Mrs. Alta White has sent to the Red Cross Society, for the Belgian sufferers, twenty-five dollars, for five hundred loaves of bread. Now she is raising milk money, for the babies.

Announcement of the marriage of Joseph W. Rouse, of Blue Anchor, and Annie D. Jones, of Elm, N. J., on Jan. 14, 1914, came as a surprise to their friends and acquaintances. The bride is a teacher in the Elm school, having resigned to enter upon the joys of matrimony. Friends wish the young couple much joy and happiness.

#### When Some Fellow's Daddy Kills Some Fellow's Dad.

When we get to fighting our fathers step in and say it is wrong, a shame, and a sin. With "Why in the world did you ever begin scratching and biting?"

A black eye at your age; why, goodness me, your face is so battered you hardly can see. What kind of a man will you grow up to be—Constantly fighting?"

But some fellow's daddy kills some fellow's dad. The finest old daddy a boy ever had. And half of the world is shouting like mad. When men disagree.

And now they are fighting by millions, they say. Thousands of daddies are killed every day. With no one to stop them or pull them away. And no referee.

We know very little of war and its schemes. We can't understand what all of it means. But when war takes our daddies it certainly seems

That fighting should cease. It strikes us as foolish that men think they must keep shooting and stabbing. Oh, why can't they just shake hands and have peace?

—T. M. Gray, in "Dore's" Life.

#### Prepare for Dear Eggs.

If the farmer wishes to benefit by the high prices that eggs are certain to bring next fall and winter, he should begin to get ready for them at once, say the poultry specialists in the department.

The way to have eggs late in the year is to hatch pullets early. It is the early hatches from which the early pullets are derived that are the largest money makers for the poultry producer.

Early hatched cockerels can be marketed in almost any market in America when they attain a weight of three-fourths of a pound to a pound and a half each which they should reach at about 6 to 10 weeks of age, respectively, at a greater profit to the producer than at any other time of their lives.

The early hatched pullets if properly grown, should begin to lay in the fall at the time when eggs are scarce and high in price.

A FEW FACTS TO REMEMBER. Pullets must be well matured before they will lay many eggs. Pullets that start to lay in the fall before cold weather sets in will, as a rule, lay all winter.

It is the early hatched pullets that produce eggs in fall and early winter, when prices are high.

February, March, and April are the months to do your hatching, in order to secure early hatched pullets.

Yearling and 2-year-old hens do not lay many eggs in the fall, as they are molting at that time, and the feed they consume goes not only to keep up the energy and life of the birds but also to put on or grow a new coat of feathers.

In properly matured pullets, all surplus energy beyond that needed to meet the requirements of the body is available for the production of eggs.
