Evely Saturday for this week presen s a new and important claim to favor. Etery copy is trimmed, nearly pasted so as not to disfigure the paper, and held together as securely as if stitched. Sheets of a larger a ze are used, so that they may be trimmed and yet leave the page of Evcry Saturday quite as large as before This arrangement, which is to be permanent. will be a very great convenience. to all who read the diversified literary contents of Epring Saturday, and all who examine its weekly gallery of portraits, landscapes, and pictures of character, incident and travel. The machine which produces this result

is the invention of Messre: Chamlers & Co., of Philadelphia; and was made by them under arrangement with Messra. James R. Degrado & Co., especially for Every Saburdoy. It is the only movine of this kind in the world, and is really a wonder in its working, accomplishing the warious processes of tolding, passing and trimming at one operation. The two sheets of which Every Saturday is composed preded in at opposite puds; are ta-ken up by the machine and carried toward each other, while he a series of automatic movements, they are folded, trimmed and movements, they are folded, trimmed and pasted, in transiti; and arriving simultaneously at the centre of the machine, the smaller sheet is blaced accurately inside the larger one, and both receive their final told and are described experted; in the box placed for them, a perfect paper. No fertilizer introduced to the farmer of the No fertiliser introduced to the farmer of the Middle and Fouthern States has given more general and uniform satisfaction than this guanc. The trade in it has steadily increased until the consumption now throughout the onitre country far exceeds that of any other fertilizer. The large capital involved in its production affords the carest guarantee to its continued excellence. The company has a far greater interest in the permanence of its trade than any number of consumers can have; hence it is the highest interest of the company to put their heat fertilizers in the Market, that their usual facilities, alted by the best scientific ability, can produce.
