From Breckenridge, Cot.

August 18th, 1800, EDITOR REPUBLICAN,

Since my last, I have been very busy, and could find no time to write you of my many adventures till now. I will devote this letter to my trip to Decatur, a small mining town on the west side of the main ridge, across from Georgetown, and where the "Atlantic-Pacific Tunnel" emerges from under Gray's Peak. I was invited there by a gentleman to see the mines of that vicinity, and I gladly accepted the invitation, as I had often heard that it was a good mining region, and I wanted to see some large and well worked mines.

On Wednesday morning of last week I started on Billy for that Eldorado, about thirty miles away. The road runs along the Blue river to Dillon, and then up the Snake River, one branch of which beads in the gulches on the side of Gray's Peak. The road down the Blue is gently descending, and Billy galloped easily along until we reached a point about four miles below town, where I turned from the road, onto the bank of a ditch that meandered along the hill side, and ran into a flat some half mile to the right, where placer mining had been done by the use of the waters of the ditch. I had determined (as is usual with me) to take advantage of every reasonable cut off, and make the distance as short as possible. Here I came into the road to Swan City, which I followed for a mile and a half, and then struck off iuto a path or trail between the mountains, and followed it for some three miles, until I came out into the main road on the Snake, at Soda Spring, three miles above Dillon. By this route I had saved several miles travel and arrived here at eleven oclock. This is a fine soda spring, and I proposed to stop here and take my lunch and let pony take his on the fine grass which abounds, and drink freely of the mineral water. I had been here before, and knew of the quality of the water. It is a large spring, enclosed by a fence to keep the cittle out (for they like the water very much), stoned up some two feet high, and a platform partly around it. The carbonic acid gas comes bubbling up and impregnates the whole water, which gives it the taste of plain soda water of the fountain. It holds in solution iron and carbonate of soda and many other mineral substances. It is deficient in chloride of sodium (common salt) or it might rival some of the springs at Saratoga as a pleasant and for the hour I remained there. There are two quite large deposits of trauer-

tine rock from this spring close by. About a mile from here is Keystone, the present terminus of the railroad in the direction I was traveling, and the place where all the ore above has to be shipped. There is one small house and barn in Keystone, and this uninhabited by man. The only live thing I saw about there was two burrows (jacks; grazing in an enclosure.

About two miles beyond I came to a quite pretentious house, exhibiting taste and refinement in its construction, in a pine grove, with a sign board nailed to a tree which read, "Elwood." I anxiously peered about to see if I could discover some human being whom I might recognize as a former resident of that namesass in Jersey; but all was as silent as death. No one was there to greet, and I passed on with a feeling of saguers at the desolation there. I soon overtook a man on a burrow, a miner, who was going over the Argentine pass, the pass just above Decatur, to Georgetown. So we jogged on together, he giving me much information in-regard to the mines in the vicinity. About eight miles above Keystone the river and road separate, one going to Monte zuma, the other to Chihuahun and Decatur. The railroad has been graded song as hetervals, to this point, and there is daine un agitation among the graphe, especially wine owners, to have it considered to the place. Two miles bound b Chicagon (Chiwaya). This was quite a long, with an ore mill of

some kind, and stores, saloons, etc. but last fall a fire in the woods swept away the mill, all the business houses, and many dwellings, and now a few blackened remains are all that is left of the once prosperous and quite populous town, except four amilies that still live there among the ruins. It was a sad and depressing sight.

Now the western sky became dark, and the mutterings of thunder were heard, and I galloped on and left my companion with his burrow behind. reached Decatur just in time to get Billy and myself under cover before the rain came down. I found a miner here who had lived and worked in Breckenridge, and he told me much about the country and mines about Decatur. I had to go yet some two miles to the cabin of my host, and after an hour's waiting it seemed to clear up, and I started on to climb up above the timber line to my journey's end. The rain began again, harder than ever. Billy could only walk up the steep, and I got thoroughly soaked through my gossamer rubber overcoat. My friend was awaiting me with a good warm fire, and soon had all as comfortable as circumstances would admit.

This was the first time I had attempted to stay over night above timber line. Some of my readers may not know what is meant by timber-line, and I will have to explain.

TIMBER LINE Means the line along the mountain side where timber ceases to grow. It corresponds to the frigid zone, where it is too cold for timber to live. So you can reach the frigid zone by going up, as well as by going north or south of the equator. Every 300 feet in height is equal to a degree in latitude, and by reaching a height of 13000 feet, timber ceases to grow in this latitude, -it has reached the frigid zone, where frost every night in the short warm season interferes with tree growth. This line is not regular, but varies from 11,000 to 13,000 feet, according to the cold and warm currents of air striking the spot. These cu.rents are controlled by the contour of the surrounding country. A mountain may protect' a spot from cold

currents of air, and this line rises 1000 feet higher than where a low place lets a cold stream of air through to strike a mountain side. Such currents, when strong, cause the trees to trail along the ground like a vine. I have seen pine trees, 18 inches through, thus lying along the ground and throwing up limbs two or three feet high, the body attaincurative water. I did full justice to it ing a length of perhaps twenty feet. So pressed to the ground, it can do no otherwise but grow in that manner. Such trees may be a hundred years old, or more. There is but a short time in the year that they can grow at all, and then but little. What struggling for existence !- A precarious life is maintained along a narrow zone, and then as you ascend, conditions are too severe, and the hardy pine life ceases.

The tops of all the higher peaks and ranges, for a thousand feet or more in height, are free from trees; and below, along their sides, they are usually covered with pine, spruce, and Br: Grass and tiny flowers-mosses - persist to the very tops, where there is any soil in which to take root. The valleys and side hills may have openings in the timber, that might be called prairies, but here are called parks. These untimbered spaces are sometimes very large, - the North, South, and Middle Parks are each from 50 to 100 miles long, and in places very large. We are between the South and Middle Parks.

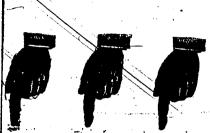

I have made a long digression from my story, to give my younger renders a correct idea of the country, and must reserve for my next letter a description of the mines and country about Decatur. Yours, &c.,

DAYS THAT NEVER RETURN

Floats a song that is half a sigh, Like the sound of leaves when sweeps by,

Edka the sound of breakers far away,

As they beat and sob,

As they-beat and throb,

Till Thear a voice in the d stant roar

On that levely stretch of sandy shore.

Over the strings of my harp to-day
Floats a song for the dying year—
A song that thrills with an unshed tear—
Through the winter twlight, chill and gray,
As the breakers sob,
As the breakers throb.
And I hear the voice with its old refrain,
For the days that never come back again.

Floats a song for my sweet, lost youth—For oh, I would give, in very truth,

Riches and fame and power away

To dream once more
Those bright dreams o'er.

"It is a vain regret;" sighs the old-refrain,
For the days that never come back again.

Over the strings of my harp to-day
Floats a song for the dying year;
A song that thrills with an unshed tear
Like the sound of breakers far away—
How they beat and sob!
How they beat and dirob!
And I hear that voice with its old refrain,
For the days that never come back again.
— Unidentifice

"Only twelve years, yet it seems as if another age had intervened," said a

friend rather sadly to me one day.
She was seated in a bay window looking out upon a charming landscape. A pile of sathetically tinted cushions supported her; two immense jars resurred from the family garret were at either end of the divan, each nourishing an amber tinted lily or two. Her "gown" was medicaval, dull tinted and streless, with a touch of Etruscan gold here and there, and her manner was characterized by an air of gently exhausted melancholy. In her lap was a

ing photographs—the portraits of class-mates and friends of other days. Twelve years ago she married and went away. Recently she had returned flushed with western prosperity to Recently she had returnher old home. She is looking, as she speaks, at the picture of four of her old school mates. One was Beatrice, the poet and valedictorian of the class in which my ir end—graduated. Beatrice wears her white graduating gown. She has a pale, serious face, and hair loose ly hanging, though innocent of bangs. My friend remembers the sense of unrest. the vague Byronic yearnings with which Beatrice filled her copious zhymes, always vowing that she never, never would marry, because she was sure not to meet her ideal this side of

esven. Yesterday she met Beatrice coming out of the village grocer's. Her arms were full of bundles and by her side was a little Beatrice, to whom she gave ginger snaps from a paper bag, to keep the child still while the two old friends alked. My friend hardly knew her, she was so changed, in manners as well as looks. She was gay, amiling and lo quacious. She was no longer pensive and dreamy; she had grown stout and about the weather, the price of butter, the scarcity of raspberries; and said that Robson (her husband) was no mansurprise, growing fat upon worry and and then Minnie told her

the low rate of board. upon making one dollar do the work of o, with three pretty children and a perhaps the less said of them the bet-

Two of the other pictures represented Dolly and Isabel, both favorities of the school and the village. The boys sent them valentines and took them "buggy riding." The girls shared caramely and pickles and new novels with them cheerfully. They had no end of intimate friends, full of school girl confidences, and swearings of eternal fidelity
through after life. My friend herself
showed all the minute pores of the
hrough after life. My friend herself had interchanged a score of delicate shell, and appeared to be a delicate Some use raw beef—raw meat, for this feminine secrets with each one of them, work of art. The egg was exhibited dish, but we have found most satisfacand had vowed unutterable affection, for a long time, and not one person in tion in using that already cooked. correspondence with Isabel that was intended to end only in death. It last-The other day she met Dolly street car. Her early beauty had faded, there were more lines upon her fore-

head and beneath her eyes than time alone would have placed there. Time seemed to have been assisted by discontent and a habit of fault finding, totally foreign to her youthful days; and perhaps held in abeyance by the general agreeableness of everybody then.

But Dolly's health had failed, people

ceased to be so considerate to her whims, admirers grew less and less attentive, she was still unmarried and had sunk deeply into the typical career of senator, once had his health proposed old maid-hood. The staple of her talk thus by the artist Story: "Here's to this way; take clear tender leans beef, I do not get it by eight, you may not this way; take clear tender leans beef, I do not get it by eight, you may not this way; take clear tender leans beef, I do not get it by eight, you may not this way; take clear tender leans beef, I do not get it by eight, you may not this way; take clear tender leans beef, I do not get it by eight, you may not want to be the talk this way; take clear tender leans beef, I do not get it by eight, you may not want to be the talk this evening. now was upon her ailments, upon the Learning—when Ever-it rises it grows." | this way; take clear tender leans beet, said now got to by eight, you may now was upon her ailments, upon the Learning—when Ever-it rises it grows." | about a pint, when finely chopped, raw expect any more work from me. disagreeable traits of her acquaintances, and interspersed with acid commiseration of things in general for falling so much below her own expectations of the way they should be. Doubtless good legith and an affectionate husband legith and one small miniced onion, a tetak, add one small miniced onion, a thetak, add one small miniced onion, a tetak, add one small miniced onion, a tetak, add one small miniced onion, a thetak, add one smal would have changed all this, but these can find out what some of them are; over the browned cakes,—Observer. were not forthcoming, and my friend Isadel, she met the premous summer that certain inner

at a watering place. Isabel was fash-ionable, and had married a financial magnate, who burrowed away at his office the year round, white his wife squandered money in town and country after strict conventional standards. Isabel's husband is thirty years the a gay and winsome school girl she had a hasty lunch whenever unexpectedly developed into a married coquette of called for. It is an uncomfortable podeveloped into a married coquette of called for. It is an uncomfortable potter and a point of the adroitest kind. She is at once sition for materfamilias to have noth when the company have all dispersed heartless, selfish and prudent. Men ing at hand, already cooked, and be there is a tramp at your back door, follow after her whenever she cares to obliged to send out—depend upon out—attract; she draws them to the verge of side cookery—for any one knows the extremity, yet never oversteps the lines of social propriety, and more than all—like the "home-made," with the home-is never enthused or confused. The made taste and flavor. Of cakes and limited—very limited, compared to the skill with which she extracts entertain- pies and other dainties, we do not ment from the hearts of men and the speak now, but of the more substantial envy of women is only equaled by her parts of a lunch, the main dish of

Reflection convinces her that the girls that she used to know and herself, have developed into a good deal such women as might have been expected, taking everything into consideration. Not always such, however, as they or their friends did expect—which is often quite another thing. There are no changes so various and wonderful a those of nature for the reason that the next morning; boil slowly for at those of nature for the reason that the next morning; boil slowly for at the reason that the next morning; boil slowly for at the reason that the next morning; boil slowly for at the reason that the next morning; boil slowly for at the reason that the next morning; boil slowly for at the reason that the next morning; boil slowly for at the reason that the next morning; boil slowly for at the reason that the next morning; boil slowly for at the reason that the next morning; boil slowly for at the reason that the next morning; boil slowly for at the next morning; boil slowly for at the reason that the damp earth on stormy days, and the case may be often in contact with the damp earth on stormy days, and the case may be followed to a consumptive patient on a dying bed.

Not only do the poor hide in the busy haunts, but they walk side by slowly for at the first to the poor. As deserving for the vell-worn on stormy days, and the case may be followed to a consumptive patient on a dying bed.

Not only do the poor hide in the busy haunts, but they walk side by slowly with you in society and you never a istance of their poverty. Respect their delicate pride; it is the link that binds with you make no parade of their poverty. drawn up, and she saw the moon, and it looked as if it were laughing at her. "You needn't look at me, Moon," she said, "you don't know about it, you can't see in the day-time. Besides, am going to sleep.

She lay down and tried to go to sleep. Her clock on the mantle went "tick-tock, tick-tock." She generally liked to hear it. But to-night it sounded just as if it said: "I know, I know, I know. "You don't know either," said Minnie, opening her eyes wide. "You weren't

Her loud voice awoke the parrot. H took his head from under his wing, and cried out, "Polly did!" "That's a wicked story, you naughty bird!" said Minnie. "You were in Grandma's room, so now!" Then Minnie tried to go to sleep again. She lay down and count ed white sheep, just as grandma said she did when she couldn't sleep. But there was a big lump in her "Oh I wish I badn't."

Pretty soon there came a very sof patter of four little feet, and her pussy jumped upon the bad, kissed Minnie cheek, then began to "pur-r-r-r." was very queer, but that too, sounded, as if pussy said, "I know, I know." "Yes, you do know, Kitty," said Minnie, and then she threw her arms around Kitty's neck and cried bitterly. "And-I-guess-I-want-to-see-my --mamma!"
Mamma opened her arms when she

ng hoarders, and to my friend's saw the little weeping girl coming the oven. The skin being removed, dignity and moved towards the door, work, despite an indolent husband and story. "I was awful naughty, mamma, but I did want the custard pie so bad, The old time Beatrice was fond of and so I ate it up, 'most a whole pie, soft clinging fabrics in her dresses, and then, I—1—O, I don't want to tell, the girls thought her a geniue, born to hut s'pect I must, I shut Kitty in the "right the wrongs" of her sex in some grand, mysterious way. And here she was, her greatmind contentedly settled Mamma told Minnie she had known all about it. But she had hoped that her little daughter would be brave enough husband whom she loved, yet who could to tell her all about it herself. But mamma," she asked, "how did you know it wasn't Kitty?" "Because Kitty would never have left a spoon in the pie," replied mamma, smiling.— Kentucky Church Chronicle.

> AN ELECTROPLATED EGG.-About three years ago, a silver-plater, named Downing, took a fresh egg and put it, proa hundred would believe it to be any.
>
> Croquets will also make use of odd thing but a cunning specimen of the and ragged remains of any sort of discussion, Mr. Downing cut the silver meat, one of milk, one of fine crumbs, egg in two, and it was found to be as fresh and sweet as the day it was electresh and sweet as the day it was electroplated. Its silver coating had hermatically scaled the pores of the shell.
>
> Most people will relish a salad made knock at the door, an imperative, 'Open please,' and instepped a haughty the way: chop finely a count dame. Since then experiments have been made which have resulted in divulging a most astonishing possibility,—that of embalming the dead in casts of nickel, silver, or gold, according to the purses and artistic desires of the deceased's

Merse Stables Should Be Boomy-Farm Savings-Various Methods, Notes and Re-cipes for the Farmer and His Wife and October he harvested 300 scres of it, Savirgs-Various Methods, Notes and Re-Mis Children, and The Town Folks. Stables for Murses.

To stand in a narrow stall day after had trodden it all down so that It day is not conducive to either comfort results, writes Henry Stewart. It looked like a field of harvest-past cornsumps and stiffens the muscles and stalks, but the ground was covered almost white with the threshed out kerwearies the animal. A large stall in which the horse may be left foose is far hattar for the animal which is able move about and exercise the musles. A single close stall should be oleaned every morning, as the drop-pings cellect in a bunch and the liquid a forms a puddle. But this does not happen in a box or loose stall, and I sufficient litter is used to keep the horse clean, the manure may remain in the stall until it is a foot deep. If a peck of land plaster is scattered over the floor occasionally and litter enough to keep the horse clean and dry is used, the stable will be much less odorous than one with the common stalls cleaned every day; and indeed from all odors whatever. These loose, roomy stalls are excellent for nares and colts. The manger should be raised high enough to prevent ma-nure being dropped in it. The use of such stalls for horses and cows both convenient comfortable and economical, and it completely avoids the common danger of horses being cast and injured, as is likely in the common narrow stalls with halter fastenings. that as wire netting is not costly

The Weekly Press.

PHILADELPHIA. One Year for One Dollar.

The Weekly Press

For 1890 will be as much better than The Weekly Prova for 1889 as we can make it. With every Press for 1889 as we can make it. An Eighty Column Paper.

Each of the fifty-two numbers will contain ten pages, or eighty columns, with a tonal for the year of 520 pages, or 4160 columns. Thus it will be "as big as a book," as the saying is. A Paper of Quality.

Not only will it be as big as a book, but it will be apaper of quality as well as of quantity. It will contain the pick of everything good. A Paper of Variety.

Paper of Variety.

The idea is that. The Weehly Press shall be both clean and wide-awake—It will discuss all subjects of public interest and importance. The writers on its list include: Julia Ward Howe, E. Lynn Linton, P. of, N. S. Shaler, Louis Pasteur, William Black, Edunundgoses, Edgar W. Nye, Opie P. Read, and, indeed, almost every p-amiar writer of note in this country and quite a number of distinguished writers abroad. In fiction, an airtaction of the year will be "Escher," by H. Ridor Hagard; another serial story, siready engaged, will be "Come Forth," by Elizabeth Stuart Pholps.

A Farmer's Paper. The best conducted Adricultural Page in America Illustrations.

A Woman's Paper.

The "Women's Page" of The Weekly Press alone is with the subscription prace. Its illustrations are attracting attention everywhere. A Children's Paper.

The Special Department for Children is now addressed to the school children and school teachers of America. Let the children join the Rainbook Club just started. Let them compete for the prizes—all bright, wholes me, matructive books.

Important Clubbing Arrangement. By special arrangement with all the leading weekly and mon his periodicals of America, subscriptions are trace for anyone or more of these jour als in connection with The Weekly Press, at such low rates as virtually make our great family paper FREE to the subscriber for one-year.

Bample copies furnished free upon application.

Terms of the Press.
