BOARD OF HEALTH NOTICE

We are at present combatting an outbreak of diphtheria. Several cases have developed, in three sections of town; and in most instances it is difficult to say just where it originated.

... Our people are too indifferent to the terrible consequences of diphtheria. The present cases are of a very severe type.

We caution you to keep your children from the movies, sociables or any mixed gatherings. Examine their throats, and use autiseptics and disinfectants freely.

YOUR GARDEN AND MINE--September "Musts" in the Garden By Katharine Moore Matlack

F THE value of Pail work in the garden is over fully realzed by the amateur, then indeed will we begin to have gardens in America that will rival those of old England. The disappointed gardener, the one bearing menger crops of flowers, will have a different story to tell if she gartleularly September. For the happy possessor of a Sum-

Spring, every one sows and plants and gardens generally. Later the interest wanes. In September many people are away from home, or busily enjoying themselves vacation-wise. Or it is very warm. Or the garden begins to look shabby and interest languishes. But the real garden lover knows no abatement of interest and knows when the psychological moment has arrived.

The Hudson Super-Six

Is Affected by New Prices.

Suppose we Look at this way-

You are offered your choice of a great variety of automobiles.

All you are asked to pay for the car of your choice is the difference between what the car sells for and the price of a Hudson Super-Six.

Here are cars which sell at \$1500 to \$1600. Until recently they were priced at between \$1200 and \$1400.

But now they sell for more because recent increases in material costs has forced selling prices, up to their present levels. So the only difference you must pay for a Hudson Super-Six is less than

Could you, under such circumstansees, give even a second thought to such a car? Wouldn't you be like the more than forty thousand who have already bought Super-Sixes? Hudson was their first choice?

Or let us suppose you already own one of those cars that has recently advanced its prices. And to emphasize the point, suppose before you had even taken delivery of the car some one offered you a brand new Super-Six for your car if you would give him not more than free to boot. There wouldn't be any hesitancy on your part in that case, now would there?

That is the situation as it stands to-day. The other cars have had to advance their prices so much that It has entirely re-adjusted the basis of values as they were known only a few weeks ago. It has brought former cheaper cars up to about the Mudson price. It has advanced higher priced cars than the Hudson so much that the differencebetween them is now \$500 to \$1000greater. So far, 51 makes have been advanced in price. The advances range from \$100 to \$700, according to make and model.

The Hudson has so far escaped the necessity for advancing its price. That is due to a fortunate turn in affairs. which finds the Hudson factory supplied. with a quantity of parts that were bo't. last year before material prices had shot up to their present unequaled, heights. The other companies exhausted their supplies in the spring, and had, to enterthe market when it was at its highest.

The Hudson prices can't stand long. Soon they, too, must advance. But the situation is unique. It is a great opportunity for those who take advantage.

. . . You must already know a lot about the Hudson Super-Six. There are somany is use that wherever you, go you will meet Super-Six awners. Ask them if you want to know what kind of a car it is. You will find it: is, the car which every one admits is the greatest performer. It is the one that has full rights on the road if its drivon cares to exercise those rights. You, will find it is the carthat meete every abuse that the hardest driver gives it and still it nover scoms to be out of condition.

Such is the kind of car you can get at prices which were established last year, if you will, buy, now-
