The Wescotville Mite Society tender thanks to Mrs. Oakley and Miss Mabel Dorphley for their assistance. We consider them the good Samaritans. Also, to the Misses Samson, for both vocal and instrumental music. Also, to the Second Quartette of Hammonton, —Messrs. George A. Elvins, A. K. Bernhouse, Frank D. Hines and Henry Thayer, as they helped to swell the enjoyment of the "Dairy Maids' Festival" of May 5th, and made it pleasant, lively, and agreeable. Also, to the little singer, Miss Florence Hill, of Philadelphia, and to Miss Annie Weaver, her supervisor, who assisted her sister, Mary Weaver, through the whole.

Mrs. Grant and Colonel Fred Grant received nearly 200 delegates to the Methodist conference, Tuesday, who had fought under General Grant.

In 1880 there were not more than 5000 Jews in the Holy Land. Now there are more than 30,000, of whom a considerable number are wealthy or well-to-do.

TRANSPLANTING.

It is a common error to select a time just after a heavy rain for removing vegetable plants. If the soil is worked when very wet it sticks together and dries into a hard mortar like consistency, and is not readily pulverized again, and there is generally either a very drying or sultry state of the atmosphere immediately after rain which is quite sure to wilt the plants, and unless the ground is very dry I would rather transplant in a dry time just before a rain; and the afternoon, say after three o'clock, is much better than morning.

In very dry weather it is an advantage to use water, but when this is done the water should be turned into a cavity around the plant, and when it has soaked in, fresh dry earth should be covered over it.

Varieties of the Sweet Potato.—The Yellow Nansmond takes best in most markets, but the variety sometimes known as Red Nansmond is much superior in quality, being sweeter, drier and a better keeper. In markets where it is well known, it brings a higher price, but in many places there is a prejudice against it, probably arising from confounding it with the Red Bermuda, which is coarse and often stringy.

The Bermudas are grown for early use, but I have not found them earlier than others, the only difference in this respect being that they yield a less number of tubers, and when we get one tuber weighing a pound from a hill it gives the impression of being earlier than if we get the same weight in two or three tubers.

In the last number of the REPUBLICAN the editor is quite excusable for making me say *Cornus Florida* instead of *Cornus Florida* (dogwood) as it should have read, for I am ready to confess to a free use of hieroglyphics in my writing, and botanical terms when not distinctly written are little more intelligible than "Chinese."

WM. F. BASSETT.

Improvement in Printing.

The lecture upon "The invention of movable type and how to dispense with them," was given by V. F. Lake in the Council Chamber, City Hall, Atlantic City, last Tuesday evening, May 15th.

Among those present were Rev. J. J. Fedigan, Jos. A. Barstow, Gen. Elias Wright, Chas. Horner, Dr. W. M. Polard, A. H. Phillips, Peter B. Risley, D. S. Lacy, W. F. Wahl, Capt. Enoch B. Scull, Capt. Samuel Somers, and others.

The successive steps in the invention of movable type and the gradual appearance of type writing machines, capable of dispensing with movable type were carefully explained. Mr. Barstow expressed himself as satisfied that the invention is a valuable one. Gen. Wright stated that the demand for such work is enormous. Peter B. Risley told of the invention since his connection with it.

This is truly a remarkable invention. The more one thinks about it, the greater it appears. Think of a little steel type-sleeve weighing less than three ounces being guided in its mechanical movements to make impressions in justified page without any mental effort on the part of the operator further than to depress the ordinary keys of a type writing machine and to insert hyphens. The type being in one piece, it will be impossible to have wrong font, or inverted characters.

Morocco suffered some humiliation in apologizing to the United States, but that way was the easiest way out of a scrape. To a government which is the wrong an apology is much cheaper than other conditions to which a nation may be forced to make it right.

TOWN COUNCIL.

There is much said about what the Council do, and don't do. There are some things that ought to be done,—things that the old Council neglected entirely,—and while the new members were not pledged to these things, probably they will see the necessity for a reform, and if it is in their power, and not prohibited by our Charter, we have no doubt there will be a change for the better. The particular reform we ask for, is of the weather. We have great faith in the Town Council and good weather, and so have provided a good supply of Spring goods, such as

A leap-year party is to be given by the New Columbia Mills Society, in Mechanics' Hall, Pleasant Mills, on Saturday afternoon and evening, May 20th. Refreshments and amusements will be provided.

Many will remember a similar meeting last year, and will desire to attend. An invitation is extended to all persons interested in Sunday Schools. As this is entirely un denominational, it is hoped that all will accept.

The following are the names of the Hammon High School graduates, this year:

FIRST GRADE.
Chas. Moore, Eugene Hooper, Harry Baker, Richard Knight, Emma Faunce, Connelley Loveland, Mattie Smith, Nellie Tudor, Minnie Conkey, Kate Fitting, Minnie Wood, Leona Adams.
There may be one or two others,—but there have been some errors in copying the names, and the names cannot be given until the figures are corrected. As it stands, this is the largest class ever graduated in Hammon or (we believe) in Atlantic County.

The Camden & Atlantic Railroad Company have greatly improved the appearance of their depot grounds. The new freight-house is graceful in form and tastefully painted; the small building has been moved down below the water-tank, replacing the old pumping-house; and three new lamps have been mounted on turned posts in appropriate positions. The safety-gates will be put up next.

Monday evening, May 28th, at Union Hall, there will be an exhibition of pictures of the Battle of Gettysburg, thirteen large oil paintings, with a descriptive lecture. This was the decisive battle of the rebellion, so regarded by both sides, and therefore one of the most stubbornly contested. Every soldier will want to see these pictures, and all of the younger generation should see and hear. Our Grand Army Post will receive a good share of the proceeds.

Mr. Jacob Milb, of Union Road, has a new strawberry, the "Star," which he claims to be superior in all respects to any strawberry now for sale. It is a vigorous grower, at present the plants are six to eight inches high, remarkably strong, blossoms perfect, berries light-colored and glossy, it out-bears the Crescent or any other of the many varieties he has, and is an excellent keeper. Our readers are invited to call now and see the plants, and later when they are in bearing.

The John F. Rhodes concert, on Tuesday evening, was well worthy of the liberal patronage it received. We are not a musical critic, but we enjoyed it well, as did all who were present, judging from the hearty applause and frequent encore. Mr. Rhodes fully met our expectation, drawing from his violin strains that entranced, delighting all with his wonderful skill. Miss Mamie Little rendered her piano solos well. Miss Everett possesses a sweet and cultivated voice. Mr. Gastel has one of those rare full, strong, rich baritone voices, trained to do its best.

Several weeks ago, a gentleman appeared in Hammon, introducing himself as the representative of a firm engaged in the manufacture of agricultural implements of all kinds. He stated that their present factory, located in Michigan, was crowded with orders, and because of high freights he had been commissioned to choose a location in the East for an additional factory. Our town being favorably located, he asked whether our people would give two acres of land for the purpose. The company is fully organized, has sufficient capital, will put up its own buildings, employ fifty hands or more, and asks no further aid. Here is a chance that should not be neglected. We hope that some of our business men will investigate the matter at once, and if it is found reliable, spare no pains to secure so desirable an addition to the town's business.

Last week Friday, Minor Rogers was brought before Justice Atkinson, charged with violation of the ordinance which prohibits the sale of liquor in the Town of Hammon. Mr. Walter Flora had found that his son, with a number of others, had brought wine of Mr. Rogers on the previous Sunday, quietly worked up the evidence, and then made the complaint. Mr. Rogers looked over the array of witnesses and wisely pleaded guilty, paying ten dollars fine and costs. In the course of his remarks, he stated to the Justice that he had sold wine to different parties, as he had a right to do, and having pleaded guilty to sell on Sunday, to a minor, and allowing it to be drunk on his own premises, he paved the way for the next complaint, "keeping a disorderly house," which complaint Mr. Flora immediately made. The Justice held accused in \$300 bail for trial at May's Landing. Such charged batteries should be exposed and no guilty man be allowed to escape. There are others in the same section of the town, and they may expect an officer to call for them on any day, for evidence is accumulating.

Don't Experiment.

You cannot afford to waste time in experimenting when your lungs are in danger. Consumption always seems, at first, only a cold. Do not permit any dealer to impose upon you with some cheap imitation of Dr. King's New Discovery for Consumption, Coughs and Colds, but be sure you get the genuine. Because he can make more profit, he may tell you he has something just as good, or just the same. Don't be deceived, but insist upon getting Dr. King's New Discovery, which is guaranteed to give relief in all throat, lung, and chest affections. Trial bottles free at Cochrans drug store. Large bottles, one dollar.

Phosphate.

After three years' trial; after several car-loads have been used in this section on plants, berries, trees, potatoes, corn, garden truck, etc.; after repeated trials with other fertilizers, side by side, by unbiased men, and evidence given in its favor, we ask for another fair trial with any other phosphate or fertilizer you may choose to use, and note improved results in your crops.

This phosphate does not reduce the soil, but its benefits can be seen for years after. For sale by
