Dr. N. B. Richardson, of London, the noted physicion, says he was able to convey a considerable amount of conviction to an intelligent scholar by simple experement. The scholar was singing the praises of the "ruddy bumper," and saying that he could not get through the day without it, when Dr. Richardson said to him : "Will you be good enough to feel my

pulse as I stand here ?" He did so. I said, "Count it carefully what does it say ?"

"Your pulse says seventy-four. I then sat down in a chair and asked him to count it again. He did so and said, "Your pulse has gone down to seventy."

I then lay down on the lounge, and said :

"Will you take it again ?" He replied, "Why, it is only sixtyfour ; what an extraordinary thing !" - I then said, "When you lie down at night, that is the way nature gives your heart rest. You know nothing about it. but that beating organ is resting to that extent; and if you reckon it up it is a great deal of rest, because in lying down the heart is doing ten strokes less a minute. Multiply that by 60, and it is 600; multiply it by 8 hours, and within a fraction it is 5,000 strokes different; and as the heart is throwing 6 ounces of blood at every stroke, it makes a difference of 30,000 ounces of lifting during

the night. When I lie down at night without any alcohol, that is the rest my heart gets. But when you take your wine or grog you do not allow that rest, for the influence of alcohol is to increase the number of strokes, and instead of getting-this rest you put on something like 15,000 extra strokes, and the result is you rise up very seedy and unfit for the next days work till you have taken a little more of the 'ruddy bumper,' which you say is the soul of man below.''- Scientific American.

Republican National Ticket For President of the United States. JAMES G. BLAINE.

> For Vice-President, JOHN A. LOGAN.

John P. St. John, of Kansas was unanimously nominated by the Prohibition Convention, as their candidate for President. For Vice-President, William Daniel, of Maryland.

This campaign has no sectional issues It has no controversy as to the scope and purpose of our government, its rights, its powers and its duties. These things are all decided. The war settled some, and since the war the rost have be is excepted, even by Democrats, as disposed of. The three issues now before the country are:

1. Shall this government be honestly alministered by officers chosen solely for their competency ?-2 Shall it protect American industry

in good wages at home from foreign competition abroad ? 3. Shall it give every citizen his rights

23 a national citizen at home, and national protection to all his rights abroad ? No American ought to be satisfied

with less than this: every American has a right to all of this. Shall he have it? Mr. Blaine makes answer or each point in his letter of acceptance.

First on administrative reform : Impartiality in the mode of apoint ment to be based on qualification, an security of tenure to be based on faith ful discharge of duty are the two ends to be accomplished. The public busi-ness will be aided by separating the Leg islative branch of the Government fro all-control-of-appointments, and the Executive Department will be relieved by subjecting appointments to fixed rules, and thus remove them from the caprice of favoritism.

Second, upon protection to labor. Wages are unjustly reduced when an

industrious man is not able by his earnings to live in comfort, educate his children and lay by a sufficient sum for the necessities of age. The reduction of wages inevitably consequent upon throwing our home market open to the world would deprive them of the power to do this. Suffrage is made universal as a just weapon of self-protection to every citizen. It is not the interest of should be adopted which involves the reduction of wages to the hard standard prevailing elsewhere.

Did these men ver consider what might result from Democratic success this Fall. Four times, by the death of the President, a Vice-President has been made Chief Executive. What a magnificent spec tacle our country would present; with do all kinds of Loundry work in a satisfactory Mr. Hendricks, the unrepentant Copperhead as its President ! During the Rebellion he denounced every vigorous movement against the enemy, opposed the abolition of slavery, and when the colored men were enlisted and organized into regiments, this same Hendricks publicly denounced it as "the crowning insult." How do you like it ? How can ary patriot (not to say soldier) give aid or encouragement to a party which will nominate such a man for the second flice in the Government ? ____
