### The Truth About

Hammonton

My dear Mr. Editor:

The letters and other literature appearing in the columns of your paper, in defense of our Town are indeed pleasing to us. Wherever, I have gone, I have always boosted Hammonton, not only because it is the town of my birth and because there are so many good Americans in it, but also because in it there is a large element in whose veins flows the blood of the Latina.

This recent spontaneous outburst of "What is the matter with Hammonton?' too clearly infers that something is wrong. Let us accept this as true. The ailment may be one of two kinds or both. It may be material and physical or merely mental. Let, us eventing each. If the first, the Town must be on a sporatic deviation from the normal life as registered by the normal life of our various communities.

If anyone would care to compare Hammonton with other communities, even with those in our immediate neighborhood, he would be convinced I am sure, that after all we are a little better off than most communities - certainly worse than none.

#### WHICH TIME?

There has been much confusion in Hammonton from the use of both Standard Time and Laylight Time. The resolution of Town Council that "the Observance of" Daylight Saving Time he and hereby is recommended to the residents of the Town of Hammonton" does not establish Daylight Saving Time either legally or officially. The legal time in Hammonton is Eastern Standard time.

Owing to the misunderstanding and uncertainty about the time we have decided to use Eastern Standard time in all news and announcements, unless otherwise specified. This time does not intefere with Daylight Saving as events may be scheduled an hour earlir than before. This is now being done by both banks and the railroads.

More than half a million Ford Cars and Trucks sold in 120 days. That is the astonishing record just established by the Ford Motor Company, eclipsing all previous sales figures and emphasizing more strongly than ever the right of the Ford to the title to "The Universal Car."

From January 1 to May 1 sales of Ford Cars and Trucks in the United States reached the enormous total of 561,544, nearly twice the number sold at retail during the same perion a year ago when the total was 283,782. Even with its huge production facilities, now operating on a schedule in excess of 6.500 Cars and trucks a day.

the company is mable to keep up with the unprecedented demand. April set a new sales record for the month, just as has every other month this year, and was the thirteenth, consecutive month in which sales have run over the 105,000 mark.

Sales during April totaled 165,582 Ford Cars and Trucks, 50,000 more than were delivered in the same month last year when 115,282 retail deliveries were made.
