HIS is a receipt printed by a National Cash Register

It tells you how much you paid, to whom you paid it, and safeguards you in case of error. When you have the receipt you can prove that you paid for your goods.

This prevents unpleasant controversies between you and the merchant or his employes.

The merchant has a duplicate of every receipt with which the cash in the register tallies at the end of each day.

He knows exactly how much money he has received every 24 hours—he can check his leaks and thus reduce his business losses.

He is sure that he has made his profit on every sale. He gives better value than an unsystematic merchant.
