furnished. Jobbing attended to
promptly. Box 538. Local Phone 800.
Cherry Street, Hammonton.

Rip Van Winkle.
MR. EDITOR:—Through the courtesy of your paper, the ladies of the Civic Club wish to draw the attention of the public to the high class entertainment to be given to-night in Bellevue Hall under their directions. Rip Van Winkle interpreted by an artist, Mr. George Kierman, who will impersonate the greatest actor of the twentieth century, Joe Jefferson. The ladies put forth every effort in aiding the firemen; now turn around and help. That is only fair play.
The proceeds are not to increase the Club's finances, but to aid the Park Committee to make our Park so attractive there will be no necessity of driving a dozen or more miles on the annual Sunday School picnic.
The small sum of 25 cents includes this entertainment to-night, and your share in assisting this civic work in your own town.
Thanking you all in advance.
MRS. C. CUNNINGHAM,
Cor. Sec'y of Civic Club.

The Daughters of Liberty will give a strawberry festival on Tuesday evening next, May 10th, in Firemen's Hall. Strawberries, cream and cake will be for sale.
There are but three weeks more of school in the suburban schools, and five at Central.

DR. J. A. WAAS,
Dentist
Oogley Building, : Hammonton, N. J.

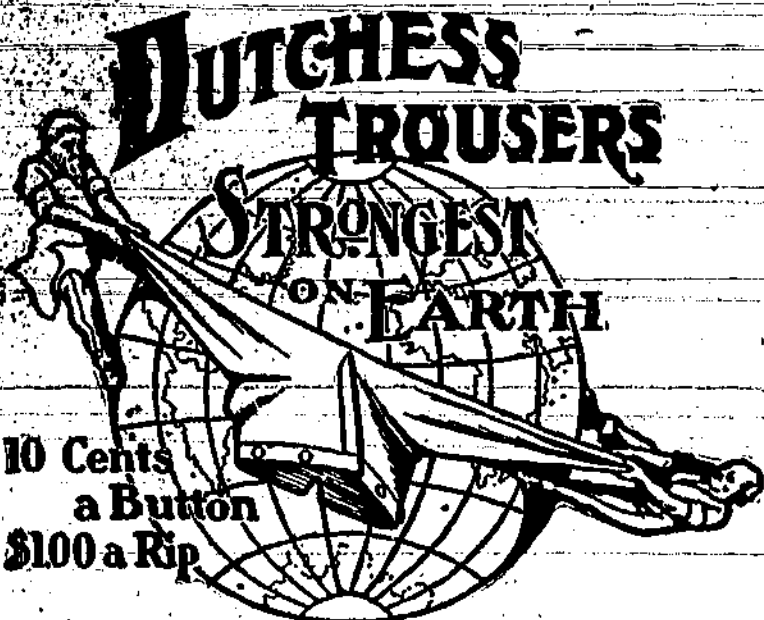

Osgood-Whiffen

BANK BROTHERS STORE
Hammonton, N. J.

The wise woman marries a homely man because the contrast is in her favor.

The man who expects to get legal advice for nothing should marry a woman lawyer.

The government is going to give us weather tips while we wait. That's the way to get the weather.

It is not the size of a woman's hat so much as the cost of it that worries the man who pays the bill.

Andrew Carnegie recently referred to "that worthless dress called money." After all that money has done for him, too!

If that London bar for women deities to win a big success it should make a specialty of 99-cent and \$1.38 deposits.

An elevator has been installed in St. Peter's at Rome. Will somebody now please give the Sphinx an extension telephone?

A professor tells young women they should pick their husbands. Of course, but they shouldn't pick them before they are ripe.

In our Atlantic fleet there are 3,500 sailors who cannot swim. They prefer to be the men behind the guns, which they hope will keep afloat.

One of the college professors wants to know why Americans are unhappy. One reason is that the people next door make it so difficult to be as expensive as they do.

Little Evelyn announces that she is going to Paris for the purpose of studying sculpture and living quietly. No mercy should be shown to anybody who attempts to hold her.

Now a London doctor has arisen to declare that mankind is losing the sense of humor. Those who live within range of tannery areas will welcome the news with unalloyed joy.

A Philadelphia magistrate has held that taking an umbrella from a friend is not criminal, but taking one from a stranger is larceny. But a man who has his umbrella taken can scarcely be called a friend of the taker.

Men who are willing to pay \$50 a seat for the purpose of witnessing the fight between Hon. Jefferson and Hon. Johnson should at least have the good taste to refrain from complaining around about the cost of living.

Perhaps not a cruel, but certainly a most unusual, form of punishment was that inflicted upon the young women of a Western college, for some "forbidden frolic" were required to commit to memory the Constitution of the United States.

American men of science are more glib than those of England. For example, a London anthropologist has lately declared that a human skull found at Gibraltar is that of a man, six hundred thousand years old. Americans pool-pool the idea, and decline to be so ungenerously as to look at a woman's teeth to discover her age—the idea of roasting a lady as a hoglet—and insist that the only way to tell anything about her is by a study of the circles in which she lives.

Foreign steamship companies doing business with American ports must pay the corporation tax, according to a recent opinion of the Attorney General. His opinion is based on the provision of the law which makes all foreign corporations amenable to the tax on that part of their business done here. There are great difficulties in the way of ascertaining on what proportion of his income a foreign steamship company should pay a tax; but if the Supreme Court finds that the law is constitutional, a way can be found for collecting an approximately half tax from the steamship companies. The government maintains that the tax is in the nature of a license fee levied on the privilege of doing business. Its opponents insist that it is a direct tax on property, and is therefore unconstitutional.

There are so many things suggested for the anthropologists to do that it is not strange that they select and designate. But nowhere among all the subjects in the vast range of American geology, from marble medical colleges to archeological finds, is the great cause of the American anthropologist so much as it is in the study of the human body. It is not the study of the human body, but the study of the human mind, that is the real cause of the American anthropologist's interest. The human mind is the most interesting and the most mysterious of all the subjects in the vast range of American geology. The human mind is the most interesting and the most mysterious of all the subjects in the vast range of American geology. The human mind is the most interesting and the most mysterious of all the subjects in the vast range of American geology.

His Way of Popping.
Miss de Style—Am I the first girl you ever loved?
Mr. Gunbusta—No; but I hope you'll be the last.—Judge.

With three nations racing for the south pole it is fortunate that Americans are nimble in their feet.

T. R. Jr., who is to be married shortly, is well prepared. He has already learned how to beat the carpet game.

Rubber is worth now almost half as much as silver, pound for pound. Here is a chance for a more elastic currency.

This is a pretty big country, and there are more than eighty millions of people in it, but there is weather enough for everybody.

After visiting the north pole the Zepplin airship expedition expects to "anchor behind Greenland." Sounds like a nice cozy place to warm up in.

London, with 40,000 children in the hunger line, needs to try something more far-reaching than reform of the house of lords for its present troubles.

The "Chanticleer" umbrella has appeared. It would be an undoubted success if it would grow loudly when it was picked by another than its owner.

A New England woman detective is to marry a millionaire. Perhaps he thinks in view of the attacks on wealth, now the fashion, that a detective will come handy in the family.

One aviator is of the opinion that it is just as dangerous to fall a hundred as a thousand feet. But the man who falls a thousand feet will have more time to think of all the mean things he ever did.

According to a Chicago doctor, the idea of a medical college, the blame for certain afflictions which, when present in limbs and joints, are commonly called rheumatism, should be laid principally on the tonsils, which, he says, should be cut out before the morbid changes take place in the joints. He adds that such an operation, together with plenty of sunshine and good food, will cure "rheum." What a mistake it was for human beings to have tonsils, anyway.

A year or two ago an Ohio farmer, discouraged in his attempts to raise orchard trees, was about to cut down his orchard trees for firewood. An officer of a neighboring agricultural college secured permission to take a part of the orchard and care for it in a scientific manner. This meant little more than that the farmer was to be paid for his orchard trees, and the result last year was a not return, over all expenses, of nearly five hundred dollars. Nowhere is applied intelligence more productive of quick and abundant returns than on the farm.

Let the wife who is continually complaining at her husband because he isn't earning enough to make it possible for her to dress as well as the lady next door have a care. Let a word of advice to the only way to tell anything about her is by a study of the circles in which she lives.

Foreign steamship companies doing business with American ports must pay the corporation tax, according to a recent opinion of the Attorney General. His opinion is based on the provision of the law which makes all foreign corporations amenable to the tax on that part of their business done here. There are great difficulties in the way of ascertaining on what proportion of his income a foreign steamship company should pay a tax; but if the Supreme Court finds that the law is constitutional, a way can be found for collecting an approximately half tax from the steamship companies. The government maintains that the tax is in the nature of a license fee levied on the privilege of doing business. Its opponents insist that it is a direct tax on property, and is therefore unconstitutional.

The Massachusetts youth who by day was a handsome employer of apparently exemplary habits and by night a burglar and, as it proved, a murderer, in a type of criminal that novelties and playfulness occasionally portray, though examples in real life are rare. It is a type of criminal that novelties and playfulness occasionally portray, though examples in real life are rare. It is a type of criminal that novelties and playfulness occasionally portray, though examples in real life are rare.

Science and Invention
Nearly 200,000,000 residents of India are dependent upon agriculture for their living.

The quantity of silver produced in Mexico last year, was the largest in the history of the republic.

The most practical solvent for oil and grease stains on a floor is a hot, saturated solution of common washing soda.

A five-foot piece of steel rail, hung from a wooden framework, serves as a fog bell at Clatskanie, Md., on Chesapeake bay.

Photographs, mounted on push carts, are replacing the long familiar hand organs in the streets of European cities.

German chemists are making a fair-sized substitute for turpentine by distilling heavy petroleum obtained from Borneo.

A concrete lock to be built at Lockport, N. Y., in connection with the Empire State's barge canal, will have a lift of 50 feet.

A single blast in a mountain side in southern California brought down 120,000 cubic feet of rock to be used in building a dam.

Recent tests will have a chance to express their opinions on a proposition to build thirty-three miles of underground railroads.

The growing use of ozone for purposes of purification lends general interest to recent experiments by Edmund van Aubel on its production, by the action of ultraviolet light. Lend was the first to show that it is possible to produce ozone in this way, but although other experimenters confirmed his conclusions, Messrs. Boyler and Nogier recently disputed its correctness. Van Aubel reaffirms Lend's results in a paper just presented to the Paris Academy of Sciences based on his own experiments.

Perhaps the usefulness of dogs to man is nowhere more convincingly shown than in their exploration. In the Antarctic expedition, the dogs were used to pull sledges and to hunt for seals. The dogs were also used to pull sledges and to hunt for seals. The dogs were also used to pull sledges and to hunt for seals.

The climatic years are certain years in a man's life that were long believed to be of peculiar significance to him as turning points in his health and fortune. These are the "mystic" years, seven and its multiples, which add numbers, 21, 35, 49 and 63. The most important of all was the sixty-third year, which was considered fatal to most men.

Callor—How pleased you must be to find your new cook is a stayer!
Honesty—My dear, don't mention it. She's a stayer, all right, but unfortunately she's not a cook.—Boston Transcript.

Let the wife who is continually complaining at her husband because he isn't earning enough to make it possible for her to dress as well as the lady next door have a care. Let a word of advice to the only way to tell anything about her is by a study of the circles in which she lives.

MARK TWAIN
Chicago Record-Herald.

His hands fell from the wheel; he looks no more
To see what reef or shoal may be ahead,
What narrow channel there may be to thread,
What jagged rocks may jut out from the shore!
What message is it that the leadsmen send?
"MARK TWAIN!" The troubled engines
Cease to throb.
The song the breezes sang and in a sob
He whispers—
"The world has lost a friend."

THE ENCHANTED SHEEP-FOLD

The hills far off were blue, blue,
The hills at hand were brown;
And all the herd-bells called to me
As I came by the down.

The hillside turned to roses—roses;
A white rose rose and a red rose
And a lock of silver wool.

Nobody minded—none, none;
And then True Love came by.
They thought my laugh but the
Nobility knew but I.

The trees were feathered like birds
Bliss was in every tree;
Yet nobody heeded, nobody heard,
Nobility knew but I.

And he is fairer than all—
How could a heart go wrong?
For he gave I know, and his knew
mine.

Like an old, old, old song,
Josephine Preston Penhwy.

A Woman's "No"

Cyril Osterman proposed to me for the first time, at Henley Regatta. We were in a Canadian canoe, and Cyril pleaded his case passionately into my left ear in the intervals between pushing logs and punts out of our path.

Why he chose such a ridiculous time I have never understood, and I found it exceedingly difficult to convey my answer to him with the decision and the clarity of thought which I was so proud to possess.

"No, Cyril, dear," I said. "I really couldn't. You know I like you awfully, and what's more, you amuse me. But I can't marry you now. I'm not ready yet."

"No, Cyril, dear," I said. "I really couldn't. You know I like you awfully, and what's more, you amuse me. But I can't marry you now. I'm not ready yet."

MARK TWAIN
Chicago Record-Herald.

His hands fell from the wheel; he looks no more
To see what reef or shoal may be ahead,
What narrow channel there may be to thread,
What jagged rocks may jut out from the shore!
What message is it that the leadsmen send?
"MARK TWAIN!" The troubled engines
Cease to throb.
The song the breezes sang and in a sob
He whispers—
"The world has lost a friend."

THE ENCHANTED SHEEP-FOLD

The hills far off were blue, blue,
The hills at hand were brown;
And all the herd-bells called to me
As I came by the down.

The hillside turned to roses—roses;
A white rose rose and a red rose
And a lock of silver wool.

Nobody minded—none, none;
And then True Love came by.
They thought my laugh but the
Nobility knew but I.

The trees were feathered like birds
Bliss was in every tree;
Yet nobody heeded, nobody heard,
Nobility knew but I.

And he is fairer than all—
How could a heart go wrong?
For he gave I know, and his knew
mine.

Like an old, old, old song,
Josephine Preston Penhwy.

A Woman's "No"

Cyril Osterman proposed to me for the first time, at Henley Regatta. We were in a Canadian canoe, and Cyril pleaded his case passionately into my left ear in the intervals between pushing logs and punts out of our path.

Why he chose such a ridiculous time I have never understood, and I found it exceedingly difficult to convey my answer to him with the decision and the clarity of thought which I was so proud to possess.

"No, Cyril, dear," I said. "I really couldn't. You know I like you awfully, and what's more, you amuse me. But I can't marry you now. I'm not ready yet."

"No, Cyril, dear," I said. "I really couldn't. You know I like you awfully, and what's more, you amuse me. But I can't marry you now. I'm not ready yet."

"No, Cyril, dear," I said. "I really couldn't. You know I like you awfully, and what's more, you amuse me. But I can't marry you now. I'm not

SATURDAY, MAY 7, 1910

Manual Training.

The report of the State Board of Education for 1907 devotes many pages to manual and industrial training in public schools.

We would like to give our readers the entire chapter, had we the space.

The writer, Prof. A. E. Dodd, calls attention to the fact that in by-gone days each child had his or her assigned tasks in the house or on the farm, that work was done mostly by hand, and parents taught their girls and boys the use of needle and saw.

Then, too, the apprentice system produced workmen in every branch. Things have changed.

Factories teach each worker one branch in any industry, and supply a finished product cheaper to buy than to build.

Consequently, master workmen in any line are scarce. Parents of to-day do not give their offspring the instruction, as they probably did not themselves receive it.

Almost the only chance a boy has to learn a trade is in a Reform School, where he is sent for misconduct.

To correct these conditions, many schools have an industrial branch, where the girl is taught the correct use of needle and scissors, to mend and to make. The boy learns form and shape, and to use square, hammer and saw, and other practical tools. This gives them occupation for many idle hours, enables them to save many a dime, and gives them a sense of self-reliance that will prove very valuable.

Here, too, lessons in carelessness and accuracy are taught. If a boy is making a box, an error will show itself at once, and cannot be remedied by staying in at recess or after hours. He sees that he must saw strictly to the line and drive every nail straight the first time.

It is not expected to turn out finished workmen in these school courses, but, properly conducted, each pupil gains not only a practical knowledge of tools and materials, but enough actual doing to make him ambitious to do more. Every child likes to make something. Our Kindergarten proves this, where the dullest pupil shows with pride the woven mat he has made, the combination of colors he has learned.

The promoter says: "This instruction is valuable for all. It excites interest, quickens intelligence, develops habits of attention, perseverance, and industry, trains the eye to accurate observation, the hand to dexterity in execution."

The question of establishing such a course in Hammoncton schools will be considered at the special meeting next Saturday, 14th, and we hope to see it adopted. From forty-five to ninety minutes, twice each week, are usually devoted to this work.

As to the cost of this course, we may have something to say next week. The board asks for one thousand dollars the first year, to which the State will add an equal amount.

THE VULCAN TOASTER

can be used on any

GAS RANGE OR

HOT PLATE

It will toast four slices of

bread in two minutes.

Here's the one article that has been lacking in your kitchen

equipment, and for that reason you have been foregoing the pleasure

of a nice toasty slice of crispy toast. No need to do so any longer.

THE VULCAN TOASTER will toast four slices of bread

in two minutes, and toast it as it only can be toasted over a bed of

live charcoal. The outside of the slice is turned a rich golden

brown; not charred and blackened. The inside is left soft and

palatable, and the finished toast has that rich nut-like flavor that

even a dyspeptic can enjoy.

THE VULCAN TOASTER is so constructed that it is im-

possible for the products of combustion or the foreign tastes from the

flame to come in contact with the bread.

We are so confident that you will be pleased with the Vulcan

Toaster that we will send you one on a ten day trial. If you are

not entirely satisfied, we will return your money.
