The Philadelphia weekly Press
and the Republican, both a year
for \$1.25, cash.

M. L. Jackson Sells

All Vegetables in their Season.

His Wagons run through the Town and Vicinity

It requires "hard pushing" to dispose of poor wares. All sorts of schemes are devised to "pull off" inferior clothing onto the unwary.

At Yates', corner Thirteenth and Chestnut Streets, schemes are not in vogue—the goods sell themselves. They are gotten up with great care, are superior in every way, and still are sold at moderate prices.

A. C. YATES & Co.,

Now only corner 13th and Chestnut Streets, Philadelphia.

Genesis of the Mosquito

BY A. J. KING.

Many intelligent people are uninformed as to the genesis of the mosquito, though there are few places on earth where their song is not heard; and it is not rare in Jersey. Happening to discover a numerous colony, in an incipient stage of development, a few days ago, in my hens' drinking-trough,—from a tiny "wiggler" to the pupa state,—I concluded to search for the eggs that produced this life. I was soon rewarded by the discovery of a black mass about one-fourth of an inch long and one-third as wide in the widest part, pointed at one end and widening to near the other and terminating in a blunt circular form, not unlike some boats, floating lightly upon the water. Placing a straw under it, I raised it carefully, and soon had it on a bit of glass under the lens of my microscope. What an interesting sight was here presented! Rows of cigar-shaped eggs, arranged diagonally across this boat-shaped mass, cemented together in the middle, and standing on end with the little end up. How beautifully and orderly they were arranged. How symmetrical their form. Light shone through the interstices between their circular forms, and presented a mosaic of exquisite beauty. With some emotion, but with less enthusiasm than actuated Archimedes, who, when a certain truth for which he had been searching flashed upon his mind while in a bath, ran naked through the streets of Syracuse, shouting "Eureka! Eureka!" yet I could not restrain myself from exclaiming, in my own vernacular, "I have found it! I have found it!" I called in all the family, and some of the neighbors, to see my new discovery. I was surprised and not a little disgusted, at the small interest some of them took in the matter. What! not take an interest in knowing just how that blood-sucker, that poison injector, that disease inoculator, that wicked stinger, that disturber of quiet and all slumber in the "stilly night" as in the active day, that assaulter, that breaker of "the peace of the people of the State of New Jersey" is produced! This was more than my patience (Job-like though it is) could quietly stand; and I confess I almost wished a "big Jersey" might then and there "go for 'em," that they might have a realizing sense of the importance of every one seeing it to be their personal, moral, christian, and religious duty to refrain from assisting in the propagation of this great pest. Some of my neighbors, with becoming zeal for knowledge, came and looked and admired the orderly arrangement of the egg-boat, and wondered if these were really mosquito's eggs? Accidents have often been the means of valuable scientific discoveries; and it happened that an accident contributed largely to the settling of this question beyond peradventure. The glass on which the eggs were got jarred, and the eggs were jostled and broken apart, some tipped over on their sides, and one was broken and its contents ran out on the glass, revealing a young mosquito "wiggler" like a chicken in the shell. This was perfect evidence that these eggs were what produced the wiggler, and it only remained to trace the wiggler to the imago, or perfect mosquito. This I had a fine opportunity of doing, as there were all stages of development in my trough, from the egg and tiniest wiggler to the pupa state.

This article is as long as space and the time of the editor will warrant this week, and I will resume next week the story of my further discoveries. However, I cannot close without admonishing everybody to look to their rain-barrels, hens' drinking-troughs, and all similar receptacles for water, and keep them clear of "wigglers," for they are merely young mosquitoes, and if allowed to develop will soon turn on you and your neighbors their blood-thirsty bills to torment you and them.

A good many so-called "swells" have nothing about them to merit that title but their heads.

John Kerns, of near Clarksboro, says he has marketed 17,000 quarts of strawberries from 7 acres of land, and has received between fourteen and fifteen hundred dollars for them.

Up to date 108 liquor licenses have been granted in Atlantic City, three refused and six pending.

Shams of the household—On pillows.

Star Brand Fertilizer

Is one of the very best!

And I can furnish any of them at bottom prices, as I have the sale of it in this vicinity.

Give it a trial, and be convinced. Orders taken at once.

Also, I am again handling the

White Velvet Flour

That is so well known to my customers.

FACTS FOR FARMERS.

AGRICULTURAL NOTES AND HINTS FOR THE HOUSEHOLD.

How to Make Farm Work Easier and More Brighter.

Farmers can easily select the best seeds by putting them between damp cloths or sheets of blotting paper. Buy such as look like new and fresh and are uniform in size.

In hot weather peas usually mildew, and are a disappointing crop. If exposed to a late crop, the early varieties, such as Alpha, are most likely to succeed and give a satisfactory crop.

A caution should be made against making too close an application of the value of fertilizers, as a difference of a few cents or even a dollar a ton between two brands may have no real significance, but may be due to unavoidable errors in sampling or analyzing.

The Right Time for Pruning.—The largest branch starts from a bud, which a slight movement of the finger would break off. By going over young trees and rubbing off buds that appear where branches are not needed, there will be very little pruning to be done when the trees come into bearing.

Unless manure is composted it will be found to give, but little food to the growing plant. The whole matter of its use turns upon the cost of getting it to the barn and from the barn to the field, as compared with what is saved by its use as an absorbent plus the value of the amount of plant food it contains; the latter factor will on an average be over \$2 per ton.

The misfortune of a short hay crop may be neutralized by a timely sowing of several crops that may be fed out fresh, or converted into hay. Millet (German), or Hungarian grass may be sown for a crop of hay, especially on well-fertilized land. Sow the fall turnips, Yellow Stone and Aberdeen, at once, and an abundance of winter turnips, such as Red-top Strap-Leaf, next month. Fodder corn may still be sown.

Rye in the Garden.—If a crop is removed to the garden, a crop is required, so the land with rye; if cows are kept, the waste of a moderate garden, will go far toward keeping a cow and the rye will form acceptable food in both fall and spring. Rye may be used for the same purpose, but they end with the season. If preferred, the land may be sowed to buckwheat, to be turned under as a green manure.

One pound of London purple to one hundred pounds of plaster is the strongest mixture advisable and the work can be done with less. The strongest mixture advisable of London purple is two pounds to one hundred pounds of plaster, and there is good reason to believe that one pound to even two hundred pounds of plaster is sufficient. The cheapest and best plaster is that of the country, and the best plaster is Paris green mixed with plaster or water.

In 1897, says a correspondent, one of our orchards set a good crop of fruit, but it dropped badly until only one-fourth of the crop remained, and of this nine-tenths was wormy and unfit for use. In 1898 all of the apples were set in the orchard, and the fruit was a Runsey pump and Nixon nozzle, sprayed the trees just after the bloom fell, using one pound of London purple to one hundred and twenty gallons of water, and the fruit was a Runsey pump and Nixon nozzle, sprayed the trees just after the bloom fell, using one pound of London purple to one hundred and twenty gallons of water is strong enough.

According to an official report on the agriculture of Colombia, South America, there are no cart horses in that country, the heavy work being done by oxen. The ordinary riding horses are small, seldom over fourteen hands, but very strong and enduring. They are considered to be comparatively valueless unless they possess the "graze," or amble, which is the pace universal in Colombia. The few English and American horses introduced for breeding purposes are used mostly for producing carriage horses on the plain. A good saddle horse costs in Bogota from \$150 to \$300.

The Rutabaga or Swede Turnip, if thought of or grown by farmers at all, has usually been considered only as a crop for cattle feeding. It may, however, be made a profitable market crop, especially near cities having a large German population. Rutabagas are easily grown and are immensely productive. Sow in drills two feet apart, about the middle of June, and thin to about eight inches in the row. The ground should be mellow and they will grow until freezing weather. The purple yellow-top is one of the best for the table, and if a good market cannot be found the stock will eat the crop with a relish.

The farmers in the vicinity of Barrow-in-Furness, England, have learned a lesson which is of general application. When that place was a town

fishery village to a town," says a Whitehaven paper, "the sea gulls were harassed until they died. Then followed a pest of grubs and insects in the ground, which the gulls, following in the wake of each plow, had previously destroyed. The farmers then held meetings and subscribed funds for the protection of the birds; huts were erected near their breeding grounds, and watchers were employed, until in a short time the gulls were as numerous as ever, and the pests of the farm were once more exterminated by them."

White there is a broad difference in the disposition and mental character of swine there is also a difference in animals and families due to training or lack of training. Pigs can be very easily taught to squeal till squealing becomes a habit. To avoid it they should be fed when young with enough at a time and at regular times. Don't feed animals a little every time you go near them if you wish them to know meal hours and remain quiet other times.

SUMMER DAINTIES.

For cherry pie, line a pie dish with crust, fill with whole cherries, adding plenty of sugar. Cover with a top crust, and bake in a rather quick oven. But cold with powdered sugar sifted over the top.

Strawberry meringue is an excellent summer dessert.—Make a rich paste and line a large plate. Bake until a light brown in a quick oven, and then draw to the oven door and cover with strawberries that have been rolled in sugar. Cover this with a deep meringue made from the whites of four eggs beaten stiff with three table-spoonsful of powdered sugar. Bake till the meringue is tinged with brown. Eat fresh but not hot.

There are many delightful ways of serving fresh fruit. The most natural, the nearest approach to the fruit eaten fresh from the dew in the glint of the sunshine is undoubtedly the most wholesome. The fruit requires only enough sugar to be palatable. Sweet fruits are most wholesome eaten with little or no sugar. Recipes for frozen or iced or half frozen dishes of fruits are to be looked on as culinary errors. It is a mistake to prepare fruit in any way which destroys the flavor, and there is no more certain way of destroying the flavor of strawberries, peaches or any delicate fruit than to half freeze it. Melons are delicious served on a bed of ice than any other fruit, but it is doubtful if they are so fine in flavor as when picked in the dew, fresh for the breakfast table.

Minced Cod.—Flake cold boiled cod, add one of mashed potatoes, a small lump of butter, one-half teaspoon of cornstarch and one beaten egg, heat and serve.

Chicken Soup.—Save the broth after boiling chickens and to it add a dozen ripe tomatoes peeled and sliced and one onion thinly sliced; boil twenty minutes, season with salt and beaten eggs and serve.

Salmon Gratin.—One cup of cold boiled salmon, one-half cup of cold drawn butter, pepper and salt; fill tureen half full and cover with fine bread crumbs; place in the oven and broil.

Beef Cakes.—Chop up rare done roast beef with a little fat bacon; season with pepper, salt and a little onion; mix; make into small cakes and fry brown; make a gravy and thicken with flour.

Potato Snow.—Mash a dozen boiled potatoes white hot; add a cup of hot cream and a good-sized lump of butter; cream with a fork until foamy; then press through a colander with potato masher, letting them fall lightly into a hot dish.

Boiled Carrots.—Trim off all the small roots, wash and scrape off the skin, wash again and cut in lengthwise slices; put them in a saucepan with a little water; boil gently until tender and drain; season with butter, pepper and salt.

Boiled Codfish.—Soak in cold water overnight; in the morning put in a stew pan with a half pint of water and a pint and a half of milk; stew slowly, then add a half cup of milk thickened with flour; season with pepper and butter and serve on toast.

Angels Food.—Sift one tumbler of flour four times, the last time sift in one teaspoon of cream tartar; add one and one-half cups of granulated sugar gradually to the beaten whites of eleven eggs, stirring constantly; sift in the flour, and stir as lightly as possible; bake in a tin that has never been greased, with a tube in the center. When done turn the pan upside down, on the edge of two other pans and let the cake fall out.

Ragout of Beef.—For six portions of the round of beef take half dozen ripe tomatoes sliced, three sliced onions, half a dozen cloves and a little whole black pepper. Cut grooves in the meat into which stuff half a pound of salt pork cut in thin squares; place the meat upon the other ingredients, and pour over them half a cup of vinegar and a cup of water, cover tightly and cook in a moderate oven five hours. When about done salt to taste; strain the gravy through a colander and thicken with flour.

STRANGE IDEAS.

Speculations concerning the nature of the moon, or the extent to which it influences terrestrial phenomena, are not confined to astronomers and other men of science who tell us that it is a dead planet devoid of atmosphere and water. To many unscientific people it is considered entirely of the latter, not to mention others who are inclined to the superstition that chalk or green cheese may enter largely into its composition, says the London Graphic.

The fact, according to a Whitehaven paper, that the moon is a dead planet devoid of atmosphere and water, is a very common idea. To many unscientific people it is considered entirely of the latter, not to mention others who are inclined to the superstition that chalk or green cheese may enter largely into its composition, says the London Graphic.

AN UNFORTUNATE DONKEY. Having been suspected of swallowing a small white duckling from a river, the donkey was taken to a butcher, and being found guilty, had its body ripped open in order that the useful plucked bird might be recovered, once again to shine upon the world.

Witches are thought to have more or less influence over the moon, and the moon, in turn, is supposed to be the cause of the moon's influence. The moon is supposed to be the cause of the moon's influence. The moon is supposed to be the cause of the moon's influence.

One sometimes meets with the superstition that when the moon is in and goes out on a Sunday seed planted during that month will not grow. Hair, it is said, should be cut at the full moon, and the hair will grow thick and long. There are also many similar superstitions, the general idea in them being that anything which may be done before the full moon is a productive increase or growth, the contrary being the case if the moon be waning.

SOME SAVAGES imagine that a fresh moon is created every month, and it may possibly have been a somewhat similar idea that has caused the new moon to become the subject of the numerous customs and superstitious fancies which one not infrequently meets with. It is customary with country people to bow or court to the new moon, and the bowing is done in the belief that a wish made at such a time will be gratified. It is held, too, that the money in one's pocket should be turned over to the new moon, and that if it is not, the money will be lost. The new moon is considered unlucky to say with the horns of the crescent pointing upwards. It is thought by some to indicate frost. Sharp horns of the new moon are supposed to presage wind, and when the outline of the crescent is like a 'V' it is said to be a sign of bad weather.

THE GREAT-MASS OF AMERICANS, loyal, energetic, intelligent, law-abiding, are men who earn their bread by the sweat of their brow. They are farmers, hand-laborers, or unskilled laborers.

This country has been extremely liberal in the matter of pensions. As a generous friend of the soldier and of his widow and his orphan, the American people is indisputably first among nations of the world.

VERY COTTY DRUGS.

Some medicines are very expensive. At a recent exhibition of the American Health association in Brooklyn on manufacturing chemist, E. Merck exhibited a case of bottles, enough to fill a barrel, of a medicine called "Homatropine hydrobromate." It was all in one bottle, containing six pounds, and was valued at \$12,000, or at the rate of \$2,100 per pound. This drug is an alkaloid, and is difficult to prepare, and the effects are similar to those of atropine, but not so lasting. It is a preparation of belladonna, and is chiefly used in the treatment of the eyes, and always in acute quantities. It expands the pupil of the eye.

This substance is a striking illustration of the application of chemistry to well-known medicinal plants. The physician does not deal so much with substances in their crude form as with the quinquinaes or active principles, says the London Graphic. The physician does not deal so much with substances in their crude form as with the quinquinaes or active principles, says the London Graphic.

AN AUTHORITY counsels us to wipe our faces upward after washing them, particularly when the evil days draw nigh that bring those indicators of age which the wrinkles on the lower part of the face. By using invariably the upward motion in drying, these wrinkles will be gently removed, and with it the tendency to wrinkle in the lower part of the face.

Very thick cream should be beaten with a fork. As fast as the froth is beaten skin it off. To mold whipped cream add dissolved gelatin, one third of a box to a pint of this cream (the gelatin is a good proportion, to which other ingredients, as sugar and flavoring, are to be added).

Long hair, the fungus of dress or cloak, with hanging loops at top, save from creasing as well as from dust and moth.

When making white cakes, use one half teaspoon more of cream of tartar than usual. The extra quantity of cream of tartar makes the egg whites stiffer.

An excellent and simple wash to keep the hands and face smooth after the occasional dish-washing which comes to almost all housekeepers is equal parts of vinegar and water. It is a good plan to keep a bottle of this in the kitchen, and to use it after each dish is washed. Wash the hands first thoroughly in warm water, wipe them dry and rub the mixture in the mixture.

Maple Sugar Biscuit. Measure out a quart of the best flour; add two teaspoonfuls of Cleveland's salt; mix to a stiff dough. Roll out to a thickness of one-eighth of an inch. Cut out the biscuits with a small tumbler or biscuit-cutter, not over two or three inches in diameter. Bake them twelve to fifteen minutes in a very hot oven. Serve them hot.

THE statement that there is nothing new under the sun has been so often repeated that the expression itself is a chestnut. The stories which amuse the children and mature generation alike were not composed nor constructed yesterday. They are only edited.

UPON the new order of things in the agricultural department of the country successful efforts are being made to more fully develop Western resources than were ever made before. The department accepts no man's conclusions. It makes its own experiments and reaches its own conclusions.

FOR HOUSEKEEPERS.

To clear soap-suds remove the fat and allow the white and shell of one egg for every quart of stock. If you wish to favor the stock more highly, add half a teaspoonful of salt. The thinest possible layer of oil, from the rind of half a lemon. Add also the lemon-juice, and more salt and pepper if needed. Mix, and pour over the stock. It will be all in one bottle, containing six pounds, and was valued at \$12,000, or at the rate of \$2,100 per pound.

AN AUTHORITY counsels us to wipe our faces upward after washing them, particularly when the evil days draw nigh that bring those indicators of age which the wrinkles on the lower part of the face. SATURDAY, JULY 4, 1891.

Why I Am a Protectionist.

Between nations that two systems
have ever existed, the free-trade system
and the protective tariff system.

The fruit of the free-trade tariff sys-
tem is, in the words of the British
Royal Commission, intermittent and
consequently dear production, and ab-
sence of reliable profits; in the words of
General Booth, over 3,000,000 of help-
less and starving British workmen, be-
ginning for work to earn the bare bread
of existence; in the words of Cardinal
Manning, "the capital that stagnates" and
"the starvation wages of the (British)
labor market."

The fruit of the protective tariff sys-
tem is—by reserving the sure home
market to the competition of American
producers—continuous and consequent-
ly economical and profitable production,
giving cheap prices to the ultimate con-
sumer, fair returns on invested capital
and the highest wages in the world to
labor. Under it neither capital stagnates
nor labor starves, but both do their
work together.

That is why I am a protectionist.—
Eugene Hall Rice, of Boston.

Dead, on the last day of June, of
poison from the hand of some cruel per-
son, good old "Mutt" Moore. He was the
children's friend and playfellow, the
household pet and protector for nearly
eleven years. He was kind, faithful,
honest, with a reputation that many
men might be proud of. He was the
faithful guardian of my little daughter
from her infancy. His intelligence and
expression often seemed almost human.
Yet he was "only a dog." Our regret
at his cruel death is heartfelt, and I
hope that when we chance to meet the
murderer, that his conscience will be his
companion. Mrs. O. E. Moore.

One of the most valuable cargoes ever
shipped from Baltimore to Brazil was
taken out the other day for Rio Janeiro
and Santos—the British steamship
Elvaston, of the Mar. Land Line. The
cargo includes fifteen locomotives and
tenders. The locomotives, which are
of the narrow gauge pattern, were built
by the Baldwin Locomotive Works.
Twelve will be landed at Rio Janeiro
and three at Santos.

This means that we are passing be-
yond the condition in which we exported
only bulky, crude products, the most
unprofitable business a people ever en-
gaged in. We now secure employment
and profits for our own people in work-
ing them up into the highest form of
finished products, and export them in
successful competition with the products
of free-trade England. It would make
an interesting calculation for a free-
trader to sit down and figure out how
many bushels of wheat and pounds of
American beef were consumed in pro-
ducing these fifteen locomotives. Had
the wheat and beef been exported in-
crude form, they would have helped to
glut foreign markets, thereby reducing
prices, and after freights were deducted,
would return to the farmer very little
for his outlay of labor and capital. As
it was, the farmer disposed of his prod-
ucts in the best market in the world,
at the American mine and locomotive
works, saved freight charges across the
ocean, and has at his command a sure
and always widening market among
makers of locomotives, from the men
who dig the ore to the skilled mechanic
who gives the finishing touch to the
great iron horse. There is profit in
this kind of business.

Private Sale.—Commencing Mon-
day, June 29th, I will sell a part of my
household goods at private sale.
MISS E. F. MOORE,
Bellevue & Union Sts., Hammon.

Pigs.—Two litters of blue pigs for sale
—Poland China and Jersey Red—six
weeks old. Six dollars per pair.
W. H. PRINCE,
Central Avenue, Hammon.

Lots for Sale.—Two desirable build-
ing lots, on French Street,
J. C. BROWNING.

For Sale or Exchange.—One of
the best farms in Hammon, heavily
fructified, first class dwelling and all out-
buildings. Terms very easy. Possession
at once. Will sell or exchange for village
residence. Owner too ill to attend to it.
A snap bargain. RUTHERFORD.

"MAKERS" gives instant
relief and is an infallible
cure for Piles, Proctitis, Dr.
Rutger's Remedy, 210
Broadway, New York City.

That handsome residence on the
Lake, known as the Frank Records
property, is for sale at a very low price,
and on the "lowest" terms one can ask.
For particulars, inquire at the REPUB-
LICAN office.

Electric Bitters.

This remedy is becoming so well known
and so popular as to need no special men-
tion. All who use Electric Bitters are
singing the same song of praise. A pure
medicinal does not exist, and it is guar-
anteed to do all that is claimed. Electric
Bitters will cure all diseases of the liver
and kidneys, will remove pimples, boils,
salt rheum, and other affections caused
by impure blood, will drive malaria from
the system, and prevent, as well as cure
all malarial fevers. For cure of head-
ache, constipation and indigestion, try
Electric Bitters. Entire satisfaction is
guaranteed, or money refunded. Price
50 cents and \$1 per bottle, at any drug
store.

A Good Section.

I have used Dr. Deane's Dyspepsia
Pills for dyspepsia and constipation, and
have been cured by them. I cheerfully
recommend them to all who suffer from
the same. STEPHEN BURMAN,
Sexton Wayne St. Ref. Ch. Jersey City.

The finest location in town for
a bank building, the corner of Bellevue
Avenue and Third Street, opposite the
Post Office, is for sale. Inquire at the
Republican office.

Work Wanted.—Blasting, plowing,
and cultivating, by S. T. TWOMEY,
181st First Road, or P. O. box 121.

Rucklin's Arnica Salve, the best
salve in the world for cuts, bruises, sores,
ulcers, salt rheum, fever sores, tetter,
chapped hands, chilblains, corns, and all
skin eruptions, and positively cures piles,
or no pay required. It is guaranteed to
give perfect satisfaction, or money re-
funded. Price, 25 cents per box. For
sale by all druggists.

OLD AND RELIABLE
Checks drawn on the People's Bank,
of Hammon.

Land Sale for Taxes of 1888.

Town of Hammon.
Returns of taxes paid on unimproved, and un-
improved land and buildings, for the year 1888,
not the latest proprietors, who are unable to
pay taxes, and on other real estate, in the town
of Hammon, County of Atlantic for the year
1888.

List of delinquent taxes returned to the
Town Council, June 25, 1889, with a description
of property by block and lot, and laid down
in a separate sheet, and the names of the
owners, which may be seen at the Town Clerk's
office, in the City of Hammon, at the office of
Attorney-at-Law, at May's Landing, N. J.

LICAN office.

Consumption Cured.

An old physician, retired from practice,
having had placed in his hands by an
East India missionary the formula of a
simple vegetable remedy for the speedy
and permanent cure of consumption,
bronchitis, catarrh, asthma, and all
thoracic and lung affections, also a positive
and radical cure for nervous debility and
all nervous complaints, after having
tested its wonderful curative powers in
thousands of cases, has felt it his duty
to make it known to his suffering fellow-
men. Actuated by this motive and a desire to
relieve human suffering, I will send free
of charge, to all who desire it, this recipe
in German, French, or English, with full
directions for preparing and using. Sent
by mail by addressing with stamp (con-
tainng this paper) W. A. NOYES, 820 Powers
Block, Rochester, N. Y.

For Sale.—A sixty-acre farm, 14
miles from Elwood station. About thirty
acres have been cleared and farmed. In-
quire of WM. BERNHOUSE,
Hammon, N. J.

If this should meet the eye of any
one who would like to buy a fine business
property, let him write to the Editor of
the REPUBLICAN for particulars.

After suffering for years with the
worst form of dyspepsia, such as bloating,
dizziness, vertigo, and stomach, etc.,
I came across Dr. Deane's Dyspepsia
Pills. Using them as directed 3
months, and still continuing, and great
relief. Would not be without, and
cheerfully recommend to any suffering
with the above symptoms.

JAMES HENDERSON,
Notions and Hosiery, 150 Newark ave.,
Jersey City, N. J.

Real Estate for Sale.—Five acres
at Chew Road and Tenth Street; or my
house with or tea acres; or ten or
twelve acres on Second Road; or the
whole 27 acres, with house, at Second
Road and Tenth Street. Inquire on the
place. J. Q. A. GREENWOOD.
