Mosquitoes.

The season has arrived when we are
liable to the attacks of this "musical
bird," and a few facts relating to its
course of life may be of interest. They
are described under the name "Gnat,"
calculus, of the probedivian division of
the order diptera, or two-winged insects,
the cousin of the French, the mosquito
of the United States. There are several
different species, some of which are
active by day, and others by night,—
the former being principally found in
marshes and damp woods, and rarely in
houses. The males do not annoy us by
their bites, but simply sit from flower
to flower, sipping the dew and sweet
juices, and require little if any food;
but the females are the most persistent
biters and annoying musicians at almost
all seasons. The proboscis or sucking
apparatus contains from two to six
sharp bristles or lancets, the combined
point of which is sharper than the finest
needle. It is said that an irritating
secretion is deposited which causes ob-
stinate itching. The eggs are deposited
in water, in boat-like form. The boat
is always of the same shape, and con-
tains from 250 to 300 eggs. The larvæ
come out in a few days as the well-
known "wigglers," and in this form re-
main suspended in the water, with their
heads downward, from five to fifteen
days according to the state of the
weather, and changing their skins two
or three times, when they are changed
into pupæ which are called "tumblers"
this time with their heads upward,
remaining in this state five to ten days.
During the larvæ state they live upon
animalcules, but in the pupæ state
take no food. The perfect insect comes
out about noon on a warm, still, sunny
day, and at this time the slightest
breeze would tip Mr. Mosquito over and
consign him to certain death in the
water. Fortunately a very large por-
tion of them fail to go through this
ordeal. It is a disputed point how the
insect produces its "music," but prob-
ably it arises from the combined action
of the wings and the thoracic vibrations
consequent thereon. It has been esti-
mated that it vibrates its wings fifty
times in a second.

A heavy frost whitened the earth in

The first Sunday's record of the oper-
ation of the high license saloons is very
satisfactory. None of the 1347 licensed
saloons sold intoxicants publicly or pri-
vately according to the reports of the
police. All but three or four were
closed entirely, and these violated the
Sunday law but not the license law by
selling "soft" drinks. A large number
of unlicensed saloons were open on the
pretense of selling these so-called soft
drinks. All these have been reported
to the License Court, which can be de-
pendent upon to deal properly and effec-
tively with them. On the whole, it was
an auspicious opening for the new law,
and Philadelphia was freer from visible
drunkenness than on any previous Sab-
bath within the memory of the oldest
inhabitant.—Philadelphia Press.

General Sheridan was so much better,

The Democratic organs were ghoul-
ishly gleeful over the fact that the Pres-
ident was not insulted by the Grand
Army veterans whom he reviewed in
Brooklyn on Decoration Day. The
organs evidently expected that the vet-
erans would be mean enough to use the
same tactics against Mr. Cleveland that
he has used against them.

The largest codfish ever caught on the

Henry George says he will fight now
for the bequest of George Hutchins of
Ancora, who died in the height of Hen-
ry George's canvass in 1886, and be-
queathed a large sum of money to
George to circulate his books. It was
understood that the widow needed the
money, and it was said that George
would waive his claim. But now that
Vice-Chancellor Bird had declared the
bequest void, George thinks of fighting.
"It is true," he said, "that the Vice
Chancellor pronounces the bequest void
on the ground that the doctrine it was
meant to promote are in contravention of
the law, I will fight that decision to the
United States Supreme Court if neces-
sary. I have learned that the money
does not go to the widow, but to collat-
eral heirs. I haven't seen the text of the
decision yet. I've sent for a copy.

W. A. Lyman, of Milford, Conn., is
making the smallest possible specimen
of an engine. It will be made with a
silver half dollar. The boiler is to hold
about eight drops of water, but with
four drops the engine can be worked
several minutes. When finished, it is
to be placed under a glass case three-
quarters of an inch in diameter and an
inch and one-eighth in height. Some
of the parts will be so fine and delicate
that they cannot be made without the
use of a magnifying glass.

The highways leading from Spring-

the snow on the roads in New London
was from three to four feet.

You are feeling depressed, your appetite
is poor, you are bothered with headache,
you are indigestive, nervous, and generally
out of sorts, and want to brace up. Brace
up, but not with stimulants, spring medi-
cines, or bitters which have for basis very
cheap bad whiskey, which stimulate you
for an hour and then leave you in worse
condition than before. What you want is
an alternative that will purify your blood,
start healthy action of liver and kidneys,
restore your vitality, and give renewed
health and strength. Such a medicine you
will find in Electric bitters, and only 50
cents a bottle at Cochran's drug store.

HAMMONTON, ATLANTIC CO., N. J.
SATURDAY, JUNE 9, 1888.
Board of Trade meeting next Monday evening. No business man should be absent; and every property owner is interested. One chief object is to encourage the establishment of manufacturing here. This would provide work for those who desire it, and necessitate the importation of other workmen, who, with their families, would require homes, food, and clothing, thus increasing business of all kinds and making a home market for much that our farmers produce.

There is much said about what the Council do, and don't do. There are some things that ought to be done,—things that the old Council neglected entirely,—and while the new members were not pledged to these things, probably they will see the necessity for a reform, and if it is in their power, and not prohibited by our Charter, we have no doubt there will be a change for the better. The particular reform we have for is of the weather. We have great faith in the Town Council and good weather, and so have provided a good supply of Spring goods, such as

The Hammonton Republicans are now ready for business, the Club having elected their officers for the ensuing year, as follows:

President, Dr. Edward North.
Vice-Presidents, M. L. Jackson and Dr. H. E. Bowles.

Cor. Sec'y, Charles S. King.
Recording Sec'y, J. Frank Scullin.

Marshal, Frank C. Allen.

Executive Committee, L. H. Parkhurst, Orville E. Hoyt, E. L. Cauffman, M. Parkhurst, J. A. Schandt.

The Club meetings are held on the first Friday evening of every month. There will probably be a public meeting about the last of June, of which due notice will be given.

In response to the notice published last week, about thirty of our wide-awake citizens met on Saturday evening, to consider the advisability of organizing a Board of Trade.

M. L. Jackson was chosen Chairman, S. E. Brown, Secretary.

After a few preliminary remarks, a copy of the constitution and by-laws of the Atlantic City Board was handed to the Secretary, who read portions, to give an idea of the range of business generally covered by the organization.

Dr. Edw. North moved that we now organize a Board of Trade for the Town of Hammonton. This was seconded, and remarks were made by several, showing a unanimous opinion that the proposed organization was needed, and would prove beneficial. There was not a vote against the motion.

On motion of Chas. Woodnutt, a committee was appointed to draw up a form of constitution and by-laws and report at next meeting. Chas. Woodnutt, T. D. Brown, and C. F. Osgood were appointed said committee, and on motion the chairman was added.

Adjourned to meet in the Council Room on Monday evening, June 11th, at eight o'clock.

And the hand-organ man.

Let there be a large turn-out at the Council Room, next Monday night. A Board of Trade will be the means of still further advancing the interests of our beautiful town; and that is what the meeting is called for.

The General Conference of the M. E. Church has extended the term of service of ministers to five years. The change goes into effect immediately and applies to all ministers of this denomination in their present charges.

Mr. and Mrs. Elam Stockwell and Mr. Tice each invited their Sunday School class to spend Wednesday evening at their residence, gave them plenty of music and other rational entertainment, with generous refreshments, and sent them all home happy.

There is no reason why Hammonton cannot have hundreds of summer boarders, were the proper effort made to get them, and then to take care of them. There are many in our great cities who would be only too glad to get out among our fruit-laden orchards and vineyards. Advertise! advertise!

OUR POLITICS.
We believe the Republican party to be the true instrument of the POLITICAL PROGRESS of the American people; and holding that the honest enforcement of its principles is the best guarantee of the national welfare, we shall support them with all our might; but we shall always treat opposing parties with consideration and fair play.

AGAINST THE SALOON.
The MAIL AND EXPRESS is the recognized leading journal of the country in the great Anti-Saloon Republican movement. It believes that the liquor traffic is a crime against the State and the enemy of the people, a fruitful source of corruption in politics, the ally of anarchy, a school of crime, and, with its avowed purpose of seeking to corrupt control elections and legislation, is a menace to the public welfare and deserves the condemnation of all good men.
In brief, all who wish to see their homes a place of peace, their children a people of national scope, broad views, clean pages and courageous, yet kindly, utterances on all questions of general public interest, will not be disappointed in the MAIL AND EXPRESS, and we respectfully solicit their influence and support.

The Tribune for 1884
GREATLY ENLARGED.

Much the Biggest of all the New York Weeklies.

Greater Variety of Contents, New Presses, New Type, and New Appliances.

At the Head of the Republican Press.

The New York Weekly Tribune will be enlarged on or before the 1st of January, 1884, by a reading matter from four to eight more pages, as well as the Tribune, much space is given to every issue to the Tribune, but without expense to the subscriber.
A complete outfit of the new folding and inserting process will be put into the Tribune's press-room in November and December, and the extra sheet will be folded into its place in the main sheet before it comes from the press. The enlarged Tribune will be the biggest and best of all the New York weeklies, and the new machinery will print it in the enlarged form, at the rate of seventy-two thousand copies a per hour.
New features and a greater variety of contents will be added to the Tribune during the coming year. Readers will be given nearly half more for their money than ever before.

Pensions for the old volunteers, especially Service Pensions, are being vigorously advocated in the Tribune, much space is given to every issue to this subject. Better Protection to Farmers under the tariff; the salvation of the country from the curse of Intemperance; and the rescue of the national government from the hands of the rebel brigadiers; these and all the other live issues of our day are receiving aggressive, earnest and loyal treatment in the Tribune.

The Tribune does not attempt to suppress the local State and County press. But in the great Presidential conflict now at hand, every thinking Republican, old soldier, farmer, mechanic, laborer, should have his local paper and the New York Tribune.
