Some idea of the amount of traveling done by Americans as a people, and the comfort and luxury at their command, is gathered from the Pennsylvania Rail road Company's announcement of its personally-conducted tours for 1893.

First comes a series to the Golden Gate, starting from New York, Philadelphia, and Harrisburg, February 8th, March 2d, and March 29th, 1893. Pourists will travel by superbly-appointed special trains of Pullman drawingroom sleeping, dining, smoking, and observation cars, under the supervision of a Tourist Agent and Chaperon.

Next in importance comes a series of five to Florida-January 31st, February 14th and 28th, March 14th and 28th. The first four admit of two whole weeks in the sunny south, while tickets for the fifth tour are good to return by regular trains watil May 30th, 1893.

In Delaware the Prohibition vote of 506, if cast with the Republicans, would have defeated the Democratic electoral ticket. In Wyoming the balance of power also rests with them, on the tace of the returns. Had the Prohibitionists of New York joined with the Republicans against the dominion of the rum power the result might have been different, for over 30,000 votes were cast there for Bidwell. Thus the Prohibitionists continue defeating the Bepublican party nd placing in power the allies of the debauching rum traffic. Is there either | Hammonton, N. J. logic or reason in such a course?

An Ottawa dispatch informs us that the Dominion press is urging the Ministry to meet the expected Democratic reduction of our taniff by a corresponding reduction. The Canadians are, of course, overjoyed at the result of our election. It means for them a new and larger market for their potatoes, barley, hay, wool, eggs and horses. The farmers will soon find out what "tarif reform" means to them.

PAINT! PAINT!

HAMMONTON.

When you buy the Hammonton Paint, you do not buy seveneighths of a gallon for a gallon, or three pints for a half gallon; nor do you get one of those packages that weigh 12 to 14 counds, and containing so much alkali that it appears to be so thick that it is impossible to use it without thinning; but in buying the Hammonton you.get a full standard gallon of paint, weighing 14 to 16 pounds to the gallon, made from the best materials known to the trade. and costs the consumer from \$1 to \$1.50 per gallon for honest paint.

If the purchaser doesn't want honest paint, and wants to be honest to himself, then be sure to buy the Hammonton Paint, and the manufacturer will give a receipt with every gallon sold telling you how to make two gallons of paint out of one or the Hammonton. It will cost 33 cents for the extra gallon.

One Dollar.

And then here comes Commercial Parint, in 30 abades, -the best wearing paint ever put on the market for so low a price as \$1 per gallou, and guaranteed to be a first-class wearing paint. If any one should not want to pay so high a price for a good exterior paint, then work the 33 cent racket, and get two gallons for \$1.33. Manufactured at
