HAMMONTON, N. J., SATURDAY, MARCH 21, 1868. 200 PER YEAR

[For the South Jersey Republican] County House.

Passing last Sunday in the vicinity of he County House, I accepted an invitati from Mr. Turner, the Steward, to attend eligious services held in the same, for the mefit of its inmates. These services have een held for about a year nest and are namally conducted by some good realous layman. On this occasion however, they re assisted by a colored preacher of the vicinity, who from his chergetic manner of the man at the modest rate of half a mile speaking might be considered a near rela- a minute, al rides on the way for which they felt grateful. These men had before made tive to Boanerges. Services were held in the dining room. About twenty-five paupors, a number of them looking quite tidy were present. We thought Mrs T. took enecial pains to have the females attend

and to appear respectful and respectable. Thirty or forty persons from the neighorhood were also in attendance. After preaching, several of the paupers came orward for prayers. Prayer-meeting was followed by speaking, in which several of the paupers who had been converted du the year took part in a matter creditable to both head and heart. Without any earthly inheritance, yet they had the true iches, a title to an deth not away." The absence of the earthly good was more than compensated by the presence of the heavenly. After service, Mr. T. kindly permitted us to visit the hospital. Several good brothers and sisters had preceeded, and were administering words of cheer to those who were unable o leave their room. Here, two men were objects of pity. One whose feet and limbs were swollen almost to the bursting point, from dropsy; the other, after the manner of the ancient lepers, his toes had fallen off, and his feet were fast becoming a mass of corruption. When we saw his tear mois "Piy the corrows of a poor old man Whose trambling limbs have borne h your door." tened cheek, we thought

Though not to our door individually, still, he became helpless as a mouse in the cusody of a cat. The bear immediately in a limited sense he had come to our door, and right gladly would we again, if it were tion being taken from the rear of the right needed, pay our mite to the tax-gatherer thigh, also the right super-scapular muscles, including the spine of the same. By good luck it so happened that Mr. Stone was well we should judge, by the way we say him store away the pork and bread, but returning to the camp and seeing the bear over his prey and always carrying his rifle with him, drew up and laid him prostrate unbalanced. He had worked about two upon his victim. Glass was yet alive but years in the construction of an uncouth olecerated that it was thought impossible looking wheel, with wooden weights pen for him to recover and furthermore the dant from all its parts, an invention intend-Indians having shown hostil menaces, the ed to supersede steam. We thought the whole company deemed it necessary to old-man's invention begun where steam move to some other locality, and Glass ended, in log, and what was had for him, still being alive, a consultation was held; it would always remain there. We learnt when it was decided to give any two of there were about fifty paupers receiving them who would volunteer to remain with support, a larger number than ever before the old man until he should die, ten dollars at one time, and that the house had not each when they reached St. Louis. The sufficient room to furnish accommodations proposition was taken by two young men as the steward desired to give, but as the and the next day all left following down hard winter is now about over, he thought a tributary of the Missouri until they some would soon betake themselves to selfthought themselves safe, and again comsupport. We noticed that cooking operations, except baking, had to be done by nenced traping. The two young men now fireplace and were surprised to learn that ing somewhat alarmed lest they should fall Mr. Turner's was the only cook stove in a prey to savage cruelty, left the patient to the house. Now to cook for fifty persons his fate and immediately commenced to over a single fireplace must be both tardy overtake the main company whose trail and inconvenient. A good cook store would they could easily follow. In a few days not only remove this inconvenience, but they come up with them and reported that | would be a real matter of coonomy, as much Father Glass had died before they left, and less fuel would be used than by the present the expectation was that they would be plan of cooking by fireplace and warming emunerated when they reached the settlethe room by a ten plate stove. Should an ment as understood, and again commenced unlucky turn in the wheel of fortune bring their trapings. Glass told me that they us to that hospitable board, we should inleft but a little provision which he soon ate sist that the county authorities dine and The man now constructed can make his up, and being left near a spring of water, sup with us until they had furnished was able to crawl to it upon his hands and cook stove of capacity equal to the domands knees after his wounds had began to sup- made upon it.

Miscellaneous.

A Steam Man--A Wonderful Piccoot Mochunism.

The old adage which proclaims that there's nothing new under the sun," has has invented a man; one that, moved by steam, will perform some of the most important functions of humanity, that will magined. His wounds continued to heal standing upright, walk or run, as he is bid, in any direction and at almost any rate of speed, drawing after him a load whose weight would tax the strength of three stout draught horses. The history of this supplies. It was in the year of 1825 that ourious invention is as follows:

Six years ago, Mr. Dedrick, the inventor, who is at present buttwenty-two years of age, conceived the novel idea of constructing a man that should receive its vitached to our mess and offered to be our tality from a perpetual motion machine, hunter notwithstanding his old age, and Thoidea was based on the well-known me

he left us and urged forward alone and got perpetual motion machine, the present succoss was attained.

ing correctly proportioned, making him a whether a woman could be made a success. to prevent sinuggling and taking charge of second Daniel Lambert, by which name he our goods retained them over night; but is facetiously spoken of among the workwhen told that I was a medico, permitted men. He weighs five hundred pounds -me to go on and after arranging things, Steam is generated in the body or trunk followed me and took me to his hours, with which is nothing but a three-horse-newer apparent welcome. On nearing the village lengine, like those used in the steam fire springs have been replaced by stronger engines. The logs which support it are complicated and wonderful. The steps are into town and when I dismounted tried to taken very naturally and quite easily. As ing generated on Thursday, he stamped aboulder me to carry me in, declaring that the body is threwe forward, upon the ad- off like a live Trojan. In the evening he Galaxy, but no Moon. The deficiency

the steam. But step in pace advances the body two feet and every revolution of the cogine produces four paces. As the engine is capable of making, more than a thousand revolutions a radiate it would get over the ground or that calculation at the rate of a little more than a minimum. But we have the rate of a little more than a minimum at the rate of a little more than a minimum also would be safe or managed to the rest of the mould be safe or managed to the rest of the

faster than would be safe on wheven ground or on Broad street cobble stones, it is proposed to run the engine at the rate of 500 revolutious per minute, which would walk

The fellow is attached to a common Rockaway carriage, the shalts of which serve to support him in a vertical monition. These can be thrown backward or forward from one in order to enable it to succeed or de seend all grades. To the soles of the fee spikes or corks are fixed, which effectually prevent slipping. The whole affair is so firmly attached to the shafts and has so excellent a foothold that two men are unable to push it over. In order to enable it to stop quickly, it is provided with two appliances, one of which will, as before stated, throw it backward from the vertical, while the other bends the knoes on a direction opposite to the natural position.

An upright post, which is arranged in front of the desh-board, and within easy reach of the front seats sugains two miniature pilot wheels, by the turning of which these various motions and evolutions are directed. It is expected that a suffiaway under the back seat it the carriage to work the engine for a day, and enough water in a tank under the front scat to last half a day.

In order to prevent the giant' from for his support. Mr. T. took us into frightening horses by its Moderful appearanother room where was a man physically ance, Mr Dedrick intended to clothe it and give it as nearly as possible, a likeness to the rest of humanity. The boiler and such parts as are necessarily heated will be encased in felt or woolen wilder garments.

—Pants, coat and vest, of the intest styles, are provided. Whenever the fires need coaling, which is every two or three hours, the driver stops the machine, descends from his seat, unbuttons "Daniel's" vest, opens a door, shovels in the fuel, buttons up the vest and drives on. On the back etween the shoulders the steam cocks and ganges are placed. As these would cause the coat to set awkwardly a knapsack has been provided that completely covers them. A blanket neatly rolled up and placed on top of the knapsack perfects the delusion. The face is moulded into a cheerful countenance of white enamel which contrasts well with the dark hair and moustache. A sheet iron hat with a gauge top acts as smoke stack.

The cost of this "first man" is \$3,000, though the makers, Messrs. Dedrick & Grass expect to manufacture succeeding ones, warranted to run a year without repairs for \$800. The same parties expect to construct on the same principle, horses which will do the duty of ten or twelve ordinary animals of the same species. These it is confidently believed, can be used alike before barriages, street cars and ploughs. way without difficulty over any irregular surface whose ruts and stones are not more than-nine inches below or above-the-level-

or the road.—Newark Advertiser

THE ASSAULT UPON THE MERIDEN EDI-R. Some weeks ago, Mr. Frederick Douglass went to Meriden, Conn., to lecture, and put up at a hotel kept by one Stephen Ives, an unreconstructed Alabam-lan, who susulted his guest by forbidding "that nigger," in a loud and offenave tone, to eat his dinner at the common table. The matter became a subject of sarcastic comment by several prominent lournals. which somewhat indiscriminately blamed the people of Meriden. Replying to this with a full exhibit of facts, The Meriden Recorder, edited by Capt. Luther G. Riggs. vindicated Meriden as the only town that powerful than Mr. Riggs, struck the latter, who was sitting in a chair, a very violent street immediately after the colling of and wholly unexpected blow directly in the face, knocking him over backward on the floor. He followed it up with two other severe blows, both on the face. Bystanders thereupon intered. Ives was imme distely prosecuted. The affair created not a little excitement, and the general sentiment of the citizens of both parties is wholly with Capt. Riggs, and it is possible the "chivalric" Alabamian may yet learn that The great mass of theeves, paupers and some things may be done in Alabama, criminals, that fill our penitontaries and that can't very well be done in Connecticut. A Washington correspondent of the Cincinnati Gazette, speaking of Gen. Grant's recention last week, says that Gen. Long-

reception last week, says that tren. Long- mily, those who make you gives more street seemed to enjoy himself greatly, and men, were taught in their boyhood to be held unrestrained conversation with many of his former friends. He declared himsel for Congressional reconstruction, and as being anxious to have a speedy restoration of the Union. A lady said to him, "Well, General, so you are for reconstruction?"
To which he replied, "Yes, madam, most marks made at the very-time of the bitter controversy between the President and Gen. Grant, and in the house of the latter. were regarded as one of the severest com mentaries upon the course of the Presiden which could be framed, coming as it did from one of the most prominent actors in

peachment the following passes occurred, in which Mr. F, did not get the worst of the argument:

Mr. Farosworth. Well, Mr Speaker, with the liberties of loyal men and freed-men in the southern States crushed out, as they will be, with unwashed rebels and as they will be, with unwashed rebels and unrepentant traitors restored to power, with the President on their side, with the Army in his hands and Congress at his mercy, what will be the condition of the country, especially when, if what my friend from New York [Mr. Brooks] says be true, that Army is recruited from the ranks of the rebels, or, what amounts to the same thing—

thing—Mr. Holman. I hope the gentleman will not misstate the remarks of the gentleman

An instance of connubial affection is narrated as occurring lately in New Hampshire. A couple had quarreled during the shole term of their married life. At last the husband was taken ill, and evidently about to die. His wife came to his bedride, where, after she had seen his condition the following colleguy enamed:

"Wy, daddy, your feet are cold, and your hands are cold, and your nose is cold! "Wa'al, lot am be bold!

"Wy, daddy, you're goin' to die!" " Wa'al, I guose I know wot I'm 'bout !"

"Wy, daddy, wot's to become of me if you die?" know in, mut's to becume of me!"

A Jady who has a great horror of tobacco ent into the New Haven cars the other day, and inquired of a male neighbor :

"Its you chew tobacco, sir?" "No ma'am. I don't," was the reply, but I can get you a chaw if fou want one. · 19集份

Remniscences-No 2.

At the Blue Springs we found in waiting

four hunters, Stone, Glass, March and Andrews, who had been waiting several

days our arrival, wishing to accompany us

through the wilderness into New Mexico.

They had lost all their mules save one by

crossing a rapid stream in which they were

drowned, with a portion of their traps,-

They had gathered a plenty of venison with

which our company was supplied and be-

ing good hunters, we gladly granted them

a fraternal reception, giving them occasion-

several trips among the Rocky Mountains

for beaver, but it mattered little whether they caught much es little, for when arriving

at the settlement they would debauch until

all was spent, and then go again for more.

Mr. Glass had become an old man of some

seventy-five years and was a native of Scot-

land; still dressed in his highland kilts, belted capote, and Scotch caps and mixtal;

retained his native simplicity and wholly

devoid of anything like sophistry. I was the more interested in him inasmuch as I

had heard from him some years before

through the public press, as having been eaten up by a white bear. I well re-

membered reading of the incident, and now

full proofs were given me of all but the

up., He was badly eaten, as the muscles

showed evidence of great lacerations and

loss. From him and his companions, above

mentioned. I learned the true history of

the case. They had been partners for some

years in beavor traping among the Rocky

Mountains, On the occasion alluded to,

it was Father Glass' turn to cook for the

mess, while the rest went out to examine

the traps; as was their custom overy mor-

ning. In the interval of their absence,

the old man was busily engaged toasting

beaver tails, when a white bear stealthily

pounced upon him and cast him down, when

commenced tearing his flesh, a large por-

staid four days-with-the-old-man, becom-

porate and the inflamation having subsided

and in the course of a few days commenced

his journey on all fours, determined to overtaku the company, but was without food, and

dependent upon some suculent roots which he gathered on the way. It was a tedious

journey under circumstances disabled as he

was and without suitable food, but finally

accomplished it and like one risen from the dead came upon them. The consternation

of his two waiting friends may well be lin-

and he again able to visit the settlement

when as usual he with his comrades contin-

ued in revelry until the avails of their formor trip were exhausted, and they obliged

to repair to the mountains again for new

to be his last trip as he seemed to appro-

hend saying that he thought he would take

while scouting in search of deer and antelone

prairie, which after making a bark bridle he

succeeded in catching, which had strayed

from some indian tribe, and who should

come riding into camp but Father Glass

greatly elated at his good fortune. He

continued with us until we struck the Span-

into the settlement some two days before

than a grain of mustard seed, and have not this town last evening, about 9 o'clock, by the mustard seed's capabilities of develop- the appearance of a ball of fire, apparently.

CHEAP CARPETS: the mustard seed's capabilities of development, who call on their kind, advocating a policy that if adopted would take us back a dozen centuries at least. This old foggyism would be amusing if it was not so outrageously stupid. The principle alarm of these fossil specimens seems to be that if the beets are grown and the factory built fine owners of the factory will make moore. It would be a serious thing if they should, no doubt, but we are inclined to think the place could endure even so great the amount of a fall of fire, apparently.

The appearance of a ball of fire, apparently.

Jo All Wanting Farms

In the great Hammonton Fruit Settlement, the best inducements are offered to all wanting tarms, in the most delightful and healthy climate, with a good productive soil, being among the best in the rarden-State of New Jersey; only thirty miles from Philadelphia on the Camden and Atlantic Railroad and but few miles to the New York Railroad. These lands are sold to the actual settlers at low prices and casy terms, in five, ten, twenty acres and upwards to suit. The title perfect; warrantee deeds, clear of all incumb ance, neals when all the purchase money is paid.

The Soil

is a fine sandy and clay loam, suitable for all grains and grasses, and is pronounced the finest quality for gardening and fruit raising of the fire a marine deposit, with a many substance mixed all through it in a maily substates nixed all through it in a very commuted form, and in the exact condition to support plants with proper farming it is very; productive and profitable; easily worked; and warm and early. The lay of the land is slightly undulating, and is called level; it is free from stones or rocks.

To is the best fruit soil in the Union.

Pears, Peaches, Appes, Quinces, Cherries, Bir cherries, Raspherries, Grapes

fall kinds, and all other fruits are raised here in immense quantities, and they are ought after by the dealers and command the best prices in the markets.

Hammonton is already celebrated for its fine fruits and wine.

Trion two hundred to five hundred dollars is cleared, free from expense, ner acre to the fine fruit culture. Sweet Potatoes, Melans, and all the finer Vegetables delight in this soil; this branch of farming pays much better thing again raises where muol dand with his grain, raising and

is described in the communication twice a day to Philadelphia, New York, and Atlantic City. The Railroad Company leaves care here to be filled with fruit every day in the season; they are filled in the afternoon, and the season; they are filled in the afternoon, they are filled in the afternoon of the season; they are filled in the afternoon. the season; they are fined in the arctrood, and the same night or next morning by daylight are in the market, where the highest cash prices are obtained, without any other trouble to the producer than delivering the produce to the car. None of the land now offered is over one and a half miles from the Rallroad.

The Climate

is mild, and delightful the winters being show and open, out-door work can be car-xied on nearly all winter, whilst the sum-men is no warmer than in the north. Persons wanting a change for health-will be satisfied here—the mildness of the clibe satisfied, here—the mildness of the cli-prate is soon boneficially folt by delicate persons and those suffering from Dyspen-gia, Pulmonary affections, or General De-hilly, as hundreds, here will testify. The socion has long been known for its health, and during the summer mouths tens of housands flock for health. No Miasma, "Until and Fevers in this section.

The Water

Is pure and soft, of the best quality. It abounds in streams and is found by digging made here, as there is no rock to go through. We have the best stores in the county, where goods are sold as cheap as they are in Phadelphia or New York—

Good sthools with competent teachers.—

Hon. Wm. Moore, May's Landing: John M. Meere, Fislerville; Leaman Blow, Bridgeton; Seth Howan, Mauricetown; Nathaniel Stratton, Millville; Eurman L. Mulford, do.; Leac E. Mulford, do.; John L., Sharp, do.; Francis Recres, do. Good, schools with competent teachers.—Clergymen of all denominations reside here, some of them in charge of congregations, others cultivating the fruits; also a number of retired physicians. The Methodists, Prosbyterians, Baptiats, Universalists, have their services regularly. Mills convenient.

MOTE A MARCHA Reliable practical nurserymen who furn-math kinds of trees, plants, and vines at the

The population of the settlement is large and rapidly increasing; it is composed of the best classes from New England, the Middle, and Westorn States,—intelligent, industrious and moral. The buildings are a set and hasdenges, and sounce them fine. All meterials for building, improving, &c., at hand; also reliable mechanics who will give satisfaction. Every convenience to be and that can be found at any other place. Percona owning property here obtain tickward of the Italicad company to and from the result of the discount of twenty-five per cent of the figure face.

Putnam's Magazine For 1868.

The re-issue of Putnam's magazine has been hailed with acclamatien in every section of the country, and the publishers are gratified in being able to acknowledge almost insumerable expressions of pleasure and good-will from readers and friends of the first series of "Putnam's Monthly."

It is their purpose, in their new anterprise, to jeave nothing undone to much the appendicular and desires of the public.

Putnam's Magazine will be a national publication. supported-by the best writers in every de-

Putnam's Magasine will be anational publica-tion, supported by the best writers, in every de-partment, from every section of the country. High, toned papers on matters of national inter-est, popular science, industrial pursuits, and sound information and instruction on important topics, will be specially cultivated. In the lighter ac-ticles, healthy entertainment and pursuamusement for the family circle will be carefully chosen from the ample resources presented by a large circle of contributors.
