SOCIETY DAMES UNBEND

No Longer Turn Up Their Noses at Money Made "In Trade"

TIME was, and not so very long ago, when the British Dame of high degree was wont to turn up her aristocratic nose in scorn at the smell of pounds, shillings and pence which bore the slightest taint of soap, candles or cash.

Her income and the income of the lords and lordlets for generations had been derived from such noble pursuits as squeezing the utmost farthing out of their poor tenants, or, in even more remote days, as fitting out piratical or filibustering expeditions to plunder whomsoever they might. The tradesmen they held in the greatest scorn.

The situation in the British Isles, until quite recent years, was, indeed, not unlike that in Japan, her sister island kingdom and her present political and military ally. In Japan the warrior was looked up to as the most noble of God's creatures. The aristocrat was despised.

The traditions of China were exactly opposite. There the tradesman was considered the most honorable member of the community and the soldier as a mere hireling. Now that Japan has entered upon an era of industrial expansion, practical every business establishment in the Mikado's realm has a Chinaman at the head of its financial department. They will not trust each other.

England's awakening, too, is of quite recent date, and the American millionaire has been the first to get to do with establishing the tradesman in his proper high place in the community. When the American millionaires began to sell themselves to American girls for good, old Yankee greenbacks, English society was not slow to perceive that the odor did not long cling to dollars made in trade.

Then began a frantic grab for the money-makes. The American millionaire, around the highways and byways of Britain in search of an aristocratic purse to hold them.

This rush for the tradesman's profits received no little impetus from the peerages bestowed, during the Victorian era and by King Edward, upon the successful merchant princes of the empire. To possess a million pounds sterling, during the last few years, has been a sufficient passport to the House of Lords, and the descendants of the buccannery of cen-

The Countess of Warwick and Her Little Son

wick, who had a shop in Bond street. Last year Lady Alington Gordon Lennox, Lady Gordon's sister, started a jam-making and fruit-bottling business at Bournemouth, and she is expected to encourage village industries by forming classes. About two years ago she secured the order for the Victoria Cross for the services of her light in the Chapel of the Pyx at Westminster and the work was executed under her personal supervision. Her latest venture seems likely to be as successful as its predecessors.

The Duchess of Abercorn is a splendid figure of her Irish home, where she has done much to develop local industries. Her great hobby is her famous embroidery, from which every week a heavy consignment of butter finds its way on to the big Atlantic liner, which has as into many of the London clubs.

Her Grace has also encouraged home-knitting by the cottagers, and every year 14,000 pairs of socks are sent to the Army Clothing Department. Indeed, she claims that it was some of these socks which enabled our soldiers to finish off King Prithvi of Ashanti just as Moltke used to say that the war of 1870 was won by German boots.

Society women seem to take particular kindly to military and dress-making, and among aristocratic modistes may be mentioned Mrs. William Greville, only daughter of Admiral Oliver, the Countess of Farnham (now Countess Alford), Lady Hope, and Lady Duff-Gordon.

One of the first society women in business was the Countess of Warwick, who had a shop in Bond street.

work, and to counterbalance the deficit on her stable expenses she is now starting a carpet shop, and a photograph supply store at Connaught House, where a fine restaurant will be opened in the near future.

There is nothing like an examination of statistics to upset received ideas. If there is one point on which people both in and out of the dramatic profession would agree, it is that New York is one of the most important cities in the world. Yet a few minutes spent with pencil and paper and the census report shows that the city of New York is not so important as it is generally supposed to be.

The census report shows that the city of New York is not so important as it is generally supposed to be. Yet a few minutes spent with pencil and paper and the census report shows that the city of New York is not so important as it is generally supposed to be.

Where is the Exact Center of the United States

AMERICANS have so strong a desire to be at the center of things that in this country two hundred and fourteen cities, counties, towns, townships, and villages have chosen the word "center" for the whole or part of their names.

Several of the leading college societies, for instance, were established in the institution nearest the educational center, and the political center, as has been mentioned, lies within Speaker Cannon's congressional district.

Take the resultant of the ten centers just enumerated, and the pin with which the result may be marked will pass through the post village of Engleville, Hamilton County, Indiana. If there is such a thing as the real center of the complex life of the country, it is in that neighborhood. Still there is no hamlet so poor or so remote that it cannot claim, as Proctor Knott did for Duth, that its site is so exactly at the center of the viable universe that the sky comes down at exactly the same distance on every side—Sunday Magazine.

Of course there are as many real centers as the country has attributes, products, or industries. Only one of them stands still—the geographical center. All others are moving westward with more or less rapidity. In fifty years the center of population has traveled two hundred and thirty miles, the manufacturing center two hundred and forty-five miles in the same time. In most cases we can ascertain only where the centers were at the time of the last United States census, but the political center may fairly be located at the medial point of the population that voted in the last presidential election. Just so, the center of education may be placed at the center of the college population, and so on through the list of more stable activities.

There is nothing like an examination of statistics to upset received ideas. If there is one point on which people both in and out of the dramatic profession would agree, it is that New York is one of the most important cities in the world. Yet a few minutes spent with pencil and paper and the census report shows that the city of New York is not so important as it is generally supposed to be.

MOTOR BOATS THAT FLY

OF the building of freak craft there is no end.

The latest example is a flying motorboat invented by Signor Torinoni, of Milan. It is a real boat, but it is not a boat in the ordinary sense of the word. It is provided with aluminum wings, and it is capable of flying at a speed of thirty miles an hour.

Another unique type of craft was the unfortunate Thomas W. Lawson, lost off the Sicily Islands. The other day, however, a new type of motorboat was launched, which was equipped with a record number of masts. This, however, was by no means the most remarkable feature of the boat.

It was said, at the time, that the boat was equipped with a record number of masts. This, however, was by no means the most remarkable feature of the boat. The boat was also equipped with a record number of sails.

It was said, at the time, that the boat was equipped with a record number of sails. This, however, was by no means the most remarkable feature of the boat. The boat was also equipped with a record number of masts.

BETTER PART OF VALOR.

Two Irishmen were at hand, with each other. The friends of one claimed that he had been insulted, and urged him to vindicate his honor.

But he prudently objected. "Look at the size of him. The man's a giant." "Very well," responded his discomfited friend, "if the people will say you are a coward."

"Well, I dunno," he replied placidly, "but I ain't no coward. I'd rather take my chance with the big fellow than with the little fellow."

"That's the spirit," said the other, "and I'm glad to see you stand up for yourself. You ain't no coward, and I'm proud of you."

"That's the spirit," said the other, "and I'm glad to see you stand up for yourself. You ain't no coward, and I'm proud of you."

OLD Favorites

The Sailor's Wife.

And are ye sure the news is true? Is this a time to think o' war? To judge, say ye what ye will, Is this the time to spin a thread When Colin's at the door?

Reach down my cloak, I'll be to the quay And so I'll come again, For there's nae luck about the house, There's nae luck at a', There's little pleasure in the house When our guidman's awa'.

And gie to me my blondest, My blondest, my blondest, For I want nae but the sailor's wife, That Colin's in the town, My Throcky slippers mair ga'e on, My stockin's peartly blue, It's a' to please my guidman, For he's baith leal and true.

Rise, lass, and mak' a clean breast, Put on ye bonnet and shawl, Gie little Kate her button gown, And Jack his Sunday coat; And mak' their shoes as black as shil, Their hose as white as new, It's a' to please my guidman, For he's baith leal and true.

There's two fat hens up the coop, Been fed this month and mair; Mak' haste and draw their necks about, They'll be ready for the fowling, And spread the table neat and clean, For we can tell how Colin fared When he was far awa'.

See true his heart, as smooth his speech, His breath like caller air, For I want nae but the sailor's wife, That Colin's in the town, My Throcky slippers mair ga'e on, My stockin's peartly blue, It's a' to please my guidman, For he's baith leal and true.

As he comes up the stair— And will I see his face again? I'm downright daisy o' the thought, In troil I'm like to greet! If Colin's well, and well content, I'll be nae mair to grieve, And I'll be nae mair to grieve, And I'll be nae mair to grieve.

As he comes up the stair— And will I see his face again? I'm downright daisy o' the thought, In troil I'm like to greet! If Colin's well, and well content, I'll be nae mair to grieve, And I'll be nae mair to grieve, And I'll be nae mair to grieve.

As he comes up the stair— And will I see his face again? I'm downright daisy o' the thought, In troil I'm like to greet! If Colin's well, and well content, I'll be nae mair to grieve, And I'll be nae mair to grieve, And I'll be nae mair to grieve.

GOD NEW ZEALAND BIRDS.

The Honey Eater Acas Like a Frencher and Looker the Part.

The honey eater is one of the commonest and at the same time the handsomest of the New Zealand birds. The neck is ornamented with a tinge of curly feathers of a greenish color with white centers and the throat is adorned with a tuft of white feathers, which has gained for it the popular name of "honey eater."

"What is this dish, my good French?" the master asked of the proud chef who had been summoned to congratulate him. "We know it is some kind of wild fowl, but it has a flavor all its own—a flavor none of us ever met with before."

"That dish," the chef answered proudly, "is a triumph of the culinary art. Only a Frenchman could have prepared it. It is, in one word, a masterpiece. 'An owl' cried every one, turning a little pale. 'But how,' a lady asked, 'could you have been so cruel as to kill the poor bird? 'Ab, madam,' said the chef, 'I did not kill it. It was dead already.'

Rider Haggard, the author of "She," calling a good story a good story, has written a novel, not long ago heard that he had produced at Budapest, and he wrote asking for programs and photographs. He received a letter in reply from the manager, saying that he had believed that the ill-fated author was dead, and he had been appearing in the Hungarian newspapers. Mr. Haggard wrote again, and asked that the report of his death might be contradicted, but the manager replied that the editor refused to publish the contradiction, as they believed it to be a mere dodge to advertise the ballet.

A Chicago hotel had a night watchman who did not take very kindly to a woman who was regularly going through the hotel at certain hours and took a set of electric buttons, thus indicating his whereabouts at a given time. So a pedometer was given to him, which would register every step he took. All went well for a time. One morning, however, the watchman was missing. On search being made, he was found asleep in the engine room, and the pedometer so attached to the string of the engine that with every stroke it registered a step. It had been traveling all night, and when awoke it registered two hundred and twelve miles.

When Slatine was a young lawyer, and cases were few, he was asked to defend a poverty-stricken tramp accused of stealing a watch. He pleaded with all the ardor of a young lawyer, drawing up pictures with such convincing energy that at the close of his argument the court was in tears, and even the tramp wept. The jury deliberated but a few minutes, and returned a verdict of guilty. The tramp, however, was not allowed to leave the court, and he was found asleep in the engine room, and the pedometer so attached to the string of the engine that with every stroke it registered a step. It had been traveling all night, and when awoke it registered two hundred and twelve miles.

TOWN COUNCIL MEETING.

Regular session on Saturday evening,
April 4th. All members present.

Light Committee recommended a
number of changes and additions to
street lights,—among others, removing
one-half of those on First Road, and the
arc at the Union, and extending lights
a half-mile out Thirteenth Street; also
incandescent lamps on Main Road to
Central Avenue.

Licenses Committee reported upon the
four applications considered. John
Giacomo withdrew his, and Council re-
fused to grant Battagliese's petition.
James Pinto and Frank Jacobs were
given renewals of their licenses.

It was developed that Pinto and Ja-
cobs had also asked for bottlers' licenses,
but for some reason these were not read
at last meeting, hence had not come be-
fore the Committee. On motion, both
were laid over and referred to license
Committee.

Property Committee reported two
bids for safety vault, \$269 and \$230.
Contract awarded to H. Kirk Spear, the
lowest bidder.

Finance Committee presented re-
port of auditors of Water Department
accounts, which was ordered printed.

Bills ordered paid:

Total of all bills, \$770.02.

Three bids received for fire ladders
and truck—\$1250, \$1140, \$1050.

It was stated that now wheels can be
put on present ladder truck, and im-
proved rigging for about \$300. After
much debate, the Committee was in-
structed to look further into the subject
and report to a special committee if
necessary.

The Band asked for use of the Park
on Memorial day. Granted.

It was voted to have California Privet
hedge about Town lot, and the lawn
seeded.

Property Committee given authority
to buy the grand stand at the Park if
they think advisable.

Council's Fire-escape Committee in-
structed to ascertain whether improve-
ments recommended had been made.

Chas. K. Nelson asked permission to
remove a shade tree which stands in his
drive-way. Referred.

Voted to have permanent stone mon-
uments placed to mark boundaries of
Park, at an estimated cost of \$20.

Attention being called to the fact
that no curb stops are put in gas-pipes,
where introduced into buildings, the
matter was referred to Fire and Light
Committee.

BEES LAXATIVE COUGH SYRUP

CONTAINS MONEY AND TAR. CONFORMS TO NATIONAL PURE FOOD AND DRUGS LAW.
An improvement over many Cough, Lung and Bronchial Remedies, because it rids the

LET THE ROYAL TAILORS

Make your Easter Suit

And you will be as well dressed as any man, and better
dressed than many. They will make it a little "different"
from ordinary clothes, and make it show what it is,—a
high class tailor made suit. Everything will be first-class
but the price,—and that will surprise you. These suits
cost no more than good ready-made clothes, but they look
better and wear better.

AS YOU LIKE IT.

You can have your coat made to suit your fancy; you
choose from twelve different styles. Your vest is selected
from six styles, and your pants are made full peg top,
medium peg, or wide legs. Every garment is made
according to your instructions. Every suit is guaranteed
to fit; guaranteed not to shrink; guaranteed to hold its
shape until worn out. You see, we take all the risk and
responsibility.
