The proprietor of this celebrated medi-The proprieter of this celebrated medicate justly claims for it a superiority over all remedies ever offered to the public for the BAFE, CERTAIN, SPREDY and PERMANENT cure of Ague and Fever, or chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to hear him testimony to the truth of the assertion that in no case thintever will it fail to ours if the directions are strictly followed and carried out. Thatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been sured by a single bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain to cure, if its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. The campaign just closed found, the country in the trough of the political waves. The Republican managers have made the best struggle they could against a state of general apathy. In a few states they have been added by the inspiring presence of a great leader whose speeches have awakened simost the only enthusiagm anywhere shown. The result of the compaign is graitfying; its gains are an inspiration; the Damocratic losses are a plain guide to popular drift. From this time forward the constructive will feel the litt of the advancing wave of 1888, which, if we all do our duty, will sweep out from Washington the masqueraders now in possession, this fees of protection, equality and patriotic government. It is now the duty of all extrastar despressions of the consolidated, cheered, and milited. To this work the Trastax pledges its zealous efforts.

It is known that Germany has a covctouseye not only on Holland, but on that portion of Belgium which includes Antworp. Germany is anxious to figure as a great maritime power, and Holland would give her a colonial empire with 80,000,000 of people, besides an enormous commerce. Antwerp is to-day one of the principal sea-ports of Europe. Its commercial importance would be enormously swollen if it became the chief port of the greatest power on the continent. Indeed, so desirable are Holland and Eastern Belgium to Germany, that there is a suspicion that instead of fighting, that power might offer France to divide Belgium between them, and so remove all cause of quarrel.
