Not for many years has there been such a building boom as there is now on in Hammonton. New houses are being erected, additions made summer kitchens and porches added, and roofs and fences looked after We are glad to see this, as it is a sign of better times.

We hope that every citizen will attend the special town meeting next Tuesday evening, in the High School assembly room. So far, we have heard no one express disapproval of the proposed concrete road building. People are tired of this everlasting patching and puddles. We spend enough money in a few years to lay permanent paving. Attend the meeting and voice your sentiments. Read the notice as printed, ordered by the town.

Tuesday was certainly a lovely day, said to be the warmest March 28th for fifty years.

just because you think they are worn out, or past repair—cut down the cost of your shoe

And you can do this if you buy "Youngster" shoes, and then take advantage of our factory re-building system—a plan that saves you the cost of the second pair—by making the old pair (the ones you would have thrown away) wear like new.

Please remember this re-building system—is not just ordinary repairing—for the shoes are actually re-built from "stem to stem" by expert shoemakers, over the same, "last" that the shoe was originally made on—and when they are returned to you, they wear like new—all for the small service charge of \$1.35. (But this re-building service is offered only on "Youngster" SHOES.)

An ideal shoe for the boy or girl who is vigorous and full of life—dressy enough for best, and rugged enough for the most strenuous play—Light, Cool, Comfortable and Good Looking. Youngster shoes fit the feet, and bend with every step, almost like being "bare footed"—still they are strong and sturdy, and can be depended upon to stand the rugged "wear" and "tear" of healthy youth's most vigorous usage.
