Run's Victim.

Like a sweet, fair lily, pure and white,

A mother's love her child

In her arms held, while out in the night

The winds rave loud and wild;

Her fair, white hands are tightly clasped,

And in her eyes and face

Sorrow and grief, and utter woe,

Their cruel record trace.

A hand, dry cough that oft disturbs

The silence of the room,

And a hectic flush on the woman's cheek

Foretell her coming doom;

And the hard, dry cough, and the low, tick, tick,

Of the time piece 'gainst the wall,

And the dismal wail of the storm outside,

Alone on the silence fall.

Now a hasty footstep in the street

Falls on the woman's ear;

It passes by—the clock at the clock;—

"To 'one,' and he is not here!"

She says, while a keener look of pain

Gleams in her wild brown eyes,

And the sudden hope that woke in her heart,

Alas! as quickly dies.

With a weary sigh she turns from her child

And sits before the fire,

And bitterly thinks of the dead, dead past

And her darling's drunken stride;

And then a great companion steals

Into her heart, and fears,

As she looks at the clock and wearily says:

"'T is 'two,' and he is not here!"

Her great, brown eyes grow wilder now,

Her face more haggard and drawn,

And she peers out into the gloomy night

And wishes that morning would dawn;

And the hollow cough and the low tick, tick,

And the wailing voice, and the wailing cry,

Are the only sounds save the wailing cry.

"'T is 'three,' and he is not here!"

She sits now with a broken sob,

And her thin hands, white and fair,

From its resting place a package draws

And a curl of Auburn hair;

The package contains her letters old,

And on his hair is a tear

Both fall as she says, while her lips grow white:

"'T is 'four,' and he is not here!"

Will the long night, never, never end—

Will my husband never come?

O God may my career run on all!

Who have said my Charlie runs!

May my career fall—then a gurgling sound,

And a low, quick cry of fear,

And the red blood crimsones the woman's lips—

And 'T is 'five,' and he is not here!"

In the morning light, in the wind and rain,

Half dazed there stood in the door,

The Charlie for whom the woman had watched

All that long, drear night before;

His eyes took in the awful sight,

And his babe's cry smote his ear,

But the heart was stiller than all night long

Had wished that Charlie were here.

Wm. H. Morris.

Hammonton, Atlantic Co., N. J.

Our Washington Letter.

WASHINGTON, D. C., Aug. 12, 1878.

Last week will remain long famous in the annals of Washington and vicinity for the number and terrible character of the rain and hail storms that seemed to select this little area of city and country as the centre for atmospheric disturbances that were absolutely terrifying to timid men and hysterical women, and that impressed the most stolid and unemotional with the trifling and illipituous character of man's works in their capacity to withstand nature's relentless forces. The week closed with a storm of an hour's duration that wrought wide-spread ruin all over the city and completed the work of destruction begun by those earlier in the week. Illustrative of the force of the gale, it may be mentioned that several sections of the iron fence between the Treasury and the White House were prostrated, iron rods three-fourths of an inch in diameter being twisted off as though made of clay. Our admirable sewer system has been damaged to the extent of many thousands of dollars, and the havoc above ground has been general. More than a hundred houses were unroofed from Monday to Saturday night, and many others were completely demolished. Pavements were torn up and utterly ruined as though the work of children. Hundreds—perhaps thousands—of shade trees have been uprooted or twisted off. Cellars all over the city have been inundated and many buildings with foundations washed out, will have to come down. A black cloud gathering anywhere above the line of the horizon will now set all Washington in a tremor of apprehension. On the whole the season has been unprecedented for hot weather and violent disturbances.

The President and his advisers are no sooner granted a temporary respite by a lull in the Indian and "moonshiner" war, and by a subsidence of the more prominent of the many other causes threatening disorderly and violent outbreaks, than Mexico comes in to claim her share of attention. Only recently she undertook to discount raids of her citizens into Texas by pleading similar ones south of the Rio Grande from Gen. Ord consumed most of the time. Ord intimates that the next expedition across that river in pursuit of thieves, or for any other object, will likely be attacked, and he asks instructions to guide him in such a contingency. A deterioration of the orders heretofore given was telegraphed in reply. Our relations have constantly grown more critical with Mexico, and

apparently we must now submit quietly, or prepare to meet force with force. Diaz can undoubtedly divert a very dangerous public sentiment against him into a less perilous channel by setting his bravos to cutting our throats.

In view of Wade Hampton's promises of immunity from punishment for past crimes to each of the ride-slab criminals of his State as desired to actively participate in the pending campaign and the turning loose of an army of ill-kept whiskey distillers on their personal recognizances, it is suggested that the imprisoned revenue officials there might be released on bail, provided Kershaw and the classes named would at thereby become so exasperated as to rend the Union asunder. But shooting a gallant Carolinian for so trifling a misdemeanor as aiding notorious criminals to escape them, and for trying to shoot the officials in question, has so incensed the people and outraged a chivalrous public sentiment, that it is doubtful if any movement looking to their safe removal from reach of a mob would be submitted to. Even their nominal transfer from the custody of a State to a United States officer, though immediately remanded to the keeping of the same jailer, was very galling to South Carolina's pride, and only her partisan firmness enabled her to submit to the humiliation. But she can't bear everything and the indiscreet officials must take their chances.

Capt. Eads has been visited by the Brazilian Minister by order of Dom Pedro who inspected the Mississippi jetties, with request for advice relative to the improvements of Brazilian rivers and also presenting him an autograph letter from the Brazilian Emperor, co-signed in the most complimentary and friendly language.

Let it be remembered that claims by Southern railroads in preparation will require \$25,000,000 to satisfy, under the precedent established by the Democratic House last winter, paying a Confederate railroad an enormous steel after it had been repeatedly rejected by the accounting officers of the Government.

MAXWELL.

Letter From Paris.

Paris, July 31, 1878.

In spite of the tropical heat of the past week, the number of visitors to the Exhibition has not materially diminished, and yet is intolerably hot in the galleries of the Champ de Mars, and the sun burns down mercilessly on the promenade out of doors. Still, there are shady nooks here and there. If there is the least breeze stirring, it is to be felt on the Trocadero terrace, where the flowers and grass are kept fresh by a system of incessant watering, and where the fountains and cascades help to cool the air.

Since it has been found impossible to install a military band in the Exhibition grounds, several of the restaurants have set up music of their own. One band plays at the British bar, and another at the Spanish cafe. Several small buffets for the sale of cakes and food drinks are now opened, and the visitors, including ladies and children, are now well supplied in this respect; they may also buy Turkish sweets, Algerian fruit, Russian hares, English bones, Parisian gaudies, and Persian scraps in various places.

The captive balloon in the Place du Carrousel is now visible from all parts of Paris, its huge bulk towering over the buildings of the Louvre and Tuilleries. The public is to be permitted to make ascents next week, the price being fixed for 20 fr. each person. In the meantime the balloon has been up twice, to a height of 1300 feet; the second time Mme. Goddard and Mme. Dardots were of the party.

The exciting moment for the exhibitors is arrived, the jurors are finishing their work, and the question of prizes, and especially of the grand prize of honor, is a burning one. Of course nobody knows anything of what is going on in the jury room, nor in the juryman's breast; but there are certain rumors, and some not of a pleasant kind. These do not however refer to any of the American exhibitors. Yesterday some very interesting experiments, with the telephone and phonograph combined, were made in the telegraphic section, before the jury. The mouths of the two instruments were placed together, and the words engraved upon the phonographic cylinders were soon heard distinctly in the telephone reception room at Versailles, and vice versa. After this the interlocutor at Versailles sang an original song through the telephone, which was taken down in the phonograph at the Champ de Mars, and it was sung and repeated by this instrument, amidst general applause. These are among the first experiments which have been made with the two instruments together, and it is evident that they may be very usefully applied.

If you have duly obtained a press pass to the Exhibition adorned with your photograph, and with official signatures, which render it doubly valuable to posterity, then you have the right to claim admittance to the Press Pavilion. It is situated near the post office, and has a telegraph office of its own; but this has practically broken down; and the journalists are now the same wiles and letter-boxes as other men. The value of the pavilion is in affording a cool and quiet retreat to write, and one supplied with all the newspapers. Here are all the principal pa-

pere in the world, and through the care of some Polish gentleman connected with the Pavilion press, the pavilion is especially rich in Slavonic papers. The pavilion has many studies and bondoirs, in addition to the great reading-rooms, and ladies and music are, it is said, not to be excluded from it. At is hoped, however, that some rooms will be preserved for solitude and quiet, or the benefit of all the other advantages will be lost to the working bees of journalism, for whom it was designed.

France, Italy, and Belgium contain the chief sources of production of marble-work. In consequence of the increased facilities for transport, and the decrease in customs duties, this branch of industry has flourished and increased considerably in France since 1875. Paris is this, as in so many other industries, the chief seat of the trade. The marbles are brought from the north, also from Marzallio, the Pyrenees, the West, and from Java. The great works at the Louvre, the Tuilleries, and the New Opera House have brought the employment of marble decorations in luxurious habitations to general favor. Working in marble is divided into four distinct branches—namely, building, decorations, clockmaking, and monuments. Each of these branches is well represented in class 16; but the merit of the French manufacture is especially noticeable in the marble decorations, the execution of which will bear comparison with the work of the Renaissance, or the time of Louis XIV. The art of ornamental sculpture employs a comparatively large staff of artists and workmen. Thus, the models executed in plaster's clay are cast by the molders, and the specimens are stamped either in stationary, portable, millboard, stuff, or plaster.

The Canadian trophy is one of the great sights of the Exhibition, and comes prominently before the notice of American tourists, because it is close to the American refreshment department. Solid petroleum is among the richest shows in the Canadian section; and, as the sightseer makes his way towards the trophy he comes upon a great gilded mass raised in the air, apparently without any sufficient means of support, which, nevertheless, testifies to the riches of Canada, by an inscription setting out that it represents in bulk the amount of gold gathered in Canada up to the end of the year 1877, namely, \$3,835,000 in the British Columbia, 271,000 in New Scotland, 50,000 in other provinces, making a total amount of 4,176,000 ounces, worth \$87,445,000.

The elevator in the Trocadero is at last finished, and will be placed at the disposal of the visitors within two or three days. Even those who know the building well, and have watched the progress of the elevator are astounded by its enormous proportions. The tower in which it is erected rises to the height of 355 feet above the surface of the hill on which it stands, and to 290 feet above the level of the Seine. The plan on which it is worked descends into a well, which passes through the old quarry below to the depth of 16 feet below the level of the sea. The counterpoises, each of which is composed of a mass of iron 65 feet long and weighs 10 tons, work in two other wells. The triple wire cable is eight inches wide, and 12 inches thick, and is formed of 588 wire, five-fifths of an inch in diameter. The resistance of each cable is calculated at two hundred tons.

The cage of the elevator is about 115 feet in diameter. The flight upwards is performed in two minutes. The view from the summit is grand, embracing not only the city, the Bois de Boulogne and St. Germain, but a view of the Seine, with all its sluiceways, as far as Mantes. A fee of a franc will be charged for the ride.

ALPHA.

Camden & Atlantic Railroad.

Summer Arrangement.

Camden & Atlantic Railroad Company will take effect on Wednesday. Two express trains are running daily through to Atlantic City, one in 55 minutes without stops, leaving Philadelphia at 4 P. M., reaching Atlantic City at 5.45. The other leaves at 5.30 P. M., stopping at Hammonton, 6.34, Elwood 6.53, Egg Harbor 7.00 and Absecon 7.15, on signal only. This train returns, leaving Atlantic City at 11.00, Absecon 11.15, Egg Harbor 11.33, Elwood 11.42, Hammonton 11.51, stopping at the Pennsylvania Junction connecting with Mt. Holly train 12.30 P. M., Camden 12.45 and Philadelphia 12.50.

A fast line leaving Philadelphia at 10.00, A. M., Camden 10.15, Philadelphia 10.22, connecting here with trains from Freehold, Hightstown, Trenton and Burlington to take up three passengers only, Hammonton 10.31, stopping on signal, or notice to conductor, at Hammonton 11.11, Elwood 11.31, Egg Harbor 11.38, Absecon 11.46, reaching Atlantic City at 12.00. Returning, leaves Atlantic City at 1.00, Absecon 1.15, Egg Harbor 1.33, Elwood 1.42, Hammonton 1.51, Philadelphia 2.00.

Another train leaving Philadelphia at 10.00, A. M., Camden 10.15, Philadelphia 10.22, connecting here with trains from Free

of domestication or cultivation

process of domestication or cultivation plants. One is that the natural result of cultivation is degeneration, and those who have been successful in raising a new old variety as proof of their failure to improve the old one. The other is that poor, worn-out soils, or neglect in cultivation, have, on many occasions, brought consideration to mind when the sort of soil is not considered. The latter, with smaller number of agriculturalists, is probably more intelligent, hold that the degeneration is a natural law, and that degeneration is but the result of ignorance and neglect. We believe that at the latter is the more reasonable of the two theories, as in accordance with the fact that the same plants are the condition of the various fruits, and other cultivated plants. Therefore, to advise the selection of the best of the old varieties, is to advise the selection of the best of the old varieties, which is not only important that the present, but also that the future should be maintained, but that a still more advanced be made whenever and wherever possible. The farmer who desires to produce better crops than his neighbors, will not wait until the next harvest crop is harvested and put in a new one, and had together, before selecting his seed. He will select his seed, will pick out the best one or two, and preserve it separately for the future.

From a field of grain of a considerable extent is upon a hill. There will be good spots, and there will be poor ones; and it is easy to gather the good ones for seed, while the poor ones will be left for the next year. It will be found with all kinds of grain, as well as fruits and vegetables that are not so. By selection there is a possibility of improvement, and in other otherwise; and a man who wishes to practice it will not only learn to select, but will eventually become a selector. The selector, however, is not progressive, he will soon become a selector, and learn that it is as easy and more profitable to go on than to lag behind.—*New York*

The Wool Product of the World.

From an interesting article on the wool trade of the Pacific coast, published in the *San Francisco Journal of Commerce*, we learn that the number of sheep in the world is now estimated at four hundred and thirty-four to six hundred millions, of which the United States has about 100,000,000, and Great Britain, the same number. From 1861 to 1876 the wool clip of Great Britain and Ireland increased from 1,000,000 to 1,500,000 pounds. That of France has increased almost as rapidly, though the wool is finer, as a rule, and hence the superiority of the French wools has been nearly as much upon the Paris country.—Great Britain. The United States product increased from very little at the beginning of the century to about 200,000,000 pounds, the present clip of this California has produced about one-fourth, and the Pacific coast as a whole almost one-third. At the rate of growth shown by the increase in the clip, the day is not far distant when the Pacific coast will produce at least one-half the wool produced in the United States. The wool of the Pacific coast, Oregon, Utah and Washington, Idaho, Montana, Utah and New Mexico are well adapted to its production. The wool clip of the Pacific coast is about 1,000 pounds; that of Buenos Ayres and the river Plata, 223,500 pounds; other countries not previously given, 469,000 pounds.

The Austrian troops sent to occupy Bosnia, in alliance with the Bulgarians, and the Serbs, having been meeting with active resistance in the Balkan States, and the Serbian Army in Bosnia were killed by the Austrians at various points where the Bulgarians had taken position.

The international committee, headed by the French Captain Bogardus, the American, Secretary of the committee, and the English, came over from London, and was won by Bogardus, who killed 70 birds to the advantage of the world and 8000 a day.

There are 47,000,000 Bulgarians in Bulgaria, and constant reinforcements are needed to keep up an army.

Dr. Deacon Leonard Latta Nina has been appointed to the late Cardinal French's secretary of state.

The committee reports that an earthquake had occurred in the mines of the Fortification of Kars, in Asia Minor, resulting in a fire which destroyed the best portion of the city.

The Austrian army of occupation in Bosnia has already met with a loss of over 1,000 men killed and wounded.

The Franco-American conference in Paris, in the interest of the Balkan States, and the two countries have agreed upon a project of a railway line from Constantinople to the Bosphorus.

The Fifth Avenue Hotel, New York, has been the scene of a most extraordinary event. A pair of white horses, which were the property of a nobleman in Europe, and which were the only pair of white horses in the world, were brought to the hotel on the 1st inst. The hotel was crowded with a large number of people, and the horses were kept in the stable for a long time. The horses were then brought to the hotel, and were kept in the stable for a long time. The horses were then brought to the hotel, and were kept in the stable for a long time. The horses were then brought to the hotel, and were kept in the stable for a long time.

The best rule of life, according to Dr. N. B. Foster's Health Manual, would be eight hours for work, hours for recreation, reading, and amusement, and eight hours for sleep and rest.

The population of the continents of America averages five to the square mile; Asia, twenty; Europe, thirty-five; Africa, six; Oceania, and of the whole earth the average is about twenty in the square mile.

Unlike any other work for us than at any time. Capital not required; we will start you. \$10 per day made at home by the industrious. Men, women, boys and girls wanted everywhere to work for us. "Now is the time." Cash paid and terms free. Address: **TRUX & CO., Augusta, Maine.**

If you feel dull, drowsy, debilitated, have frequent headache, mouth tastes badly, poor appetite, and tongue coated, you are suffering from torpid liver, or "biliousness," and nothing will cure you so speedily and permanently as to take **SIMMONS' LIVER REGULATOR** or **MADONNE'S PURELY VEGETABLE.**

The Cheapest, Purest and Best Family Medicine in the World!
An effective Specific for all diseases of the Liver, Stomach and Spleen.
Regulate the Liver and prevent
CHILLS AND FEVER, MALARIOUS FEVERS, BOWEL COMPLAINTS, RESTLESSNESS, JAUNDICE AND NAUSEA.
BAD BREATH!

Nothing is so unpleasant, nothing so common as bad breath and in nearly every case it comes from the stomach, and can be easily corrected if you will take **SIMMONS' LIVER REGULATOR**. Do not neglect to secure a remedy for this repulsive disorder. It will also improve your appetite, complexion and general health.

PHLEGS
How many suffer tortures day after day, making life a burden and robbing existence of all pleasure, owing to the secret suffering of Phlegm. Yet relief is ready to the hand of almost any one who will use systematically the remedy that has permanently cured thousands. **SIMMONS' LIVER REGULATOR**, is the drastic violent purge, but a gentle assistant to nature.

CONSTIPATION!
Should not be regarded as a trifling ailment—in fact nature demands the almost regularity of the bowels, and any deviation from this demand proves the way often to serious danger. It is quite as necessary to remove impure accumulations from the bowels as it is to eat or sleep, and no health can be expected where a castive habit of body prevails.

SICK HEADACHES!
This distressing affliction occurs most frequently. The disturbance of the stomach, arising from the imperfectly digested contents, causes a severe pain in the head, accompanied with disagreeable nausea, and this constitutes what is popularly known as Sick Headache; for the relief of which, take **SIMMONS' LIVER REGULATOR** or **MADONNE'S PURELY VEGETABLE.**

HAMMONTON N. J.

CUMBERLAND MUTUAL Fire Insurance Company.
BRIDGETON, N. J.

Conducted on strictly mutual principles, offering a perfectly safe insurance for just what it may cost to pay losses and expenses. The proportion of loss to the amount insured being very small, and expenses much less than usually had, nothing can be offered more favorable to the insured. The cost being about ten cents on the hundred dollars per year to the insured on ordinary risks, and from fifteen to twenty-five cents per year on hazardous properties, which is less than one-third of the lowest rates charged by stock companies, on such risks—the other two-thirds taken by stock companies being a profit accruing to stockholders, or consumed in expenses of the companies.

The guarantee fund of premium notes being now Three Millions of Dollars.

If an assessment had to be made of five per cent. only, twice within the ten years for which the policy is issued, it would yet be cheaper to the members than any other insurance offered. And that large amount of money is saved to the members and kept at home. No member having ever been made, being now more than thirty years, that saving would amount to more than

One Million Five Hundred Thousand Dollars

The Losses by Lightning.
Where the property is not set on fire, being less than one cent per year to each member, are paid without extra charge, and extended so as to cover all policies that are issued and outstanding.

BENJAMIN SHEPPARD, President.
HENRY B. LUPTON, Secretary.

NOTICE TO CONSUMERS

TOBACCO.

The great celebrity of our **TIN TAO TOBACCO** has caused many imitations thereof to be placed on the market. We therefore caution all smokers against purchasing such imitations.

All dealers buying or selling other than tobacco are liable to the penalty of the Law, and all persons violating our trade marks are punishable by fine and imprisonment. **SEE AD OF CONSUMERS, AUG. 16, 1878.**

The genuine **LORELLARD TIN TAO TOBACCO** can be distinguished by a Tin Tag on each lump with the word **LORELLARD** stamped thereon.

Over 7,000,000 best tobacco sold in 1877, and nearly 8,000,000 persons employed in factories.

Taxes paid Government in 1877 about \$5,000,000, and during past 15 years, over \$20,000,000.

These goods sold by all jobbers at manufacturers' prices.

Sold at the Customary Store.
