PEMALES Dr. Marchielle Marchielle

Dandy Ferguson: The Hero of Chaparal Shaft.

Who is that man? He's a hero, sir, though sailly wor

hough his fann is se shrunk an bent I'd rather, stranger, be like him an' I'd glory in it Than wenr the finest clother if I had faced what h

We called him Dandy Ferguson when fust In earn

up here From Trisco, rigged from top to toe in a young blood's He wore a plug an' finshed a spark in his bil'd, while ehirt front, then,

An' the airs he put on did'nt suit us rough, hard work for men; So purty hearly all th' boys was down on him from Fur, you see, we did'nt know then that Bandy had a heart.

Quartz Mountain mon was nt used to see paradin' 'rossad With his nose cocked up as if the wile an' musty smell he'di found

While ev'ry day he scented besself with smell-wate An' so, as we could'nt about his ways we kinder let him be: Fur he was a delicate lookin' cuss, with hands so soft

kn' white,
We sorter thought 'iweuld be a shame to force him into a tight.

see that quarts mill over thar? Thet's th Chaparal mine, ye know, An' it's that that Bendy Fermeon made friends of ov'ry foe.

One night—he'd bis a month with ns—sombody on

thar yelled "Sre!" Th' h'istin' works was in a blaze, an' th' flames higher an' higher.

We rushed to the spot like med men, sir, but no on knew what to do,

An' th' night-shift down in th' lower drift were waiting death, we knew

An' th' fire was creepin'along th' caves, an' down like snow flakes fell Great sparks an' burnin' shingles, while we stood lik men in a spell.

We knew that th' engine's fire was banked an could'nt h'ist the cage an' than was'nt water within a mile to stop that fire's flerce rage : An, we knew that the timbers in the shaft, pitch-pine an' thoroughly dry,

oon take fire, while, scared an' dated, we watched th' flames shootsbigh. Just then through th' dows o' th' h'istin' works--an' he looked like an sayel than

Sprang Ferguson in his white, frilled shirt an' streamin yellow ha'r. -He did'nt wait fur nobody, then, but jamed a scanilir Over th' shaft, thet no two men could a lifted in the

towa; Then he yelled fur a rope na' th' old win'less that was lyin' just outside

An' quick's a flash thetrold win'is scantiin'-tied. went th' rope and Bundy's shout "I'm here, boys till I roast !"

Then alone he worked liteth amoke a very host .enough when I'drop" cried Ferguson, to one who offered aid!

An' while some wag mad with excitement, all for our contrails prayed. Ere long up came a half clothed

him out, most dead; down went th' rope 'again an' flames mared on o'erhead,

An' like black-snake whips the cords Dandy Fergureon's neck, Yet still like a giant he labored on in

crumblin' wreck. Th' roof o'er th' biler was smokin' n

An' we on th' outside standing beautiful without se-Though Ferguson stood like one at th' stake-th'

When sweet Magaio Hildreth into the fire with a

But her dress was burnin' ere her feet half over thet firy inchaped.

'Thet is th' ticket, my girl," he shouls. You'r a trume whoever you are, An' I won't forgot ye, live or die !" an' his head was

Just keep that blanket wet, you men. That's water in the sale !" Mug' charply cried, as out of th' fire she rushed an'

downward sank. I'll marry th"fust brave man that thows a bucket o' water on blus-

I'll marry him though he's a Chinaman!" an' her even grew moht an, dim.

Them's her blentical words, them is, an' th' mea did'nt Fur purty Mag' th' young bucks, sir, was allors crasy

But quicker than th' other galoots was her brother bem, you bet, An' after that we managed to keep that blessed blanket

Th' rote went down fur th' last time, new, furnillamen Brave Jus' who would'nt leave till hall seen th' leat

from that death trap go. Th' whirtin smoke hid Ferguson an' th' flames licked up th' wood,

Az' th' only place of safety thar, was whar th' win less

win'iges turn,

Just as th' pale of th' buildin' fell, with a awful granh Then a hundred men forgot all fear an' rushed to what

He fall, An dragged him out, though we thought him det

You sir, you kin het beare Francis in wiking In the Fur he lived, you see and Maggie gave to like her

Our Washington Latter.

W. Waningron. D. C., Oct. 7, 1378. The gross partisanship of the Demreration members of the last Mouse, so the last related to the seating of Parierson in Bellow's pil has been fittingly rebaked in the Columnic election tion. The record made by most of them taken ing the session was conclusive against any know of reaching them by the scriptural method of punishment, for the many legislative outrages rotes necessary to become laws, Institu heaping coals of fire on their heads, it was waste of amountilou to accomp. The meat by methods that have proved efficient dend, nothing that did not directly appeal to their tears of being left politically strauded and deserted for the exces es into-which they plunged during a session that is assertably notorism above all its predemiers, held out a single hope of a modification of the victors programme that it was apparent to all they had cemeanied to. But we man hope such a menace of their enforced retirement at the since of 46th Congress as comes from the State they deliberately disenfranchised, may exert an inflaence for good in the absslow about to convene, and impose a restraint on these with constitu ncies so hopelessly indifferent to the go opinion of the balance of the country as to have given them a se nomination. The Colorad lesson confirms that taught by Oregon a few days carlier, to the effect that no party allying itself with eppressive monopolies sun hogs to escape the influent they righly descree by concenting to such an unboly attumes.

Pantly, at least, the managers of the Union and Central Pacific R. R. have their greed to thank for the change a few months have wrought in public sentuaent in faves of the lines pro jected to compete with them for the sapidly growing trade between Atlantic and Pacifiques. ports. They seem to have Secome so blinded by their own grasping avarice as to have overresched themselves and played directly into the hands of those seeking to divide with them the profits of this traffic. With the depressed condition of business and the margin for profit on what was being done se parrow that next to nothing was left after paying the freight miss at that time exected by Mustington and his asgoviates, and advance was ordered that forced hasiness men everywhere to the conclusion that they must abandon all business requiring for its transaction the aid of either of the two companies controlling the only soute scross the contiment, or the oppressive monopoly must be breken down by the consequetion of competing haddhafate set their faces like fints against the proposition for Government to guarantee the payment of the 5 per cent, interest on the construction bonds of the Texas Pacific road, to a Lound their opposition; and the benefits which they seem confident as certain to allure from the opening up of the rich country along the proposed road and the branches whose construe tion would inevitably follow that of the trunk An' slingin' it oventh' blisterin' back of Dandy, turned | line, seems to have converted into warment advocates many of those as sturdily opposed to the enterprise at the lest session. With the in. gratisade of Hantington and his fellows still frosh before the public and with the efforts they have made to evade their obligations still fresh in minu, any company seeking Government aid or countenance, will certainly be required to guarantee its exemption from possible loss and from any of the troubles and anneyaness it has experienced at the hands of those who have grown encomously rich on its bounty, and insolent instead of grateful for its indulgence. But opposition to the countenance saked by the Toxas Pacific has been a said chiefly by the bad faith exhibited by Huntington and Co., rather than from any danger of loss in the limited endorsement requested; and it new looks as if this might be forgotten in the desire to punish their inordinate greed and to relieve the sommeres and business interests of a whole contisent, laying at their mercy, and within their nower to paralyse, till a second road to the Pasific shall have been built and equipped." Very few save the bitterest personal enemies

and most unscrupulous partisans will sympathise with the animus just how exhibited towards Ex Governor Shophord of this Metrict, by a few newspapers published here and elecwhere, lest be should be awarded the credit be has serned in the leading part he has taken with a few other Washingtonians in lending down to her guards the steamer "Chambers" with personaries and delication for the favor aufforors, and dispatching her on her grrand af

mercy down the Ministerppi from St. Louis Every old soundal ever heard of in his consec-tion with the Board of Public Works stands a chance of being dug up by these ghouls. . there are few men better fitted by exec espacity to organize the manus of relief needed in this is rived emergency than Mr. Shopherd; and he has the comfidence of this whole com pity, with lew exceptions, in his praiseworthy efforts to rob the postilence of some of its ter

The other fall happenings are too

New York city's celebrated seaside I resort, Coney island, is graphically described by Charles Carroll in 165 or 18 Magazine, as follows: Before us lies the broad Atlantic, tumbling in all its applendor of bransparent green braskers, it ipped with foam and damied with revery size, and variety of sail. To the right, low on the horizon, lie the purple banks of Neversink hills, the atmosphere streaked and darkened with the waving I cloud cannons of many steamers runs. n the fall a gilent sadness to In the fall above the valley movy cloudlets.
In the fall the Broadway windows are profuse-with Paris styles—
Much to the joy of the ladies, be is. cloud remone of many steamers runs this through the Narrows. Straight in front nothing stands between us and Europe. Up and down the shore the eye ranges over an unbroken stretch of five or six miles of beach, which, thus

foreshortened, seems one continuous village of cheerful hostelires. These, one and all, from the gigantic caravands which can shelter a thousand resets down to the shed which would be crowded with a dozen, are built and conducted by the shed was a series of the shed with a dozen, are built and conducted by the shed was a series of the shed with a dozen, are built and conducted by the shed was a series of the shed was In the fall a man will feedly ides his presty count Kate— Or Mary Anne, as the case may be. And her need sources are intended to power.

Her form is enveloped in many colored marvels of millinery;
And her petticoat is embroidered with a hundred butterflies fluttering among flowers.

Her feet are atoms of celestial origin, And her kedshai is the pink cloud which protects them.

with a dozen, are built and conducted by their proprietors with just three definite, humanitarian objects—to ablute the exterior of their fellow-man, to mourish his interior, and to cheer his nervous system with amusements light and varied. Behind us lies Cable's a long two storied building with immensa. gardens sers, In the fall we are all positive that winter's nourish his interior, and to obser his nervous system with amusements light and varied. Behind us lies Cables a long two-storied building, with immense airy dining-rooms and versadas, and a few lodging-rooms above. Westward is an immense clamboarded hard, the "At-To many her heart is hard and cold;
To them it is very beautiful porcelain.
To me it is soft and warm;
To me it is freah-out velvet.
Her lips are sealed, and words proceed not therefrom.

The company sichs of aromatic fractions are company and acquiring and thirstly humanity, and for hungry and thirstly humanity. Oshikoji Nobutaro was a young noble who found himself quite disillusioned, no that the gayeties of society, the variety of travel nor the schievement of himself and he retired a prey to unutters.

All that she had heard of the him, and he retired a prey to unutters and she was a bundantly verified weariness, to the ancestral abode on the beautiful shores of Lake Biwa, hoping to find at least tranquility.

E Kurth M. D., Chairman of last Convention

Mr. Wharton's Lecture.

On account of the rain, on Monday evening there was not a large number of persons in attendance. The meeting was alled to order by Merrill Parkliurst, Secretary of the caneus called two weeks ago, and adjourned, and met on Monday wening at the call of the Chairman P. H. Brown. He being absent, Dr. H. E Bowles was made temporary Chairman. Mr. Wharton addressed those present previous to electing delegates to the Conmention to be held at Egg. Harbor City ment Tuesday. He first spoke of the terzible ordes! through which the country as passed, and the effects had been serion the business men of the country the merchant, the mechanic and laborer This set them to thinking, and turned their thoughts toward things financial, and new when near the end of money roubles, shall we reverse our floancial status? To restore confidence in business is what occupies the minds of business men, and is what is wanted. To this end two Beories are offered for the conduct of the pusiness of the country. One is an irredismable currency, based on the flat of law. The other is a currency not actual money, but a representative of money, Gold and Silver, these being the only money of the world. Here he quoted from Campbell and Butler to show ho valueless the fiat currency would be, which would be of no value, because it would spresent no value. Butler says he would This cannot give value ton piece of paper. Gold and silver being the result of human labor, these have value, as human labor is the basic stratum of value on this planet. These metals are property. On these our present greenback is, based, because per is redeemable. The two greenbacks are no more alike than paper and gold .--Remove the promise to pay from our present greenbacks and they would possess no value. First currency is no new thing. But law never made money. The Cont

not worth one dollar, even when backed

G. W. Pressey, Greenbacker, asked a howed to speak. He said the reason the continental money became so valueless was, the Government had no power or property to give them value. He referred also to the \$60,000,000 of paper issued by the Government during the war that mover depreciated. To which Mr. Wharton replied, and showed in the first how ions gual ideas were, and that is some States of New England the severest penalties were pronounced on those who mould not take the Continental currency. and that the Government had the same power then that it possesses now.

At the close of the speaking, the cauems proceeded to elect delegates to the Convention. The following are the fortunate ones: E. D. Redman, W. D. Whartem, Dr. E. North, E. R. Sproul, M. L. Jackson, L. H. Parkhurst, H. D. Smith S. G. Rogers and J. C. Anderson. There heing no further business the caucus ac-

A written examination in the last three digetting above a certain standard will have their names in the Westers Continues and not a Dr will tell you of its wonderful curse published in the county papers, while all those, who pass the required examination is all the studies of the highest grade, will receive a county certificate, to be

required examination in that will receive a higher studying other branches not mentioned in it, but the will be examined only in these. The examination will be held the same days in all the schools.

Having purchased a large lot of sol d Silver Hunting American Watches, we will, for a hort time, sell for nine (9) Dollars. C. M. ENGLEHART & SON. 254, No. Second Street

Smith's Landing items.

For the South JERSEY REPUBLICAN. Mr. Editor:

In renly to the 3rd edition from Farmer. will say I never strike a turtle when he has drawn his head into his shell. Therefore have but very little to say until he again comes out Attend H Grand Opening, with his tomahaws and scalping knife for the warfare. When he dees that, as he threatens to when his assistants arrive to aid him, then ! will defend the case to the best of my ability. I was surprised to learn that the Farmer claims to be on the defensive, when the public well knows that he was the offensive party, and am willing to leave it to the public to judge who is the biggest ignoramus, but still it is a mystery to me where he could have got such an educa tion, and does not know the difference between the offensive and the defensive.

Were imminent everywhere, and war was raging on the continent. Everybody was discouraged. Some of the little cantons of Switzerland, which would receive the most benefit from the completion of false teeth, the French excel in the manufacture.

If Americans excel in the manufacture of false teeth, the French excel them in false eyes, writes a Paxis correspondent.

Were imminent everywhere, and war was and some 20,000 feet of gneiss rich in mica. This is followed again by 5,000 feet of schistous gneiss with threads and lumps of quarts, and nearly 10,000 feet of sea with them plays its part of seaven-ger of the ocean. Many sailors are still with some 2,000 feet more of mica schist, ending on the labor of incubation and some 20,000 feet of gneiss rich in feet of schistous gneiss with threads and lumps of quarts, and nearly 10,000 feet of schistous gneiss with them plays its part of scaven-ger of the ocean. Many sailors are still with some 2,000 feet more of mica schist, ending on the Italian side of rearing the young, which, when fully fleeded, puts off to sea with them plays its part of scaven-ger of the ocean. Many sailors are still with some 2,000 feet more of mica schists, and nearly 10,000 feet of schistous gneiss rich in mica. This is followed again by 5,000 feet of schistous gneiss rich in mica. This is followed again by 5,000 feet of schistous gneiss rich in mica. This is followed again by 5,000 feet of schistous gneiss with threads and lumps of quarts, and nearly 10,000 feet of schistous gneiss with them plays its part of scaven-ger of the ocean. Many sailors are still with some 2,000 feet more of mica schist, and nearly 10,000 feet of schistous gneiss rich in the feet of schistous gneiss rich in the scale of the ocean. Many sailors are still with some 2,000 feet more of mica schist, and nearly 10,000 feet of schistous gneiss rich in the scale of the ocean. Many sailors are still with some 2,000 feet of schistous gneiss rich in the scale of the ocean. Many sailors are still with some 2,000 feet

the money he had advanced, and what ever sum he desired as recompense for his good action. A great many honest merchants sent on their 500 francs, and in due course received advices from the Madrid office of the Messajerias entra Espana y Francia that a trunk had been deposited there, which would be forwarded on payment of express charges. The honest merchant sent on the money, and that was the last of it. Sometimes, instead of being a French officer, it was an aide-de-camp of Queen Isabella, arrested for plotting for the restoration of King Amadeus, who knew where the queen's jewels were; sometimes it was one of Don Carlos' aids, sometimes a Turkish paina. At last, however, the swindlers were run to earth, and now the Parisian authorities have advertised

the telegraph which conveys the coal from the screen into the big shute. While playing in this manner the men

drawing coal from the shute into the cars. The boys, unmindful of their danger, slid down the telegraph into the Riggs—State and Pennsylvania.

the alarm. It was soon decided that the best way to rescue them was to continue emptying the shute until the boys would appear at the gate below, through which the coal was rushing into the cars. Pretty soon young Rice appeared, but was found to be lifeless. His two companions came out through the gate almost at the same time, and, strange as it may seem, both were alive. They

panions came one always almost at the same time, and, strange as it may seem, both were alive. They were unconscious, however, and were resuscitated by the application of water. The affair caused intense excitement in the village, and while the coal was being drawn hundreds of people flocked around the breaker, some crying and screaming the breaker.

Half a dozen onions planted in the oellar, where they can get a little light, will do much toward absorbing and correcting the atmospheric impurities that are so apt to lurk in such places.—Dr.

Flott's Health Monthly.

Is generated by the action of the sun's rays upon damp, decaying vegetation, stagmant pools and marshy, low-lying tracts. The true stanter of this miasma is by no means clearly understood, but there are two facts in relation to it that are. The first is, that the periodical favers which it breeds are of the most virulent type; the second is, that these maindies are rarely cured, although they may be ameliovated, by the ordinary remedies employed to overcome them. The true antidote to the effects of miasma is Hostetter's Stomach Bitters. This medicine is one of the most popular remedies of an age of successful proprietary specifics, and is in immense domaind wherever on this continent fever and ague exists. A wineglassful three times a day is the best possible preparative for encountering a malarious atmosphere, regulating the liver, and invigorating the stomach. RACE

For upwards of thirty years Mrs. WINSLOW'S SOOTHING SYRUP has been used for children with never-failing success. It corrects acidity of the stomach, relieves wind colle, regulates the bowels, cures dysentery and diarrhoss, whether arising from t athing or other causes. An old and well-tried remedy. 25 ets. a bottle. A Vegetable Preparation, invented in the 17th century by Dr. William Grace, Surgeon in King James' army. Through its agency be cured thous ands of the most serious sores and wounds that hatiled the skill of the most serious acress.

ers amused themselves by riding down

Fire Insurance Company. BRIDGETON, N. J.

Conducted on strictly mutual principles, of-fering a perfectly safe insurance for just what it may cost to pay losses and expenses. The proportion of loss to the amount mained being very small, and expenses much less than usue very small, and expenses much less than usue ally had, nothing can be offered more favorable to the insured. The cost being about ten cents on the hundred dollars per year to the insurers on ordinary risks, and from fifteen to seemy-fice cents per year on hazardous properties, which is less than one third of thelowest rates charged by stock companies, on such risks—the other two-thirds taken by stock companies being a profit acruing to stockholders, or consumed in expenses of the companies.

The guarantee fund of premium noter being now Three Millions of Dollars.

If an assessment had to be made of five pe-cent. only, twice within the ten years for which the policy is issued, it would yet be chesper to the members than any other insurance offered. And that large amount of money is saved to the members and kept at home. No assess ment having ever been made, being now more than thirty years, that saving would amount to more than

One Million Five Hundred Thousand Dollar The Losses by Lightning.

Where the property is not set on fire, being less than one cent per year to each member, are paid without extra charge, and extended so as to cover all policies that are usued and out-
