A MATTER OF POPULAR INTEREST.

We condense from the *Lehigh Register* the substance of a conversation about Oak Hall, in Philadelphia, between a visitor and a resident of the city.

Visitor: "What corner is the Building on?"

Resident: "South-East corner of Sixth and Market. Please note the SIXTH, for some strangers seeking Oak Hall, have been misled by designing persons."

Visitor: "It is perfectly colossal! Do you know its dimensions?"

Resident: "12,000 square feet—55 on Market, and 180 odd on Sixth, six stories high, has over three acres of flooring, and covers space once occupied by the Pennsylvania Hotel."

Visitor: "Do you use steam power?"

Resident: "A giant young engine furnishes power for the freight and passenger elevators, and the boilers steam for heating, and the other operations of the house."

Visitor: "What order do you take with goods?"

Resident: "They are first ordered and arranged in the basement on long low counters, and taken thence on the freight elevator to the inspection room on the first floor."

Visitor: "Is inspecting the first operation?"

Resident: "No, sir, measuring. The goods are first measured in the place, then inspected. The cloth passes over rollers in the face of a strong light, and two men sit one before and one behind the rollers, watching with the eye of a hawk for the least pin-hole imperfection, and marking every flaw, so that the cutter may see and avoid it when he comes to cut the garments."

Visitor: "You must employ an army of cutters?"

Resident: "Come to our fifth floor and see! We keep 70 hands all the time cutting up the cloth into garments, besides the machines that do a dozen men's work each at a stroke."

Visitor: "Do you manufacture all your own goods?"

Resident: "We do, and most carefully. Our experts inspect every stitch and seam, and certify to every garment as extra well made before we put our ticket on it, and become responsible for it."

Visitor: "Your system must save you a great deal?"

Resident: "In every direction, sir. It is the system and economy we practice all the way through, that enables us to put our price down to the people as we do."

Visitor: "After inspecting the work, what becomes of it?"

Resident: "Before it goes into stock it is checked. Every single garment has its number and other points noted on it, so that its entire history can be traced without fail, upon our books."

Visitor: "You must have 30 or 40 salesmen?"

Resident: "Yes, sir, on busy days you may see 100 in the various rooms and suites of rooms, selling to the throngs of customers."

Visitor: "Do you do an order business, by mail and otherwise?"

Resident: "Very great. All over the country. Our

perfect system and rules of self-measurement make it possible to please people 2,000 miles away by mail, as if they were here in person."

Visitor: "I suppose you have at least half a dozen different departments?"

Resident: "My dear sir, we have more than twenty, each charged with its own business, and each thoroughly organized, a necessary wheel within the great wheel."

Visitor: "Will you name a dozen or so of them?"

Resident: "The Order Department, the Cutting Department, the Sewing Department, the Finishing Department, the Dressing Department, the Packing Department, the Shipping Department, the Receiving Department, the Special Uniforms Department, the Delivery Department, with its score of messengers, the Store Department, with its hold, hold, hold! The Advertising Department, with its bill and sign distributors, editing and publishing a business and popular journal, eleven times a week, 50,000 copies monthly (sell all your friends and send for it). The Men's Department, with its many rooms. The Boys' Department, with its special entrance for ladies. The Telegraph Department, with its Chief Clerk's Department, with its book-keepers and assistants. General Manager's Department, Financial Office, and other offices of the firm all busy as bees thinking, planning, executing, buying, making, registering, receiving, sending out, selling, and in a thousand ways joining their forces to carry on a business with the people amounting to between \$2,000,000 and \$3,000,000 annually."

Visitor: "I don't understand it!"

Resident: "Indeed it is! I forgot to name the Cashier's Department, which handles its \$25,000 of retail sales on some single days!"

Visitor: "That's 25,000! Immense! That's what enables the house to buy cheap and sell cheap?"

Resident: "Exactly! You have just hit it. The people through here, knowing that we depend on low prices and immediate sales."

Visitor: "What are the 'pots' you mean? I hear so much about it?"

Resident: "Our system of business dealing—1. One price, no variation; 2. Cash for everything; 3. A guarantee protecting the purchaser; 4. The money returned if the buyer can't otherwise be satisfied."

Visitor: "Nothing could be fairer."

Resident: "Nothing. And the people see it."

Visitor: "Well, I thank you, sir, for your polite attention."

Resident: "Not at all. It's a pleasure to give you. Call again, and be sure of the place—Wanamaker & Brown's Oak Hall, South-East corner Sixth and Market."

Visitor: "Thank you! I shall be happy to do so. Good morning."

CUMBERLAND MUTUAL Fire Insurance Company, BRIDGETON, N. J.

Conducted on strictly mutual principles, offering a perfectly safe insurance for just what it may cost to pay losses and expenses. The proportion of loss to the amount insured being very small, and expenses much less than usually paid, nothing can be offered more favorable to the insured. The cost being about ten cents on the hundred dollars per year to the insured on ordinary risks, and from fifteen to twenty-five cents per year on hazardous properties, which is less than one-third of the lowest rates charged by stock companies, on such risks—the other two-thirds taken by stock companies being a profit accruing to stockholders, or consumed in expenses of the companies.

The guarantee fund of premium notes being now Three Millions of Dollars.

If an assessment had to be made of five per cent. only, twice within the ten years for which the policy is issued, it would yet be cheaper to the members than any other insurance offered. And that large amount of money is saved to the members and kept at home. No assessment having ever been made, being now more than thirty years, that saving would amount to more than

One Million Five Hundred Thousand Dollars

The Losses by Lightning.

Where the property is not set on fire, being less than one cent per year to each member, are paid without extra charge, and extended so as to cover all policies that are issued and outstanding.
