Virtue requires no other recompense than the tribute of self-approbation and A sinner's time is wasted if he does

The wise man has his foibles, as well as the fool. But the difference between them is, that the foibles of the one are known to himself and concealed from remember when Barnum first-purchase the world; and the foibles of the other are known to the world and concealed from himself.

The greatest loss of time is delay and expectation which depend upon the future. We let go the present which we have in our power, and look forward to that which depends upon chance-and so relinquish a certainty for an uncertainty.

This and that may be right and true. but public opinion says we must not do We must act and walk in all points as it describes, or we shall be lightly esteemed; certain mouthfuls of articulate wind will be thrown at us, and this, what moral courage can front?

The man who has character gets credit, and the man who has no character gets none. Credit, therefore is a moral premium paid to men for their character, and it is of transcendent importance both to individuals and to communities that are struggling from a low to a high estate.

NO ELEPHANTS WANTED, "" The Present Condition of the Curi osity Market.

"The elephant market is overstock-This is the alarming statement made by Dr. Oscar Kohn, and he ought to know what he is talking about. He went into the show business twentyeight years ago with the great and only Barnum, and has had something to do ince then with every circus, side show and museum from Portland, Me., to Portland, Ore., and from Lake Erie to the Gulf of Mexico.

Thousands of ladies and little children who used to visit Barnum's Museum, at Ninth street and Broadway, will remember the white-haired, whitebearded, jolly-faced and gold-spectacled old "doctor" who used to sit at the gate and take tickets. That was Oscar Kohn. Every fat woman, fat boy, giant and giantess, dwarf, living skeleon, baby Venus, tatooed man or-girl, leopard boy, what-1s-it, two headed woman, armless man or woman, fourlegged chicken, five-legged cow, musical oyster, and every other curiosity on the ace of the globe knew and loved him. Recently he sat in a small office in the ld building at the southeast corner of Ninth and Broadway, New, York, oppo site to the corner whereon Bunnell's Museum once stood, and seemed to be : very busy man. The walls of the office were hung with circus posters. It is the place where Bunnel reads letters from his agents who are searching for living curiosities and wild animals throughout the world, Bunnell has no nuseum in New York city. He has one in Buffalo and another in New Haven. He supplies other museums throughout the country with curiosities. When the eporter first entered the office and asked As the soil, however rich it may be, Dr. Kohn whether he had anything new cannot be productive without culture, in curiosities, the doctor hung his head The oily vapor and steam pass through n shame as he replied "There is nothng new. It is the same old story."

"How about wild animals," asked the reporter, "are they in demand?" r tiger is always in demand.

"How about elephants?"

The doctor laughed until he was tired. t was then that he said: "The elephant market is over-stocked." He added Why, there are more elephants in thi thoughts, they are not sin; but if we country than showmen know what to do per year in Wayne County," he said, Barnum has thirty of them up with, in Central Park, and he would be glad As some of the most delicious fruits of an opportunity to sell them. They are very delicate birds, but Barnum drives them about the streets now just the same as though they were elephants. "Where is the tattooed Greek?"

"He's stone blind and is living i England. He made a great deal o money while here and hoarded it away Oh, he was the greatest of them all Now I can furnish you tattooed men

So they will, perhaps, nine times out of ten; but the tenth time a whirling gust of wind may carry a spark of coal where it will kindle a blaze, or one of the brands may have some soft, punky place in it where the fire will nestle for days, and bide its time. But old backwoodsmen, the writer thinks are not so apt to take things for granted.

In northern Maine and New Hampshire he said, tourists would throw away cigar stumps. The backwoods men can't afford cigars, and as a rule smoke their pipes out, because they don't find tobacco or the money to pay for it very abundant. Before breech-loaders or cut wads be-

ome so common, many bad fires were started from gun wads made of loose paper. The cut wads now used do not hold fire long. Of course, with metal cartridges there is no danger. Locomotive sparks are a very frequent cause when a railroad run through a large forest.

HOOKS AND EYES. The Ingenious Machines Used in Their Manufacture

100

For more than a dozen years the manufacture of hooks and eyes for women's and children's dresses may be said to have been dead, buttons having superseded them. But there are indications that hooks and eyes are again their residences since the register was to come into use, at least to a considerable extent. If this should prove to be the case, it will gladden the hearts of some who have preserved their machinery from the scrap heap. Thirty years ago the State of Connecticut had manufactories within her territory that produced these little articles to the value of \$122,000 annually, at fifteen cents a gross. Previous to 1830, or thereabout, hooks and eyes were made by hand and sold at \$1.50 per gross.

The machines for making hooks and eyes are quite ingenious, those for the hooks being capable of making ninety per minute and those for the eyes one hundred and twenty per minute. That for making the hooks takes the wire from a reel through a straightener, cuts off the wire to the exact length, when a blade strikes the piece in the-middle of its length, and two sile blades moving simultaneously ben I the wire double, laying the two halves of its length close together and parallel. Then two pins rise, one on each side of the ends of the wire, to form the eyes of ers bend the ends round the pins, making the eyelets for sewing the hook on to the fabric. The unfinished hook is still perfectly flat, when a horizontal pin and a vertical bender working upward, curve the double end of the hook. and a presser flattens the end to a "swan bill,"

The eye is formed in another machine, but by means of similar appliblack or japanned goods. The silver coating is made by mixing an acid precipitate of silver with common salt and produce a paste. The Seine Washerwomen

The French Ministry have decided to drive the washerwomen from the Seine. and they are likely to have a much livelier time with them than they had expelling the French Princes. A Berlin letter says :

The Government has now determined get rid of the Seine washerwomen and of the washing-ships moored along the banks of the river. There are over fifty of these huge barges, which are made use of throughout the year by no less than 38,000 washerwomen. The Government has been impelled to order their removal by the fear that as all the drinking water at Paris is drawn from the Seine, disease and bacilli might be engendered by the washing of so much dirty linen therein. The women, however, are up in arms. They refer the Government to some old charter of rights and privileges granted them two enturies ago by King Henry IV., of glorious memory, and threaten that if the measure is persisted in they will all march in procession to the Ministers armed with the battoir, which they use for beating the linen. They also declare they will resist by force any attempt on the part of the authorities to board their ships. According to the latest intelligence received from Paris, Gen. Boulanger is conferring with the Minister of marine as to the possibility of a combined movement on the part of the land and sea forces, while the Minister of Public Works has been consulted as to the possibility of temporarily diverting the Seine into another channel and thus stranding the enemy's fleet.

The Game of Chesa

Many tales are told of the invention of the game of chess. The Hindoos saw that it is the invention of an astrologer who lived more than 5,000 years ago, and was possessed of supernatural knowledge and acuteness. Greek historians assert that the game was invented to beguil the tedium of the siege of Troy. The Arab legend is that it wasdevised for the instruction of a young despot by his father, a learned Brahmin, to teach the youth that a king, no matter how powerful, was dependent upon his subjects for safety.

These varying styles the lower animals in some respects. are so admirably handled by skilful dressmakers that it is difficult to decide which will be preforred. At present both are adopted, and ladies of fashion that have an extensive wardrobe have these contrasting tollets for use on different occasions, according to fancy. They bring into use the various tones of light green, such as mignonette and Nile green, and bright shades of yellow, such as orange, indian yellow, jon-quil and the different tones of lemon, and they are as much worn as red. Suits in yellow are usually covered with some kind of lace, in ecru, black or seal brown, or with beaded net-work. The parts of the dress that are not covered with lace or net-work have arabesque embroideries, usually in vari-ous shades of reddish brown. Old mauve is unquestionably gaining ground, both for dresses and bonnets. for skirts and waists it is employed under lace or some material in openwork.

-Among toilets of light summer fabrics many lace dresses are worn by Parisian ludios. These have eithe waists to match or waists made of velvet and ottoman in dark shades. The skirts are draped with ribbon bows, which are sometimes fastened under fancy metal clasps. Bows of ribbons are again in constant use. Embroidered and beaded trimmings are usually in panel style. They are worked on the underskirt, and the tunic is opened on either side to show the work. The other side of the tunic is raised near

the back, puffing in full small plaits, and then falls either straight or in waves. Many aprons are also to be seen. Some of these form part of the tunic, and are raised very high in the sides. Others are square and trimmed with either galloon or lace. The latter are only employed over plaited skirts. with the skirt falling straight down the back. Another way of arranging a dress is to have a panel trimming in the tunic. This tunic opens over the front of the skirt, is separate from the back puffing, and is fastended to it by cordings or flaps. If cordings are em ployed then there are also drooping ornaments, and with the flaps there are handsome buttons. Great importance ant atta as they give a stamp of originality to many costumes. Let me observe, to begin with, right you are, P. G.; right you are. One Sunday in London, it struck me

that it wouldn't be a bad idea to go down to the office on the Strand and finish up some correspondence that was long over due. I would be assisted by the quiet and freedom from interruption that I was certain of on that day. so about 11 o'clock I went to the Hammersmith railway station and found it closed. Their contention, is that the action of the dog in the case cited and in all similar cases, is the action of an automation or machine, made to run as it is directed without any discourse of reason.

That the dog will not understand as the boy does, the "cool, calm request," unless it is accompanied by some gesture or peculiar tone of voice to indicate what it wanted, we deny. Take for instance the historical case of the dog near Detroit, which was left on shore, while his master was on board a steamboat 'Landlord,' he said, '1 suppose lots of a career of villainy and deception, to he is an inveterate chewer. THE INDEPENDENT

The Largest, the Ablest, the Best Religious & Literary Weekly. The most influential religious organ in the States,-Spectator, London, Eng.

The independent is one of the best papers in the world. Its good points are many and striking. They have jointy to be stated to be appreciated; and for proof of our claims appeal may be taken to any of the dify-two issues of the year. Any number will show that its contenia are marked by ABILITY, VAHIETY, and INTEREST.—The great thinkers, the great story-writers, the great poets, men of the highest reputation in all departments of human knowledge, make up its list of court-hators. Religion philosophy, science, literature, and; travis, discoveries, stories, and all conceitable topics are embraced in the contents, and everybody, old or young, learned or un learned, without r-grad to sex, employment, or cond-tion, will find something of interest in every issue Compare human human is a state for the self story. The Independent is one of the best papers

Comprehensiveness—It is a religious, a literary, an educational, a story, an art, a scientific, an agricultural, a financial, and a political paper com-bined.

BREADTH. CANDOR, EARNESTNESS. - The Independent is thed to no denomination; it is the organ of no clique or party in State or Church. It is free to diccuss all questions, and to speak its mind candidly. discuss all questieus, and to speak its mind candidy. It is not swerved by fear or favor. It is a vigorous de-fender of the Evangelical failt, it preaches practical righteousness, carnestly supports all moral reforms. All its columns-the advertising as well as the reading -are free from everything of doubtful or objectionable character. No matter what a person's religion, poli-tics, or profession may be if he desires to keep up with the times, and know what the brightest minds are thinking of, the ablest pens are writing about, and what the world at large is doing,-he should read the Independent.
