## Koal-Spar

Consumes  
all the  
Vitality  
there is in Coal.

Koal-spar saves 25 per cent of  
your coal bills.

Koal-spar prevents smoke, and  
therefore a smoke consumer.

Koal-spar destroys coal gas.

Koal-spar prevents soot and  
cinders.

Koal-spar starts a hot fire in  
five minutes.

Koal-spar keeps boiler tubes  
clean.

Koal-spar will make a poor  
quality of coal do the ser-  
vice of the first quality.

One Package,  
costing 25 cents,  
Saves one-quarter  
ton of Coal.

Koal-spar is all-powerful, alike  
with hard (anthracite) or soft  
(bituminous coal).

## DISSOLUTION.

The co-partnership heretofore  
existing under the firm  
name of Elvins & Roberts  
having been dissolved, by  
mutual consent,

**GEORGE ELVINS**

would respectfully notify  
his patrons, and the  
public generally,  
that he is still doing business  
at the old stand,  
and solicits, as in the past,  
a large share of  
their patronage.

Orders received by mail  
will have special and  
prompt attention.

day. Legal business placed in his hands  
will receive careful attention.

Office hours at Hammonton,--7:30 to 9:15 A.M.  
8:30 to 9:00 P.M.

## John Atkinson, Justice of the Peace,

Commissioner of Deeds  
Pension & Claim Agent.

Bellevue Ave. and Second St.,  
HAMMONTON, : : : N. J.

All business placed in my hands will  
be promptly attended to.

The Festival given by the Base  
Ball Club of Nesco, Saturday afternoon  
and evening proved a success in a finan-  
cial point of view; they realized nearly  
sixty dollars. The Tuckerton and  
May's Landing Clubs had promised to  
be present and play the Nesco Club, but  
stayed away to save their reputation, as  
winners. Not to disappoint the large  
concourse of people who had assembled  
to witness the games, the second nine  
consented to play. As soon as play  
was commenced it became evident that  
the second nine had the advantage of  
the first in mouth and legs; both were  
used to perfection, so much so that the  
first nine became rattled and lost the

game. Following are the names:

First Nine.--William Wescoat, John  
Abbott, Jos. Albor, David Wescoat,  
Chas. Thibault, Robt. Gifford, Jesse  
Wescoat, Harry Craig, Wm. Piper.

Second Nine.--Thos. Craig, Charles  
Russell, C. Loveland, Edrain Thibault,  
John Ford, Jos. Abbott, Albert Wes-  
coat, Robert Ford, John Reed,  
Score 14 to 15. TOM COLLINS.

Mr. EDITOR:--I wish the people to  
understand why I left Mr. Barral's em-  
ploy. I worked for him as gardener and  
to make pure wine for home and church  
use; but he wanted me to do some  
work that I would not do, and I was  
discharged. We parted good friends,  
and he paid me all he agreed. I am  
boarding with Mrs. Berard on Central  
Avenue, and I am willing to work by  
the day for any one who wishes a gard-  
ener, or at other work.

CHAS. DATILLOIS,

Box 94. Hammonton, N. J.

Owing to a similarity of a sound,  
many persons suppose the Christian  
Alliance is one and the same with  
Christian Science. I take this way of  
informing the readers of the *Republican*  
that this is an entirely wrong idea.  
The Christian Alliance is composed of  
all denominations who hold certain  
Scriptural doctrines in common. Its  
object is the evangelization of the world.

M. S. HOFFMAN.

Wheat made another low record at  
New York, Wednesday. Predictions  
were made that it would go to 50 cents.

A. M. Bailey, a well-known citizen of  
Eugene, Oregon, says his wife has for  
years been troubled with chronic diarr-  
hoea and used many remedies with little  
relief until she tried Chamberlain's Colic  
Cholera and Diarrhoea Remedy, which  
has cured her sound and well. Give it a  
trial, and you will be surprised at the  
prompt relief it affords. 25 and 50-cent  
bottles for sale by druggists.

Friday of each week.

## HOUSEHOLD AFFAIRS.

### TO CLEAN BOTTLES.

To clean crown glass bottles and decanters, throw half a cup of coarse sand into them and shake until they are clean. For dusty jars, cut a raw potato into small cubes, and use in the same way. The process will be longer, but there is no danger of breaking or scratching. —New York World.

### PLANTS IN THE KITCHEN.

A few growing plants give an aesthetic touch to the appearance of the kitchen. I once read, written in a correspondent of the New York World, that the beautiful flower known as the Cyclamen had a sort of Cinderella beginning in the corner of an industrious housewife's kitchen. She used a perforated tin of the kitchen, and in it she placed a box of earth for propagating bed.

The heat from the fire and the moisture from the steam of the teapots and kettles produced such healthy and vigorous plants that florists with elaborately managed green-houses looked at them in amazement.

### HOW TO CLEAN CALVES' FEET.

Calves' foot jelly is often recommended as a diet for invalids, but I have never seen any method of cleaning the feet, writes Sharlot M. Hall. The following method is the result of experiments made in our family and we have found that calves' feet are more easily cleaned than pigs' feet.

Skim the feet carefully down to the hoofs and then put them in boiling water for ten or fifteen minutes. The hoofs will then slip off easily and leave the feet clean. Wash well and they are ready for use.

### THE KITCHEN LIBRARY.

A shelf for books will not be a kitchen. There are some much needed books for this part of the house as well as for the library. For instance, there are the cook books that the modern housekeeper needs in our family, since methods are changing all the time and there is a blank book you need yourself to jot down receipts or else to paste in those you may clip from magazines or among the books of the butler's and grocer's books that should be kept where they are easily found.

That housekeeper who keeps an account book and tries to guard the small leaks of the kitchen by keeping pains to note expenditures is fortunate, indeed; however, this sort of "help" cannot be reckoned upon in every household. —St. Louis Star-Sayings.

### DRINKING SKELETS AND TABLETOWELS.

It is a good plan, always considered, of course, whether time and strength will allow, to take linen sheets and tablecloths from the line when about half dry, shake them and smooth them out, fold them once over and hang them over the line without any stretching or pulling. A couple of pins at the little ends will keep them in place.

When a French husband calls his needed and allows the pieces to dry in a much better shape. Many laundresses seem to think that clothes may be hung on the line in any way, crumpled, wrinkled, folded or twisted, as the case may be, but this means just so much additional work when ironing day comes. Things that are done right the first time are done right.

Not long ago, in Germany, letters written by the Countess von Moltke to her betrothed were published, and these the great soldier frequently called the "my little kernel of coffee."

This strikes one as a very queer or pet name, and has suggested the following authority that, in view of the writer's character and profession, "my little kernel of coffee" or "my little lump of bread" would have been more appropriate.

Stewed Canned Mushrooms—Drain the mushrooms from the can, put in the steaming water with a large tablespoon of butter for five minutes, stirring all the time; now dredge them with flour, cover with a half pint of cream, stirring all the time till it boils.

Mutton-Broth—The water that mutton is boiled in makes a very good broth. After removing the mutton set the water to cool; when cold remove the fat that will rise in a cake to the top. Heat what remains, adding a good quantity of salt and a little pepper if desired.

A Dainty New Dessert—A loaf of angel food filled with chocolate rusks is a new dessert that is much liked. The loaf of cake must be baked in a deep round pan, and just before it is done to take out a layer from the top, take out the center of the under part without breaking the wall, and fill in with the chocolate rusks. Put the top on the cake, cover with a soft frosting and scatter over it powdered macaroons or candied violets.

Cucumber Sauce—To one pint draw butter sauce, made with three tablespoons butter, two tablespoons flour, four each-half teaspoon salt, one-half teaspoon pepper and one onion, hot water, and three tablespoons chopped cucumber pickles. Use first two tablespoons butter with the onion, adding the rest when the sauce is cooked, to avoid floating oil on the surface. Mix flour, salt and pepper together, and add all at once to the melted butter.

## General Disposition.

A traveler in India told a story of the destruction of a certain peculiarly bloodthirsty tiger which for a long time had prowled about a porch of a well-known hotel, attacking the drivers of the native cars, and carrying them off to be devoured in the neighboring jungle. Those who were employed to travel this road had employed various methods for insuring safety. One of these was to travel in numbers, several carts going through in succession. But none of these methods were effective.

At length the Superintendent of Police, Mr. D., who unfortunately had lost one arm by an accident, determined if possible to put an end to the creature's depredations. He obtained two covered carts, each drawn as usual by two bullocks. The leading cart was fitted in front and behind with strong bars of lashed bamboo, which formed an impenetrable cage. In this cage the driver was seated, while Mr. D. himself sat by his side, facing toward the rear, prepared to drive through the bars should the tiger, according to his custom, attack the driver of the rear cart.

This would have been an exciting moment for the other driver in question, but Mr. D. had carefully prepared a dummy, dressed exactly to resemble the usual native carrier, would follow closely in the rear of the leading cart, from which a splendid shot would be obtained should the tiger venture upon the attack.

All went well; the road was desolate, bordered by jungle upon one side, and wild grass-land upon the other. They had now reached the locality where the dreaded danger lay, and slowly the carts moved along the road in their usual apathetic manner.

Suddenly there was a roar; a large tiger leaped from the jungle, and with extraordinary quickness seized the dummy driver from his seat upon the rear cart, and dragged the unwilling victim toward the jungle.

Nothing could have been better planned, but there was one possibility which had not been taken into account. No sooner had the tiger roared and bounded upon the cart, than the bullocks, terrified by the dreadful sound, at once stampeded on the road, and went full gallop across the country, followed by Mr. D. and the tiger.

It was impossible to fire, and after a few seconds the tiger, having eaten the dummy, both carts, and the numerous small bullocks of the broken ground, where bullocks and vehicles lay in superlative confusion. The victor, having eaten the dummy, was left to enjoy a rather dry meal—a straw hat and a few small leaks of the kitchen which he had expected.

The tiger was subsequently killed by a native hunter, who watched from a tree over a tied bullock.

### Queer Pet Names.

The terms employed by the people of one nation as the choicest phrases in their vocabulary of endearment are often employed for quite the opposite purpose by other people. One of the most familiar and much-coveted phrases of endearment among the French, for instance, is "my little pig," and "my little puppy dog," is also much appreciated.

When a French husband calls his wife "my cat," she does not fly into a passion of resentment, as an English speaking wife might do in the same circumstances, but takes it as a gentle compliment.

On the other hand, if he were to call her a "duck," she would be very much offended. Not long ago, in Germany, letters written by the Countess von Moltke to her betrothed were published, and these the great soldier frequently called the "my little kernel of coffee."

This strikes one as a very queer or pet name, and has suggested the following authority that, in view of the writer's character and profession, "my little kernel of coffee" or "my little lump of bread" would have been more appropriate.

Stewed Canned Mushrooms—Drain the mushrooms from the can, put in the steaming water with a large tablespoon of butter for five minutes, stirring all the time; now dredge them with flour, cover with a half pint of cream, stirring all the time till it boils.

Mutton-Broth—The water that mutton is boiled in makes a very good broth. After removing the mutton set the water to cool; when cold remove the fat that will rise in a cake to the top. Heat what remains, adding a good quantity of salt and a little pepper if desired.

The loaf of cake must be baked in a deep round pan, and just before it is done to take out a layer from the top, take out the center of the under part without breaking the wall, and fill in with the chocolate rusks. Put the top on the cake, cover with a soft frosting and scatter over it powdered macaroons or candied violets.

Cucumber Sauce—To one pint draw butter sauce, made with three tablespoons butter, two tablespoons flour, four each-half teaspoon salt, one-half teaspoon pepper and one onion, hot water, and three tablespoons chopped cucumber pickles. Use first two tablespoons butter with the onion, adding the rest when the sauce is cooked, to avoid floating oil on the surface. Mix flour, salt and pepper together, and add all at once to the melted butter.

The twinkling of the eyelids, the bad weather, because it shows that the nerves are not in a normal condition, and the temperature, which probably indicates atmospheric disturbances.

## THE BLIND MADE TO SEE.

One of the most remarkable cases in recent medical science is that of Mrs. M. J. Mearns, of Chicago. Some time ago she fell, striking her face on a number of chairs strewn on the ground. The eyeballs were ruptured and the aqueous humor having escaped it was deemed certain that the young woman was doomed to a life of blindness. Dr. Pinkerton, who attended her, had hopes of restoring her vision and after the scars, which had been removed and the wounds had healed he determined to attempt the cure by the operation of transplantation. Six rabbits were selected and after careful treatment were made ready to be operated on.

Mrs. Mearns was restored to sight and the operation was a success. The eyes were ruptured and the aqueous humor having escaped it was deemed certain that the young woman was doomed to a life of blindness. Dr. Pinkerton, who attended her, had hopes of restoring her vision and after the scars, which had been removed and the wounds had healed he determined to attempt the cure by the operation of transplantation. The eyes were ruptured and the aqueous humor having escaped it was deemed certain that the young woman was doomed to a life of blindness. Dr. Pinkerton, who attended her, had hopes of restoring her vision and after the scars, which had been removed and the wounds had healed he determined to attempt the cure by the operation of transplantation. Six rabbits were selected and after careful treatment were made ready to be operated on.

Mrs. Mearns was restored to sight and the operation was a success. ## THE BLIND MADE TO SEE.

One of the most remarkable cases in recent medical science is that of Mrs. M. J. Mearns, of Chicago. Some time ago she fell, striking her face on a number of chairs strewn on the ground. The eyeballs were ruptured and the aqueous humor having escaped it was deemed certain that the young woman was doomed to a life of blindness. Dr. Pinkerton, who attended her, had hopes of restoring her vision and after the scars, which had been removed and the wounds had healed he determined to attempt the cure by the operation of transplantation. Six rabbits were selected and after careful treatment were made ready to be operated on.

# 5 DOLLARS TO PER DAY 20 Easily Made.

We want many men, women, boys, and girls to work for us a few hours daily, right in and around their own homes. The business is easy, pleasant, strictly honorable, and pays better than any other offered agents. You have a clear field and no competition. Experience and special ability unnecessary. No capital required. We equip you with everything that you need, treat you well, and help you to earn ten times ordinary wages. Women do as well as men, and boys and girls make good pay. Any one, anywhere, can do the work. All succeed who follow our plain and simple directions. Earnest work will surely bring you a great deal of money. Everything is now and in great demand. Write for our pamphlet circular, and receive full information. No harm done if you conclude not to go on with the business.

**GEORGE STINSON & Co.,**  
Box 488,  
PORTLAND, MAINE.

## Your BOY or GIRL should Learn Short-hand and Type-writing.

**A. J. KING,**  
**Resident Lawyer,**  
Master in Chancery, Notary Public, Real Estate and Insurance Agent.  
Insures in No. 1 companies, and at the lowest rates. Personal attention given to all business.

If the McKinley bill made it harder for foreign products to be brought into our markets certainly they can be landed on our shores easier and cheaper when a Democratic tariff bill takes a bar out by cutting down custom house duties. This case and cheaper rate mean fiercer, more destructive competition for our wage-earners; the more goods that foreign manufacturers can get into our markets the less labor there will be for our own manufacturers to give their operatives. The Democratic policy is to encourage foreign manufacturers who employ cheap labor to occupy our markets, while our better paid labor crowded out of their own markets, must hunt abroad for markets which are already supplied by underpaid labor. Can any American wage-payer or wage-earner see anything patriotic or hopeful in this policy?

Cold facts about the business of the country are better than the political fairy tales now being disseminated by Democrats. Dun's commercial reports say that, while there is an improvement of 10 per cent. over the midsummer dullness, the business of the country is still 25 per cent. below the average. That is the sort of "good times" the Democrats have brought us, for which they ask to be continued in power.

Three canneries at Millford, Del., are packing 80,000 cans of tomatoes per day, and three at Fredrick are packing 75,000 per day, while many smaller canneries all over the State and the peninsula are busy with tomatoes. Meanwhile a farmer in Kent County, Md., received recently, for 100 baskets of tomatoes shipped to Baltimore, \$4.43. The baskets alone cost him 4 cents each.

The New York *Tribune* states a fact and asks a question in this terse way: "The joy of British and German importers brightens the neighborhood of all custom houses, but is there a single American factory or workshop doing better or paying better wages than before the election of 1892? No other test is worth a straw." And this just tells what kind of a foreign tariff feast the Democratic party has dished up for American consumption.

The British Government has begun to export young women to Western Australia for wives for the settlers there. Those who wish to go are sent free of all expense.

It seems from the number of old Congressmen who have failed renomination that there is to be a change of men as well as of policy in the next Congress.

The White House has been given a fresh coat of paint, but the administration, which needs it much worse, still has its spots and blemishes uncovered.

Kentucky saved herself from a disgrace that would have been National. Mr. Breckenridge will not again represent the old Henry Clay district on the floor of the Federal Congress.

Senator David B. Hill was nominated by acclamation for Governor of New York by the Democrats at Saratoga despite his protest and amid a tumult. He declares the nomination an outrage.

John G. Mauger, Editor of the *Sunbeam*, Seligman, Mo., who named Grover Cleveland for the Presidency in Nov., 1882, while he was Mayor of Buffalo, N. Y., is enthusiastic in his praise of Chamberlain's Colic, Cholera and Diarrhoea Remedy. He says, "I have used it for the past five years and consider it the best preparation of the kind in the market. It is as staple as sugar and coffee this section. It is an article of merit, and should be used in every household. For sale by druggists.

Palmer's Shorthand College, Betz Building, Philadelphia, assists its graduates in securing remunerative employment. Many of the private secretaries and amanuenses of prominent business men in Philadelphia, obtained their knowledge at this Institution.
