Speech of Dr. Ayer.

The following which we take from the Lowell Courier, was delivered by Dr. Ayer, the well-known "Medicine man," at the inauguration of the new town of Ayer, on Monday, 6th of March:-

Ladies and Gentlemen

On the western coast of Scotland where it slopes into the Irish Sea, a river, rising on the mountains of the inner land, winds down among the hills and empties into the Frith of Clyde. From remote time it has been called Ayr from an old Scotch word "Ayry," meaning an eagle's nest—the river of the eagle's nest. Near its mouth and a contiguous harbor, long stood a hamlet which became a royal burg or town named from the river, and now about one-third as large as Lowell—the city of Ayr. For more than a thousand years it has been noted in the history of Scotland. During the wars of Robert Bruce it was one of his resorts, and was especially favored by him because he was there cured of loprosy. Oliver Cromwell made it one of the depots and headquarters of his army in his attack upon Scotland, and one of his old forts is now the On the western coast of Scotland where

But above all its distinctions, Ayr was the birth-place of the poet Burns. And what a poet! What a voice has he given to all the endearments of home! How has he hallowed the cottage and all it covers—weans and wife, patches and pover. ty, beaus, barley, ale, hardship and the poor man's toil. How he wraps with tenderness whatever he names, even his bleak leagues of pasture, the stubble field, ice, snow, sleet, and rain, brooks, birds, mice, thistles, and heather. His Bonny Doon, John Anderson, my Joe John, Auld Lang Syne, and Highland Mary roll round the world in every ring-Mary roll round the world in every ringing symphony with what is purest and
best in human nature. His songs woo
and melt the hearts of youth and maidens,
bring solace to the serrowing and courage
to the overburdened by their lot. His
inspiration has set the affections to music in strains that are immortal.

-No other one man ever made a language olassic, but he has rendered that lowland Scotch a Dorio dialect of tame. The name of his home and his beloved river Ayr was lifted on the wings of his pathos. and now the approaching traveller yearns to reach the spot his genius has sancti-

Along the borders of the sea in a parallelogram and surrounding the town is a country of the same name—Ayrshire.

It would weary your patience to hear the history of my ancestors from one ancient John of Ayr, then John Ayr, down through the centuries to this Ayer now before you; through their vicissitudes of poverty and plenty—of fortune and mis fortune; how they have intermarried with England, Ireland and Scotland, and later with Americans, who are an excellent mixture of them all.

My friends, -you have chosen the name Tinherited for your town with an-extra-ordinary unanimits, and have thereby conferred an honor upon ms, the proper acknowledgement of which I do not feel eacknowledgement of which I do not feet thilly able to express. But Liber you to be assured that it is appreciated and that it will be gratefully remembered with a living interest in your prosperity while life remains to me, and, I trust, beyond that by my children after me.

If this name has become noted among the many that are worthier around you, that is greatly due to its publicity. May I he permitted to state whence that came? Until within a few centuries all the eivilized nations of the Globe were pent up on the Eastern continent. Two or three hundred years ago they leaked over into this; fow and fearfully at first, then more and more but always in their settlements timidly hugging the Atlantic coast,— Within the last two or three generations, they have burst out, as it were, and over run these vast continents of the West Now they are scattered here and posses these measureless stratches of mountains and valleys, hills, plains, forests and prainies with the boundless pampas and mountain ranges of South America. Former generations lived in villages and towns, thickly settled together where physicians were plenty and near at hand. Now, the people are widely scattered, in many sections of these many countries. For great these measureless stretches of mountains numbers the timely treatment of physicians cannot be had; over large traces of country good or competent physicians cannot be had at all. They cannot visit patients enough many unles apart to live by their profession, nor one they carry medicines unough with them on horse back for the requirements. Hence has arisen in these modern times, a necessity for remidies ready at hand, with directions for their use -a present recourse for relief in the exigencies of sickness, when no other nid is near. It is a new necessity consequent upon the changed condi-tions of human life -- a want I have spent my years in supplying, and will tell you comothing of its extent. Our I choratory something of its extent. Our I charactery makes avery day some 630 000 portions or deses of our preparations. These are all teken by somethody. Here is a number equal to the population of fifteen cities as large as Lowell, taking them every day (for rickness keeps no subhaths) nor for oneo only, but again and again year after year, through nearly one third of a century. We all join in the jokes about neal cities as we do about the Doctor's mission to kill, the dergyman's misioenty and to kill. The chergyman's rusineerry and the lawyer's cheating. Yet cuch of these labors among the most serious realities of nic. Suckness and its attendant suffering are no joke, neither is the treatment of them. This system of transportable relief them. This system of transportable relief to be made exaltable to the people, and keep its remotes froch in their memories. This is done by interpreting. Mark its extent. An indicate more, taking the rim of the reweigness with which is extend (for all commences) is stocked from the reweigness with which is extend (for all commences) is stocked from the remove each equal to pro-

book, the thickness through them is sixteen miles. In addition, it takes some seven millions of pamphlets and twelve millions of circulars to meet the public demand for this kind of information. Our annual issue of pamphlets alone, laid sol-al upon each other, make a pile eight and one quarter miles high. The circulars measured endwise reach 1894 miles, and these assertions are matters of mathematical certainty. Whatever the estimation in which these publications may be held here, they reach the firesides of millions upon millions of men who do treasure and them and the in their trials do

regard them, and who in their trials do heed the counsel they bring.

Not only over these great Western continents but throughout that other land so little known to you, under our feet, the Australian continent, there are few villenges. lage as large as this which are not familiar with the name you have chosen, and

employing the remidies that bear it.

Thus, gentlemen, have I atriven in my humble sphere to render some service to my fellow men, and to deserve among the afflicted and unfortunate some regard for the name which your kind partiality hangs as these wells around me. We may look on these walls around me. We may look forward with confident hope to the renown von will sather under it, and the prosperity, which their is a reason to trust the future has in store for you. Situated as you are here on one of the main arteries between the west and east, between the great industries of the plough and the spindle you must aid in their exchanges and thrive with them. Soon these chan-nels will be opened wide and pouring through your precincts streams of men and morchandise that will need your furtherauce and must contribute to your

I had occasion to address a few words to the Senate during the last Congress on the importance of this subject, and they under a small appropriation for the last winter months. This appropriation was to pay a crew of experienced surfame, to serve the mortar and the boats at alternate life saving stailons. The gentleman representing that district in the House to get a crew at each station. Fearing that I could not obtain the whole sum required, I saked for a crew at each alternate station, and secured an appropriation of \$50,000 for that purpose. During this last season vessels came ashore in the neighborhood of the stations where a crew was, and life and property to an immence amount were saved on such occasions. And almost as it for the purpose of proving the importance of manning all these stations where there is also came ashore at stations where there tance of manning all these stations, vessels also came ashore at stations where there was no crew and nobody to serve the Government apparatus, and on such occasion of life and great loss of property. WALTHAM WATCHES.

The extensive use of these watches for the last fifteen years by Railway Conductors, Engineers and Expressmen, the most exacting of watch-wearers, has thoroughly demonstrated the strength, steadiness, durability and accuracy of the Waitham Watch. To satisfy that class in these respects, is to decide the question as to the real value of these time-keepers. More than 500,000 of these watches are now speking for themsolves in the pockets of the people—a proof and a guarantee of their superiority over all others.
