A N APPEAL to the Utizens of Hammonton, N. J., in behalf of C. E. FOWLER.

C. E. Fowler, who is in the County Asylum for what is hoped to be a temporary derangement, is in urgent need of money for proper clothing and other necessaries. Money is needed, also, to pay the wages of his workmen and a few other pressing obligations, in order to keep his business running and his property from being sacrificed. Some \$300 or \$400 are due him from the citizens of Hammonton, most of which is for ice delivered last Summer, for which payment should have been made months ago.

All Persons Indebted to Him Are requested to pay at the earliest possible moment; and as an extra inducement, a discount of five per cent will be made on all bills paid within ten days. Mr. Fred Whitmore, who has charge of his business, is any ized to receive payments and ith for same, and to make control of the con new work.

All Creditors Are requested to send in statements of their accounts. All money collected after paying the wages of his works men and the running expenses of all husiness, will be divided pro cats among his creditors. The most of life assets being a stock of ice, which can not be realized on until next Summer there may be nothing to divide among creditors until the ice is marketed. is believed that the stock of ice now on hand will be sufficient to pay all debts in full. All Persons

Having paper hanging or other work to be done, who are able to pay the each for it, are urged to have it done now, in order to keep his men employed and business running. Extrainducements will be made in price to those having their work done now. All work done and sales made at present must be strictly cash.

The Choice lot of Flowering Plants Now in his green-houses, are offered for a short time at wholesale prices in order to save the expense of keeping up fires during the Winter. All who are able to buy plants, please lend a helping hand to clear the house and assist him in his time of need, and adorn your homes with choice plants. Things Missing.

A large pocket book, and a partial upper set of teeth belonging to C. E. Fowler, are still missing. Any per-

#### Tours to Florida.

No district in America presents, during the Winter season, so many rarled attractions as the State of Florids. He sides its delightful climate, which to one escaping from the cold and unbeattaful changes of the North seems almost other rial, it is pre-uninculty a land of sport and pleasure. Along its cloven hundred miles of salt water coast and in its twelve hundred fresh water lakes are fish of almost every conceivable variety, from the migratory tribes common to North-orn water to the tarpon, pompane, and others of a more tropical character. Nowhore in all our broad land out the augier find a greater variety of game or better aport. Here also the most cuthusiastic hunter finds satiety. Deer, turkeys, bears, pauthers, and wild cats ream at large through the more sparsely settled regions, while birds of all kinds may be in abundance throughout the State. The more novel sport of allgator and manatoe bunting may also be in-

dulged in by the more adventurous.

With its matchless climate, its crange groves its rivers and lakes, its bosting and bathing, its fishing and hacting, and its excessive forests. Fords presents unrivaled attractions for the valetudingrian, the lover of nature, the aportsman, and the explorer.

To this attractive state the Penneylvanta Railroad Company has arranged four personally conducted tours during the season of 1897, leaving by special train Jan. 26, Feb. 9 and 28, and March 9. The first three tours will admit of a sojourn of two weeks in this delightful land : tickets for the fourth tour will be valid to return until May 81 by legular trains. Rates for the round trip, \$50 from New York, \$48 from Philadelphia,

and proportionate rate from other points. For tickets, itineraries, and other information, apply to ticket agents, special booking offices, or address Geo. W. Boyd, Assistant Gen. Passenger Agent, Broad Ht. Htation, Philadelphia.

California has been most fittingly termed the "I aly of America." All the delictions balm, the cloudless sky, and the rich verdure of the great European pen-incula are duplicated in the enuny land of the Pacific. Here nature bakks in the sunshine of her own beauty; and here she has established her own sanitarium, wheresternal spring inspires everleating youth. With the snowmantled peaks of the Sierras upon the one hand, the calm Pacific with its soft breezes upon the other, and a veritable paradise of fi were fruits, and plants botween, man can find and needs no lovier land. To visit such a country is a privilege, a blessing. The Pennsylvania Railroad Company, recognizing the need of a more comfortable and pleasant way of crossing the country of contract of the country of nent, inaugurated a series of annualtour to California, running a through train of Pullman palace care from New York to the Pacific Coast and stopping at the principal points of interest cincuits.
