up for your niece, Mr. Hinkley," said Mrs. Wilkerson. "We didn't know just when you could be here, and we thought we'd want to know—"

"Um! yes. I'm much obliged. I guess I can be moved; guess there ain't no bones broke," Mr. Hinkley responded.

"You're without warmth. You've changed consider'ble since we knew each other up in Indiana, hain't you?" he queried.

"Indiana?" Andrew Wilkerson repeated, and then he said, "Oh, yes, you're to-be-sure! So've you."

"You're thicker set."

"Wal, yes, guess be. You're holdin' your years well, Mr. Hinkley, splendid."

"You're layin' down ag'in, hain't you?" said his wife.

"Mr. Hinkley I'm holding my years," Mr. Hinkley rejoined, unamused. "I've got a good straight, honest life behind me, anyhow. I never done no injury to nobody."

"Course not—course not!" said Mr. Wilkerson, in a soothing manner, which nettled his enforced guest.

"I've tried to forget that little transacted business," said Andrew Wilkerson.

"Said Mr. Hinkley. "Since we've been neighbors here I've tried to forget it. But I can't reely forget being cheated out of a hundred and twenty-one dollars and a half clear gain."

"Want it fifty-one cents?" Mr. Wilkerson demanded, bursting into a great roar of laughter. "See here, I wanta know what you're drivin' at. I thought you was dooin' your duty."

"I was seerin' it that I tell you you ain't. What are you tryin' to get at? I never see you before I came here, in all my born days."

"Ain't you Andrew Wilkerson, o' Indiana?"

"I'm Andrew Wilkerson, but I ain't of Indiana, by a long shot! I come from Michigan—always lived there—er I ain't ashamed of it."

"Andrew," his wife remonstrated, "if you're here, you're here."

"Ain't I excited," said Mr. Hinkley, lying down weakly. "I felt, when I laid eyes on you, that I'd bin makin' a mistake all this time. I've got such a good straight, honest life behind me, anyhow. I never done no injury to nobody."

"Wal, yes, guess be. You're holdin' your years well, Mr. Hinkley, splendid."

"You're layin' down ag'in, hain't you?" said his wife.

"Mr. Hinkley I'm holding my years," Mr. Hinkley rejoined, unamused. "I've got a good straight, honest life behind me, anyhow. I never done no injury to nobody."

"Course not—course not!" said Mr. Wilkerson, in a soothing manner, which nettled his enforced guest.

"I've tried to forget that little transacted business," said Andrew Wilkerson.

"Said Mr. Hinkley. "Since we've been neighbors here I've tried to forget it. But I can't reely forget being cheated out of a hundred and twenty-one dollars and a half clear gain."

"I've tried to forget that little transacted business," said Andrew Wilkerson.

"Said Mr. Hinkley. "Since we've been neighbors here I've tried to forget it. But I can't reely forget being cheated out of a hundred and twenty-one dollars and a half clear gain."

"Want it fifty-one cents?" Mr. Wilkerson demanded, bursting into a great roar of laughter. "See here, I wanta know what you're drivin' at. I thought you was dooin' your duty."

"I was seerin' it that I tell you you ain't. What are you tryin' to get at?

"Oh, happy," she cried, "you ain't no happy! Oh, happy, I was said to be dead when Wilbur come and told that."

"Told you I guessed he wasn't hurt," said a tall young man behind her.

Upon this young man Mr. Hinkley and Joe were fixed. He was a fine fellow, tall and thin, and Jean called him Wilbur.

Mr. Hinkley felt that some explanation was due, but he didn't say so. He was next again to an own explanation feast.

"Jean," he said, "the ain't the man, I'm from Indiana, Jean. I've won him."

"Oh, happy," Jean sobbed. "No more, I've got to go by you. I've seen her. We got acquainted at the Indian girl's dance, and we've seen each other lots since, and—ah, happy—"

"And were going to get married," said Wilbur, with a flush of pride and contentment.

"What, you minx," he cried—"You freed marry a son of Andrew Wilkerson?"

"Yes, I did," said Jean, her bright eyes hidden on her uncle's arm. "I couldn't tell this minute that you was the man puppy thought you was. But I'm next again to an own explanation feast, and I wouldn't ask who his father is, and make him think I cared if his father was a rascal."

"You're the right kind!" said Andrew Wilkerson, in a shout.

"You're the gal for me—and for my puppy."

"She's the gal for the best man on top of the earth," said Mr. Hinkley, breaking her from her uncle's arm.

"I'm glad to hear that," said Wilbur, with a nod.

"I'll dance at your wedding, but you don't go 'way after and leave your puppy. I can't spare you. I guess there's plenty of room for my ranch for you and the man that's next again to an own explanation feast."

"I'm so glad of that, puppy!" Jean, smiling, joyfully.

And Mrs. Wilkerson wiped her eyes, and Wilbur looked out of the window, and Andrew Wilkerson went and shook hands with the tall young man.

He stopped him.—Saturday Night.

Plenty of Food in Sight.

According to Mr. Orquhart's figures, the 4,000,000 tons of cotton seed produced by this country annually, after selecting an unlimited supply of oil, will yield 1,500,000 tons of meal, to attempt to utilize this grain as food for the human race has just been made known experimentally. At a well-known public institution in Brooklyn the newbeys were fed for several months on a diet of cotton seed meal, bread and codfish made of cottonseed cake. It ranks in nutriment next to wheat flour, but it never has been used for food because it has not been needed. There is such an abundance of cottonseed cake that the waste cottonseed cake is sold to feed cattle and chickens.—Cottonseed cake can be produced at less than half the present cost of wheat flour, and it is calculated that the country is producing sufficient cottonseed cake to fill, if ground, 15,000,000 barrels. Our wheat crop this year approximates 375,000,000 bushels and figuring four and a half bushels is equivalent to a barrel of flour this year, we are short of what we need no hungry, for we can still fall back on our cotton fields. Wonderful is the cotton plant that gives us clothing, oil and food for man and beast.—New York Mail and Express.

The Standing Stones of Peru.

Near the little village of San Jose, Peru, the bleak and barren shores of Lake Titicaca—the most elevated body of water of any considerable size in the world—are three large pillars of stone. If they were not of unequal height they would be called the three pillars upon which at some time in the far past great arches had been erected. To the different tribes of Peruvians they are known by words which signify "standing stones" and are called *huachucas*. The three pillars of each of these huge boulders the rude features of a human face have been deeply carved, the other three boulders of each being chiseled with decorative signs of the same kind.

These carved boulders are supposed to have some reference to sun worship, which the ancient Peruvians are known to have practiced. Although the ancient inhabitants of the country probably had many mechanical appliances, it is believed that they were unequal to the task of placing these gigantic monoliths in their present positions. Their having originally been wandering or erratic boulders deposited by some melting glacier.—Detroit Free Press.

In the west of France a cord is drawn over the neck of geese, and to the cord is suspended horizontally in front of the breast a long and heavy stone. The geese, when they are to be killed, indeed, we may call it bridle—exactly in the same fashion. The object in both cases is to keep the animals from passing through the hedge and eating the grass of neighbors.

Sea water is said to contain all the soluble substances that exist on earth

SHOOTING WITH FERRETS

TRAINING THEM TO DRIVE RAB-
BITS FROM THEIR HOLES

[illegible]

What is planned. — If there is no bolt in a reasonable time, and the ferret remains in the earth, stoop down and make the feed-call, and if properly trained the ferret will tell you if he be found and killed a rabbit by the blood on them. Always reward him with meat or liver until he is an old hand at the business. You will still have to be careful that will be the envy of the neighborhood. Sometimes the best animals will take a fit and "lay up," that is to say, they will refuse to come out, and in such a case do not make a nest of grass or straw, leave at one end, and bank both ends up with a sod of grass. The next morning, or possibly as you return, the ferret will be found, curled up on the bed waiting for the next action.

Selection of muzzles. — Ferrets are always a lively matter of argument. Most of the muzzles used are totally unfitted for use, and one might as reasonably expect a race horse to race with a muzzle on his nose, as to expect a ferret to do good work with one of the made-to-look monstrousities on his nose. A muzzle should consist of flight, soft leather straps, which are put together so will fit snugly over the nose, and the others lying one along the nose, one under the chin, one around the nose near the eyes and the last encircling the neck close behind the ears. If you cannot make your own, take the little fellow to a harness maker and get him interested in the matter, and he will turn out a muzzle that will fit like a lady's glove, and the ferret will wear comfortably and well. Remember always that the muzzle is not a sporting natural instinct when he hunts and that your aim is to assist him as much as you can.

As to working them with bells. — I am not so prejudiced. The dog groomers say that the bell on the muzzle will make the rabbit have bells or very great watchfulness, as it runs a ferret to let him ram around loose, even for a very few minutes, and that is what he will do if he gets out of the muzzle. I have no objection to bells as the sound travels a long way through the ground, and if there are any other passages with rabbits in them they will all "git up and git" while the hunter is sleeping. The little fellow is a hard mouth-biter, and the model of smell he can procure, and should be slung on to a very light strap, care being taken in putting the collar on that the bells are so arranged that the bells on each side and the chin, and the bells on each side and one in the middle of the back of the neck. If the bells hang under the chin they are in the way and half the time they cannot sound, while if properly arranged they will be heard. The little buckie will keep them on the back of the neck, where they will do most good.

As most rabbits bolted from earth, are shot within a twenty-yard range, the muzzle is of little use, and you may or must be so loaded as to produce what is called "scatter" shooting, and what is more it must be a hard-hitting gun, for the furry fellow takes a lot of killing, and frequently gets on board. The orthodox load is one ounce and a quarter of No. 6 shot and three drachms and a half of powder, using thick wads over the powder; but many good men prefer the smaller gauge. When using wood or smokeless powder in the second barrel, it is not in both. This is very important on a misty morning, when smoke from black powder hangs around. Arrange so that the muzzle can be cleaned, and wads and board may be obtained as low as twelve dollars per week, and a personal visit will arrange for any number of old days on about the same terms. Rabbit shooting obtained for some years in the neighborhood of the ground on sight. — *New York Recorder*

A Curious War.

When Her Majesty's ship Challenger was engaged in making that celebrated series of soundings, and while measurements of ocean depths were being taken in the vicinity of the Ladrone Islands, the "Challenger" was engaged in the business of the worm family to the surface. The creature was about the size of a half-inch rope, nearly twenty-three inches in length, and striped and banded with all the beautiful colors of the rainbow. It was very proboscis, well equipped with powerful teeth, each hooking downward. The horny beak was used expressly for capturing food, and was only 34 inches in length. The head was very small, and the worm species would do with a "captured" edible may seem a mystery to the average reader, but our rainbow-colored sub-marine curiosity had now for just such purpose. When the worm species was taken, a fresh lot of frog spawn floated his way he instantly seized upon it with his armored beak and quickly "turned himself wrong side out, completely swallowing the spawn. This curious incident revealed a remarkable state of affairs. The "dimmer hook" was the same at both ends, the body of the worm fastening around it at the middle, and the head at the other end. The worm was the same as the "outside" — that is, if anyone could tell which was which. — For want of a better name the specimen was labeled *Vermea vice versa*. — *St. Louis Globe-Democrat*

FLOOR OF THE PACIFIC

IT IS THREE MILES FROM THE

IN- TALKING SOUNDINGS for the Hawaiian
Islands. The scientists made
Interesting Discoveries.

PROFESSOR GEORGE DAVIDSON has completed a profile of the cable route between California and Hawaii, surveyed by the United States Fish Commission in the Albatross. The route that the officials of the bureau received the Albatross's reports have decided is most economical and available, starts from Salinas Landing, in Monterey Bay, where the deep basin of the bay opens into the ocean. This valley has a steep descent that will give the wire a resting place 385 fathoms (2100 feet) below the surface two miles and a half after leaving the landing place. After leaving Monterey Bay, the cable will follow a northward traveling to reach the floor of the Pacific, which averages about three miles from the surface.

Some of the mountains on the big Pacific are 15,000 feet high when it comes to laying the cable, but not many of them. Mountains are not good for submarine cables. The rocks chafe and wear the coverings, and cliffs and precipices and valleys leave the cable in a position of danger to the sea to bite through or play with.

The biggest of these submarine mountains found by the Albatross is a little less than 600 miles from the coast. If it were set up on dry land it would make the distance from San Francisco, Nevada, for it is over two and a half miles high, and yet its summit does not come nearer than half a mile of the surface of the water. There is another mountain of the same height, one day's run from Honolulu, but its summit is 6000 feet under water for all its mighty effort to reach the surface. At the southern base of both these mountains the surveyors found deep beds of coral, and the Albatross found a large place of a cable, and it is in this direction that the detours around the unfriendly peaks will be made.

While the Albatross was surveying the cable route the scientists of her command were busy with the study of all kinds of ways, from scooping them on board from the surface to dragging them from the extreme depths with trawls, drags and dredges. They found the bottom of the sea, coral, shells, crustaceans, animals, worms, vegetable specimens, and, in short, everything that could possibly have habitat in the saline depths.

The catches showed that submarine life is not so interesting a part of the sea as they are. Some of them are little; some are pretty and some are hideous; some are friendly and some are harmful and spiteful, but all are curious.

The spirit of the sounding is not so interesting a part of the sea as they are. The equipment, simple though it is. The compasses in use consist of an old cannon shot suspended on the eccentric bell crank principle. They are not very accurate, but they have a valve at the bottom to permit its receiving a portion of the deposit of the ocean's bed. When the weight is relieved the bell crank is tipped, the shot slips off, and all that the line has to do is to pull the cylinder with its accumulated treasure.

Incidental to the surveying and fish catching the Albatross scientists took the temperature of the sea depths. They found an extraordinary fact, that above the temperature is but slightly above freezing point at any time. Strange to say, it does not change much with an increase in depth of two miles. The temperature is the same up from the bottom, 15,000 or 20,000 feet down. Does not show over a dozen or twenty degrees more of cold than the water three or four thousand feet down.

There is no intermediate life to be found in the water. The scientists call things that live on the bottom, seem unable to exist except under a pressure of from four or five thousand pounds to the square inch, and they have to go down from the surface to find them. It is not this. It is queer, that living in the dark, as they do, some of them have eyes and some have not. Those that have given eyes also run to extremes; some have eyes that look like a microscope or other optical eyes which give them a force to the keenest search to discover them. They are all carnivorous, each species feeding on the species next in size down to the minute. They are not very different from their method of sustaining life. No vegetable life grows in these cold night-colored depths and the scientists have no hesitation in pronouncing anything that looks like a plant an animal, no matter how dwarfed it may seem.

Down near Honolulu, where the water is shallow, the temperature increases to the bottom to seventy and eighty degrees, and this is a problem the cable route will have to solve. The cable is liable to interfere with the insulating properties of the ordinary water.

DIDN'T PUSH IT OVER.

A Crank Resists Temptation at the Washington Monument.

Washington is the Mecca of cranks, and the monument seems to be their principal shrine. Even the White House is a place of pilgrimage to them as the great white shaft. It can be seen for miles around and seems to attract trunks as a candle does moths. The watchmen have become accustomed to the gentry, and as long as they appear to be harmless, they are inclined to deal gently with them, however wild their ideas. One man they tell of declared that the monument was built of human skulls and bones and pointed out the bones of soldiers in the stones; perhaps the oddest specimen on record happened down there the other day.

When the watchman first observed him, he raised his heavy lantern against the shaft, apparently with all his might at least he would push for a while and then he would walk around to the other side, apparently to see if there were any people there. The water was so shallow that he was wading for a while and then accosted him:

"Beg pardon; you aren't going to push it over are you?"

"I could if I wanted to," responded the man, with the utmost dignity, "but it is not my business."

"Oh, the strong man!" ventured the watchman, *sizing up the man, who was about five feet five and not very muscular.* "Let me see, you were watching the man's theater a few weeks ago, weren't you?"

"No, sir!" replied the man sternly. "I am the reincarnated Samson of biblical times; the one who overthrew the pillars of the temple, and I am pulling down the pillars of the temple. Why, it would be more child's play for me to upset this puny monument."

"Well, I would not do it if I were you," said the watchman, in a friendly, mild way. "You see this is in memory of Washington; probably he have never heard of him, as he was a little after your time, but we moderns think a good deal of him. Then it costs the government a great deal of money to keep a good many years to build this monument, and a good many people would consider it unkind of you to destroy it."

"*But he was not for instance, I am inclined to watch it, and, of course, you would not like to see it destroyed.* Besides you might hurt somebody."

"No, I was very careful to look on the other side first," said the man.

"But perhaps you think I can't do it? Now you just look up and see me!"

The watchman was agreeable. Now it is a fact that when one stands directly at the base of the monument it appears to be toppling over. This is, of course, an optical illusion caused by the fact that the monument is so tall that it impresses the crank with his power.

"Did you see me shake it?" he inquired triumphantly.

"Yes," responded the watchman, solemnly. "But I wouldn't do so any more. I am sure you would ruin the statues even if you didn't push it over. Besides, here comes a crowd of people and not knowing who you are, they might laugh at you. Then you would have to push it over to prove it to them."

"That's so," said the crank, and bidding the watchman "Good-day," he departed, and has not been seen about the monument since. Chicago Times

Earthquake Incidents

A Constantinople correspondent of the New York Tribune says that it will probably never be known how many persons were killed in that city by the earthquake of last summer. The chroniclers of the event, however, in their chronicled accounts of facts, and the newspapers were forbidden to publish statistics of the earthquake. What are believed to be moderate estimates place the number of deaths at about 150, and the number of persons injured at 100,000. The correspondent cannot help praising the courage of the firemen stationed to watch at the top of a tower more than 200 feet high. They stuck to their posts, and when the flames layed like a flagstaff, and when the fires broke out after the overthrow of dwellings, they gave the signals as usual.

Another case of a similar sort was that of a fireman who had gone up to the top of a minaret to remove a conical cap which the first shocks had chattered askew. While he was there another shock occurred, and there was a terrible pile in the street.

There is a fine picture in one of the galleries of the museums, began to run down stairs, and the mosque square below shouted to him to come down; but he stayed where he was.

"It is going to fall," he said, "it will fall before it gets out of it!" and he proceeded with his work.

Many wonderful escapes occurred. Two men were walking together. A Turk met them, and as is not unusual in Turkey, he was talking to them of turning in between them instead of turning to one. At that instant a stone fell from the building above them, and the Turk, who fell dead between them, was the originator.

But the most marvellous escape was that of a boy three years old. He was running along the street at the base of the city wall just as one of the ancient towers was overthrown. When the tower fell he was in the air, and he fell down to the ground by great stones.

SUNDAY SCHOOL LESSON

JANUARY 27, 1933.

The Great Confession.
LESSON TEXT.
(Matt. 16 : 13-23. Memory verse: 13-14)

LESSON PLAN.

TOPIC OF THE QUARTER: *The Glorious Son of God.*
GOLDEN TEXT FOR THE QUARTER:—*We becloud his glory, the glory as of the only begotten of the Father.*—John 1:14.

LESSON TOPIC: *The Son Receiving Earthly Recognition.*

1. Diverse Opinions Stated—vs. 13-16.
2. Correct Opinion Honored.—vs. 17-20.
3. Disturbing Events Disclosed.—vs. 21-23.

GOLDEN TEXT: *Thou art the Christ, the Son of the living God.*—Matt. 16: 16.

DAILY HOME READINGS:

M.—Matt. 16 : 13-23. The great confession.
F.—Matt. 16: 66-71. Another confession.
W.—1 Pet. 2 : 1-8. The chief cornerstone.
T.—Acts 4 : 5-12. Peter's witness for Christ.
F.—Matt. 10 : 32-42. Cost of confessing.
S.—Rom. 10 : 1-11. Believing and confessing.
S.—2 Tim. 1 : 1-12. Confessing and enduring.

(These Home Readings are the selections of the International Bible Reading Association.)

LESSON ANALYSIS.

I. DIVERSE OPINIONS STATED.

1. Current Opinions:—
Thou the Baptist;.....Elijah;.....Jeremiah, or one of the prophets (14).
They have called the master of the house *the Baptist* (15).
This is John the Baptist; he is risen (Matt. 14 : 2).
It was said by some.....that Elijah had appeared (Luke 9, 7, 8).

2. Correct Opinions:—
Thou art the Christ, the Son of the living God (16).
Of a truth thou art the Son of God (Matt. 14 : 33).
Thou art the Christ (Mark 8 : 29).
Thou art the Holy One of God (John 6: 68).

II. CORRECT OPINION HONORED.

1. Blessings Pronounced:—
Blessed art thou, Simon Bar-Jonah (17).
Thou, O Lord, hast blessed, and it is—blessed for ever (1 Chron. 17 : 27).
They.....are blessed with the faithful Abraham (Gen. 3 : 9).
Who hath blessed us with every spiritual blessing (Eph. 1 : 3).

2. Discouragements Recognized:—
Flesh and blood hath not revealed it unto thee, but my Father (17).
Unto you it is given to know the mysteries (Matt. 13 : 11).
Unto us God revealed them through the Spirit (1 Cor. 2 : 10).
His anointing teacheth you concerning all things (1 John 2 : 27).

3. Humanity Utilized:—
Thou art Peter, and upon this rock I will build my church (18).
Thou shalt be called Cephas (John 1 : 43).
Upon the foundation of the apostles and prophets (Eph. 2 : 20).
Twelve foundations; and on them twelve names of the twelve apostles (Rev. 21 : 14).

4. Authority Conferred:—
I will give unto thee the keys of the kingdom (19).
What things soever *you shall bind*.....shall things be bound (Matt. 18 : 18).
As thou hast said *me*.....even so sent I *them* (John 17 : 13).
Whosesoever sins *ye forgive*, they are forgiven (John 20 : 23).

III. DISTURBING EVENTS DISCLOSED.

1. The Disclosure:—
Hemust.....suffer.....and be killed, and.....be raised up (21).
The Son of man shall be delivered unto the chief priests (Matt. 20: 18).
The Son of man must suffer many things (Matt. 8: 31).
The Son of man must.....be crucified, and slain (Luke 24: 7).

2. The Sargines:—
Be it far from thee, Lord; this shall never be unto thee (22).
Peter took him, and began to rebuke him (Mark 8 : 32).
They understood not.....and were astonished (Mark 9 : 32).
The Jews were now seeking to slay thee; and goest thou hither again? (John 11 : 8).

3. The Repulse:—
He.....said unto Peter. Get thee behind me, Satan (23).
Then said Jesus unto him. Get thee hence, Satan (Matt. 4 : 10).
Believe us from the evil one (Matt. 6 : 13).

Thou wilt stand steadfast in your faith

Verse 18.—"Who do men say that the Son of man is?" (1) The illiterate; (2) The vulgar; (3) The ignorant; (4) The scornful criticisms.

Verse 15.—"Who say yet that I am?" (1) Who Christ really is; (2) Who others think him to be; (3) Who we think him to be.

Verse 16.—"Thou art the Christ, the Son of the living God." (1) The Christ of God; (2) The Son of God; (3) The "Savior of Men;" (4) The Lord of men.

Verse 17.—"Flesh and blood hath not revealed it unto thee, but my Father." Sources of revelation contrasted: (1) The human; (2) The divine.

Verse 18.—"The gates of Hades shall not prevail against it." (1) Christ's rising; church;—(2) Hades opposed; (3) Christ's assured triumph.

Verse 19.—"I will give unto thee the keys of the kingdom." (1) Christ's supreme authority; (2) Peter's delegated authority.

Verse 2.—"He must go, ... and suffer, and be killed, and be raised up." (1) Christ's suffering; (2) Christ's death; (3) Christ's resurrection; (4) Christ's triumph.

Verse 23.—"Get thee behind me, Satan." (1) Peter's error; (2) Christ's rebuke.

LESSON BIBLE READING.

SYMBOLISM or NOBLES.

God's unchangeableness (Deut. 32: 18; Isa. 17: 10).

God's strength (Psa. 18: 1, 2; 62: 7).

God's protection (1Sa. 13: 2, 3; 34: 22; Job. 38: 28; 39: 25).

Christ's care (2a. 12; 1 Cor. 4: 4).

The church's foundation (Matt. 16: 18; 1 Pet. 2: 6, 7).

He Got There.

A good story about Professor Tucker, formerly of Bowdoin College, is told by the Portland Transcript. About the year '61, when he was a student at Bowdoin, the bell rang for prayers at the chapel, as now, very early in the morning, and it was imperative upon tutors and pupils to respond.

As a tutor Mr. Tucker was very conscientious, and was always prompt to get to the head of his class at the early morning devotions. One morning, however, he found his clothing gone and his door nailed while the bell was ringing. Finding a hatchet he soon split the door open, and found at the last place of the bell appeared clothed in his shirt and a pair of overalls, barefoot, but with a smile of serenity on his expressive countenance.

He took his customary place, and announced that toward were words of complaint heard from him.

The Analysis of Tea.

Attempts have been made to determine which of the constituents of tea are responsible for the physiological effects, both bad and good, attributed to its use, but as yet they are far from complete. The general conclusions come to, however, may be summoned up as follows:

Tannin is, of course, well known to be a strong astringent, and though used medicinally, can hardly be taken in any quantity habitually by most people.

A few finely-powdered tea leaves are placed in a glass tumbler, and with a paper cap, and the glass placed on a hot plate, a white vapor slowly rises and condenses in the cap in the form of colorless needle crystals. These crystals are the nitrogenous substance theine, the "active principle of tea."

The oil, which is supposed to give tea its flavor, is of a pale yellow color, and has a strong smell like that of the rose.

It is undoubtedly the oil which has the effect on the nerves, and gave such alarming results as those instanced by the writers of a hundred years ago, but which in smaller quantities helps to make tea so refreshing. According to some authorities theine has somewhat the same effect, but it seems to have other qualities as well, and to be more truly nutritious. Therefore, what we take in the tea we drink is as much theine as we get a little oil for the sake of the flavor, and as little tannin as possible.

Now, the theine is dissolved out of the leaves much more quickly than the tannin, and thus we see the reason for the rapidity with which it is lost in a perforated holder in the teapot in which to put the leaves, and removing this after a few minutes, or, better still, of pouring the infusion of the leaves into another pot. Either way the boiling water must not stand on the leaves for more than five minutes.

—Good Words.

The Towers of Silence in Persia are stone structures provided with gratings within on which bodies are exposed to be devoured by the flocks of vulture that always infest the locality.

An apparatus is on trial in Great Britain, which, it is claimed, will abate the sewer gas nuisance in large cities.

The average man can't afford a silver name plate until there is one upon his coffin.

—The Boston Herald.

5 DOLLARS TO 20 PER DAY Easily Made.

We want many men, women, boys, and girls to work for us a few hours daily, right in and around their own homes. The business is easy, pleasant, strictly honorable, and pays better than any other offered agents. You have a clear field and no competition. Experience and special ability unnecessary. No capital required. We equip you with everything that you need, treat you well, and help you to earn ten times ordinary wages. Women do as well as men, and boys and girls make good pay. Any one, anywhere, can do the work. All succeed who follow our plain and simple directions. Earnest work will surely bring you a great deal of money. Everything is now and in great demand. Write for our pamphlet, circular, and receive full information. No harm done if you conclude not to go on with the business.

GEORGE STINSON & CO., Box 488, PORTLAND, MAINE.

YOUR BOY OR GIRL should learn Short-hand and Type-writing.

Charles Reade on "The Coming Man," says: "The boy or girl who can write short-hand and operate the type-writer is safer from poverty than a Greek Scholar."

Where to go—PALMER'S Short-hand College, PHILADELPHIA.

Is the place, if you want a thorough course in short time. The instructors are specialists. Individual attention is given. Stenographers furnished to Business Men. Catalogue with list of Graduates sent free.

2 oz. PACKAGES 5¢

New York Tribune. 1895

Foremost of American Weeklies

Circulation, 168,000 Copies a week.

First to rally from the overwhelming defeat of 1892. The New York Tribune patiently labored for two years to awaken the sleeping judgment of the Nation. Possessing an enormous circulation, equipped with a staff of competent and honest students of public questions, and itself having no object to serve except the welfare of the masses upon the farms and in the shops, scorning lies and sensational appeals, and satisfied merely to place the truth before its readers, the N. Y. Tribune has sent half a million earnest and reflecting people, weekly, a budget of honest facts, sensible arguments, and timely suggestions, which have at last borne fruit in the elections of 1894. The work of the people is, however, only half done. It is necessary in 1896 to place in the chair which Grover Cleveland has not adorned, a constructive statesman of the Republican faith. To this task the Tribune now addresses itself, and invites the support of every American citizen who desires a return of the "good old times."

Bowling G. Horv, ex-congressman from Michigan, but now of New York City, will continue to discuss Tariff, Currency, Colleges, and Labor questions in the Tribune. By all odds the most witty, earnest, and well informed speaker upon the stump, he is every year sent by the Tribune to aid the local campaigns in every part of the country. He keeps in constant touch with the people, knows their wants, and addresses himself in the Tribune directly to the thoughts which are in their minds, and makes himself understood. He will gladly answer questions, asked in good faith, by readers.

All the regular features of the Tribune will be continued. For Western readers, a special array of Western news is supplied. For Eastern readers, an Eastern edition is printed.

It is the intention to make the paper especially helpful to farmers and mechanics. Each class has its separate department in the Tribune, and the new inventions of mechanics, who lack means to exploit the productions of their brains, are advertised free of charge, in the hope of aiding them to find a purchaser or a partner.

The market reports of the Tribune, long acknowledged to be the best in the country, will maintain their old standard; and the usual variety of foreign news letters, essays upon home topics, book reviews, articles on chess and checkers, and miscellany, will be presented every week. The editorial pages of the paper sum up the most important news of the day, we can say.

The Tribune also prints for the ladies, the very latest fashions from Paris and London, and there is a department "Answers to questions," conducted by a capable writer. In which all the questions of the people on miscellaneous topics are carefully answered.

The Semi-Weekly Tribune is an incomparable paper for readers who go beyond the range of the daily Tribune, but find it necessary to keep in touch with the best thoughts and higher interests of the world at large.

A few premiums are offered to our readers and club agents.

Any friend of the Tribune is cordially invited to send for sample copies and make up a club of subscribers. We would be especially pleased to see a large circle of readers in every workshop.

Sample copies free. WEEKLY, \$1. SEMI-WEEKLY, \$2. DAILY, including Sunday, \$10. The SUNDAY Tribune separately, \$2. Tribune Almanac for 1894, ready in January, 25 cents.—all previous numbers supplied.

THIS PAPER may be found on file at Geo. F. Howard & Co's Newspaper Advertising Bureau, 40 Nassau Street, where advertising contracts may be made for it in NEW YORK.

A WINTER'S ENTERTAINMENT!

GREAT VALUE FOR WEEKLY NEWS OF THE WORLD FOR A TRIFLE.

The NEW YORK Weekly TRIBUNE

a twenty-page journal, is the leading Republican family paper of the United States. It is a National Family Paper, and gives all the general news of the United States. It gives the events of foreign lands in a nutshell. Its Agricultural Department has no superior in the country. Its Market Reports are recognized authority. Separate departments for "The Family Circle," "Our Young Folks," and "Science and Mechanics." Its "Home and Society" columns command the admiration of wives and daughters. Its general political news, editorial, and discussions are comprehensive, brilliant, and exhaustive.

A Special Contract enable us to offer this splendid journal and the South Jersey Republican for

One Year for only \$1.25, CASE IN ADVANCE.

Regular subscription for the two papers is \$2. Subscriptions may begin at any time. Address all orders to the South Jersey Republican.

You can have a sample copy of each at this office.
