HAMMONTON!

RARE OPPORTUNITY

TO SECURE A HOME

To All Wanting Farms. Karalin was a series

In the great Hammonton Fruit Settle nent, the best inducements are offered to il wanting farms in the most delightful and healthy climate, with a good productive soil, being among the best in the garden state of New Jersey; only thirty miles from Philadelphia on the Uamden and Atlantic Railroad, and, but. few. miles to the New York Railroad. These lands are sold to the actual settlers at low prices and cosy terms, in five, ten, twenty acres

The Title Perfect.

Warranted deeds, clear of all incumbrance given when all the purchase money is paid

The Soil

a fine sandy and clay loam, suitable for all grains and grasses, and is pronounced the finest quality for gardening and fruit raising. It is a marine deposit, with a marly substance mixed all through it in a very comminuted formand in the exact condition to support plants. With proper firming it is very productive and profitable, easily worked, warm and early. The lay of the land is slightly undulating, and is called level; it is free from stones or rocks.

The Best Fruit Soil in the Union

Pears, Peaches, Apples, Quinces, Oher-ries, Birckbernes, Raspberries, Grajies, of all kinds, and all other fruits are raised here in immense quantities, and they are sought after by the delers and command the best prices in the markets.

Hammonton is already celebrated for its

fine fruits and wine.

From two hundred to five hundred dollars is cleared, free from expense, nor acre in the fine fruit culture. Sweet. Potatoes, Melons, and all the finer Vegetables delight in this soil; this branch of farming pays much better than grain raising, and is much casier work.

The Market

is unsurpassed; direct communication twice a day to Philadelphia, New York, and Atlantic City. The Railroad Company leaves cars here to be filled with fruit every day in the season; they are filled in the afternoon, and the same night or next morning by daylight are in the market, where the highest cash prices are obtained, without any other trouble to the producer than delivering the produce to the car. None of the land now offered is over one and abulf miles from the Railroad.

The Climate

is mild and delightful the winters being short and open, out-door work can be car-ried on nearly all winter, whilst the sumried on nearly all winter, whilst the summer is no warmer than in the north. Persons wanting a change for health will be satisfied here—the mildness of the climate is soon beneficially felt by delicate persons and those suffering from Dyspopsia, Pulmonary affections, or General Debitty, as hundreds here will-testify. This section has long been known for its health, and during the summer, months tons of and during the summer months tons of housands flock for health. No Allasma, Chills and Fevers in this section.

The Water

Is pure and soft, of the best quality. It abounds in streams and is found by digging from ten to thirty feet. Wells are very cheaply made, as there is no rock to go through. We have the best stores in the county, where goods are sold as cheap as they are in Philadelphia or New York.—Good schools with competent teachers.—Clergymen of all denominations reside here some of them in charge of congregations, others cultivating the fruits; also a number of retired physicians. The Methodists, Prospectrums. Baptists, and Universalists Prosbytorians, Baptists, and Universalists Invo their services regularly. Mills convenient,

Reliable practical nurserpmen scho furn ish all kinds of trees, plants and vines at the lowest priecs.

The population of the settlement is large and rapidly increasing; it is composed of the best classes from New England, the Middle, and Western States,—intelligent, industrians, and moral. The buildings, are industribus and motion, and forms of them linds. All materials for building, improving, &e., at hand; also reliable mechaniss who will give satisfaction. Every convenience to be had that can be found at any other place.

The lands have been examined by some of the last agriculturests and fruit growers in the country, who ponounce them the best in the U.S. for fruit growing. Mr. Solon Robinson, the agriculturest editor of the New York Thinwell, Dr. I. P. Trimble, the State Entomologist; Mr. John G. Hergen, member of the American Institute of New York; and others, reported their they never saw a finer growth of fruit, grain, and grass, than they saw here, and recommend this settlement to persons desiring to till the soil, for planner or profit. These lands are being rapidly rold, and from the rapid and extensive improvements property will certainly increase in value, require for R. J. BYANES, the founder of the settlement, who will show the lands true of expense. For further information agaze or additions, The lands have been examined by some

[For the Republican.] Sanologia-No. 2. LIGHT.—ITS EFFECT UPON OUR ORGANIZA TION.

"Good morning, Dolores, you seem to be busy?' "Waal, yes. You see I have been read-

in' about them are yaller walls bein' sickly, so I jist give ourn a good coat of white-"So far so good; but still I notice that

the windows have thick paper curtains which entirely exclude the light:" "Don't you see they are blue, and that

thought, was the right color.' "Certainly, blue is the proper color to reflect the chemical ray, but your curtains reflect it externally, whilst you need it inside, and not outside of your house."

What is this reflectin?

When a ray of light traverses space its ourse is rectilinear, and its velocity uniform; but when it encounters an obstacle r enters a different medium, it undergoes ecrtain modifications, and separates itself into several portions. One of these is reflected or turned aside; a second enterathe predium, and is refracted or bent out of its original direction; a third is absorbed or ost; and a fourth portion is radiated or expelled in all directions from its sprince. Thus, if a ray enters a dark room and falls upon a white surface it will be reflected and the room become lighter; but if it falls unon a black surface, the room will remain dark since nearly the whole of the ray will be absorbed. Hence the importance of baving the interior of our dwellings such colors as will reflect the greatest amount of

light. Light is the natural agent by which objects ure rendered perceptible to the sense of sight. By what subtle means it acts philosophers are not agreed. Two hypothesises are generally accepted; the hypothesis of emission and the hypothesis of undution. The first supposes that light con sists of a highly attenuated fluid, the par- and shot through the brain. At the coreticles of which are not affected by gravity, but are endowed with a great self-repulsive force, and are actually projected from lu minous substances, in straight lines with inconceivable velocity. In the hypothesis of undulation on the contrary, the whole Universe, including the interstitial space of the Doctor had no personal enemy in the all matter, is conceived to be filled with a city, and that his assassination was done highly elastic rare medium, which possesses by the city authority. The death of this the property of inertia but not gravitation, to which the name of Ether has been given. This medium is not light, but light is produced in it by the excitation on the part of city charter of Great Salt Lake City. Since luminous bodies: of an undulatory motion analogous to the waves of the Ocean. By this theory, luminous bodies are supposed to act on the universally affused fluid, somewhat in the same manner that sonorrous bodies do on air in the production of sound. Whichever hypothesis he adopted, Organized a Monopoly Merchantile Stock certain it is, that light undivided is of the utmost importance in a physiological point of view. Exclude it from man and the high er order of animals and Etiolism or blanching results. "Yaller's wrong, blue's not right-now what color is good for kurtings?

White or the absence of all color is .unquestionably the best, because it freely permits the light and actinism to pass but excludes the heat of the solar ray.

"Waal, but my Sally Ann can't stand so much light, she's not been used to it." Intolerance to Sun light is evidently an alarming sympton of nervous debility and in her case may be caused by want of exeriso of the visual organs in the open air; tor it is a physiological law of our organization that without action, Atrophy and

of volcanic agency in the Mammouth Cave of Kentucky, without doubt they perfect and if they could have been observed from generation to generation, a gradual diminution of the faculty of seeing would have been noticed, as step by step, dimness of vision, blindness, atrophy of ontic nerves andabsolute absorption of visual organs took place. Hence we find them to day without eyes. No doubt you have read of the release of

the aged prisoner of the Bastile so piteously imploring to be returned to his gloomy dungeon as he was unable to bear

We may see you again.

SANOS. From the Bridgeton Chronicle. Utah and the Mormons.

Formerly the Territory of Utah, had no power to make grants; or give title to pub lie lands, in fact up to this date, there had been no regular authorized surveys, consomently no land office, but Governor Young took upon himself to dispose of public lands throughout all Utah, as suited him best. Wood and timber in Utah is confined wholly to the mountains, and the same only neessible by way of the different canons. Brigham thereupon taker it upon himself to have the following net passed by the Legislature of this Territory, Of the Or dinances passed by the General Assembly,

March 28th, 1849, is the following : Chapter VII, page 63,-An Ordinance concerning City Creek and Canon .- Be it ordained by the General Assembly of the State of Desert, that Brigham Young have sole control of City Creek and Canon, and that he pay into the public treasury, the sum of five hundred dollars therefore. Approved Dec. 9th 1850.
Thus giving and making Brigham Young

sala controller and sala awaer of thousands control of City Creek, (the maje dependence of Salt Lake City for vater,) for his own land throughout I'tah was disposed of in known by the company he keeps." the same manner. Brigham immediately

built a stone wall eight feet high and two feet thick completely around the mouth of this extensive wood land canon, and he exacts to this very day, every alternate load of wood and every alternate thousand feet of lumber taken therefrom. Dr. Rober son had questioned the right of this Utah Legislature, to make grants on public land and the ctiy of Great Salt Lake to have its charter, thereby disputing the right of the to pre-empt land. He accordingly filed claim upon the unoccupied land surround ing the Warm Springs near Salt Lake City, erected (agreeable to the Homestead Laws, building upon the same. This building was torn down at noon one day by an armed force of police. Dr Roberson brought it up before Judge Titus of U. S. Court, and i was decided in favor of the city." Dr. R. then gave notice of his intention to appeal On the 11th of October a bowling alley belonging to the doctor, was totally destroyed one night by a party of twenty men with blackened faces, Soon after Doctor Roterson called on Mayor Wells of the city in regard to the matter, was denied any answer, and was ordered to leave the house. shaking and sawing of her head, and a In the local column of the "Salt-Lake stubborn disposition to sulk." But I kept Daily Telegraph," appeared the following her moving; and after a few runs, each the next morning :

"-As well trained .-- The admiration for Zebra, Napoleon and Leopard on Friday night, was snuffed out by the admiration for Dr. Ball-Alley, as he cleared from the Mayor's house yesterday afternoon. His honor had only to open the door, direct his finger, and the man of pills and bluster, vamority with a gray, that fairly eclipsed little Leopard under the improble direction. tion of Bartholomew.

The second-night after the above publication, between 11 and 12 o'clock at night the Doctor was called out of bed to attend to man who had his leg broke,. When the Doctor and his escort reached the corner of Main and Third South Street, the Dog or was full abon ner's inquest, one witness saw one man running down the street westward, two others saw three men running cast three others were seen running south, making seven persons engaged in the murder. The investigation held, clearly proved that man was brought about by his contending for the rights due him as an American cittizen, and for attempting to contest the this event in the dark annals of Mormon History, there has been many other atroc ities committed to numerous for me here to make mention of in detail. Brigham finding that as assassinations would no wholly keep out the Gentiles, they in 1868. Company under the name of Zions Co-operative Merchantile Association. Each Mormon being compelled to take stock to the amount of three and five dollars, and more if he wished. There should be a Cooperative store in each ward, and these Coonerative stores should hang out for their shingle the following:

HOLINESS TO THE LORD.

(The All-seeing Eye.)

ZIONS CO-OPERATIVE MERCHANTILE INSTI

The saints were not allowed to deal or rade at any Gentile store, or any store not having the above (as the Gentiles are im pudent-enough to call it) bull's eye stuck up. If they did they were immidiately cut off from the church, (which means examination.) have gon where the wood lows have gobbled it all. And the little old three and five dollar fellows have never seen dividend nor principal, and the joke is they never will. This institution is still in existence; as regards the solveney, I do not think any one could consciontiously swear to, but it still hangs on like a chick-

en with the " pipe." In reviewing this record of Mormonism have thus far tried to confine myself to the truth, taking as my authority provious to the very 1865 records that can be relied upon, records that are on file (in detail) both in this Territory and Washington, some being in the latter place now, as tes timony before the Committee on Territo ries. Since the year 1865 these statements

are founded upon personal observation, I have thuse far made no mentign of the many endeavor of the different Christian denoninations to establish a footing here and will only add in this connection, that their endeavors thus far to establish the rthodox religion among these people, have been met with every immaginable discour gement,

In recalling the past history of Mormon sm, it has been my endeavor as a loyal citizen of the United States, to the readers of the Chronicle that the boasted loyality of the Mormon amounts to nothing. And the principles emanating from the church of Zion and Latter-day-Saints, are those that promote, agitate and encourage assas ination and murder.

The tone of my communication thus far, may appear to such that savor of prejudice yet however prejudicial they may appear, the outline is cerrect and true in every particular. Some of the readers of the Chronicle may suggest to their own minds, tha surely there must be some good honest inof series of woodland, and giving him entire dividuals connected with this institution of Mormonisin, and why not mention it. will say in unswer to such, that there may use and purposes, to use and dispose of be those that are true and honest in their the same us he saw fit. All the timber belief, but on the other hand "a man is

BILL CULLUM.

SALMON-FIBHING .- "Au terra?" asked Roma, hesitating to shoot the rapids.

"Bah! no, no, au large," responded Bruno. Then turned to me, "No time for de shore channel; have to run de pitch. Down on your knee, sir, and brace yours' hard 'gin the mid-strip;" and with one vig orous sweep of his paddle, he sent our barl into the main channel. Roma dropped his pole and seizing his paddle, kneeled in the bow, and both paddled with all their might With a wild whoop we ran the pitch

The flight of our cance was like that of a arrow, the gray rocks sceming to pass like phantoms up-stream as we shot past. The item of our birch parted the troubled wave below, and a deluge of spray came over us The men shook themselves like a pair of Newfoundland dogs, as I recled up the elack of my line. Finding the fish still fast, I landed on the ledge of rock that forme one shoulder of the pitch.

"We will fight it out here, my lady," I said, as I forced her into the eddy. She came reluctantly, with much desperate shaking and sawing of her head, and a showing that her pluck was gone and her strength declining, I saw her dark blue back and silver sides. In a few minutes I drew her into a little cove. Bruno's gaf hook went deep into her side, and she was landed on the rocks after a contest of near ly an hour. The spring balance was pro duced from my satchel, the hook inserted in her snout, and down went the index. marking twenty-nine bounds-a fresh-rui fish, measuring three feet four inches.

"BOILED THIBUNE. Mothing, to us i seems, could be more consolatory to Greely than to be assured, on quite credi ble authority, that after his editorials i the Tribune have had all the mental effect to which their merits entitle them the are afterwards made the instrument of working almost miraculous currative results on the system of the unwell Syrian. As rool, we have the following, related by the Rev. Dr. Jessup, an esteemed mission ary in that country, who says:

"A Hakeem, or native doctor, one day came to me and asked for a few old newsapers, to which appeal I responded by the gift of a few well-worn conies of the New York Tribune. A fortnight after, the grateful recipient came back to me in wor derful spirits and thanked me most heartily for the gift; inviting me to go and car grapes and figs in his vineyard, saving, 'I thank you very much for those old journals. There is nothing like them; they have worked wonders for my patients!' What the quack, to be invited to look into an earthen jar, in which these newspapers had been soaked to a pulp in water and then in otive oil, quantities of which astounded mixture had been swallowed by this fellow' eredulous patients with such amazingly heneficial results! The old Hawkeen gravely thought it was the magical charm of the printed letters which did the business." Nothing like boiled Tribune. - Harper's Magazine.

A MUSICAL DUEL -- Watson's Art Journal says: A pianoforte duel has actually occurred at Cedar Rapids, Iowa. The challenge was offered by a Mr Matheson and accepted by a Mr. Rooney, Gotfshalk's "Last Hope" was played by Mr. Mathe son in six minutes and a half, while Mr Rooney came through it in five minutes and a balf . In a piece called "The Rivadeath of parts ensue.

When fish were first confined by means this outfit, (us J. Fisk, Jr. said before his his competitor, beating him by just four minutes and fifty sine accords. minutes and fifty nine seconds. The umbine twineth." Brigham and the big tel- pires on this occasion were ladles, and their spirit of the contest. They awarded the laurels to Mr. Rooney, "not because Mr. Matheson proved himself less skillful, but because Mr. Rooney displayed superior skill." This strikes us as about the richest Hibernicism of the present century.

GETTING RID OF AN UNDESHABLE TEN-ANT. - A man in Montana a short time ugo squatted on another person's land and built a small frame shanty. When requested to remove he positively refused to do so; so one night a squad of men came round, after the squatter and his wife were poleer and, lifting the whole concern, shanty and ull, with deliberate care, carried it to the river and set it on a small raft. Then they pushed the raft into the stream, and let he go. When the squatter got up in the morning to go out, he was surprised to find

A paragraph is going the rounds about a girl in Chester Vt., dying from tight lacing. An editor commenting on the fact says: "These corsets should be done tway with; and if the girls can't live without being squeezed, we suppose men can be found who would encrifice themselves. As old as we are we would rather devote three hours a day, without a cent of pay, as a brovet corset, than see these girls dying off in that manner. Office hours almost any time.

A ridiculous story is told of a mi-hap to

fat man at the recent burning of his house

at Springfield, Mass. The egress of Fatty

and a window of narrower dimesions than

broom handle to keep him squirming, by

which means he worked his body through. I versally respected."

Timing a Fast Horse.

A friend of ours, who owns a fine farm near Camp Dennison—John we will call him—is fond of horses, and has a private race track, where he puts his fast nage. through a course of equine sprouts. Thos residing in the vicinity who have, or think they have, fast nags frequently resort to the race track for the purpose of festing the speed of their horses. Now, John is a .. bit of a wag, and numerous are the jokes he has played off upon his friends in "timing" their horses with his patent stop watch. Every man likes to think he has got a fast horse, and when told that his horse has made a mile in 2.30, when he had no idea he could get below the fifties, Le naturally feels clated, don't you seeespecially when so grave and carnesta man asour friend John holds the watch, and that watch is known the country round for s rejiability.

If anybody else were to time the speed of the page they might question itsauthenricity, but John-no one thought of questioning him or his patent watch. " One day last fall, a neighboring farmer, who could not sleep very well nights because he had got it into his head that a colt he owned was fast, brought the said colt to John's race-truck to try him very acostn. modatingly held his patent watch while the owner of the colt drove round the track; "Two thirty-eight!" yelled !

the colt passed the mile pole. "What's that?" shouted the mi onishment. "Two minutes and thirty-eight xactly," replied John, moving a

This was so much better than

enrictor had anticipated that not bolieve it puson le and said s " Hold the watch yourself, ther John, somewhat gruffly, "if you

"Oh," replied the man hastenin cilitate, "I don't question your me the matter, but you might have mistake on the watch! "Doo't you know this is a pate

ratch? !-inquired John. ... It can

my mistake; there, you see, it has stopped on two minutes, thirty eight seconds. 'Il drive around and you time the colt " Now, the interior of the track was plantd with corn, and a forest of three stalks! eared their lofty heads there, completely obstructing more than a very limited view of the track. The word "go" was given and John "got." As soon as he was out of sight of the others he daried through a woods that traversed the comfield, outting was my surprise, on entering the house of off nearly half the distance, so that when he reached the wife post the owner of the

colt fairly danced with joy as he roared :-

Two thirty-one and a half by holey ! The man was nearly wild with excitoment! and refused five hundred dollars John-offered for the colt on the spot, and hutried i home with his newly lound treasure. He is was on a lookout for some fair where hoos was confident of being able to "scoon letteril all" as he said. The Blanchester lair come off in a little while, and there was our hero ni with his wonderful colt... Ha put bim in it gajust the fastest tratter they had, bet bis w money freely, and to his own, bestorbands. the uprogrous mirth of the crowdahis from cult was nearly five minutes cibu kertingin tround. In ofter disgust, he sold the cole .. for a moderate sum, and is, entirely our des of the fast lorse complaint ... Handon't know to this day that John stopped his stop watch' on him, and ho is ignorant of the short out the fach the cornfield but w no don't want any more fast heiseamidohida has cured several embrya horsemen in thed! same way, and looks unon himselfasathem. decision was quite in accordance with the efactor of his race, if he is not of she horse w race. Ilis treatment is expensive but of N feogual.

> "MORE COMING." By an innocent fid." tion the local agent of the associated press, who usually sent a dozen despatches a day, was enabled to send one only by Texarding the first eleven as merely parts of despatchcs, signing each one "More" or "More. Countag, and affixing his name in full to the twelfth at midnight. The practice of signing " More" still adheres, though the reason has long since vanished; and there il is no signuture more honored in the Assicinted Press office. Always on the lookout " to guard against pulls and first-of-April nessages commonly known as "solls, "this office scrutinizes first the signature, and More, or More Coming, is prima facie ev. idence of gonulueness! A newly appoint of agent at Moriolk, Va, who received and despatch from New York, chronioling the arrival of the ship Black Warrier in the following regulation form: " New Tork! 30th, Black Warrior nerived . Medical.

CONSUMPTION.

On, Schnick's Pulmonic Synut for the eur

Dr. Schencks Mandrake Pills, for disease of the stoments.

Dr. Schencks Mandrake Pills, for disease of the liver or to act as a gentle purgative.

All of these three medicines are often required in curlou consumption, though the Pulmente Syrup alone has cured many desperate cenes. The Seaweed Tonic and Mandrake Pills, assist in regulating the stemach and liver, and help the Pulmente Syrup alone has cured many desperate cenes. The Seaweed Tonic and Mandrake Pills, assist in regulating the stemach and liver, and help the Pulmente Syrup to digest and search through the Pulmente Syrup to digest and search through the Pulmente Syrup to digest and search through the remedy for pulmentery consumption, and feri, all those morbid conditions of the body which lead to that fatal disease. Liver complaint and dysuppia are often forerunners of consumption, and when they manifest themselves they require the most prompt attention.

The Pulmente Syrup is a medicine which has had a long probation before the public. Its value has been proved by the thousands of cures it has male through a period of more than thirty-five years, in all of which time its reputation has increased, and the most obstained skepticism can no longer doubt that it is a remedy which may be used with confidence in all cases which accompany each bottle, he will certainly be cured, if his longs are not too much wasted to make a cure possible. Even in eases suipposed to be incurable, when friends and physicians have despaired, the use of this medicine has axed the life of the patient and restored him to perfect health.

Dr. Schenck does not say that all cases of pultomach. Schencks Mandrake Pills, for disease ui

has saved the kio of the patient and restored him to perfect health.

Dr. Schenck dues not say that all cases of pulmonary consumption are within .teach of medicine, but he emphatically asserts that often when patients have the most alarming symptoms, such as a violent cough, creeping child, night sweats and general debi ity, even to such a degree that they are obliged to lie in bed, and when they are given up by their physicians they may still be cured. No medical treatment can erect now homes but when the lungs are very sailly disease lungs, but when the lungs are very sadly disease and to some extent destroyed, a cure may be of feeted by Dr. Schencks medicines. "About a scorfulous diseases, those medicines at

and to some extent destroyed, a cure may be effected by Dr. Scheneks medicines.

Also in scorfalous disance, those medicines are equally efficient. Dr. Schenek has photographs of a number of persons who have been nearly covered with running scres, and now all healed up. This shows its purifying properties, which must be done to heal cavities in the lungs.

In the treatment of consumption it is of the utmost importance to give rigor and a healthy tone to the system. Hence it is necessary to strengthen the appelitual, the patient and improve the digestion. Proper notrishment is required together with such means as will make the food easily digestible. The articles most suitable for the diet of consumptive patients are designated in Dr. Schanek's Almance, which are distributed gratatitiously. In general, the most highly nutritious articles are to be preferred, but the digestive organs must but strengthened in creder to make either food or medicine service able. This requirement is her by the Schanek's Manace, which the digestive organs must but strengthened in creder to make either food or medicine service and for this purpose it was designated.

When the digestive powers are put a good order, the food has its proper effect, the system of the patient is invigorated and the lungs hegin to exercise their functions in a normal and healthy manner. Then the healing powers of the Pulmonic Syrup will complete the cure.

Pelmonare consumption is almost decay complituded with dyspepsia, and liver complaint Schenek's Mandrake Pills are intended to re-

nonic Syrip win complete to cure.

P. Innounce consumption is almost always complete.

P. Innounce consumption is almost always complete.

Exchange's Mandrake. Pills are intended to remove obstructions from the liver and restore it healthy action. They have all the efficiency with is accribed to calouned or "blue mars." and are warranted bot to contain a particle of any universal poison. These pills cure tho mars distincted in the properties of the properties of the modern of obstructed condition of the liver. One for of these fills will prove the refleacy of the medicine. In consumption the Scaweed Tonic and Mandrake pills are invaluable auxiliary incidicines. They relieve the sufferings of the parents. and Mandrako pills are invaluable auxiliary medicines. They relieve the sufferings of the patient and assist the Pulmonic Syrup in affecting a cure. They have been found weful in advanced stages of consumption, where the larges are almost entirely destroyed and all symptoms according to the judgement—of the physicians, interest specify death. The lives of patients who were actually in a dying condition have been preserved for months by the use of Schenck's three great remedies.

Dr. Schenck's Almanac contains a full tretise on the various forms of disease, his mode of treat-

THE GREAT MEDICAL DISCOVERY

Dr. Walker's California

VINEGAR BITTER

More than 500,000 persons hear testimony to their wonderful curative effects.

For fanale campilains, whether in young or old, married or single at the dawn of women and or the turn of life, those Tonics have no out Send for a circular.

They are a get the purgative as well as a toni possessing also, the peculiar merit of active reported agent in rolleving congestion is matter of the life of the life

WHAT ARE THEY.

THEY ARE NOT A VILE.

Made of poer Rum, Whisky, Proof Spirits, and Refuse Liquors, doctored, spired and sweetened to please the taste, called "Tomics," "Appetizers," "Restorers," Ac, that lead the tipler on of drunkeness and rain, but are a true medicine, made from the native roots and herbs of California, free from fill alcoholis estimulants. They are the great bleed purifier and life-giving principle, a perfect renovator and invigorator of the system carrying off all poleonous matter and restering list blue to a healthy soudline. Naperson conflicte these Ritters needing to diffect the sand remain leng uswell.

S100 will be given for an incurable case, provided that the bones are not destroyed by mineral poisons or other means, and the yith organs wasted by the state of the point of repair.

Tor inflamatory and chronic Ricomattem and tent, Dyspredia of Indigestion, Billous, Remittent and internitient fevers, Discasses of the blood, Liver, Kridevsk and Buddyr, these bitters have been meet successful. Such discasses or easier they vitiated blood which is generally producedly derapgement of the digestive organs. Fancy Drink,

by vitiated blood which is generally producedby derangement of the directive organs.

Cleanse the vitiated blood whenever you find its impurities bursting thocush the skin in pimples, crupitions or stores; cleanse it whenever you find it obstructed and sluggish in the veins; cleanse it when it is food, and your feelings will tell you when. Even the blood pure and the leads of the system will follow.

Plu, Tape and other W rms, lurking in the strength and removal.

In Billions, Remittent and Intermittent fevers, there lives have no qual. For full directions

Th Billions, Remittent and Intermittent revers, these Blitter have no equal. For full directions rend-carefully the circular around each tottle, printed in four languages—English, German, French and Spanish.
