Advice to Horsemen.

1. Load lightly and drive slowly.
2. Stop in the shade if possible.
3. Water your horse as often as possible. So long as a horse is working, water in moderate quantities will not hurt him. But let him drink only a few swallows if he is going to stand still.

4. When he comes in after work, sponge off the harness marks and sweat, his eyes, his nose and mouth, and the dock. Wash his feet but not his legs.
5. If the thermometer is 75 degrees or higher, wipe him over with a wet sponge. Use vinegar water if possible. Do not turn the hose on him.

6. Saturday night give a bran mash, cold and add a tablespoonful of saltpetre.
7. Do not use a horse-hat, unless it is a canopy-top hat. The ordinary bell-shaped hat does more harm than good.

8. A sponge on top of the head, or even a cloth, is good if kept wet. If dry it is worse than nothing.
9. If the horse is overcome by heat, get him into the shade, remove harness and bridle, wash out his mouth, sponge him all over, shower his legs and give him four ounces of aromatic spirits of ammonia, or two ounces of sweet spirit of nitre, in a pint of water, or give him a pint of coffee, warm. Cool his head at once, using cold water, or if necessary, chopped ice wrapped in a cloth.

10. If the horse is off his feed, try him with two quarts of oats, mixed with bran, and a little water; add a little salt or sugar. Or give him oatmeal gruel or barley water to drink.

11. Watch your horse. If he stops sweating suddenly, or if he breathes short and quick, or if his ears droop, or if he stands with his legs braced sideways, he is in danger of a heat.

12. If it is so hot that the horse sweats in the stable at night, tie him outside. Unless he cools off during the night, he can not well stand the next day's heat.

WHEREAS, at the time and place specified for hearing of said application, the same was heard and fully considered by the said Borough Council.

NOW THEREFORE, the Council of the Borough of Folsom, in the County of Atlantic and State of New Jersey, do ordain and enact as follows:

THAT permission be and is hereby granted to The Delaware and Atlantic Telegraph and Telephone Company, its successors and assigns, to erect, construct, lay and maintain all necessary poles, wires, cables, cross arms, conduits, manholes and other fixtures and appliances for its telegraph and telephone lines in, upon, along, over and under each and every of the public roads, streets, alleys and highways within the limits of the Borough of Folsom, in the County of Atlantic and State of New Jersey, for the conduct of its business, subject to the following conditions:

1. That the use of the public roads, streets, alleys and highways shall be subject to such reasonable regulations as the said Borough now has or hereafter may enact, and as may be prescribed relative to street or highway openings.

2. That whenever the said Company shall desire to erect, lay down or construct any pole, conduit or manhole, it shall present a plan or plans showing the location, number and size thereof, to the Chairman for the time being of the Highway Committee of said Borough, who is hereby authorized and empowered for and on behalf of the Council of said Borough to approve or disapprove as to location, which plan or plans or copy thereof with approval endorsed thereon, shall be filed forthwith with the Borough Clerk of said Borough.

3. That all poles erected by said Company shall be neat and symmetrical, and the length thereof shall not be less than twenty (20) feet above the surface of the ground, and shall be so erected as to prevent any interference with the safety or convenience of persons traveling on or over the said roads, streets, alleys and highways, and in the handling of maintenance of its underground system, said Company shall not open or encounter more of any road, street, alley or highway than will be necessary to enable it to perform the work with proper economy and efficiency.

5. That space on the poles erected or in the conduits constructed under the provisions of this ordinance shall be reserved free of charge, for the purpose of carrying wires of any Fire Alarm or Police Telegraph System owned and maintained by said Borough; provided the said wires are placed and maintained in such a manner as may be prescribed by the said Company, and in no case used to carry high-tension currents.

6. That the said Company shall maintain all poles, wires, cables, cross arms, conduits, manholes, and all other appliances erected or constructed under the provisions of this ordinance, in good and safe order and condition, and shall at all times fully indemnify, protect and save harmless the said Borough from and against all actions, claims, suits, damages and charges, and against all loss and necessary expenditures arising from the erection, construction and maintenance of its system, or from its neglect or failure to maintain the said apparatus in good and safe order and condition.

Your property depreciates in value unless protected by a quality paint. Such a paint has a hard, smooth surface, keeping out the moisture and is a perfect armor against Nature's assaults. It is elastic—expanding and contracting with heat and cold, thus avoiding cracking, peeling and scaling.
A good paint has beauty of color. It does not fade quickly. It proves the poet's saying, "A thing of beauty is a joy forever."
