A Hint for Atlantic City.
[We give the following a place in our columns with pleasure. It is from a person who resided in Atlantic City several years, and though now in a distant part of the State, has not lost interest for the "Island City."]

Mr. Editor.—Evidently the landlords at Long Branch have a keener eye to business than their brethren of Atlantic City. The latest scheme is the building of a cottage to be presented to Bishop Simpson, and to be occupied by him during the coming season. The proposition was started at the close of last summer, and the first subscription of \$100 was made by President Grant. Apparently the theory of building cottages and ceremoniously giving them to popular men, the Branch people think an admirable one, as it not only adds greatly to the popularity of the place, but also cash to their pockets. At the beginning of last season a neat cottage was gratuitously offered the President on condition that he would make it his residence during the season. The proposition was accepted, and the result is known—thousands of people flocked there for no other purpose than "seeing Gen. Grant," and because it was fashionable, made so by his presence. This scheme greatly affected the value of real estate. Building lots of 100 feet front, in the vicinity of the cottage, now almost reach New York prices. This new dodge of inducing the Bishop there, will probably produce like effect.

After such an example would it not be well for the people of Atlantic City to take knowledge of their competitors of the Branch—immediately build or buy a cottage and present it to a man of eminent reputation. It is possible, and quite probable that Vice President Colfax, Gen. Sherman or Henry Ward Beecher would not reject such a proposal. Undoubtedly the Land Company would contribute the site, and the cottage people one-half the funds necessary. The landlords and permanent residents would doubtless cheerfully furnish the remainder.

Perhaps the same individuals that hooted at the proposition of lining the beach with a plank walk, will as persistently endeavor to defeat this, but as the project was executed regardless of their hostility, and thereby proved to be one of the most beneficial acts ever effected by the city, their counsel ought to be as readily thrown aside.

Here is a desirable opportunity for a speculative scheme. Will it be improved? Perhaps now or never, as the Saratogians have an inkling in this direction. There appears to be no good reason why a vigorous movement should not immediately be made. So, evince your pluck.

Camden and Atlantic Railroad—Atlantic City.

The directors of the Camden and Atlantic Railroad are now exerting their energies in making arrangements to accommodate the increased amount of travel which, even at this early day, promises to pass over their line during the coming watering season. The company have made an addition to their rolling stock by the purchase of ten handsome cars, which increase their passenger accommodations to forty-five cars. Baird & Co., of the Baldwin Locomotive works, are building them a large locomotive, which, when completed, is to weigh thirty-five tons, and is to have two driving wheels over five feet and a half in diameter. The through train on the Camden and Atlantic Railroad this summer will make the run in one hour and thirty minutes, without stopping at any of the intermediate stations. This fact will not be without its influence upon those who are seeking a cool retreat for their families, but who wish to be within easy distance of their business themselves. The uniform regularity in the running of the through express train last season was remarked by all who patronized it. The reduction of fifteen minutes in the running time, will still further enhance the popularity of this line. The track has been thoroughly overhauled and repaired the entire distance, and two hundred tons of new rail laid, placing the road in better condition than at any other former period. The enterprise of the railroad company in supplying gravel to improve the streets, and the aid cheerfully rendered in everything looking to the improvement of Atlantic City greatly encouraged the owners of property there, and has been instrumental in setting on foot several new enterprises, which fact is apparent when we turn our attention to the improvements that have been made within the last few months. Dr. Wetherill of Philadelphia has put up a large hotel to be called the "Island House," which is located about five blocks below the new "Excursion House." The proprietors of the Unit d

States Hotel, not finding their accommodations sufficient last year, have made an addition of forty rooms to their popular house. J. Doughty, Esq., is also building a large boarding house, and a row of spacious stores adjoining the Ashland House, are being erected, under the supervision of Mr. Bryant. The bathing promises to be better than it has ever been before, owing to a change in the beach. The popularity of Atlantic City with those who can only afford to spend a single day at the sea shore, is steadily maintained. The company have already forty-two charters for excursion trains on their boats, and applications are made almost daily for others. We congratulate the railroad company and all concerned at the cheering outlook for the season of 1871.—Camden Press.

No fertilizer introduced to the farmer of the
Middle and Southern States has given more gen-

The trade in it has steadily increased and the consumption now throughout the entire country far exceeds that of any other fertilizer. The large capital involved in its production affords the surest guarantee to its continued excellence. The company has a far greater interest in the permanence of its trade than any number of consumers can have; hence it is the highest interest of the company to put their best fertilizers in the Market, that their usual facilities, aided by the best scientific ability, can produce.

This guano is sold at retail by local agents of the company throughout New Jersey, Dela-
