Our Washington Letter.

WARRINGTON, 10 . Dec. 2, 1878. Upon no people under the sun, perhaps, is the rapidity with which the earth makes her circuit about the coutre of the solar universe, more deepty improved then upon the Washing tonian and the crowns that regularly come and go with Congress It is a but yesterday that the members of the tiret acari n of the 45th Concrete convenid, of envised, struggled and during the da and dissipated of them) the nights tilt the heat of summer dress team-testing in With them west the heagerson, male and female, who make the joint occupation of Washing on during the Congress. foret season more or less crufttable or se pleas antas to ineare their annual toturn with the (for the time being) honorable members, ' Today the record session meets with a few short weeks in which to do their work. With very many of the Representatives to likely their last session as such, and the term of service of an unusually large number of Senature expires with the ringing down of the curtain on the Erd of March. Senator Hambin, of Maine, is of the number. It is understood that he nesttively declines a re-nomination, but will fellow the best of his inclination to live a private citisen the balance of bis life. He is the senior mem ber of both Houses as regards length of Congressiums services; and of al. the men of the pan who have grown famous during their Congressional careers and have died with the Lar hear or have retired on but well earned laurelene one le't a mure exemplary character for the imitation and guidance of their successon than denatur Hemito will have dens should he constant yet a few more weeks in the straigntforward course that has characterized his public life of more your thirty years duration. He has less the impress of his Status. maninon and his incorrectible honesty on many of our most obverets disposituations. There was nove a measure neroduced into the Senate, looking to the perfect a of Republican Goveerunical on the mission main of the interest of the interest of the great make it is regarded as a proof the great make it is fell as most that his aid of union between Raghard, France, and Tuthey; and secondly, because his except and experiment in the case of the most have been received by any periods in France and Raghard, cannot were a second in their tall to prove beneficial to Syria. keen coupled. Bis beauty is as undoubted here among these who have had opportunities to som his life as when he first entered the Sonate quite a third of a contary age. In order Sonate quite a third or a country may be to fully appropriate the kind of futtigitly requisite to preserve any one species. In this meetitrees of corruption, where men are alleged to be bought and sold like sheep in the shambles, it must be renombered that the vest of one coupquently worth a fortane-could probably comsand M. Yet Mr. Hamlin will go out of secvice a comparatively poor man, though his life here and at home has always been of and radically Republican in its simplicity. All in all, no man ever in the Senate has wern hettor than the voteran from Maine; and very few have succeeded in retaining such a full me of the respect of all parties. May he yethere many years vouchenfed him, to the almost tail versal wish that will follow him into his retirney.

The fight between Army effects and the Indian Bureau is likely to be taken up wery early in the session. Mr. Behurn has of the espenses the side of the Bureau, and Gen. Sheeman that of the Army. Congress can hardly be arrayed on a strict party line in this matter, as the abuse of both contestants by the average Democratic member has only been limited by. his commend of language.

Another matter—the gut est of the Texas Pacific Railroad bonds-will be pressed to an early hearing. Prophector lack a good deal of being facts, semetimes, and I ferbear. But it is evident to these lecking on that the reaction in the public minds prevoked by the appressive course of the Control Pacific read towards these forced to patronice it, has been favorable to the T. & P. enterprine and this has been rendered much more decided by the refusal of Munting:on's road to semply with the laws, and by its defiance of Government authority.

From the tenor of all that has been heard from returning members of Congress we seem justified in believing that the more influential of both parties have some back from their respective constituancies imback with the imper tunes of making politics secondary this winter to needed legislation; and we may reasonably hope that after the passage of the present the bills, action that will also restoration of public configuration of public configuration. in empianction with the resumption of specie psymouts. Eularged and more intimate com mercial relations with Mexico, flentral and South America will be regarded favorably in Congress. The mission of Compoure that feldt under Government patronage, snows that everything looking to a rectoration of old time prosperity will have the hearty co operation of the Auministration.

An Extract from our European Letter. LONDON, KHGLAND, Ngw. 21, 1878.

The enermous armaments of Continental States, magnificent as they are to the night of the people whose ideas of glory they fester, and upon whom they estall heavy burdens which they are encouraged to bear, are a standing reprouch to civilisation. They are organized not for defence but deflance, not for protection but aggression, for congrest, anrexation, and spoil. England is being feroed into a war with the Ameer of Afghanistan through the reckless ambirica and intrigues of the Caar, or of the military authority behind the threse which reems to be more potential than that of the and luris with the flashing of blood-stained "HWATCH, IS IN E CONSISTOR WHICH ONLY SEED PROVI ere could approve, and rational and humans men, to whatever nation they bolong, must de plore.
