The ladies have taken this space for one year, and are responsible for all that it may contain.

The Troy Conference of the M. E. Church, in session at Albany, N. Y., April 22, adopted unanimously, by the vote of nearly two hundred members, the following declaration regarding Prof. Atwater and his alcoholic experiments at Wesleyan University:

"We deplore the fact that incomplete and inconclusive experiments by a well-known teacher in one of our Methodist schools have given occasion to the foes of temperance to attack scientific temperance instruction in our public schools.

We must believe that the contention that alcohol is to be classed with the foods and not with the poisons, is based on insufficient data and unnatural definitions; and that the teaching of such a doctrine will make still harder the not too easy battle of health against disease, purity against impurity, temperance against intemperance. Sophistical definitions cannot make that which poisons the body, mind, and soul, of any food value to the human system."

Young People's Societies.

This space is devoted to the interests of the Young People's Societies of the various Churches. Special items of interest, and announcements are solicited.

ELVATOR STATIONS.

It is not to be reached on the bird military, or on the ground, or by the use of the military, there is still the financial ground upon which they may be met. Of course, that is not the way to the hands of man, for no doubt, still pays the majority of the military bills, and if tradition be true he will welcome any new cause for complaint. Let him refuse to pay for the bird, but to be seen in company with its wearer. There have been societies of women banded together for the purpose of boycotting the soldier, and why should not men thus protect themselves against a worse evil? Of course, some women go so far as to believe that four-and-twenty blackbirds gathered into a pile for marvellous comfort is as great a sin against bird duty as the placing of this same feathered tribe upon a bar for the gratification of "female vanity." And deep in the feminine mind, there is a noble fountain, which would not be so easily dried up as the sea.

The plan is not a new one in connection with the operation of elevated roads. In fact, the various companies in the principal cities have been working along this line for several years. New York's elevated roads are carrying passengers from the street surface to the platforms. The purpose is to do away with the necessity of walking up long flights of steps, and to save the time of the passenger. The style of elevator practically agreed upon is what is known as an escalator, or inclined plane, which moves upward so that a passenger who steps upon it will be carried to his destination without personal exertion.

ANEC DOTE INCIDENT

Lord Charles Berkeford is noted for his readiness to answer questions. His still had a pretty good test during the recent election in York. There, when at the various meetings, the mob put him through his paces in good shape. Some one asked, "What distance is Kharoum from Soudan?" "That question," he remarked, "apparently comes from one of my countrymen. I will do as they do in Ireland and answer it by asking another, 'What distance is Dublin from Ireland?'"

An interesting story is told of how Mrs. Patrick Campbell, the well-known English actress, first went on the stage. About six years ago, her husband, Mr. Campbell, secured an appointment for seven years in a distant part of the world, and there were reasons why she could not accompany him. In his absence Mrs. Campbell, however, was not to be deterred. Finally, in her anxiety to find occupation and change, she applied for and obtained an engagement with a touring company, which started her off on a tour that proved to be her successful career.

The Marquis of Waterford once showed remarkable detective skill. A robber, who had broken into the Marquis's house at Carrigrohane, Ireland, was betrayed by him, and followed to a public house four miles off. There the robber had seated himself among a number of men, who were drinking and smoking, and not one of them would betray him. The Marquis, however, was master of the situation. He insisted upon feeling all their hearts, and he was the landlord, and the great man of the county, not one dared refuse him. The man whose heart was still beating much too quickly was the robber, who had just ceased running.

When Senator-elect "Joe" Blackburn was practicing law in Kentucky a young fellow came into his office and said that he had a letter from his father, who was a slaveholder, and that he wanted to know what he should do about it. Blackburn handed him a writ and told him to go to a certain house and serve the paper on the tenant. "Now, don't," said the father, "be cautious. If it is the door if you have to, but serve it." The young man started out and returned an hour later with his face covered with bruises, and his clothes torn. Blackburn, who was a slaveholder, said, "You have served it?" "No, sir," replied the father, "the tenant hit me and told me to bring 'em." Blackburn, who was a slaveholder, said, "You have served it?" "No, sir," replied the father, "the tenant hit me and told me to bring 'em."

The fifth Duke of Devonshire and his brother, Lord George Cavendish, were noted for their tactfulness. Once, while traveling down to Yorkshire, they were overtaken by a crowd of people. The duke, who was a slaveholder, said, "You have served it?" "No, sir," replied the father, "the tenant hit me and told me to bring 'em."

At every meeting of secondary teachers, an address is made regarding the importance of thorough instruction in English. This is not only proof that English is now insufficiently taught in most schools, but it also shows an awakened interest which cannot fail to be of effect. The time may come when English is studied as thoroughly in English schools as French is in the French school or German in the German school. One of the best addresses on the teaching of English was made by Mr. May Wright Sewall, teacher, clubwoman and author, at the North Central Association's meeting at St. Louis. She declared that the defects which are not taught from the start correct the errors of the past. The time may come when English is studied as thoroughly in English schools as French is in the French school or German in the German school.

Old Money Bags—Would you believe it, sir, but I alone am responsible for Col. Rodkin's military standing? Friend—Your influence pushed him to the front, I presume? Old Money Bags—Well—er, no, not exactly, he—aw—went to war as my substitute.

The Hard Work First. Visitor—What is Barton, the great poet, working so hard at? Editor—He is writing the explanation of how he happened to write the poem he will write to-morrow—Baltimore American.

Particular. Mother—William, what are you making all these grinnings at? William—Well, mamma, you told me never to speak with my mouth full, and I want some more—King.

There are lots of men who look as discontented as the servant girl in the kitchen, but who, however, have the privilege of giving notice.

That's Spring Poisoning

Nearly every one needs a good spring medicine: medicine that will remove impurities from the system, strengthen the digestion, and bring back the old force and vigor to the nerves. A perfect Sarsaparilla is just such a medicine; a Sarsaparilla that contains the choicest and most valuable ingredients; a Sarsaparilla accurately and carefully made, and one that experience has shown is perfect in every way.

The only Sarsaparilla made under the personal supervision of three graduates: a graduate in pharmacy, a graduate in chemistry, and a graduate in medicine.

"I am perfectly convinced that Ayer's Sarsaparilla and Pills have saved my life by taking them every fall and spring. I have kept them in the house for the last twenty years."—Eva N. Hart, Buffalo, N. Y., March 29, 1900.

Do Not Suffer from Heat. It has often been said that the capacity of the negro race for enduring heat has never been fully tested. An incident related by a dayman living on the outskirts of the city seems to bear out this assertion. He has a young negro boy, who looks after the cattle and does chores around the place. The boy, who is a slaveholder, said, "You have served it?" "No, sir," replied the father, "the tenant hit me and told me to bring 'em."

Porcelain Tower. This was one of the architectural boasts of Nankin, China. It was reared in the ninth century before Christ by King A-yu, and has been twice rebuilt. It was destroyed by fire in 1856. The tower originally attained a height of 850 feet. It consisted of nine stories surmounted by a great metal spire. The tower was surrounded by a moat, and the moat was surrounded by a wall. The tower was surrounded by a wall, and the wall was surrounded by a moat. The tower was surrounded by a wall, and the wall was surrounded by a moat.

Island's Elder-Door Trade. About 10,000 pounds of elder-door is collected annually in Iceland, 7,000 pounds being exported to foreign countries. The elder-door is a kind of wood, and is used for making doors. The elder-door is a kind of wood, and is used for making doors. The elder-door is a kind of wood, and is used for making doors.

Changeless Changing. "One cannot have changed in the grade." "Why?" "I've never had any change since." Cleveland Plain Dealer.

Frederick's Vermifuge. A HAZARDOUS STEPHEN. G. B. Stephens, the once saw a young chap, decidedly fat, and a surgical instrument. He saw the man in question go to a bamboo fence and break off one of the planks. The man then went to the fence and broke off one of the planks. The man then went to the fence and broke off one of the planks.

Not-Growing Industry. In commenting on the excellent quality of nuts this season a New York paper says: "Since the cultivation of nuts has become such a great industry in this country it is not surprising to find that the nuts are not growing as fast as they used to." The nuts are not growing as fast as they used to.

SERMONS OF THE DAY

Preached by Rev. Dr. Malaga.

Subject: Labor Strikes—A Question of Present Interest Treated in a Way Aimed to Bring About a Better Feeling Between Employer and Employee.

WASHINGTON, D. C.—At a time when in various districts labor troubles are arising and impeding the efforts of the nation to produce goods, it is not surprising that the question of labor strikes is one of the most important questions of the day. The question is not only one of the most important questions of the day, but it is also one of the most interesting questions of the day.

Moreover, it is your duty as employer, as well as your duty as employee, to do your best to solve the problem. The problem is not only one of the most important questions of the day, but it is also one of the most interesting questions of the day.

Again, I counsel all employers to look well after the physical health of their employees. The physical health of the employees is not only one of the most important questions of the day, but it is also one of the most interesting questions of the day.

Employers, urge upon your employees the importance of physical health. The physical health of the employees is not only one of the most important questions of the day, but it is also one of the most interesting questions of the day.

PARABLES OF THE KINGDOM. Read Matt. 13: 24-35; Mark 4: 26-32. Memory verses: 24, 25. Golden Text: The field is the world. Matt. 13: 28.

LESSON PLAN. Topic: Illustrating Spiritual Progress. ANALYSIS. I. PROGRESS DESPITE ENMITY. 1. Good Work Done: A man sowed good seed in his field (24). In the morning soon after seed (Eccl. 1: 11). He that sowed the good seed is the Son of man (Matt. 13: 37). His enemy came and sowed tares also among the wheat (25). The enemy that sowed them is the devil (26). The devil sowing whom he may devour (27). Then the harvest appeared: The tares with the wheat also (28). The evil man, bringeth forth evil fruit (29). Out of the heart come forth evil thoughts (Matt. 15: 19). A tree cannot be made good, neither can a fig tree be made bad (30). Then shall they cut him into the furnace, and shall tread him under foot (31). Then shall the righteous shine forth like the sun (32).

II. PROGRESS DESPITE SMALLNESS. 1. The Little Mustard Seed: A grain of mustard seed...less than a seed (33). It is like a grain of mustard seed (34). It is like a grain of mustard seed (35).
