The New Loan.

LONDON, August 22, 1871. The new loan is a great success.

The European Syndicate opened their books at ten o'clock A. M. in this city and in Paris, Berlin, Frankfort, Amsterdam, Hamburg and Brussels.

The amount introduced was \$75,000, 000 of five per cont United States bonds. No subscriptions were received at less than par in gold.

The loan commanded a premium of 3-4 to 1-1-2 per cent previous to the opening of the books.

The subscriptions in this city are alreaby for over \$30.000,000. Advices from the Continental agencies

make it certain that the entire \$75,000,-600 has been taken.

The books will be closed to-morrow (Wednesday), instead of on Thursday, as has been advertised.

Foreign Postage.

An arrangement has just been concluded between the United States and Germany, to take effect on the 1st of October next, which reduces the rate of international postage for prepaid letters, if exor under. Unpaid letters so exchanged are to be charged with double the prepaid rates, and the insufficiently paid let-ters with the postage for unpaid letters after deduction of the amount prepaid. This arrangement thus establishes a uniform postage of seven cents, or three silver groschen per single rate, on prepaid letters exchanged between the United States and Germany on and after let of October proximo, whether transmitted via England or by the direct lines via Hamburg or Bremen. It is particularly to be observed that this reduction applies to letters only, so that all correspondence other than letters posted in the United States for Germany will continue subject to the same rates of postage and to the same conditions of compulsory prepayment as are now applicable thereto Postmasters will levy and collect postage on and after the 1st of October next. By order or the Postmaster General.

The press hotly debate the proposed distandment of the National Guard. The conservative journals advocate and the radical papers oppose the step. Fears are expressed that its enforcement will meet with opposition in Lyons and elsewhere.

It is reported that a compromise has been unde in the matter of the prolongation of M. Thiers' term of office, under which he is to receive the title of President and hold the position un'il the dissolution of the present Assembly.

The Indiana Bureau to-day received a communication from Enoch Hong, of the Central and Southern Superintendency. transmitting a report received by him from Laurie Tatum, agent for the Kiowas, dated Fort Sill, August 5 in which the agent states that Kicking Bird and soveral other chiefs and head men of the Knows were at that post on the 2d inst., and brought in eleven mules to in part rep acc the ones they had recently stole in Texas, and gave assurances that they wished to live in peace and would make no more rands in Texas or elsewhere, and that they would bring in the remainder of the forty-one mules they had stolen. The mules brought in were very inferior. and the agent would keep but two of them, telling the Indians they stole good mules and must return good ones. He assured them that if they would restore the mules and go upon the reservation nothing would be done with them at pres

Woman's Department

Extract from the report of the Nation al Woman Suffrage and Educations Committee.

1. Every woman should vote or attempt to vote, at every Federal, State, or municipal election under the act of May, 1870. baving first qualified, or attempted to qualify, according to the laws of her State.

2. Women should form parlor associa-

tions or clubs in every town for the purpose of strengthening each other in the performance of this duty, and should pay the expenses of such suits as it may be thought best to bring into court as test cases out of a common fund raised by the association for that and kindred purposee. It is very desirable that these associations should also employ competent women to prepare and argue the case, paying them from the common fund. The moral effect of this proceeding would be very great, and every State has one or more women within its borders who are entirely compe tent to perform this duty in a satisfactory manner. Already there are cases in the courts which will probably be carried up to the Supreme Court, where one case ar-gued and decided will furnish as good u test as many. But should Congress be compelled next winter virtually to decide changed between the two countries by the closed mail via England, from ten to seven cepts for each rate of half an ounce of women, an appeal to the Supreme Court will be rendered unnecessary, and there are many who believe this will be

3. Every woman who wishes to be 3. Every woman who wishes to be choosed with the right of voting on the same terms with the mais citizen of the republic should send her name and postofice address on a small slip of paper to the secretary, Mrs. Josephine S. Griffing, Washington, to be placed to an autograph book of record, which will be kept open for signatures at the Capitol until woman is dealered to be attranchised. She should is declared to be enfranchised. She should enclose also such sum of money, large or smail, as she may wish expended in the circulation of political tracts under the direction of the committee, and she will immidiately receive an acknowledgment of both name and money, and a specimen of the tract in present distribution.

4. Women should obtain hearings be-fore legislative committees of every State arguing the question for themselves; should obtain lyceum and free lectures in every town and village; should read and fortify themselves with arguments for rrivate use, that fathers, husbands, and brothers may be moved because of their importunity, it for no other reason, to accord to them equal political rights. The committee are of the opinion that it rests with women themselves whether they will sit with folded hands in their comfortable homes deploring the terrible evils that now afflict the body politic, or, rousing themselves for a contest with these evils, will bring them in a swift coming future to their deserved end. Men alone are powerless to do this. Men and women together are God's vicegerents upon the earth to replenish und subduo it, and make it a paradise indeed. Women of America, will you shrink any longer from accepting your share of this sacred duty?

[From the New York Globe, of Aug. 11th.]
The Good Samaritans.
The National Grand Lodge of Good

Samaritans is in session in this city to-day. Very little has heretolore been heard or known of this order, but it is now evident. that as a reformatory institution it is des tined to become a great power in this country. As an organization it is specially devoted to reclaiming drunkards, upon the philosophy of the Good Samaritan, who gave succor to one who fell among thieves. It is proposed to incorporate a new feature to the organization by giving a new application of the parable used by Christ, striking out boldly upon the idea that he who fell among thieves would have been better served and better saved if the Samaritans had instructed him how not to fall among theves. In a word, it is proposed to look to education for a correct formation of habit, rather than mor-al or legal suasion in reforming bad habits.

This is the true philosophy. A recent remarkable donation to the head of the order by a citizen of Rockland county, led to the result alluded to. A spacious insusion and beautiful grounds, comprising over one handred city lots, situated in the new village of Alturas, in that county, have been presented to the order to be used, in the language of the donor, "as a Home and School for little girls who are orphans and indigent because of the intemperance of parents dead, and for those who are more than orphaus. and worse than indigent, because of the intemperance of parents yet alive.

This is a move in the right direction. and commends itself to every right-mind-ed person. Property surrounding the "Home" which it is thought will yield near \$200,000, is donated to the purpose of establishing a Temperance College, one in which the matter of temperance shall be taught as the sciences are. The projector of this grand enterprise puts the case thus:

". The educator of the present is the rae reformer of the future.

"To systematize, and logically, practically, and vigorously develop the military spirit of our country, we have West Point. The widely diffused but impracticable anti-slavery sentiment of America had its Systematizing Oberlin. Law, Theology, Medicine and the Arts, each have in their several ways brought blessings to man by employing the philosophic and philanthropic educator.

"To found an institution of learning that shall be to the temperance cause what the Academy at West Point is to the army, and what each of the various schools mentioned is to its special interest, is the crying need of our times. And to estabish such an institution and to place it as an instrument in the hands of the Order of Good Samaritans and Daughters of Samaria, is the proposition I make."

A GERMAN VIEW OF TANMANY.-The following is from the American Correscondent or the Augeburg Allgemeine Zeitung, the ablest and one of the most fluential German papers, whose corresundents are selected with great care.

The Democratic party of the country has its headquarters in New York, from whence the political wires of the party are pulled. At its head stands a clique whose leaders. Tweed and Sweeny, are notorious demagogues in New York, and which, under the shelter of Governor Hoffman, has politically corrupted not which the client by the state of the party of t only the city, but the State. The Demo-cratic party in the city and county of New York is in fact, a pure mobocracy (Pobelerrschaft) Its pelitical triumphs have been constantly gained through fraudulent majorites, and it has in this way forced its supremacy on the city and State Through corruption and fraud this clique nas come into the possession of such wealth that it employs as its paid tools on the occasion of the elections the lowest dregs of the population, especially a great number of Irish. The better classes, es-secially the numerous merchants of New York, are finally aroused from their politial lethergy, through the pressure of inrdinate taxation, and determined to put in end to the morally and politically lawoo mab rule.
