Coming Down the Crowded Street.

Coming down the crowded street,
You find forms I daily meet;
Forms of grace with stalwart limbs,
Clothed in garments neat and trim;
But, alas! the eye is dim,
Or a wild uncertain glare,
And a gathering moisture there
Tells of tears nightly shed--
Tells of honor, virtue fled.

Coming down the crowded street,
Battered hat and shaggy coat,
Grown old and begrimed with care,
Half-concealing colors more
Than the famed coat of Joseph wore;
Bleary-eyed visage, blasted name,
Lost to honor and to fame--
Such the picture oft I meet
Coming down the crowded street.

Woe without, but ah! within,
What a fearful load of sin,
Crushed as with a leaden weight,
Irresistible as fate--
For this fall from man's estate,
Black remorse and bitter woe,
Torments that must fiercer
Lash the fallen, trembling soul
Onward to its final goal.

Oh! the terror and despair
When the bitter end lays bare
All the years of wanton strife--
Wasted years of precious life--
That like an avenger's knife,
Pierces the soul in that dread hour
Of the dead's triumphant power,
As before the startled eye,
Death, relentless death draws nigh!

Wm. H. HOFFMAN.

New York Correspondence.

NEW YORK, DEC 10, 1877.

THE BABY SHOW.

The sensation for this week is the baby show. The prizes offered for babies, the leastest, the fattest, the handsomest, the ugliest--there were no entries under this class--the finest pair of twins, the finest triplets, all kinds in fact, have not been decided yet. The stimulated mothers are still bringing to the hall all sorts of babies, and a very funny show it is. There are now four sets of triplets, and ugly little specimens they are; and two more sets have been discovered and captured for future use. Singular as it may seem, the hall has been thronged for days, and mostly by women. Mothers who have lost their children come in throngs, as if the sight of living children was, in some sense, consolation for their loss. The babies stay from ten in the morning till eleven at night, and as the hall is crowded all the time, they are having a hard time of it. It is a sensation.

COLORFUL BABIES.

Another genius has devised a still more taking notion. He has advertised for two thousand and colored babies, which he proposes to put on exhibition, at once. He has divided them up among the States, and intends to have them from all over the south. He pays expenses to and from the city, and expenses while here. He could get his two thousand from New York alone, but the point in the exhibition is, to show the raw material from the south, as well as those who have been favored with the civilizing influences of the Irish, Italian and Chinese residents of this city. It will take immensely, 2,000 colored babies, with their mothers, will make a show such as the city never before saw. Already it is the town talk, and everybody anticipates a great deal of fun out of it.

THE CIGAR-MAKERS' STRIKE.

continues with varying fortune. Some few of the manufacturers, whose orders were weeks behind in consequence of the strike, have succumbed and taken back their hands at the advance asked, while others still hold out. Five hundred of them have organized a co-operative factory, and are going into business for themselves. This is a move in the right direction. If workmen can start for themselves when wages don't suit them, they have solved the labor question. But, alas, there will be forty heads to it, they will get dishonest and inefficient men in control, there will be all sorts of irregularities and it will doubtless fail. Still, I am glad it is being tried. There will be a thousand failures before they learn how to do it, but when they have once learned, it will be a great thing for labor. The cigar-makers can thus afford to experiment as any other class. Thursday, five thousand of them, upon women and children, turned out in procession, with banners and music, and made a very respectable demonstration. They observed the factories that were paying the advance, and hused most emphatically those still holding out.

POLITICAL.

The struggle over the New York offices, between Secretary Harris and Senator Conkling is the theme of talk among the politicians. They are easily divided about it. One faction claims that all the reforms carried out by secretary Sherman were urged by collector Arthur, months before the new administration came in, and that under the civil service rules he ought not to be removed; while the other side insists that collector Arthur, having tolerated the abuses ought not to be retained. Probably both sides are right, and both wrong. Arthur is an honest man, but I take it he was running the Custom House as it always had been run, and I doubt whether there would have been so sweeping a change but for the decisive action

taken in Washington. It is claimed, and with some show of justice, that the President ought to have in place those who co-operate with him in harmony. He will have a hard time enough of it to institute reforms, heaven knows, even if he is allowed to have his own way about these minor matters. It is a thousand pities that the trouble cannot be healed, and the integrity of the State preserved. This is no time to split up into factions and let the enemy beat us in detail.

THE LOAN EXHIBITION.

for the benefit of the decorative art society, is the greatest novelty. The ladies of the best and wealthiest families of New York have lent their art treasures, their lace, worth thousands of dollars, their costly fans and antique ornaments, and gentlemen have lent their pictures, choice carvings, illuminated missals, bronzes, porcelain and bric-a-brac of every curious and costly sort. The result is a show of richness and brilliance that delights the soul of the novelty loving citizen. He and his wife can bend over the show-case and compare the laces of Mrs. Astor with those of Mrs. August Belmont and other millionaires' wives, look at their splendid old court fans and jeweled watches, and fancy how it would seem to own such things themselves. There are point laces, 300 years old, in good condition and quite ready to be worn on a dress again, a dress entirely of thread lace, worked with little sprigs, made at a manufactory in Ipswich, Mass., in 1824, lent by a Boston lady, and specimens of the rarest points, made by Mrs. Carter, the lace artist of New York, some of them made between two and seven in the morning, after a day full of business. So the modern and the antique lie side by side. The lace made in this country and the rest is the finest, but the old surpassed it in beauty of design. The exhibition is unusually successful, and will be a great attraction while it lasts.

THE DECORATIVE ART SOCIETY.

was established less than a year since, to provide instruction in fine handicrafts, lace work and embroidery, china painting, wood carving and modeling, and to give persons who are skilled in these arts a means of disposing of them to the best advantage. A man or woman who does a piece of good work anywhere in the country can send it to the society, and have it sold--for its favors are free to all--in the best market, for a commission of 10 per cent. to pay expenses. Already the society has more orders for fine work than it can fill, and articles seldom remain long on its shelves. Contributions of work are sent from all the States, and one of the latest, a piece of the finest muslin the work of an old lady, who does needle work as valuable as lace.

FASHION NOTES.

Evening hats of white felt are seen at popular milliners. The shapes are the close helmet, or the round hat turned up at one point above the temple. The trimming is a plume or white wing and a large knot of plush filling the front, and the effect of this simplicity is very pretty. Gloves are longer and have more buttons than ever. A sensible new stocking is on sale for the first time this year, of German manufacture, which looks exactly like a knit stocking, and goes by the name of "handknit." It is heavy, seemed all the way, and comes in all the fashionable colors, cardinal, dark blue, gray and scarlet, brown and hunter's green, and is warm, firm and very elastic. Colds and cold feet are out of the question with the sensible fashion of wearing thick stockings and boots. The cork-soled shoes, always light and dry, are a great improvement on the heavy-soled English boots, which really told on a woman's strength after walking in them for an hour or two. With these, and the thick, light, "blanket" goods, a woman can go warmly dressed, without being overburdened.

PATRICK.

Our Washington Letter.

WASHINGTON, D. C., Dec. 10, 1877.

The annual report of the Commissioner of Agriculture, just issued and ready for distribution, contains many things of interest to the general reader. The volume is unusually compact and well arranged, and there are several new subjects treated. In looking through the book I notice an article concerning "A Successful Insect Destroyer," accompanied with a drawing or cut of the invention. It is a new thing, patented during the year, and promises to be a great benefit to the farming and fruit-growing community. The annual destruction of crops of fruit, cotton, corn, tobacco and vegetables by the voracious, cotton-bill, army and other worms, amounts to millions of dollars. Of all the numerous remedies tried none have so far proved successful. The "Little Turk," as the insect is called, has almost driven plum culture from the country, while the ravages of other species named are immense. The worms are all hatched by eggs laid by miller and beetle insects that fly at night and are easily caught by a properly arranged light. It is estimated that these insects deposit from 18,000 to 1,000,000 eggs each, according to their species, in the average seven-day of their life. If, therefore, the insects can be destroyed before appearing in the worm stage of existence, this will prove the

most successful point of attack. The device referred to by the Commissioner was patented by a firm in Russellville, Arkansas, Patton & Duke, I believe--and consists of a peculiarly constructed lamp which is to be lighted and set on a pan filled with water, the bottom of which receives a stick or other support, so as to raise the light to the desired height for the crop or tree to be protected. Everybody knows the proneness of insects to "go for a light." It is one of the curious facts connected with insect life that their eggs are always deposited at night, when there is no rain or wind. They are, in season, almost numberless, and can readily be destroyed by this device. The Commissioner says: "The moths being attracted by the light dart against it and fall into the pan, and are destroyed before depositing their eggs on the tender leaves of the growing plants." The patentees, I learn on inquiry, have just started a factory at Russellville, and are manufacturing the lamp, etc., in great quantities, and selling rights of territory.

Democratic Congressmen not wholly indifferent to public opinion are casting about for some pretext that will, in a measure, relieve them of the odium of black ingratitude contemplated towards the Administration, and which was very definitely foreshadowed in a recent speech by Thurman, and by the tone lately assumed by Lamar, Hill and others of the leaders. The said Republican vote in favor of Kellogg, and the well deserved strictures upon the character of Hamburg Butler appear most available for their purpose; and it now appears settled that President Hayes may look for aid from that side just to the extent it promises to widen the existing breach between him and the representatives of the Republican party, and not the fraction of an inch farther, however meritorious the measures appealing for their vote. The degree to which the members of this old Jesuitical, hide-bound organization are committed to sustaining it, right or wrong, is shown in the unanimity of the Democrats of the committee in favor of seating Colorado Patterson, who claims to an election in accordance with the law is no more valid than that of Massacre Butler. Both are to have their seats. The outrage perpetrated would have been no greater in the Crown conspiracy had that trick of the "Reformer" been successful. The vote excluding whisky sellers from the Capital may be regarded as a blow struck against Democratic supremacy, in this way. A portion of its Representatives will absent themselves long enough to obtain their accustomed positions even at the risk of a partisan defeat for their side; and if the voters cannot be found on the premises they will be sought at the nearest point outside. Many second and third rate drug stores in the vicinity of their boarding places and the sale of liquors much the most profitable branch of trade during the sessions of Congress. Grocery stores ditto.

All evidence thus far elicited before the Naval Court of Inquiry goes to confirm the general belief that the loss of the *Huron* and the fearful sacrifice of life is wholly attributable to the ignorance, gross carelessness or criminal indifference of the officer or officers charged with her navigation.

It is thought probable that Ku-Klux democracy will be further strengthened by the admission of Eustis before the holiday adjournment, and that the Silver bill will be forced through the Senate, substantially as it passed the House, before Saturday night. Its friends have recovered from the demoralizing blow dealt it and anti-resumption by the measure; and their present aggressive attitude is, likely, based on the belief that it can command sufficient votes in both Houses to force it through, a Presidential veto notwithstanding.

A meeting held here Saturday to perfect the organization of a Greenback Party throughout the country, was numerously attended by men of some note in and out of Congress. Harrison, the funny Illinois Democrat, has introduced a bill revising the income tax. Holiday trade is brisk, the weather seasonably pleasant, and the proposed recess from the 15th inst. to the 13th proximo will be more than ever generally observed, as a time for universal relaxation and rejoicing.

MAXWELL.

To Farmers

AND FARMERS' WIVES, AND ALL ENGAGED IN AGRICULTURAL, HORTICULTURAL AND INDUSTRIAL PURSUITS.

The prosperity and success of the Rural New Yorker have enabled the proprietors to present a number of new and remarkable features never before controlled by any other journal of its class in America. It is for this reason that all persons are invited to send for a free specimen copy, that they may judge for themselves of what cannot otherwise be so well set forth. They would, however, respectfully call attention to the following new features:

Eighty-two acres of fine land as an experimental farm, where novelties are tested and results published. No "cobbler stone" farming. Desirable seeds of new flowers and berry plants are propagated and distributed from among subscribers interested in horticulture. Four-page supplements issued from time to time, finely illustrated, and filled with timely practical matter.

Special contributors, from among the best talent in the country, including officers of nearly every Agricultural College.

Full market reports from the two great commercial centres--New York and Chicago.

Five pages of literary matter devoted to the Household, comprising *Stories*, *Reading for the Young*, *Miscellany*, *Sabbath Reading*, and *Illustrated Fashion Articles*, with which are furnished cut, Paper Patterns of leading styles; also illustrated papers on Home Decoration, showing how to make fancy and ornamental articles.

The usual features found in other papers--Crop Reports, etc.--we have also, only more and better.

We invite you to send for *FREE* specimen copy.

You can subscribe as follows:--3 months, \$1.00; 6 months, \$1.50; 1 year, \$2.50; or through postmaster or local agent at \$2 per year; or may club as follows: The Rural and any one of Harper's publications or Scribner's or the Atlantic (single price \$6.00) for \$5.00; or with Arther's Home Magazine, (\$4.75) for \$3.75; or with Peterson's Magazine (\$4.50) for \$3.50; or with Demorest's Magazine, (\$5.50) for \$4.00; or with Orlin on the Hearth, (\$5.25) for \$2.45. Address, RURAL NEW YORKER, 78 Duane Street, New York.

An Excellent Idea.

A teacher in Akron, Ohio, teaches little children to read after a new method, thus: The teacher prepares on some slips of card board some word that will be made the principal one in a short sentence, as, for instance "dog." The word is written and printed on the slip so that the pupil may learn the elements of penmanship with reading and spelling. The school are taught to read, spell and write this word until they have learned it thoroughly, and then another slip with the word "the" upon it is given them, and they are taught its meaning, use and relation. Then the pupils are taught other words in the same way, and are taught to put the words together to make sentences. Thus in each new word that comes up the scholar is interested, and his interest is preserved all through.

We have here received the first number of the *New Jersey Magazine*. It is a striking title and its very name should attract the interest of Jersey men and women, and the contents of this number should be a sufficient reason for their encouragement. It will contain 48 pages of reading matter, from the pen of able writers, in prose and poetry. There are several able contributions in the first number. It is neatly gotten up, and edited and published by A. E. C. & J. H. Maskell.

We have received from the publishers, Lee & Shepard, Boston three of their series of popular books, "That Wife of Mine," "Just His Luck," and "His Own Master." The first is from the author of "That Husband of Mine," which has reached a sale of over 125,000 copies. It is a companion volume and is equally popular. "Just his Luck," is a capital story, full of interest, and just the thing to read in spare moments. "His Own Master," is by that popular author, J. T. Trowbridge. This should be recommendation enough. But this is one of his best. In paper cover, mailed, for 50 cts.

The *Sentinel of Freedom* uses the following language in its comments on that part of the Presidents message in which he speaks of his Southern policy, and Civil Service Reform:--

In the matter of his Southern policy, the one owe lamb of the President's fold, he takes too much for granted. It will be difficult for him to persuade the men who voted for him that a Solid Democratic South, an extinguished Republican party in all the lately seceded States, a suppression of the power of appeal, either thro' the press or public assemblage, constitutes the kind of peace worth having. In his belief the President anchors all his hopes on men like Wade Hampton, and assumes that they will keep their word. It is a cheerful view to take of it and looks about as warm as Col. Sellers' stove. And so with his other pet, Civil Service Reform. Only Presidential omniscience could carry it out. On these two matters will hang the opening session of Congress. The Democrats will help him wherever in so doing they can help themselves. The Republicans will take the same position. There is an old story about two stools.

The Russians have gained a great victory in Turkey, taking Plevna, a Turkish strong hold, with the entire Turkish army including the commander, 40,000 in all, with 800 guns. The Turkish force was suffering from hunger, and after making a desperate resistance, war overpowered, and surrendered.

The Boston *Commonwealth* says it has occasion to know that Mr. Tilden withdrew from a business enterprise in which he was interested, with a declaration that he proposed to devote the next year, or as long as it should take, to the maintenance of his claim to the Presidency.

THE

EATON GOLD and SILVER REDUCTION COMPANY.

Office--No. 20 CHURCH ST., N. Y.

GEN'L JOHN C. FREMONT, President.
PROF. A. K. EATON, Vice-President.
W. W. HANLY, Secretary.

This Company is founded upon discovery, inventions and improvements in the reduction and treatment of Gold and Silver, and other ores, which have recently been perfected. It is intended that its business shall be conducted by works of large capacity, which, for generating commercial reasons, will be near the city of New York, as well as by branch works in the mining districts, and by sale of its patent rights to other reduction works in this and foreign countries. The discovery and improvements upon which the Company is founded, have been made by Prof. A. K. Eaton, one of the ablest chemists and metallurgists of the present day. They have been reached during a practical and personal experience in mining and mineral occupations extending over a period of more than thirty years.

Twenty-six years ago Mr. Eaton invented and patented the Amalgamating Plates, which have ever since been in use at all the Gold and Silver Mills throughout the mining regions. If the use of these plates were discovered to-day, the yield of gold would probably be multiplied ten-fold. In the same way his later discoveries are valuable and effective, and are marked by the same certainty and simplicity. The ores of nearly all the gold and silver mines are rendered more or less difficult by the presence, in combination, of zinc, sulphur, and other elements which give them a refractory character, and which involves great expense and time in working, and great loss of gold and silver.

It is not too much to say that the great mountain region West of the Mississippi and Missouri rivers is occupied and populated only on account of its mines of gold and silver, and other metals. Over this whole country many of these refractory ores are left unworked and many hundred thousand tons of ore left unused, because their working would be too difficult and expensive under present modes of treatment. To all these ores Mr. Eaton's processes directly apply. They render their working comparatively easy and inexpensive, and give immediate value to this idle property, and employment to many thousands of unemployed men. These processes increase the yield of ore at present had, by from ten to forty per cent. The reports of the Consolidated Virginia and California mines, for the year ending December 31, 1876, show that only 73 per cent of the gold and silver contained in the ore was obtained by their present working, and the combined yield of these two mines for the year was \$30,023,782.00--thirty millions, sixty-two thousand, seven hundred and eighty-two dollars. By the Eaton processes, this yield could have been increased by six or seven millions of dollars. The gold mines of Senator Jones, in the San Joaquin Valley, gave him only 60 per cent of what the ore contains. These mines are quoted because they are well known, and because every appliance that money and art could devise, under the ablest management, has been used to increase their production. Under Mr. Eaton's processes, it is claimed that out of what pays 97 per cent--practically all--of the gold and silver can be obtained at much less cost of time and money than is at present required; that Base Bullion can be treated and refined at one-third the cost, and one-fourth the time at present used. In reference to this latter process, Prof. Torrey, U. S. Mint, New York, says: "I believe it to be an entirely new and very useful process. Theoretically, the mechanical and chemical principles on which it is based are correct."

Large amounts of gold and silver ore are brought to this city for treatment, and for shipment abroad, as also are large quantities of Base Bullion. The process of reduction is greatly facilitated by working together ores of a different character, and the Base Bullion now sent abroad, can be retained for treatment at the works in New York, under the improved process. For the purpose of a general demonstration of these processes, the Company has granted a limited right to a party in New York who is erecting works capable of treating twenty-five tons of ore and twenty-five tons of Base Bullion daily, and the buildings and machinery for this purpose are in greater part ready.

They now desire to provide for the immediate erection of the larger works by sale of a limited portion of their capital stock, and it is in order to procure the required means without unnecessary sacrifice, that their enterprise is in this way laid before the public. For this purpose a sufficient amount of stock will be sold at its par value; and it is requested that persons who may wish to purchase, will apply personally, or by letter, to the Secretary of the Company, P. O. box 574, to whom all remittances for shares should be made, and from whom the Prospectus and other and more full information can be obtained.

ESTABLISHED IN 1819.

FANCY

DYEING ESTABLISHMENT

J. & W. JONES,

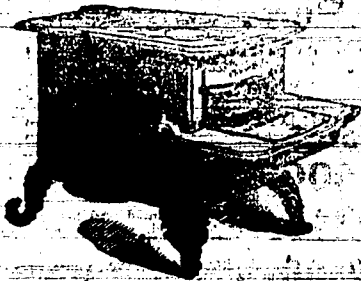

432 North Front Street, Phila.

Dyes Silks, Woolens and Every Grade of every description. Their specialty of dyeing Ladies' and Gentlemen's garments is widely known. Orp and Merino Shawls dyed the most brilliant and plain colors. Orp and Merino Shawls cleaned, and made to look like new. Also Gentlemen's apparel, or anything cleaned or dyed. Kid Gloves cleaned or dyed to look like new. Call and look at our work before going elsewhere.

Branch Office, cor. 5th & Vine.

ARTIFICIAL TEETH, Cheaper than Anywhere Else.

BEAUTIFUL SETS OF
TEETH, FROM \$5.00 TO \$15.00
PER SET, GUARANTEED
GOOD.

A Perfect Fit or Money Refunded.
Impression in the morning, Teeth at 3 o'clock
afternoon.

Persons having teeth that do not fit, can have
them remodeled and made to fit.
Our teeth are beautiful, durable, life-like,
and so perfect as to defy detection.

Painless extraction with Gas, 50 cents per
tooth.
Teeth extracted free when others are ordered.
Repairing Fitting. Consultation, 314 Pine St.,
32-34 Philadelphia.

To the Working Class.—We are now pre-
pared to furnish all classes with constant employment
at home, the whole of the time, or for their spare mo-
ments. Business new, light and profitable. Persons
of either sex easily earn from \$3 cents to \$5 per evening
and a proportional sum by devoting their whole time to
the business. Boys and girls can earn nearly as much as
men. That all who see this notice may send their ad-
dress, and test the business, we will send them a circular
offer. To such as are not well satisfied we will send one
dollar to pay for the trouble of writing. Full particu-
lars, samples worth several dollars to commence work
on, and a copy of Home and Fireside, one of the largest
and best illustrated Publications, all sent free by mail.
Reader, if you want permanent, profitable work, address

PHILADELPHIA.

GOLD

Great chance to make money. If you

can't get gold you can get greenbacks.

We need a person in every town to

take subscriptions for the largest,

cheapest and best illustrated family publication in the

world. Any one can become a successful agent.

The most elegant work of art given free to subscribers.

The price is so low that almost everybody subscribes.

One agent reports making over \$100 in a week. A lady

agent reports taking over \$200 subscribers in ten days.

All who engage make money fast. You can devote all

your time to the business, or only your spare time.

You need not be away over night. You can do it as

well as others. Full particulars, directions and terms

free. Elegant and expensive outfit free. If you want

profitable work send us your address at once. It costs

nothing to try the business. Terms \$2 and \$5.

Now is the time. Don't delay. Address "The People's Journal,"

Portland, Maine.

999

Can't be made by every agent every month

in the business we furnish, but those will-

ing to work can really earn a dozen dol-

lars a day right in their own localities.

Have no room to explain here. Business

pleasant and honorable. Women, boys and girls

do as well as men. We will furnish you an outfit free.

Two insurance pays better than anything else. We will

bear expense of starting you. Particulars free. Write

and send. Farmers and mechanics their sons and daugh-

ters, and all classes in need of paying work at home,

should write to us and learn all about the work at once.

Now is the time. Don't delay. Address "The People's Journal,"

Portland, Maine.

\$777

Is not easily earned in these times, but

it can be made in three months by any

one of either sex, in any part of the

country who is willing to work steadily

at the employment that we furnish. \$300 per week in

your own town. You need not be away from home

over night. You can give your whole time to the work,

or only your spare moments. We have agents who are

making over \$200 per day. All who engage at once can

make money fast. At the present time money cannot

be made so easily and rapidly at any other business.

It costs nothing to try the business. Terms \$2 and \$5.

Now is the time. Don't delay. Address "The People's Journal,"

Portland, Maine.

\$10 to \$25 a Day!

Made by Agents in cities and country towns. Only
