The Dying Year's Counsel. Now the year is dying fast, Many hours he cannot last, Deathly chills are o'er him cast.

All his children stand around, Uttering not a word or sound,

As with spells of magic bound. Twelve there are; I dimly mark All their figures in the dark, Hovering near the patriarch;

Like the sons of Jacob old; Waiting each one to be told What the inture shall unfold. Though the father's life is done All his children, one by one, Have fresh races to be run.

Lenning down, I bend my ear O'er the faint, expiring year, And these words I seem to hear: January, let the weight Of thy charities be great,

For the poor and desolate Let thy brother, close behind, Sneathe his sword of cutting wind, When he doth the homeless find. March, when days are getting long,

Let thy growing hours be strong To set right some wintry wrong. April, with thy plowed-up earth, Bid each scented shower give birth To some seed of deathless worth. Merry, music-loving May. Let thy life be not too gay For unselfish werk each day.

June, thy beauty is a snare,

To waste time in visions fair; Ot vain dreaming, oh, howaru! July, as thy thunders roll, Pierce with doubting mortal's soul,

With the truth of God's control. August, in thy sultry heat, Teach some lesson, pure and sweet, To the respers at thy leet. Thou, September, scatter wide, With thy sheaves well satisfied, Seed corn for heaven's harvest-tide.

Sweet October, all with praise, Rich and glowing as thy days, Every poet's heart-felt lays. And November sad-a psalm, Tender, trustiul, tull of balm, Thou must breathe in spirits calm. Thou, the youngest of them all, Whom we "dark December" call, Brightest light on thee shall tall. Christmas logs blaze on the fires;

Christmas carols sing the choirs; Christ's own love each heart inspired

This is all I heard, for now, Pressing the year's death-cold brow, I rose up with many a yow. -Caroline May.

A Wonder up Forty-Pound Squash.

Among those exhibiting at the Territorial fair this year is James R. Johnson, a farmer of the Prickly Pear valley, crowd as th blending o whose ranch lies seven miles north of Helens. He has a splendid collection of Helens. He has a splendid collection of grain and vegetables—among the latter a squash of nearly forty pounds weight, which has a history too remarkable to pass unrecorded. It is of the California mammoth variety, and considerably the smallest "bulb" of several of the same kind shown in the same collection. Some six or seven weeks ago—when litchance to se Some six or seven weeks ago-when little more than ten pounds weight—this squash was accidentally severed from its vine by the tread of a farm emp

Mr. Johnson deplored the accident the we think vegetable being a favorite and the first knowledged to set from the blossom, and he entertained great expectations of it. The hired mun, seeing his distress, suggested that the squash be taken and raised by that the squash be taken and raised by hand. Johnson confessed that he did not know what that meant. "I will grow and mature it if you will manish the milk," was the response. "Go ahead and do it," said Johnson, who smited grimly, thanking that the Yankee

Neil Claffin on him. The "orphan vegetable," with falling tree. the stem and a few inches of the vine Fred Breit. left intact, was taken to the house and not only lost deposited in a garret room, where it could get a sun bath part of each day.

Peter John The stem was wound with several lay- Marshalltow ers of cotton cloth, and this was submerged in a dish of new milk morning and evening. The squash fed hungrily on the lacteal fluid. On the start it absorbed a pint of milk in a few hours. Joe Webb on the lacteal fund. On the start to describe a pint of milk in a few hours.

This was necessary v increased to a quart, and twice a day it was thus rationed to the first day of the fair, on Monday last. It thrived wonderfully Menno Gel on its novel bringing up, and neighbors left one of the former distributions that the search of the control of the search of the control of the

on its novel bringing up, and neighbors who dropped in from time to time to see came home. It expressed their surprise and astonishment at this singular mode of vegetable production. They watched it nurse, and could easily detect the healthy appetite draining the nutritious drink. Everyone gave the squash repeated shakes, and pressed their investigations of the skull bat the sk shakes, and pressed their investigations to learn whether there was any internal the skull ba ovidence of all the milk which that regetable had consumed. The squash While los evidence of all the milk which that vegetable had consumed. The squash prospered amazingly, expanded in size continually, and when taken away for exhibition weighed within a fraction of forty pounds. There were many at the fair whose curiosity was greatly excited about this squash, and Mr. Johnson promised to cut the vegetable in the presence of witnesses, and exhibit to them its "true inwardness." This was done this morning before a large concourse of neople, and the amazement of the multitude may be pictured but not described when it was opened to their wondering eyes. Divided carefully in the cap for the middle, the top half was removed, disclosing a globe of beautiful goldenhued butter, with plump-filled seeds

they always speak with respect of her majesty.

In a Quandary.

Several years ago the pastures of Queensland were so thickly infested with weeds that the sheep began to persish from starvation. These weeds the pastures of counstances plenty of clean water ought. ish from starvation. These weeds were of a variety which is held in high estimation by the ordinary English rab-bit, and a cargo of rabbits was introduced. The rabbits ate the weeds, but unfortunately, they did not stop here, but kept on multiplying and devouring every living thing, and swarmed into the streets and houses to that extent the unharpy Australian. It was plainly evident that unless something was given too hot. Supply plenty of water and observe regularity in feeding and also in gathering the eggs.

should be made neither too wet ner given too hot. Supply plenty of water and observe regularity in feeding and also in gathering the eggs. Queensland would become a wilderness howling with hungry heasts. The rabbits have exterminated the weeds but a new kind of animal was needed to exterminate the rabbits. A shipload of weasels was accordingly imported, and at present they are reveling in rabbits. The rabbits fairly melt away before them, and the weasels, with delight beaming from their happy faces, pursue them to their hiding places and massacre them by thousen's. The only question that bothers the Queensland ers is what they will do with the weasels will do will do with the weasels will do will the mixture is about as thick as buckwheat batter. Bake in square tin memories of the reput will do with the weater of a warrant will be will do with the weater of a warrant will be will do with the weater of a warrant will be will down the weater of a warrant will be will do with the weater of a w oits, and the only solution to the problem is that the next crop must be wild soda, and two tea-spoons cream tartar; cats, as they are the only that can take bake in jelly tins. Make caramel as folareof the weasels.

The Aurora Borealis. Esmark, who has spent many years in surveying the northern lights, says: "The aurora is never seen during appears when an ordinary arctic tem perature is raised by southerly and westerly winds, and is generally followed by snow. In the southeastern part of Norway it seems to be especially caused by southeasterly winds, which core, leave whole or cut up, as preferred, are there very moist and rather warm. It's appearance is always accompanied by a falling barometer. It my opinion the phenomenon is due to the following causes: When a wind laden with warmth, moisture and electricity comes in contact with a body of cold air, the warmth and electricity are thereby released, and the aurora is the result of the disturbances. The northern lights cannot occur in very high latitudes, because the warm, moist air is cooled long before it reaches them." In this way Herr Esmark would account for the splendid appearance of the aurora, bringing warmth, moisture and electricity cannot occur in very high latitudes, because the warm, moist air is cooled long before it reaches them." In this way Herr Esmark would account for the splendid appearance of the aurora, bringing warmth, moisture and electricity cannot occur in very high latitudes, because the warm, moist air is cooled long before it reaches them." In this way Herr Esmark would account for the splendid appearance of the aurora in the below of the self-warm of the below of the aurora in content of the warm of the below of the aurora in the result of the warm of the below of the aurora in content in ware requinces, pare, the claim of the kidneys and bladder by Hostetor's Bitters' which is most useful in infangance fruit and boil slowly till clear, place in jury and pour syrup over them. All the netes are printed by the bank, and all defective or mutilated coins are returned to the one with a marking in the control of the one with a marking it is satimated that 45,000,000 it is need then thoroughly rinsu dozen eggs air consumed daily in the United States. New York alone appropriating 40,000,000 dozens annually. Such figures as these naturally incline everybody owning poultry yards to consider the way and means by which the greatest number of eggs shall be gained. The production of eggs unring cold weather is largely under the control of the one who has charge of the lowls. Hens supplied with warm and comfortable quarters and an abundance of sation near Fort Craig, Arizona, by the with a massacre of thirteen with a massacre of the lowls.

All the notes are printed by the bank, and all defective or mutilated coins are returned to the smelting pots as they come in, the depositor being charged a discount of eight cents, which is judged to cover the loss from this cause. In one case they show the progress in making bank notes, the earliest being written with a pen, their amounts being changed by erasures and interlineations—then, estep by step, to the great square notes of to-day. The different specimens of counterfeit notes are very curious. In one fortally and an abundance of suitable food as a rule reward the owner and an abundance of suitable food as a rule reward the owner and an abundance of suitable food as a rule reward the owner and the massacre of thirteen with a bountful supply of eggs. In connection with liberal care should be observed the ages of the fowls. Geyehn and other scientists who have looked into the matter state, and Professor Miles quotes the following proportion as applicable to the average of poultry: First year after hatching, fifteen to twenty eggs; second year, 100 to 120; third year, 120 to 125, and the fourth of the massacre of thirteen persons, an exchangesays: The history of this station is a singular one, and is clated to us by an ohl army friend, in whose mind the above marrative revives memories of the arid regions surrounding it. The country borders on the west bank of the Rio Grande river, bounded on the north by Fort McRae, on the south by Mesilla, and on the east by the Organ mountains, and its passage is the following proportion as applicable to the average of poultry:

1. The country borders on the west bank of the Rio Grande river, bounded on the north by Fort McRae, on the south of the Border and the massacre of thirteen with a bountiful supply of this station is a singular one, and is classed to us by an ohl army friend, in whose mind the above narrative revives memories of the arid regions of the relation is a singular one, and is classed to us by an ohl army friend, in whose mind the above narrative rev region is over sixty miles in length, unone case the attempt was made to print the fifth year being accorded only sixty the without life, uninhabited, save at on genuine bank note paper stolen from

stopped. Then, too, the method of tracing the history of every note it has issued is wonderful, being done by ingenious indices, and with great labor, the
smallest note being for £1, the largest
for £1,000. In the collection of redeemed
notes there is one that went through
the Chicago fire. It was charred, but

Thus the points of interest vegetables and any green food obtain—

This was for the benefit of government on the corner being grains he gives buckwheat the preference, and next to this he advises good was a lieutenant of topographical entering was a lieutenant of topogra redeemed. Thus the points of interest are very momentous, not excepting the council-room where the board meet, and the excellent and savory dishes which are also desirable.

This was for the benefit of government trains and army people in general. The passage of the Jornardo then required and now takes two days, involving the are also desirable.

The food may be further varied by using wheat screenings or middlings and shorts mixed and sixty two and one-half pounds per galt And, coming out, we are right in the midst of such a busy throng, such a rush and jam, that, although the lord mayor's house is right opposite, it seems hardly a safe place to store such an amount of treasure. However London is not now a city of riots and gunpowder plots, but soher, steady and royalty-loving, at least in as far as loyalty to the queen is concerned, for whatever they may feel

sumstances plenty of clean water ought of people. The government made Mar-o be provided. to be provided.

To present the matter in a nutshell, furnish suitable accommodations, obtain and keep excellent breeds, feed as great a variety of diet as possible, and diamond in the rough. The Vicarillo great a variety of diet as possible, and reat a variety of diet as possible, and deed them as much as they will eat—a Stanton were always kindly treated by hungry hen will not be a laying hen. In Stanton were always kindly treated by very cold weather add a little cayenne were allowed water free as long as they were allowed water free as long as they pepper to the morning ration, which should be made neither too wet ner left undisturbed the persons and prop-

eggs, one and a half heaping tea-spoons baking powder, or a small tea-spoon during the time he lived at Aleman

The estimated cost of supporting the public schools of New York for the year soda, and two tea-spoons cream tartar; bake in jelly tins. Make causmel as follows: Butter size of an egg, pint brown sugar, half cup milk or water, half cake chocolate; boil twenty minutes (or until thick enough) and pour over cakes while warm, piling the layers one upon the other. For frosting for top of cake, take while so flave ergs one and a half take whiles of two eggs, one and a half cups sugar, a tea-spoon vaniles, three every school building now occupied, heaping tea-spoons grated chocolate. CUMBERLAND MUTUAL Fire Insurance Comp ny.

BRIDGETON, N. J. Conducted on strictly mutual principles, of

foring a perfectly safe insurance for just cat it may cost to pay losses and expense. The proportion of loss to the amount insured being priportion of loss to the amount insured using very small, and expenses much less than usue ally had, nothing can be offered more favorable to the insured. The cost being about ten cents on the hundred dollars per year to the insurers on ordinary risks, and from hiteen to twenty-five cents per year on hazardous properties, which is less than one third of thelowest rates charged by tess than one third of the lowest rates charged by stock companies, on such risks—the other two-thirds taken by stock companies being a profit acruing to stockholders, or consumed in expenses of the companies.

The guarantee fund of premium notes being now Three Millions of Dollars.

If an assessment had to be made of five pecent, only, twice within the ten years for which the policy is issued, it would yet be chenper to the members than any other insurance offered. the members and kept at home. No assessment having ever been made, being now more than thirty years, that saving would amount to Street

One Million Five Hundred Thousand Dollar

The Losses by Lightning.

Where the property is not set on fire, being less than one cent per year to each member, are paid without extra charke, and extended so us to cover all policies that are usued and out
