of Nervous Debility, Incompetency, Premature Decay and Youthful Error, actuated by a desire to benefit others, will be happy to furnish to all who need it, (free of charge) the recipe and directions for making the simple remedy used in this case. Those wishing to profit by his experience—and possess a Valuable Remedy—will receive the same, by return mail (carefully sealed) by addressing

JOHN E. OGDEN,

No. 60 Nassau Street, New York.

## ABSECON CEMETERY.

The attention of the public is called to the new Cemetery, located at Absecon. An excellent map, showing the walks and lots, may be seen at the store of SAMUEL L. RYAN, Esq., and will give at one view, a good idea of the whole plan. The first attempt to get the land, in grass has failed, but we expect better success for the next season.

Sufficient lots have been sold to cancel the mortgage, so that purchasers will now obtain unexceptionable deeds. The money next received will be expended in further improvements. With proper attention on the part of lot-owners, we predict that this land will become a beautiful resting-place. These lots are worthy the attention of families in Atlantic City, where already several have been taken. Further information may be obtained upon application at Mr. Ryan's store.

## J. B. SOMERS, M.D.

Has changed his residence and office to Capt. Richard Garwood's, better known as the House of the Franks Homestead.

## PROSPECTUS

OF THE

## SOUTH JERSEY

## REPUBLICAN,

A FAMILY NEWSPAPER, PUBLISHED WEEKLY AT

## Absecon, Atlantic County,

## NEW JERSEY.

Devoted to Politics, Education, Morality and Literature.

## AS A POLITICAL PAPER,

We shall advocate those principles which we believe lie at the foundation of all good government. We do not believe that manhood consists in the color of the skin, the shape of the cranium, or the texture of the hair; but that the mind is the man, the world over, and that a mind of the lowest order has as much right to life, liberty and happiness, as one of the highest—and that every man, of whatever nation, class or color, has the right to cultivate his talents to the full extent of their powers, and that no one has the right to decide for another what that extent is. We will advocate the rights of a negro as quickly, fearlessly and boldly as the rights of a king. We stand for mankind and for the rights which God has given all men, and which men or governments take away at their peril. We stand for the Constitution as our fathers intended it, not for the slaveholder's self-interested garbled interpretation of that noble old instrument.

We believe the war to be the cause of the nation, and that upon its issue depends our liberties, depends all that is desirable in our Government. We shall therefore fearlessly defend and uphold the Administration in its efforts to subdue and crush the rebellion from every part of our land, and to restore the supremacy of law wherever it has been denied. We are with the Government heart and hand so long as they seek the integrity and perpetuity of the Union.

## AS AN EDUCATIONAL JOURNAL,

We shall seek to promote the true interests of education in every possible way, because we believe it conducive to the highest interests of mankind, and that free governments cannot long exist in peace and prosperity without it. We also believe it to be the duty of the State to educate her citizens, and that until free schools are within the reach of all, the duty is not fully done. When it is seen that treason and rebellion thrive only in those portions of our land where free education has been wholly or nearly neglected, the importance of it must be seen and acknowledged.

## AS A MORAL PAPER,

Though not what is known as a religious journal, we shall ever be found on the side of morality, integrity and virtue. Nothing sectarian can ever be admitted in our columns, but we are willing to do all in our power to advance the temporal and spiritual interests of all evangelical churches, Sabbath schools, and other institutions of the Gospel.

## TO FARMERS.

There will always be one or more columns of our paper devoted to the interests of Agriculture, containing original or selected matter that will not only be interesting but instructive to farmers. Our columns are always open to communications from those engaged in any of the branches of husbandry, and we hope that successful cultivators will make our pages a medium of communication with the public.

## ON OUR FIRST PAGE

Will generally be found selected family and political readings.

## AS AN ADVERTISING MEDIUM.

Our paper will be second to none in the county.

Although a new enterprise, a circulation in all parts of the county has been secured, and to some extent in the various parts of South Jersey. No pains will be spared to give it a wide circulation.

## OUR TERMS.

Are such as to bring it within the reach of all.

One copy, one year, \$1.50.

One copy, one year, to Clergymen, 1.00.

## PAYMENT ALWAYS IN ADVANCE.

## ADVERTISING RATES.

One square of one insertion, \$0.50.

Each subsequent insertion, 25.

One square, three months, 1.00.

One square, one year, 10.00.

D. B. SNOW, Editor.

## THE TRIBUNE PRIZE STRAWBERRIES.

How they originated—How they

Look and Taste—Why they

Are Given to the Subscribers of the

Tribune—When and to Whom

they will be Distributed.

The cuts in our show-bills represent the Tribune prize strawberries, which we have secured because we purchased them at a very large price, to bestow exclusively upon the subscribers of either edition of the Tribune for 1863, intending to send one of each kind to every subscriber who expresses a wish to that effect at the time of subscribing. This will be equal to a prize of \$1.50 to each subscriber, as that is the price charged by nurserymen for similar plants. Indeed, neither of these New subscribers who desire strawberries at any price, can be produced in the year 1863, exclusively at prices to our subscribers. We have incurred the large outlay necessary for this purpose, because we have an earnest desire to see the propagation of improved fruit greatly extended, and because we believe that every one who receives these plants and grows them will hold the Tribune in kindly remembrance for enabling him to enjoy such a good gift of a kind Providence, and will therefore feel an increased desire to improve all the list of fruits. It is thus that health and happiness will be increased.

As these plants have all to be grown from the few plants that we bought of Mr. Fuller in the Autumn of 1862, we will not be able to send them to subscribers on or after the 1st of September, 1863, when they will be carefully packed in oil-silk or paper, and forwarded, through the mail, at our expense, or by express at expense of the receiver. The three plants will be sent to each person who sends us a year's subscription for either the Daily, Semi-Weekly, or Weekly Tribune, indicating at the time of subscribing that they desire the strawberries, and the distribution will be made in the order the subscribers' names and requests for strawberries are received.

Single subscribers will receive their plants by mail, done up in oil-silk, or other suitable oil-silk substance.

To Clubs, plants will be sent in packages, to correspond with the number of names in the Club; and where the number will warrant it, they will be sent by express, packed in boxes.

New subscribers who desire strawberry plants should say so at the time they send their money, as we do not intend to send any to those who will not appreciate them. They are too valuable to be wasted. There are parties who would gladly contract for the exclusive right to all these plants, at 25 cents apiece, and there are many subscribers who would not, as soon as they see and taste the fruit, part with their price for a "green-back."

## HOW THESE NEW STRAWBERRIES WERE PRODUCED.

The following statement is made by Andrew S. Fuller, horticulturist, Brooklyn, the originator of these strawberries. He says:

I commenced sowing seeds of the strawberry for the purpose of producing new and improved varieties. I have always selected seeds from the largest and best that could be obtained, and the results were that I produced some few good varieties each season, yet they were not such as I was willing to send out as seedlings. Every year I selected the seed with more care than I did the previous one, and found that I made constant improvement. I therefore determined that I would put forth extra exertions and see if a few extra choice varieties could not be produced. In 1859 I obtained the best variety known; and by fertilizing the flowers with another, I expected to produce strawberries combining with the excellence of that heretofore known. In this I was disappointed. I produced that year many thousands of seedling plants, and the fruit of many was really excellent, so much so that I was urged not to throw the plants away; but as excellence, and not variety, was my object, I destroyed all but the most promising. I determined from the first that no plant should get out as a seedling unless it combined great excellence with any other strawberry known. From the selections of that year a competent committee from the Farmers' Club of the American Institute, who had the matter three years in charge, made a selection of three sets, ripening early, medium and late, and they preserved as the final result of my seven years' laborious experiments to produce a new and improved strawberry from seeds. These I intended to dispose of in the ordinary way of a nurseryman's business, and should have done so but for the desire of THE TRIBUNE Association to make a gratuitous distribution of these truly excellent strawberries to their subscribers. I have therefore contracted to furnish them exclusively for that purpose. No one but them can be the purchasers at any price. If I had kept them for sale to individuals the price would have been 50 cents each, or \$5 a dozen.

## NAMES AND DESCRIPTIONS OF THE PRIZE STRAWBERRIES.

"The earliest ripening one was named Col. Ellsworth, in honor of the martyr who lost his life when Alexandria, Va., was first occupied by the Union army during the present war. It is a very large variety, of a crimson color, conical in shape, and having slight depressions, running from calyx to point, resembling the sutures on the peach, with a long neck, and the calyx part is a deep red color, quality good; flesh firm. Although the largest of the three, it is also the earliest, ripening at the same time as the Jolly Lind and Early Scarlet, and is very productive. The original plant, eighteen months from the time the seeds were sown, produced over 200 perfect berries, averaging from 1 inch to 1 1/2 inches in diameter.

"The next ripening is called the Monitor. It is very large, of a dark bright scarlet color, approaching a crimson in the sun. Berry very solid and firm, of the quality, plants very vigorous and productive. This sort will become a great market fruit, the color and shape being very attractive.

"The third, from its color and origin, is called the Broomstick Scarlet. Although this variety is inferior in size to the other two, yet it possesses merits that will always make it a great favorite. Its shape is a regular oblong cone, color the best beautiful bright scarlet. Flavor, they say, is the best of the berry, strawberry-flavor, the judges at No. 41 Park Row, New York, on this point, as they awarded it the first premium over all its

## PROSPECTUS

OF THE

## SCIENTIFIC AMERICAN.

THE BEST MECHANICAL

PAPER IN THE WORLD.

Nineteenth Year.

## VOLUME IX—NEW SERIES.

The publishers of the Scientific American beg to announce that on the fourth day of July, 1863, a new volume commenced, and it will continue to be the aim of the publishers to render the contents of each successive number more attractive and useful than any of its predecessors.

The Scientific American is devoted to the interests of the Mechanical Arts, the Mechanical Arts, Manufactures, Inventions, Agriculture, Commerce, and the Industrial Pursuits generally, and is valuable and instructive not only to the Workshop and Manufacture, but also in the Household, the Library, and the Reading Room.

The Scientific American has the reputation, at home and abroad, of being the best weekly publication containing mechanical and industrial particulars now published, and the proprietors are determined to keep up the reputation they have earned during the sixteen years they have been connected with its publication.

The Scientific American will be found a most useful journal to them. All the new discoveries in the science of chemistry, its columns, and the interests of the architect and carpenter are not overlooked; all the new inventions and discoveries pertaining to those pursuits being published from week to week. Useful and practical information pertaining to the interests of millwrights will be found published in the Scientific American, which information they cannot possibly obtain from any other source; subjects in which planters and farmers are interested will be found discussed in the Scientific American; most of the improvements in agricultural implements being illustrated in its columns.

To the Inventor: The Scientific American is indispensable to every inventor, as it not only contains illustrated descriptions of nearly all the best inventions, but they come out, each number contains an Official List of all the Claims of all the Patents issued from the United States Patent Office during the week previous, thus giving a correct history of the progress of inventions in this country. We are also receiving, every week, the best scientific journals of Great Britain, France, and Germany. We shall continue to transfer to our columns, copy extracts from these journals of whatever we may deem of interest to our readers.

To the Mechanic and Manufacturer: No person engaged in any of the mechanical pursuits should think of doing without the Scientific American. It costs but six cents per week; every number contains from six to ten engravings of new machines and inventions, which cannot be found in any other publication. It is an established rule of the publishers to insert none but original engravings, and those of the first class in the art, drawn and engraved by experienced artists, under their own supervision expressly for this paper.

TERMS: To Mail Subscribers, Three Dollars a Year, or One Dollar for four months. One Dollar and Fifty Cents pays for one complete volume of 416 pages, two volumes comprise one year. A new volume commenced on the fourth day of July, 1863.

## CLUB RATES.

Five Copies, for Six Months, \$6.00.

Ten Copies, for Six Months, 10.00.

Twenty Copies, for Six Months, 23.00.

Fifty Copies, for Six Months, 34.00.

Twenty Copies, for Twelve Months, 40.00.

For all clubs of twenty and over, the yearly subscription is only \$2.00. Names can be sent in at different times and from different Post Offices. Specimen copies will be sent gratis to any part of the country.

Western and Canadian money, or Post Office stamps, taken in full payment. Canadian subscribers will please to remit 35 cents extra on each year's subscription to pre-pay postage.
